CHATTANOOGA, TN (JULY 27) UPI - Jails in Hamilton County were brimming full Thursday as authorities closed the net on a huge vehicle insurance fraud operation and simultaneously wrapped up the biggest drug bust in city history.

Authorities in Tennessee, Georgia, and Alabama began the widespread arrests of insurance fraud suspects Thursday after a local grand jury issued nearly 100 sealed indictments to cap a 19-month long investigation dubbed Operation Transfer. Investigators say the suspects plotted to have their vehicles stolen in order to falsely collect insurance money.

Meanwhile, Chattanooga police are searching for dozens of people facing 150 indictments charging they sold crack cocaine to an undercover agent. City narcotics Chief Pat Rowe said the drug buys were so numerous that the amounts purchased have not been calculated. It is the largest number of people sought at one time in the city's 138-year history, police said.

Jails in Hamilton County were jammed to capacity following the arrests and threaten to exceed a federally imposed cap, authorities said. "I told them to bond them out as fast as they come in," said Hamilton County Chief

Deputy James Hammond.

Tim Kett, a spokesman for the National Automobile Theft Bureau in Chicago called the insurance fraud sting "the largest operation that has been made public this year." The theft bureau is a non-profit corporation supported by 650 insurance companies.

The fraud operation used undercover police who posed as thieves and stole vehicles at the owners' request. Detective Jim Baker, who posed undercover said the false claims submitted by the vehicle owners may amount to millions of dollars when the sting finally is closed,

"We came awfully close to getting some attorneys," said Lt. Ron Conner. "We got an insurance salesman, a nurse, college professor, and business owners." "They are all middle to high class people," Baker said. "I didn't dream it was this widespread. I don't think any of the officers did."

"I'm surprised how bad it is," Conner said. "We were going for just ten cars. We got them right off the bat. So we went for 20, then 50, then ..." "The same thing is going on all across America. All you have to do is set up shop and put the word out," Baker said.

#90208u1889 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The government Friday ordered a Florida company to stop distributing Cal-Ban 3000 diet tablets, saying the pills can be dangerous.

The Food and Drug Administration ordered Health Care Products of Lutz, Fla., to recall existing supplies Cal-Ban tablets and advised consumers to stop using them and return remaining pills to the store where they were purchased.

At least 17 people have experienced blockages in the esophagus after taking Cal-Ban tablets, the FDA said. Ten patients required hospitalization and one died of a blood clot in the lungs a week after surgery to remove the blockage, the FDA said.

The state of Florida on July 18 stopped sales of Cal-Ban 300, saying it had information about 50 cases involving injuries.

The company, which is also known as Anderson Pharmacals of Tampa, Fla., could not be reached for comment.

The agency also said it was investigating similar diet products to determine if they pose the same health hazard.

''Cal-Ban's main ingredient is guar gum, a complex sugar that swells when it becomes wet and can create a sense of fullness when ingested,'' the agency said.

''FDA had already been moving to ban guar gum because its effectiveness as a weight loss ingredient has not been demonstrated,'' it said.

Guar gum is approved for use in small amounts in foods such as cheese, salad dressings and ice creams, but in those uses is not considered a health hazard, the agency said.

The agency announced in May that some 100 diet product ingredients that had not been shown to be effective would be taken off the market.

LOS ANGELES (JULY 27) UPI - The long-rumored agreement between automakers Chrysler Corp. and and Fiat SpA may be officially announced as soon as next week, the Financial News Network reported Friday.

FNN, quoting sources inside Chrysler and from Fiat's home base in Turin, Italy, said the companies would like to have a deal announced next week - perhaps timed to coincide with Chrysler's scheduled announcement of what are expected to be weak second-quarter earnings on Tuesday.

FNN said, however, that a ranking Chrysler executive denied that a deal could be completed so soon. The network added that any agreement between the companies could take months to complete.

FNN noted that the key questions surrounding any Chrysler-Fiat deal concern how broad a working relationship the two companies would have. It said while it is possible that Fiat could eventually take an equity position in Chrysler, a joint marketing venture is more likely at first.

Under a joint marketing agreement, the report said, Fiat could agree to distribute Chrysler's popular mini-vans and Jeeps in Europe. FNN said Chrysler would also like Fiat to contribute to the development of a new sub-compact Jeep, code named "The J.J."

The FNN report pointed out that Chrysler and Fiat have been intermittently talking about a deal for the last four years, and cautioned that while a deal between the companies seems imminent, it could always fall through at the last minute. Chrysler president Robert Lutz confirmed last week that his company is actively talking about a wide variety of ventures with Fiat.

The Detroit Free Press had reported Thursday that Chrysler and Fiat could be getting ready to sign a deal under which Fiat would build Chrysler's Jeeps and minivans to sell in Europe, with Chrysler, in return, most likely selling Fiat's subcompact Tipo in the United States.

The Tipo would give the Number-Three U.S. carmaker a small car to replace the Omni and Horizon models which Chrysler stopped making early this year, the Free Press said.

However, a spokesman for Fiat in New York played down the report, which stemmed from a financial analysts' meeting held by Fiat in Turin earlier this week. Refusing to comment directly on rumors of a Chrysler-Fiat

tie-up, Gualberto Ranieri said that any talk concerning Chrysler "was not high on the agenda."

LOS ANGELES (JULY 27) UPI - The jury in the second McMartin Pre-School trial announced Friday it was hopelessly deadlocked on all charges against Raymond Buckey, forcing a mistrial in the most notorious child molestation case in U.S. history.

The deadlock, announced after the jury had voted on four occassions on all eight counts against Buckey in an effort to break the impasse, handed prosecutors a staggering defeat and electrified the courtroom.

The massive prosecutorial effort - which spanned two trials, lasted more than six years, cost at least $17.2 million, and once involved hundreds of charges, dozens of alleged child victims and seven defendants - failed to win even a single conviction.

The jury of seven women and five men spent 15 days deliberating the eight molestation charges against Buckey, 32, before reporting it was hopelessly deadlocked on all charges relating to the alleged abuse of three girls at the nursery school nearly a decade ago.

Superior Court Judge Stanley Weisberg, who told the jurors on Monday to keep trying when they announced then were ''apparently hung,'' accepted the deadlock Friday after polling the jurors individually and declared the mistrial.

The jury had earlier reached verdicts on two charges, but the decisions were kept sealed by the judge. On Friday morning, they asked for the unannounced verdicts to be returned, saying several of them had changed ''their views.''

That unusual request came after the jury heard the testimony of one girl, her mother and a prosecution medical expert, Dr. Astrid Heger, read back to them on Wednesday and Thursday. All three witnesses testified that all three girls bore signs of anal and vaginal scarring that indicated molestation.

Weisberg said the jurors were entitled to change their votes because, ''until a verdict is rendered in open court, it is subject to further consideration.''

At the conclusion of the first trial in January, Buckey and his mother, Peggy McMartin Buckey, were acquitted of 52 other molestation counts stemming from the alleged sexual abuse of 11 children at the now-closed preschool in suburban Manhattan Beach.

The jurors at the first trial deadlocked on 13 other charges against Ray Buckey. Following an unprecedented public campaign by parents outraged over the acquittals, District Attorney Ira Reiner decided to retry Buckey on eight of the deadlocked counts.

The verdicts in January climaxed a trial that lasted nearly three years and cost $13.2 million, making it the longest, costliest criminal trial in U.S. history.

Buckey's retrial, which involved the alleged molestations of three girls at the once-prestigious, family-run preschool from 1979 until 1983, lasted only about 3 1/2 months. Cost figures for the retrial have not yet been compiled. A preliminary hearing cost $4 million.

The mistrial could signal an end to the 6-year-old prosecution of the McMartin case, which shocked the nation into a heightened awareness of the spectre of child molestation and polarized the affluent oceanside community of Manhattan Beach into feuding factions of supporters and accusers of the defendants.

The prosecution could seek a third trial, but no decision was immediately announced.

When the county grand jury initially handed down its indictments in March 1984, the case was the largest sex abuse case in U.S. history.

It involved seven preschool teachers, including Buckey, his mother, grandmother Virginia McMartin, and sister Peggy Ann Buckey, who were

accused in hundreds of counts of molesting 42 children.

But, over the years, the case shrunk steadily as scores of charges and all the defendants except Ray Buckey and his mother were dismissed because of insufficient evidence. When Peggy Buckey was acquitted of all charges at the first trial, only her son was left.

Although he was never convicted of anything, Buckey spent nearly five years in jail after his arrest. He was finally released on a $3 million property bond in February 1989. At his retrial, Buckey faced up to 22 years in state prison if convicted on all charges.

From the beginning, the defense argued that the children were pressured by their parents and brainwashed by overzealous therapists at the Children's Institute International in Los Angeles into falsely alleging they were molested.

Buckey and his defense also said the prosecution was politically motivated originally by former District Attorney Robert Philibosian to bolster his campaign against challenger Ira Reiner, and then by Reiner to support his failed bid for state attorney general.

The core of the prosecution's case at the retrial was the testimony of the three girls, who said that Buckey molested them, forced them to play sex games such as ''Naked Movie Star,'' and scared them into silence.

However, when pressed by the defense for details, the girls repeatedly said ''I don't remember.''

The girls, who are now ages 13, 12, and 11, said they were molested when they were ages 2 to 5.

But under cross-examination, one of the girls even denied that Buckey ever penetrated her, which he was specifically charged with doing.

Buckey testified he never molested a child.

Deputy District Attorneys Joseph Martinez and Pam Ferrero buttressed the children's claims with the testimony of Dr. Heger.

But the defense presented its own medical expert, Dr. David Paul, who testified medical evidence of molestation is inexact and unreliable.

The retrial was greatly scaled down, with prosecutors attempting to present a simplified version of their case.

At the first trial, 124 witnesses testified, 74 for the prosecution and 50 for the defense. The retrial offered just 40 witnesses, 15 for the

prosecution and 25 for the defense.

When initially filed in 1984, the case made nationwide headlines because of bizarre allegations that the children were forced into horrific satanic rituals involving animal sacrifices and pornographic photo sessions.

However, prosecutors failed to substantiate many allegations, and over time downplayed them and eventually stopped mentioning them altogether. For instance, not one child pornography photo was ever found.

The preschool was closed by the state in January 1984, after the allegations of molestations surfaced. It was razed two months ago to make way for an office building, but not before zealous parents dug up the foundation in an inconclusive search for the secret tunnels mentioned by some children.

#90208u1938 07/27/1990 ~United Press International

NEW YORK (JULY 27) UPI - The dollar took a pounding in New York trading Friday after the U.S. government said the national economy grew by just 1.2 percent in the second quarter, far less than what private economists expected.

The dollar "got hammered," said National Westminster Bank trader Mark Morris. "It wasn't good information," he said. "The market was expecting more like 1.9 (percent economic growth). It was not exactly encouraging."

The dollar hit a 30-month low against the German mark, a 27-month low against the Swiss franc and slipped against the Japanese yen.

Late in the New York session the dollar traded at 1.6112 marks, off more than one pfennig from the previous close of 1.6225 marks. Analysts said it had not been so weak against the deutsche mark since January 1988.

Currency traders said the U.S. currency was changing hands at 149.10 Japanese yen, off more than a yen from 150.35 yen Thursday.

The GNP data lent itself to various interpretations, all bearish for the U.S. currency, which was already under selling pressure.

"Softer (interest) rates, softer economy, lower dollar," said Robert Ryan, a Bank of New York foreign exchange manager. "The market wanted to go lower (with the dollar), so it went that way."

As Ryan indicated, the dollar was sold on the clearest evidence to date that the U.S. economy is flirting with recession, and on the related view that the Federal Reserve Board will have to reduce interest rates.

The perception of lower interest rates ahead leads global investors to shift funds to higher-yielding investments in other currencies.

The dollar slide could continue. "My feeling is there will be just a little bit of a correction on Monday, but the dollar is still under the gun," Morris of National Westminster predicted.

Other New York dollar rates: 1.3620 Swiss francs, down from 1.3775; 5.3950 French francs, off from 5.4350; and 1,179.50 Italian lire, off from 1,188. The British pound soared to $1.8380 from $1.8140.

In Europe, the dollar declined against the major European units in response to the poor second-quarter U.S. GNP figures.

"The figures were depressing reading," said Stephen King of James Capel. He said the data "showed the chance of a continued slowdown in the U.S. economy ... and the definite possibility of lower interest rates."

Many European markets had already fixed their closing levels before the GNP figures were released. Dealers in those markets said they expected the dollar to plunge after the weekend on the news.

In Frankfurt, the dollar ended slightly lower at 1.6222 marks against 1.6235 Thursday. It also slipped in Zurich, to 1.3655 Swiss francs compared to 1.3740.

In London, the pound surged by two cents to close at $1.8345 against $1.8115 at the previous night's close.

The U.S. unit eased in Paris, Milan and Brussels, to 5.4375 French francs

against 5.4405, 1,187.80 lire against 1,188.50 and 33.29 Belgian francs from 33.35 at Thursday's close.

Earlier in Tokyo, the dollar rallied against the yen for the fifth straight session as investors bought dollars in expectation of stable U.S. and Japanese interest rates and a possible hike in oil prices.

The dollar closed at 150.75 yen, up 0.64 yen from Thursday's close of 150.11 yen, the Bank of Japan said.

In Zurich, gold closed down at $367 ounce compared with $368.50 an ounce and also eased in London, to $367.50 an ounce against $368.50.

Republic National Bank in New York closed cash gold at $367.75 an ounce, off from $369 Thursday. The New York Commodity Exchange settled gold at $367.80 an ounce, also down from $369.30.

Silver closed unchanged in Zurich at $4.85 an ounce, and was lower in London at $4.84 an ounce against $4.86.

Republic closed cash silver at $4.85 an ounce, off from $4.86. Comex silver moved down to $4.831 an ounce compared with $4.85.

#90208u1983 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - Rival Liberian rebel groups are expected to continue fighting with each other if they succeed in toppling President Samuel Doe, a senior U.S. official said Friday.

The State Department said that Doe has not responded to a standing offer from the United States to take him out of country and appears determined to make a last stand in his presidential palace in Monrovia.

The U.S. offer was based on the hope that Doe's departure would end the fighting, but a senior U.S. official said it now is likely the competing rebel groups who oppose Doe will continue fighting after Doe is beaten, which appears to be inevitable.

One rebel group, led by Charles Taylor, a former Doe government official who fled Liberia after being accused of embezzlement, is opposed by a breakaway group led by Prince Johnson. Both groups have entered the capital of Monrovia and are moving from different directions on the center

of the city.

The senior official, talking to United Press International on the basis of no further identification, said Taylor and Prince are not cooperating in the effort to take Monrovia, and are expected to fight each other for supremacy once Doe is ousted.

Liberia, on the west coast of Africa, settled by former American slaves, has retained a strong influence from the United States, including a series of rubber plantations run by U.S. corporations and the use of U.S. dollars as the official currency. English is the official language.

Although current U.S. economic assistance to Liberia is relatively low - $7.5 million through the Food for Peace program - it was a principal recipient of U.S. economic and military assistance in the early 1980s and has received about $500 million in U.S. assistance in the past 30 years.

Only 3 percent of Liberia is made up of descendants of American slaves, known as Americo-Liberians, but they have tended to dominate the political leadership. But 95 percent of the business management of the country has been run by non-Africans, mainly Americans running the communications and rubber industries.

According to the State Department, fewer than 400 Americans remain in Liberia.

#90208u2038 07/27/1990 ~United Press International

NISKAYUNA, NY (JULY 27) UPI - Fraternal twins this week became parents on the same day in the same hospital after the parents-to-be made a mad dash to the pediatrics ward in the same car.

Ironically, Cathy White didn't expect to go into labor for another two weeks and her sister-in-law, Sheri Squillini, was two weeks overdue.

Cathy White and Sheri's husband, Jerry Squillini, are fraternal twins and both became parents Tuesday.

''We knew it would be close, but we never expected both babies to be born on the same day,'' said White's husband, Jay.

On Monday, White went to the doctor who assured her she would not give birth for at least another two weeks, said her husband. But later that night she began what was thought was a false labor.

A little while later her twin brother, Jerry, called to ask for a ride to the hospital because his wife was in labor and their car wouldn't start.

Jay White made a dash to pick up the the couple and their 2-year-old son.

''The plan of attack was for me to pick them up, drop Justin off with my wife, drop them off at the hospital, then return to my wife. But by the time I got back to our house, my wife said she was coming with us,'' Jay White explained.

Two women in labor, and a cranky and confused 2-year-old were bundled up and dispatched to the hospital.

''It was all very confusing, it took some explaining once we reached the hospital'' Jay White said. ''No one could figure out who was with whom, and why we were all together talking. They didn't realize we were related ''

Sheri Squillini gave birth to 6-pound 9-ounce Rachal Lyn at 8:28 a.m.; Cathy White followed up with 8-pound 15-ounce Christopher Jordan five hours later.

#90208u2084 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The Senate, after including provision to impose trade sanctions against Iraq, passed a farm bill Friday that would spend $55 billion on farm subsidies, create new programs to protect the environment and give farmers slightly more freedom to decide what to grow.

However, the package could see major changes before it becomes law. The White House has warned it might veto a farm bill that does not include substantial cost cuts from the current level.

Senate leaders, however, decided to delay cuts until Congress and the Bush administration agree on a package of budget cuts - possibly weeks from now. The bill includes a proposal by Senate Republican Leader Robert Dole of Kansas for across-the-board cuts if major reductions are needed.

The bill passed 70-21 after senators spent most of the day debating Iraq sanctions and resolving a fight over which ports would handle Food for Peace shipments.

In a rare coincidence, the House and Senate spent the past week debating different versions of the farm bill. The House refused Friday to kill the honey support program, joined the Senate in voting sanctions against Iraq, and gave its approval to a plan to divide control over the Food for Peace program.

House leaders hope to complete work on their bill next week.

''He (Iraqi President Saddam Hussein) is a butcher, a torturer,'' said Sen. Alfonse D'Amato, R-N.Y., sponsor of the amendment against Iraq. ''We've got to stand up at this point in time or the mad dog will go further and further.''

Sen. Max Baucuas, D-Mont., was the only senator to announce in advance that he would oppose the bill. He said it would not provide enough income for farmers and predicted it would ''create ghost towns in rural America.''

It took six days of debate for the Senate to pass the bill - about half of the time consumed by the contentious 1985 farm bill, which had the goal of making U.S. commodities competitive on the world market.

The 1990 farm bill continues many of the policies of the 1985 bill.

''This is a good, solid, progressive farm bill. It is an environmentally conscious farm bill,'' said Agriculture Committee Chairman Patrick Leahy, D-Vt.

Passage of the bill was delayed for nearly a day by a dispute over whether to guarantee Great Lake ports a share of Food for Peace shipments. Rather than the 240,000 ton guarantee the initially was proposed, the Senate decided to let the ports compete for half of the food-aid shipments on the basis of a more favorable formula.

Senators voted to invoke sanctions against Iraq as a way to express repugnance with Iraq's violations of human rights, its use of chemical weapons and its attempts to acquire nuclear arms technology.

The administration opposes the sanctions, which it says would deprive the United States of leverage with Iraq.

In a speech immediately after the vote, Dole warned that ''a substantial cut'' in the bill was likely. He pointed to estimates that cuts could run as high as to $18 billion.

''Keep in mind, if we don't do anything, we'll get a (budget) sequester and that will hit agriculture very hard,'' Dole said.

In addition to extending farm support programs for five years, the bill would set the terms for operating food-aid, export promotion and environmental programs.

Since 1985, farmers have been required to practice conservation in order to be eligible for program benefits such as crop loans and support payments.

The bill does not contain a nutrition section, the provisions that would renew food stamps and other public-feeding programs. Leahy says those programs will be added during House and Senate negotiations.

The House has proposed a $4.5 billion expansion in food stamp spending by

allowing larger deductions for recipients and slightly sweetening the formula for benefits.

Senators generally refused to major changes to the bill, whether they involved so-called reform amendments - like banning payments to large farmers - or efforts to increase subsidies or reduce spending. They dropped the idea of including a mandatory seafood inspection program in the bill.

The only notable changes were a vote to end the honey program and to reform the money-losing federally subsidized crop insurance program.

''It is a carefully crafted, difficult compromise,'' Leahy told senators just before they rejected the final attempt by prairie Democrats to raise target prices.

Sen. Richard Lugar, R-Ind., said it was misleading to suggest that subsidies could be increased.

''It's not going to happen. It's going to crash in a heap,'' Lugar said, pointing to the virtual certainty of budget cuts.

A key point in the bill was its creation of two new programs to protect environmentally sensitive land. One would buy 30-year easements to protect wetlands and the other would pay farmers up to $1,500 a year to help farmers implement practices that will avoid contamination of water by farm chemicals.

In addition, the bill strengthens the ''swampbuster'' program by making it easier to catch producers who convert wetlands to crop production. That would be balanced by graduated penalties for accidental violations and, in limited cases, would allow farmers to eliminate small pieces of wetlands if they restore an equal-size, or larger, former wetland.

At present, there is only a ''drop dead'' penalty - loss of all farm program benefits - for violations of swampbuster.

The bill also includes ''circle of poison'' language to ban the export of pesticides barred from use by U.S. farmers.

Although target prices for most crops would be frozen, the bill creates an oilseed marketing loan, beginning at $5.50 for a bushel of soybeans, or $1 higher than the current loan. Soybean acreage has dropped by 10 million acres in the past decade despite booming world demand.

Some analysts blame the drop on government subsidy rates that make other crops more attractive.

The administration opposes the soybean marketing loan as costly and ineffective. It says its full-fledged planting ''flexibility'' program would be more effective.

Senators approved a flexibility plan that would let farmers adjust their mixture of crops on 25 percent of their land now devoted to wheat, feed grains, cotton and rice without losing eligibility for crop payments in coming years. There would be no crop support payments on ''flex'' acres.

The bill also freezes the support price for sugar and set the minimum dairy support price at the current $10.10 per 100 pounds of milk.

It also would revise the Food for Peace program to allow food donations to needy nations, rather than concessionary sales, and allows debt forgiveness in some cases.

#90208u2086 07/27/1990 ~United Press International

ELLIS ISLAND, NY (JULY 27) UPI - Ellis Island and its new National Museum of Immigration will open to the public Sept. 10 in expectation of becoming one of the nation's top tourist attractions in the first year of operation.

''We are expecting at least 2 million visitors a year,'' said Diana Pardue chief of museum services. ''Many will be descendants of the 12 million immigrants who were processed at this largest of the nation's immigration stations. It is estimated there are 140 million Americans whose ancestors came through Ellis Island.''

Abandoned for nearly 30 years, the 27-acre National Parks Service property with a complex of 34 buildings has come to life again with the restoration of the Main Building. This took eight years of labor and the expenditure of $160 million in funds raised by the Statue of Liberty/Ellis Island Foundation created by automotive executive Lee Iacocca.

Visitors will reach Ellis Island by Circle Line ferry, and a shuttle service will take them on to neighboring Liberty Island if they want to visit the Statue of Liberty on the same day.

A quick visit to Ellis Island will take two hours - plus and hour for transportation - but Pardue suggests a half day visit ''to take it all in.''

Admission will be free. The only charge will be for ferry transporation.

The first preview tour of the 220,000 square-foot Main Building by project architects John Belle of New York and James Alexander of Boston

illustrated the magnitude of the project, said to be the largest historic restoration ever undertaken in the United States.

A visit to some of the still unrestored areas of the Main Building, such as the dining room for the few immigrants who were held overnight, kitchen and laundry, shows the devastation wrought by time and the elements on the sturdy 1900 building.

Flooding from weather-damaged roofs and fallen plaster and tiling left the interior a shambles where trees and shrubs rooted and pigeons roosted.

''Vandals even stripped the copper skin from the building's four towers,'' Belle said. ''Every window frame and sash had to be replaced. In winter I have seen snow covering the floors.''

Now the principal reception, waiting and processing areas, where the average immigrant spent spent four or five hours, look much as they did about 1918. That was the year the vast, vaulted ceiling of the Registry Room was handsomely tiled after a World War I sabotage explosion in nearby New Jersey brought down the plaster ceiling.

Original white wall tiles and brass lighting fixtures gleam like new, and walls are freshly decorated in the same soft beiges and yellows found under a dozen layers of old paint. Faux caen stone painted decoration on plaster that survived on the balcony level of the Registry Room have been touched up.

Tourists will enter the building through the baggage room, just as immigrants did, and climb the Registry Room stairs that helped doctors spot asthmatics and heart patients. From there they can visit waiting rooms with original graffiti on the walls, the Special Inquiry Room where the two percent of immigrants who were rejected for health or legal reasons plead their cases, and a dormitory with three-tier iron pipe bunks.

The final room on the tour is a railroad ticket office where immigrants bought tickets for trips west, starting at rail terminals in Hoboken, just a ferry ride away. This huge space will be the setting for an educational exhibit, ''The Peopling of America,'' which tells where immigrants went and what they did after they left New York.

''Most people think the immigrants went into New York City after being processed, but only about 20 percent did,'' Pardue said.

Old light wells have been glassed over and opened up into the main structure to provide galleries for display of possessions immigrants brought with them from the Old World, ethnic costumes, antique luggage, and other displays. Two 140-seat theaters for documentary films have been carved out of a warren of old offices.

By roofing over the lower floor of light wells, space has been found for a research library and center for genealogical studies. There also is a recording studio for adding to an already ample oral history of the immigrant experience, a listening room where the recordings can be heard, a reading room, and a meeting room.

Exterior restoration, involving cleaning brick walls and limestone trim of decades of erosive salt accretions, has left one of the finest examples of French Beaux-Arts architecture in America in pristine condition. The four cupola domes topping the stair towers have new copper sheathing which will soon turn the brilliant blue-green color that once made them Upper Bay landmarks.

The only exterior addition to the building is a dining terrace with dramatic views of the bay, the Manhattan skyline, Governor's Island and Staten Island in the distance.

The grounds, maintained by the National Parks Service, include formal plantings of gnarled sycamore trees that help screen views of a rotting ferry slip, deteriorating hospital buildings and other unrestored outbuildings that may someday be transformed into a convention center.

WASHINGTON (JULY 30) UPI - Combined domestic and foreign machine tool orders for June rose to $262.65 million, up 27.2 percent from May's 206.45 million, the Association for Manufacturing Technology said in a report released Monday.

According to the NMTBA, which represents U.S.-based machine tool

manufacturers, June total machine tool shipments increased to $350.20 million, up 28.3 percent from May's $272.95 million.

Comparing June to the same month of 1989, orders were up 9.1 percent and shipments were up 6.9 percent.

During June, the greatest advance in machine tool orders came from foreign clients, whose orders jumped 75.5 percent to $44.15 million. Domestic orders were up 20.5 percent to $218.50 million.

Industry analysts attributed the advance in foreign orders mainly to greater export promotion efforts by the industry.

For the first six months, total machine tool orders stood at $1.42 billion down 4.8 percent from the same period in 1989. Domestic orders dropped 10.5 percent, to $1.17 billion, as the domestic industry slowed down, while foreign orders surged 35.5 percent, to $249.65 million.

Orders from the domestic automobile industry were particularly weak, said Glyn Finley, statistical director for the NMTBA. He added that the main foreign clients for the U.S.-based machine tool industry are Canada, Mexico, Britain, South Korea, Japan and West Germany.

Total shipments during the first half of the year reached $1.66 billion, up 10.6 percent from the same period in 1989.

The machine tool order backlog for June was $1.56 billion, down from May's $1.65 billion, as higher shipments than orders worked off the backlog, Finley said. The June 1989 backlog was $2.18 billion.

''Analysts had forecasted an improved order picture in the second half of 1990 - we hope that we are seeing the beginning of this predicted upturn '' said NMTBA President Albert W. Moore.

However, he warned that interest rates are a cause of concern.

''Our industry is particularly sensitive to interest rates as capital equipment spending requires large outlays,'' he said. ''Many of our members and their customers have suffered from increasingly stringent credit conditions.''

During June, metal cutting machine tool orders rose 35 percent from May, reaching $186 million. During the first six months, metal cutting orders reached $986.10 million, down 7.2 percent from the same period of 1989.

June's metal cutting shipments totaled $275.65 million, up 42 percent from May. During the first six months, metal cutting shipments were $1.18 billion, 11.8 percent higher than the figure for the same period in 1989.

Metal forming orders for June reached $76.65 million, up 11.7 percent from May. For the first six months, metal forming orders total $433.95 million, 1 percent higher than in 1989.

At $74.55 million, June metal forming shipments were down 5.4 percent compared to May. For the first six months, metal forming shipments reached $479.90 million, up 7.6 percent compared with 1989.

#90208u2147 07/27/1990 ~United Press International

ST. LOUIS (JULY 27) UPI - The debt of two leading defense contractors, both affected by cuts in the U.S. defense budget, was lowered Friday by two credit rating agencies.

The debt of McDonnell Douglas Corp. and General Dynamics Corp., both based in St. Louis, were downgraded by the two New York credit rating agencies which cited problems in McDonnell's commercial aircraft operations and cost overruns in the A-12 attack plane program.

The two companies are partners in the $4.8 billion A-12 program for the U.S. Navy and share profits and losses in the program.

Moody's Investors Service downgraded McDonnell Douglas Corp. commercial paper to Prime-3 from Prime-2; its senior debt rating to Baa3 from Baa1; and its subordinated debt rating to Ba2 from Baa2.

McDonnell Douglas Finance Co. senior debt rating was lowered to Baa1 from A2; its subordinated debt to Baa3 from A3; and its rating for issuance of commercial paper to Prime-2 from Prime-1.

The downgrading affects about $5.2 billion in McDonnell Douglas' debt.

Standard & Poor's Corp. downgraded the ratings on General Dynamics senior debt to single-A from single-A-plus and on subordinated debt to single-A-minus from single-A. The ratings affect about $610 million in long-term debt.

The A-1 commercial paper ratings of General Dynamics and General Dynamics Credit Corp. were affirmed, S&P said.

McDonnell Douglas, the nation's No. 1 defense contractor, had 1989 revenues of $16 billion and is ranked 25th in the Fortune 500.

General Dynamics, with $10 billion in revenues last year, is rated 44th.

General Dynamics reported a second-quarter loss of $240 million after a

one-time charge of $500 million. The charge included $450 million against the A-12 program and $50 million against the SINGCARS radio program for the U.S. Army.

McDonnell Douglas did not take a charge on the A-12 program, saying it had made claims for reimbursement from the Navy for development costs in the program and was making efforts to hold down costs.

The company reported second-quarter earnings of $57 million on revenues of $4.1 billion.

Moody's said it lowered McDonnell's rating because of its weakening cash flow and liquidity resulting from problems in the commercial aircraft division. The Douglas Aircraft Co. division is burdened by huge debt, estimated at $2.5 billion, and poor performance on its production lines.

Another problem at McDonnell is cost overruns in several defense programs, including the T-45 aircraft, Moody's said.

''McDonnell Douglas Corp.'s financial condition has weakened significantly despite several major restructuring programs designed to significantly improve its cost structure,'' Moody's said.

The company recently announced plans to lay off 17,000 employees in an effort to cut its budget $700 million by the end of the year.

S&P said General Dynamic's total debt to capitalization is expected to be in the 35 to 40 percent range for the intermediate term, with significant cash requirements during the next few years.

Despite the downgrades, S&P cited General Dynamic's strong competitive position in the defense industry with contracts for high-priority aerospace, naval, and land-based military programs.

S&P said recent contract awards, including more than $3 billion to provide M1 tanks to Saudia Arabia, could help General Dynamics maintain a good business base despite reduced defense industry prospects.

#90208u2174 07/27/1990 ~United Press International

MIAMI (JULY 27) UPI - A co-defendant in the drug-trafficking case of former Panamanian strongman Manuel Noriega was arrested at an exclusive home once owned by President Richard Nixon, police said Friday.

Roberto Steiner, alleged pilot for the Medellin cartel, was arrested Thursday and a small cache of weapons confiscated at the Key Biscayne mansion, said John S. Fernandes, spokesman for the Drug Enforcement Administration in Miami.

''Roberto Steiner was arrested yesterday (Thursday) by the DEA,'' Fernandes said, declining to give further details.

The two-story island house, which was the setting for a shootout in the

movie ''Scarface,'' starring Al Pacino, was once owned by Nixon. The former president's close friend, Florida realtor Charles G. ''BeBe'' Rebozo, still lives next door.

Steiner, Noriega and 14 others were charged with drug trafficking and money laundering in a February 1988 indictment returned by a Miami grand jury. Steiner, who is the eighth defendant arrested by federal agents, faces a maximum sentence of 30 years in prison if convicted.

Prosecutors accused Steiner of flying about 880 pounds of cocaine from the farm of Medellin Cartel boss Pablo Escobar. The drugs was taken from Hacienda Napoles in Colombia to the Coronado airstrip in Panama.

The cocaine was allegedly given safe passage out of Panama and flown to south Florida.

The 12-count indictment accuses Noriega of allowing Escobar and other Colombian drug lords to use Panama as a shipping point for cocaine bound for the United States and stockpiling their profits in return for at lease $4.6 million in payoffs.

Noriega, Lt. Col. Luis del Cid and pilots Eduardo Pardo and Daniel Miranda surrendered to U.S. forces when they overthrew the Panamanian dictator in December 1989. Brian Davidow of Miami and William Saldarriaga of Colombia were arrested months before the invasion.

The eight defendant, Amet Paredes, son of a former Panamanian National Guard commander, turned himself in to authorities earlier this month.

#90208u2187 07/27/1990 ~United Press International

GALVESTON, Texas (JULY 27) UPI - The fire-scarred remains of the tanker Mega Borg were towed Friday from the spot where the Norwegian vessel was rocked by explosions last month that killed four men and dumped 3.9 million gallons of oil into the Gulf of Mexico.

Officials estimated it would take two months to tow the 885-foot tanker to Karachi, Pakistan, where it will be broken up for scrap metal.

An unidentified German steel mill, represented by Ailesford Ltd. of Gibraltar, paid $2.4 million earlier this month for the Mega Borg. The Norwegian tanker was declared a total loss after a series of explosions that began June 8.

The blasts spilled 3.9 million gallons of light crude oil into the Gulf of Mexico and touched off a fire that burned for a week. The explosions occurred as the ship was transferring crude to a smaller vessel 57 miles

off Galveston.

Most of the oil spilled by the Mega Borg burned off in the fire. The rest either was skimmed off the surface by specially equipped boats, evaporated or was broken up naturally by the sun, wind and waves.

Oil-eating microbes also were sprayed on part of the spill, and backers of the technology said preliminary data indicated the clean-up effort was a success.

The cost of cleaning up the spilled oil has been projected at up to $7 million, but liability for the incident has yet to be determined. The Mega Borg was operating in international waters and carrying crude owned by the Houston subsidiary of a French oil company.

The cause of the explosions remained under investigation Friday.

#90208u2200 07/27/1990 ~United Press International

(JULY 27) UPI - A showdown may be looming between the Red Army and renegade ethnic armies in Soviet republics. The Soviet interior minister warned today he'll use force to take weapons from armies in Armenia, Azerbaijan and elsewhere. The minister said he would meet Wednesday's presidential decree requiring the rebels to disband and disarm within 15 days.

Louisiana Governor Buddy Roemer for the second time has vetoed a strict anti-abortion law on grounds the measure- quote- ''flies in the face of common sense and our own Constitution.'' Roemer said abortion as a form of birth control must be curtailed, but he says the bill imposed too many restrictions that conflicted with existing law. The bill's author is urging adjourned Louisiana lawmakers to return for an emergency session to try to override the veto.

Budget negotiators adjourned for the weekend voicing gloomy views of the process. President Bush attended a budget meeting for the fourth straight day but said there was NO dramatic progress. A tentative Republican proposal would raise taxes on beer and wine and limit deductions for state and local taxes.

The Irish Republican Army said today it executed a man its members believed had infiltrated the I-R-A as a British informer. Police say the found the man's body with a a hood over his head and his hands bound. Police found the body 65 miles west of Belfast.

A man who robbed an Abilene bank of about 23-hundred dollars in 1958 will return to the scene of the crime tomorrow and give the city a check for

50-thousand dollars. Delbert Dunmire was a 24-year-old Air Force Lieutenant when he robbed the bank. But after spending two years in Leavenworth federal penitentiary, he went on to build an airplane empire in Kansas City, Missouri. A spokesman says the 50-thousand-dollar check is Dunmire's way of repaying his debt to society... with interest.

#90208u2268 07/27/1990 ~United Press International

STARKE, FL (JULY 27) UPI - A 38-year-old man sentenced to die for the 1983 stabbing death of a housewife who let him into her home after he asked to use the telephone was denied a stay by the U.S. Supreme Court, clearing the way for his execution scheduled for Friday evening.

Lawyers for Anthony Bertolotti filed the 11th-hour appeal with the high court after a federal appeals court in Atlanta refused to halt the execution. Bertolotti was scheduled to die in the electric chair at 7:01 p.m. EDT Friday.

Bertolotti ate about half of the shrimp and macaroni and cheese he ordered as a last meal, prison spokesman Bob Macmaster said. He was visited by his friend, Luann BegyBegy of Ocoeo, and two attorneys.

The 11th U.S. Circuit Court of Appeals had previously held up three other Florida executions because of arguments from defense attorneys that the state's electric chair may not be working properly.

But the state tested the chair earlier this week and sent the results to the appeals panel, which denied Bertolotti's request after oral arguments Friday morning.

If Bertolotti is executed, it will be the first in Florida since the controversial execution in May of Jesse Tafero. Flames shot from the chair's headpiece during the execution, and it took three separate surges of electricity before Tafero was pronounced dead.

Prison officials blamed the flames on a bad sponge in the chair's headpiece. The sponge is soaked in salt water and acts as an electrical conductor, but before Tafero's execution the natural sponge inside was changed to a synthetic one.

The three-legged electric chair, including the synthetic sponge, was tested earlier this week and pronounced by experts to be in fine working order.

Like attorneys for death row inmates in the three stays granted by the 11th Circuit Court, Bertolotti's lawyers contended the state's electric chair is broken and would impose cruel and unusual punishment.

Bertolotti was sentenced for the Sept. 27, 1983, murder of Carol Ward in Orlando. According to court records, he approached her while she was working in her yard and asked permission to use her telephone.

She allowed him inside her house, where he armed himself with a knife and robbed her of $30. Ward tried to persuade Bertolotti to put down the knife but he became angry and started stabbing her, the court records said.

At some point, according to the court records, the first knife broke, so Bertolotti got another one and continued to stab her until she died. An autopsy found 14 separate stab wounds in the woman's body and also revealed sexual intercourse at some point during or after the attack.

#90208u2298 07/27/1990 ~United Press International

TRENTON, N.J. (JULY 27) UPI - The National Rifle Association filed suit Friday in U.S. District Court seeking to block the state's ban on the future sale of military-style assault weapons.

The suit seeks a temporary restraining order on the law, believed to be the toughest anti-gun statute in the country.

The plaintiffs listed in the suit include the NRA, the Coalition of New Jersey Sportsmen and the Congress of Racial Equality and the defendents were Gov. Jim Florio, Attorney General Robert Del Tufo, Superintendent of State Police Justine Dintino and Mercer County Prosecutor Paul Koenig.

''We are focusing on some of the narrowly defined aspects of the law which are of immediate concern to sports men and women in the state,'' said Richard Manning, an NRA spokesman, in a statement.

Florio, fulfilling a campaign promise, signed a measure in May to ban the sale of more than 80 types of assualt weapons and limit their ownership to gun collectors and target shooters.

The law requires those who keep the guns to register the weapons and join specially sanctioned shooting clubs.

Under the law, people who decline to register the weapons or render them inoperative by removing the firing pins have a year to either surrender their guns or sell them to approved dealers out of state.

Violators would face penalties of up to 10 years in prison and fines of $7,500.

California is the only other state with a ban on the sale of assault

weapons, but does not require any current owners to surrender their weapons.

''Anyone has a right to sue,'' said Emma Byrne, Florio's press secretary. ''We are confident the law will be upheld and even more confident that if people on the street were asked they would agree that we don't need to be selling automatic weapons in New Jersey.''

The NRA led the opposition to the bill as it made its way through the Legislature, organizing massive rallies that culminated in a raucous protest the night the bill passed in the Assembly and was sent to the governor.

The group argues the bill is unconstitutional because it would take guns out of the hands of law-abiding citizens.

The measure also bans the use of ammunition magazines that hold more than 15 bullets, meaning the measure could be imposed on ''BB'' guns as well as other firearms, Manning said.

''It is ironic that a bill aimed at controlling criminals would result in the banning of air guns and 'BB' guns,'' he said. ''Additional action is anticipated.''

#90208u2355 07/27/1990 ~United Press International

(JULY 27) UPI - A number of leading economists sound gloomy following today's report of slow growth in the gross national product. The Commerce Department pegged the nation's total output of goods and services at a disappointing one-point-two percent. Chief economists for top banks... as well as for the U-S Chamber of Commerce... say the country is on the brink of a recession.

Energy analysts say OPEC's agreement today to curb oil output will cause retail gasoline prices to at least hold steady... and possibly increase. While OPEC ministers raised their production ceiling... they agreed to curb quota violations which had made oil more plentiful. Analysts noted that the agreement should help counteract lowered demand... which usually forces prices down near the end of summer.

Rebel forces seized a strategic portion of the Liberian capital of Monrovia today in street-to-street fighting. Guerrillas under the command of one renegade rebel leader, Prince Johnson, closed to within one mile of the beachfront mansion where President Doe is holed up. Johnson split with another rebel leader, Charles Taylor, two months ago, and their relationship is now UNclear.

President Bush today predicted his nominee for the Supreme Court will win Senate approval ''with flying colors.'' The president said there is ''broad support'' across the nation for U-S Appellate Court Judge David Souter. Republican Senator Warren Rudman of New Hampshire said that during Souter's interview for the job, the White House honored Souter's desire NOT to ask him how he would rule on specific issues.

The jury in the second McMartin Pre-School trial in Los Angeles announced today it is hopelessly deadlocked... forcing a mistrial. Raymond Buckey had been charged with eight counts of child molestation against three girls at the nursery school nearly a decade ago. The deadlock was a staggering defeat for prosecutors. An earlier trial against Buckey and his mother cleared the two of 52 counts, but had left some counts UNresolved.

-30- 2205

#90208u2356 07/27/1990 ~United Press International

TORONTO (JULY 27) UPI - The Toronto Blue Jay Friday acquired veteran left-hander John Candelaria from Minnesota for second baseman Nelson Liriano and minor league outfielder Pedro Munoz.

Candelaria, 36, was 7-3 with a 3.39 ERA in 34 games with the Twins, mostly

in relief. He had allowed 55 hits and 22 earned runs while striking out 44 and walking just nine in 58 innings. Candelaria has four saves.

The Blue Jays are Candelaria's sixth major league team over 18 seasons. He has a 174-110 lifetime record.

Liriano, 26, was batting .212 in 50 games for Toronto, with one home run and 15 RBI. The Dominican Republic native had been used exculsively as a second baseman this season, his third with Toronto.

Munoz, 21, was hitting .319 with seven home runs and 56 RBI in 86 games for the Syracuse Chiefs of the International League. Munoz is a right-handed hitting outfielder from Ponce, Puerto Rico and was signed by the Blue Jays as a non-draftee free agent in 1985.

(JULY 27) UPI - The House and Senate- in a rare convergence of issues- are both debating their versions of the farm bill. The Senate today voted to give ports in the Great Lakes special treatment in the shipment of U-S food aid to foreign countries, but specified the Great Lakes program will be phased out by 1996. The House and Senate both took action to cut off export credit for Iraq- while differing on the specifics.

The American Dental Association is working to combat an AIDS scare triggered by reports that a dentist may have infected a patient with the disease. The Centers for Disease Control reported on the case yesterday, pointing out that it is NOT certain that it was the dentist who transmitted the disease to the patient. The A-D-A- faced with canceled appointments across the nation today- emphasizes that AIDS transmission to patients is extremely rare- if it occurs at all.

Two Dallas record stores face misdemeanor obscenity charges for selling the 2 Live Crew rap album ''As Nasty As They Wanna Be'' to a 13-year-old accompanied by an undercover cop. But a group of lawyers has offered to defend any Dallas record store charged in selling the album. One lawyer attributes the arrest to political motives on the part of the assistant district attorney.

IRVINE, Calif. (JULY 29) UPI - An investor group led by James M. Sweeney said Friday that it plans to buy health products manufacturer McGaw Laboratories for $210 million from The Kendall Corp.

Sweeney's offer for McGaw, which has 3,000 employees, includes undisclosed

other considerations and is financed by Alex. Brown & Sons Inc. and Donaldson, Lufkin & Jenrette Securities Corp.

McGaw has annual sales of about $225 million. It manufactures intravenous sets amd solutions, nutrional products, pumps and controller and pharmacy products, which are sold to hospitals and health care providers.

Sweeney said, ''For the fisrt time in many years, McGaw will be an indpendently-owned-and-operated company with its corporate headquarters in Irvine, Calif.''

Richard Gilleland, chief executive officer of Kendall, said, ''McGaw is an excellent business and while it no longer fits with our current strategy, we are confident the company can flourish under the ownership of Mr. Sweeney's group.''

#90208u2447 07/27/1990 ~United Press International

NEW YORK (JULY 27) UPI - The Dow Jones industrials started the week plummeting more than 100 points in intraday trading for the first time since the October mini-crash, and finished the week below the 2900 mark for the first time in over two weeks.

The Dow industrial average fell 22.28 Friday to close at 2898.51, losing 62.63 points, or 2.1 percent, on the week.

Of the broad market indexes, Standard & Poor's 500-stock index lost 8.17 to end the week at 353.44 and the New York Stock Exchange composite index fell 4.33 to close the week at 193.32.

Declines led advances 1,291-608 among the 2,175 issues traded this week. Big Board volume totaled 858,623,940 shares, compared with 834,887,170 shares a week earlier and 889,256,730 shares a year ago.

The Dow industrials fell more than 100 points during Monday's trading for the first time since Oct. 13, rebounded late in the day, but still rang up their third-largest loss of the year.

Analysts blamed the early debacle on poor earnings reports, particularly in the technology sector, a gloomy outlook for interest rates after the previous week's inflation data and stock prices that had become overvalued relative to earnings.

The broad market failed to show any rebound from the early sell-off, however, and had its worst day of the year. Declines led advances 1,409-226 among the 2,018 issues crossing the tape, the largest gap between losers and gainers in 1990.

Alfred Goldman, market strategist with A.G. Edwards & Sons Inc. in St. Louis, said Monday the ''market was primed and ready for a pullback'' after gaining some 350 points since the first of May.

''Excesses (in prices) had built up in relation to book value and earnings '' he said.

Stock prices closed higher Tuesday and Wednesday, rebounding due to a bout of computerized buy programs and some strength in technology issues and utilities. Analysts said the market was trying to find a stable range after its earlier gyrations.

Prices closed lower Thursday in a round of selective futures-related selling and a sell-off in tobacco stocks after the New Jersey Supreme Court handed cigarette manufacturers a major defeat. The court ruled smokers or their survivors can seek damages for injury or death caused by failure to provide sufficient warning of health risks.

Prices fell again Friday after the Commerce Department reported the nation's gross national product, battered by a plunge in exports, managed only a 1.2 percent gain in total output of goods and services in the second quarter, after a 1.7 percent increase in the first quarter, analysts said.

Market forecasters had predicted an advance of 1.5 to 1.8 percent in the GNP for April, May and June.

The economic news triggered a wave of futures-related selling resulting from stock-index arbitrage. The programs, involving the sale of baskets of stocks and the purchase of index futures, were sparked when futures contracts dropped to small premiums, market watchers said.

After spending the previous week flirting with the landmark 3000, the blue-chip average fell 22.28 Friday to 2898.51, the first time it has fallen below the 2900 mark since July 10.

The second-quarter GNP as well as significant downward GNP revisions for the previous three prior quarters indicated economic conditions were softer than most people anticipated, said Hugh Johnson, head of investment policy at First Albany Corp. in Albany, N.Y.

Recent reports of weaker-than-expected earnings indicated a similar softness, he said.

''The stock market is responding to those weak earnings reports, the weak economic data today and there is genuine nervousness starting to creep into the picture about the state of the economy,'' Johnson said.

The data also indicated slower economic growth still to come, he added. Without two successive quarters of 1 percent growth or less, Congress will not be allowed to revise the federal deficit targets spelled out in the Gramm-Rudman Act, he said.

Congress must instead cut the federal budget or raise taxes to meet the deficit target for 1991, and either strategy will slow economic growth, he said.

''Basically what were seeing for the whole week is the stock market moving down or correcting in response to the realization that the economy and earnings are not as strong as the market had previously reflected,'' Johnson said. ''It's really coming back to touch base with reality.

''The GNP data simply dramatized what the reality is,'' he continued. ''The state of the economy was not as good as stock prices in May and June had suggested.

''Until you can make a stronger case for recession, we simply have to conclude this is a correction and not a start of a bear market,'' he added. ''But the case for recession gets a little stronger every day.''

On the trading floor this week, Citicorp was the most active issue, losing 3/4 to 20 3/8. Philip Morris followed, off 3 1/2 to 46 5/8.

Wal-Mart Stores was third, off 1 7/8 to 31 5/8.

In the high-tech sector, AT&T lost 1 3/8 to 36 1/4 and IBM lost 6 1/4 to 111 3/8. Compaq Computer lost 4 1/2 to 55 3/4.

Among other blue chips, General Electric fell 2 1/4 to 71 3/4.

On the American Stock Exchange, the Amex Market Value index fell 4.96 to close Friday at 355.49. Declines led advances 524-288 among the 998 issues traded.

Amex volume totaled 68,855,845 shares, compared with 62,059,015 traded a week earlier and 63,701,725 traded in the same week a year ago.

Ensco led the Amex actives, up 1/4 to 4 1/2.

The National Association of Securities Dealers composite index fell 12.69 to end the week at 442.59.

#90208u2450 07/27/1990 ~United Press International

HOUSTON (JULY 27) UPI - Exploration activity is expected to increase sharply during the last half of the year, making 1990 the best drilling year in the United States since 1986, World Oil magazine said Saturday.

The prediction, based on a June survey of 23 major and 200 independent operators, said 19,773 wells will be drilled during the last half of the year for an 18 percent increase over the first six months.

World Oil publisher Robert M. de Sombre said his magazine's mid-year review, which appears in the August issue, boosts the total number of wells from the January forecast of 33,498.

The latest estimate forecasts 36,490 wells will be drilled nationwide in 1990. Last year an estimated 30,697 wells were drilled in the United States, World Oil said.

''What all this points to is the best drilling year since 1986. But it will still be only 40 percent of the 1981 level and far short of having any impact at all on the deplorable decline of U.S. production and reserves,'' de Sombre said.

The rig count continued to climb during the second quarter, while oil prices trended downward until the beginning of the second half, he said.

''This price drop was forecast last January. However, the peak winter demand season passed without a corresponding decrease in OPEC production, causing a steeper price decline than expected. Prices appear to have bottomed and are now climbing,'' de Sombre said.

The survey predicted 640 wells would be drilled in the Gulf of Mexico during the last half of the year, compared with 527 wells drilled there already this year.

''U.S. operators kept an average of 952.6 rigs running in the first half of 1990. This was up almost 22 percent over the same period in 1989 despite erratic prices,'' de Sombre said.

''With natural gas prices faring no better, it appears most domestic producers have begun to look past price fluctuations toward the longer term,'' he said.

#90208u2502 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - Senate leaders agree there could be major budget cuts before the new farm policy bill becomes law, but they declined Friday to speculate on possible targets for spending reductions.

''I have absolutely no idea of sending that kind of signal now,'' Agriculture Committee chairman Patrick Leahy, D-Vt., said shortly after the Senate passed the bill. ''I'm not going to send that blueprint out before I even know what the House or the (budget) summit does.''

The Senate bill calls for spending $55 billion on farm subsidies during the next five years.

The White House and Senate Republican leader Robert Dole of Kansas have repeatedly warned against legislation that would give farmers a misleading impression of what the farm program will look like.

Sen. Richard Lugar, R-Ind., said farmers were unlikely to be misled by the Senate bill. After all, he said, it freezes target prices and crop support rates and gives a ''strong indication'' that further cuts are possible.

If spending cuts are needed, Lugar said, they should not be met through bookkeeping gimmicks such as taking more land out of production as a way to avoid paying crop supports.

Leahy said the final House-Senate version of the farm bill would not be written until the scope of budget cuts is known.

''We know there probably will be a substantial cut in program outlays,'' Dolesaid before citing estimates that cuts could range from $6 billion to $18 billion over five years.

''Keep in mind,'' Dole said, ''if we do nothing, we'll get a (budget) sequester and that will hit agriculture very hard.''

There are estimates that without an agreement between the White House and Congress, the automatic spending cuts required under the Gramm-Rudman deficit reduction law would slash farm spending by $3.9 billion, or 38 percent.

In a statement, Dole said the cost of the new farm bill might have to be reduced an average of $2.5 billion a year.

House and Senate Agriculture committee leaders aimed at writing farm bills that would spend about as much money as if there were no change in current law.

Some farm-state congressmen have predicted that budget cuts will be accommodated by turning the limited ''planting flexibility'' in the farm bill into mandatory flexibility - meaning some acres would be excluded from eligibility for crop subsidies.

#90208u2512 07/27/1990 ~United Press International

NEW YORK (JULY 27) UPI - Treasury bond market hesitancy evaporated and prices surged Friday after the government issued figures showing the national economy grew a scant 1.2 percent in the second quarter, boding trouble ahead.

The gross national product figure came in lower than the projections of most private economists, who expected growth of 1.5 percent after the expansion of 1.7 percent seen in the first three months of 1990.

Meanwhile, an inflation gauge linked to the GNP fell to 4.4 percent in the second quarter from 4.8 percent in the first. That combination of weak growth and diminished inflation was tailored to bond-buyers tastes.

''The market has improved a lot,'' said Elliott Platt, director of economic research at Donaldson Lufkin & Jenrette Securities Corp. The data ''confirmed the suspicion that economic growth was slowing down a lot and inflation was not the problem many earlier thought,'' he said.

''Economic activity, though positive, is weak,'' said economist Samuel Kahan of Fuji Securities Inc. of Chicago. The report ''indicated rather strongly that future activity is not likely to show much strength, either '' he said.

''It's a good bet that we'll get at least one negative (growth) quarter by the end of the year,'' added F. Ward McCarthy, a managing director of the Stone & McCarthy Research Associates advisory firm of Princeton N.J.

At the close of trading Friday, the benchmark 30-year bond, the 8 3/4 of 2020, traded at 102 28/32 to yield 8.48 percent, compared with 102 09/32 and 8.54 percent a week earlier. That translated into a gain for the week of nearly 5/8 point, or $6.25 for every $1,000 face value.

Signs of economic weakness drive up the prices of bonds, because their fixed rates of return are more attractive in uncertain times. Reduced inflation also helps bond prices, because inflation can eat away bond yields.

Economists pointed out, too, that the second-quarter GNP was inflated by the counting-in of inventories. If those were excluded, leaving only final sales, the economy actually contracted by 1.5 percent, they said.

All this left economists believing that the Federal Reserve Board will have to guide short-term interest rates down another notch or two by early fall if the economy is not dip into the negative figures.

''I think it increases the bias in that direction (of easing),'' said

Kahan of Fuji Securities. But the timing of Fed easing depends on the Washington talks on reducing the federal budget deficit by $50 billion, he said.

''I think the Fed will be easing a few more times over the course of the year, but I think the Fed will be deliberate,'' Platt said.

Kahan and Platt voiced some optimism that this could be achieved before Congress recesses for its summer break, or at least by September, given strong pressure from voters, in this election year, for action.

Fed Chairman Alan Greenspan has indicated that his central bank would be more disposed to ease once Congress has struck a budget deal and passed it. But the Fed's hand could be forced by more economic weakening, Kahan said.

Ten-year Treasury notes closed at 102 31/32 to yield 8.42 percent, compared with 102 19/32 and 8.48 a week earlier. Five-year notes ended at 101 01/32 to yield 8.23 percent, against 100 27/32 and 8.28 percent.

Three-year Treasury notes closed at 101 07/32 to yield 8.12 percent, against 101 04/32 and 8.16 percent a week before. Two-year notes were at 100 to yield 8.00 percent, against 99 31/32 and 8.07 percent at auction Wednesday.

Six-month Treasury bills were discounted at a rate of 7.41 percent to yield 7.80 percent, against a discount of 7.45 percent and yield of 7.84 percent one week earlier. Three month T-bills ended at a 7.53 percent discount to yield 7.78 percent, against a 7.55 percent discount and 7.80 percent yield.

#90208u2520 07/27/1990 ~United Press International

EL SEGUNDO, CA (JULY 27) UPI - Zsa Zsa Gabor, wearing slacks and a sweatshirt, began her three-day jail term in a city lockup Friday for slapping a Beverly Hills motorcycle officer.

Gabor, 71, carrying a manuscript and a small valise, arrived at the El Segundo Police Station about 1 p.m., accompanied by her husband, Prince Frederick Von Anhalt, and her attorney.

''She's a very nice lady,'' said Fern Ruiz, a records supervisor for the tiny jail facility who met the actress as she was checked into her single cell.

The oft-married former glamour queen was convicted in September of slapping Beverly Hills Officer Paul Kramer during a routine traffic stop last summer.

Gabor was sentenced to a 72-hour jail term and more than 100 hours of community service. Although she has completed most of that service, which was carried out at a Venice homeless women's shelter, she was given until Aug. 15 to fulfill her jail sentence.

Gabor's three-week trial at a Beverly Hills courthouse last fall made international headlines and was frequently marked by the actress's sudden emotional and often comical outbursts, including calling the judge a drug user and dashing out of the courtroom in tears.

At one point, she said she would be afraid to go to jail because of the alleged ''lesbians'' there.

Deputy District Attorney Elden Fox, the prosecutor who tried Gabor, said, ''I'm not too interested, frankly'' when told she had begun her jail term.

Gabor had the option of serving her sentence at any of the county's women's jails. Her attorney inspected the El Segundo jail last week and notified authorities that his client wanted to stay at there instead of the overcrowded Sybil Brand Institute for Women, the region's main women's facility.

The jail in El Segundo, located about 20 miles west of downtown Los Angeles near the coast, has a limited inmate population and private cells for all prisoners.

Before beginning her term, the usually gussied-up Gabor was told to leave her jewels and furs at home, and she will have to eat standard jail fare - frozen TV dinners.

''We haven't won any awards but our meals have been approved by the county Department of Health Services for meeting nutritional requirements,'' Ruiz said.

Although Gabor had often talked about completing her memoirs while in jail it will not possible - prisoners are forbidden to have pens, Ruiz said.

Gabor also has offered to work for her keep, Ruiz said.

''She has expressed an interest to do some work while she's here,'' she said. ''Although most of our male prisoners wash police cars, we've garnered some non-sensitive city documents that need to be filed and she can begin filing anytime she's ready.''

Gabor's daughter, Francesca Hilton, called the jail shortly after her mother arrived, asking when she could visit. Ruiz said visitors are allowed only between 10 a.m. and 11 a.m. daily.

#90208u2524 07/27/1990 ~United Press International

BEVERLY HILLS, CA (JULY 27) UPI - The flap over Roseanne Barr's shrill rendition of the national anthem at a baseball game evolved into a federal case Friday with President Bush calling it ''disgraceful'' and Barr acidly wondering if he could have sung it any better.

''I'm sorry I didn't sing so good,'' the comedienne said during a raucous news conference at the Beverly Hilton Hotel. ''But I'd like to hear him (Bush) sing it.''

Barr was roundly booed when she screeched her way through the ''Star Spangled Banner'' before the second game of a double-header between the San Diego Padres and Cincinnati Reds on Wednesday night.

Bush, talking to reporters aboard Air Force One during a flight Friday to his summer home in Kennebunkport, Maine, said: ''It was disgraceful.''

''That is the way I feel about it,'' Bush said, ''and I think a lot of San Diego fans said the same thing.''

After her singing, Barr spat on the ground and grabbed her crotch, which many fans considered an insult to the national anthem. But at Friday's news conference, she said she had simply been trying to amuse the baseball players and parody their penchant for spitting and adjusting their protective cups.

''I thought that it would be very funny,'' she said.

''None of this was meant viciously. Nobody feels worse than me,'' Barr said.

Before her 20-minute news conference started, her enraged husband, Tom Arnold, demanded that photographers for tabloid newspapers leave the room. He then focused his anger at a photographer without press credentials who identified himself as Kip Rano of American Photo Syndicate.

Rano initially refused to budge, but he left when three Beverly Hills policemen arrived and said he would be subject to a citizen's arrest if he stayed.

Barr and Arnold, who were both fairly subdued once the news conference started, said they planned to file suit next week against several tabloid newspapers over allegedly untruthful articles.

''I'm not going to take it any more,'' she said.

Barr said the lesson she learned from the anthem debacle was to limit her public appearances in the future.

''From now on, I'm going to concentrate on the (TV) show and not leave myself unprotected,'' she said.

Barr stressed several times that she had called the news conference because she wanted the controversy to disappear. She also claimed she had received widespread support along with the brickbats.

''I've had hundreds of phone calls from people that say, 'What is the big deal they're making out of this?''' she said.

''You're treating me like I rode (an enemy) tank in North Vietnam,'' Barr said. ''I want it to stop. I don't want to be like run out of town on a

rail, that Jane Fonda right-wing frenzy stuff.''

Barr said she had expected to be well received for her performance, which was part of a special ''Working Women's Night'' promotion, but considered stopping a few seconds after starting because of the boos.

''It took all the guts I had to finish,'' she said. ''I'm sorry that people are appalled and that this is the worst thing they've ever heard.''

Barr said she has been taking singing lessons and has been singing as part of her stage act.

''There's a lot of people that sing like me in this country. I have the right to sing the 'Star Spangled Banner' too,'' she said.

She also said that the incident has not soured her on baseball and she remains a Padres fan. ''I really love baseball,'' she said.

(JULY 28) UPI - SPORTS DIGEST

Auto Racing

Brazilian Ayrton Senna gained the provisional pole position for the West German Formula One Grand Prix in Hockenheim, West Germany, clocking one minute 40.198 seconds on the 4.223-mile (6.797km) Hockenheim circuit. ... Italian Massimo Biasion and navigator Tiziano Siviero sped their Lancia Delta Integrale over dry mountain roads to win the second stage of the Argentine Auto Rally in Cordoba, Argentina. The rally is the eighth event in the world championship season.

Baseball

The Round Rock, Texas city council is expected to vote Aug. 9 on a resolution that would seek voter approval for a $6.6 million bond package to build a new stadium for a minor league baseball team. The city does not yet have a commitment from a minor league franchise to locate in Round Rock.

Boxing

Thailand's World Boxing Council strawweight champion Asawin Sordusit retained his title by knocking out his Filipino challenger Roger Jamayot in the second round at Pattaya, Thailand.

Golf

Stephen McCallister shot a 3-under 67 at the second day of the $630,000 Dutch Open at Zandvoort, Holland, putting him at 4-under 136, three strokes clear of fellow Briton Colin Montgomerie.

Hockey

Bernie Parent, the first Philadelphia Flyer inducted into the Hall of Fame rejoined the club as goaltender instructor. He will replace Glenn Resch, who was not rehired.

Soccer

Hugo Maradona, Diego's younger brother, is battling a knee injury which may see the 21-year-old Argentine sidelined for months. Maradona, who joined Rapid Vienna this season, may have to undergo surgery to repare damaged cartilage, doctors said.

Swimming

Jeff Keith, a triathlete who lost a leg to cancer at age 12 and went on to capture national attention with a 3,200-mile run across America in 1985 to battle disease warmed up Friday for his fourth ''Swim Across the Sound.'' The swim will feature Olympic gold medalists Steve Lundquist and Rowdy Gaines; Olympic swimmers Craig Beardsley and Tracey Caulkins. Proceeds from the 17-mile relay race across Long Island Sound will go to a cancer prevention program at St. Vincent's Medical Center in Bridgeport.

Tennis

The first annual Sobro Bronx International Tennis Championships, will take place Aug. 16-20. The event will bring together top mens and women's singles players ages 25 and under, as well as eight of NewYork city's top junior players including winners of the recent 1990 Mayor's Cup Tournaments.

#90208u2557 07/27/1990 ~United Press International

LOS ANGELES (JULY 27) UPI - The deadlocked jurors in the McMartin Pre-School molestation case retrial said Friday the prosecution was ill-served by the controversial videotaped interviews of the alleged child victims by therapists.

''If there was any one thing that put a shadow of doubt over the whole thing, it was the interviewing techniques'' used by the child therapists at Children's Institute International in Los Angeles, said the jury foreman, Rick Dunham.

The therapists were commissioned by authorities to interview hundreds of students and former students at the once-prestigious McMartin Pre-school.

The interviews, innovative at the time and employing word games and dolls to represent the children and adults at the school, were a primary source of the accusations that produced the massive McMartin prosecution, with seven defendants and hundreds of charges involving scores of children.

Now, years later, the jurors in Raymond Buckey's retrial - echoing their counterparts in the first marathon trial - said the interviews did not help the search for the truth.

Dunham and other jurors said they felt uncomfortable seeing the therapists asking leading questions and pressuring the children by saying their friends had revealed ''yucky secrets.''

''The CII tapes, in my mind, were very bad,'' Dunham said. ''We didn't put a lot of credence in them. Most (jurors) feel the CII tapes were very poor.''

Juror Lloyd Issacson, a 64-year-old U.S. Treasury Department employees, said, ''I had a lot of problems with the tapes and the way things were done. I feel the kids were just going along with the adults (who were) leading the kids, definitely.''

Jurors said they also had trouble with other parts of the prosecution case.

#90208u2577 07/27/1990 ~United Press International

DESERT CENTER, CA (JULY 27) UPI - The pilot of the Sun-Seeker, a spindly homemade plane covered with 700 solar cells, was forced to delay the start of his planned transcontinental flight Friday, but only by a day or two.

Eric Raymond, a champion hang glider, had been expected to begin a 10-day cross-country flight in the Sun-Seeker on Friday morning, but needed additional time to correct problems with the aircraft's propeller, said his spokesman, Jack Whitehouse.

He said Raymond will perform two or three test flights and could take off from Desert Center, east of Palm Springs, as early as late Saturday morning. Raymond's first stop on his way to Kitty Hawk, N.C., will be Albuquerque, N.M.

Rough weather had previously forced cancellation of the Sun-Seeker's flight.

Raymond, 33, spent four years building the plane in his garage in Lake Elsinore, Calif. The aircraft is covered with 700 solar cells which charge batteries that drive a three-horsepower motor. The motor provides power for takeoffs and landings and in turbulence, but the aircraft mostly uses updrafts, then gildes.

#90208u2720 07/27/1990 ~United Press International

ANNAPOLIS, Md. (JULY 28) UPI - Maryland's highest court Friday said former Gov. Marvin Mandel enjoys the same immunity afforded U.S. presidents and cannot be sued for a 1971 veto of legislation that touched off his prosecution on federal charges.

The Maryland Court of Appeals dismissed a $15 million fraud suit filed against Mandel by two former owners of the Marlboro Racetrack, who alleged the former governor and five friends used the legislative process to manipulate the value of the racetrack.

With the unanimous court decision, Maryland becomes the first state in the nation to issue a ruling specifically protecting a governor's immunity in the exercise of legislative duties, such as the power to veto, lawyers said.

The $15 million suit was filed by two former partners of the Marlboro Racetrack, brothers Michael Patrick O'Hara and James O'Hara III, who alleged that Mandel vetoed a bill that would have authorized extra racing days for the track.

They claimed the May 1971 veto was intended to lower the value of the racetrack, since five Mandel co-defendants bought the partners' 14 percent share of the track after the racing days were rejected. The brothers allege that after the sale, Mandel then encouraged the Legislature to override his veto, to drive up the value of the track once again.

Lawyers for the brothers said the alleged manipulation amounted to fraud, but the Court of Appeals said the actions of a governor on legislation is protected by the same immunity provisions afforded U.S. presidents.

In a footnote, the court said that the protection, however, does not extend to ''criminal prosecution, claims for equitable relief, or damages for alleged constitional violations.''

Mandel, 70, who now practices law in Annapolis, told Friday's Daily Record in Baltimore that the decision was a victory for all governors.

''I think this decision will bring to an end a long period of problems for the state,'' said Mandel, who was thrown out of office for racketeering

and mail fraud convictions for his alleged involvement in the racetrack deal.

He was convicted and thrown out of office in 1978 for allegedly accepting gifts and cash from five co-defendants in exchange for influencing the racing legislation, serving 19 months in a federal prison. The convictions were reversed in 1987 when a federal judge ruled that the charges had been improperly applied.

''This reaffirms that a veto is part of the legislative process, and that was at the core of this case,'' said Mandel. ''We asked for full immunity and we got it.''

Mandel's attorney, H. Thomas Howell, said Friday's decision is the first of its kind - affirming the immunity enjoyed by governors - because the immunity issue is widely understood and usually not questioned in court.

Baltimore attorney Roy Mason, who represented the O'Hara brothers, said he is considering appealing the decision to the Supreme Court, arguing possible violations of the Fifth Amendment due process clause.

#90208u2775 07/27/1990 ~United Press International

PRINCETON, NJ (JULY 28) UPI - More than 150 religious leaders, including Moslems and Jews, Christians and Buddhists, Hindus and Sikhs, called on the world's governments Friday to save children from economic exploitation and needless death.

The World's Religions for the World's Children Conference attracted religious leaders from 28 countries who met at Princeton Theological Seminary as a prelude to the United Nations World Summit for Children set for Sept. 29-30.

The assembled leaders heard grim testimony on the plight of children in underdeveloped countries and in the ghettos of the world's cities.

UNICEF Secretary James Grant, who chaired the conference, said more than 40,000 children die each day for want of simple vaccines, sanitation, or food.

Religious representatives from 28 countries set aside their differences to study the problems facing the world's youngsters.

The final day of the conferences ended with the group issuing a declaration and action plan which they plan to present to the United Nations in September.

The document calls on governments to:

- divert at least 10-15 percent of military spending to helping children.

- sign, ratify, and monitor compliance with the Convention on the Rights of the Child, an international agreement protecting childre.

- provide basic health care and education to all children.

- take action to stop economic exploitation of children and child abuse.

- undertake actions to promote the well-being, education, and leadership roles of female children and their right to equal treatment with male children.

- reorder community resources in accord with the principle of the right of children to a first call on resources.

The clerics also called on religious bodies to focus more attention on the role of organized religion in helping children.

''Our common voice resounds despite differences in our traditions, our practices, our beliefs, and despite our inadequacies. Our religious traditions summon us to regard the child as more than a legal entity, but as a transformer of society,'' a statement released by the religious leaders said.

The delegates also called for a time of worldwide prayer and fasting combined with individual donations toward ending the poverty of children throughout the world on the weekend of Sept. 21-23.

#90208u2814 07/27/1990 ~United Press International

(JULY 27) UPI - The National Rifle Association filed suit today... seeking to block New Jersey's ban on the sale of military-style assault

weapons. The suit seeks a temporary restraining order on the law, believed to be the toughest anti-gun statute in the country. The N-R-A argues the bill would only take guns out of the hands of law-abiding citizens. A spokesman for Governor Jim Florio said most citizens agree there is NO need for automatic weapons.

There are reports a Muslim group has laid claim to control of the small Caribbean nation of Trinidad and Tobago. The Muslim group armed with machine guns stormed the government television and radio headquarters in the capital, Port of Spain, today and claimed power. Other reports say Prime Minister Arthur Robinson has been seized by the rebel group, which reportedly has connections with Libya.

OPEC agreed in Geneva today to increase and honor its oil production quota... which in turn is meant to boost oil prices by three dollars a barrel. The action follows threats by Iraq in recent days against two small Persian Gulf neighbors. Iraq accused Kuwait and the United Arab Emirates of driving down world prices because of cheating on quotas.

Washington Mayor Marion Barry rested his defense against drug and perjury charges today without taking the stand. Barry's lawyer, R. Kenneth Mundy, called 17 witness in the mayor's defense. Mundy told the judge in the case that it was Barry's ''informed decision'' NOT to testify on his own behalf. The trial should go to the jury next week.

#90208u2815 07/27/1990 ~United Press International

(JULY 27) UPI - Avianca Airlines today made what one lawyer called ''a great humanitarian gesture''... offering 75-thousand dollars to each survivor of a January Long Island plane crash. The Colombian air line made the offer without demanding recipients give up the right to pursue additional damage claims. One lawyer for the survivors said Avianca was- quote- ''buying a certain amount of good will.''

The Red Army Faction terrorist group struck again today in the West German capital of Bonn. The Red Army claimed responsibilty for bombing the car of the West German official responsible for countering terrorism. The fact that the official's chauffeur was on vacation and that he was driving himself may have saved his life. The blast centered on the passenger seat and blew out the side door. The official walked away from the wreckage.

Deadlocked jurors in the McMartin Pre-School molestation case in Los Angeles say videotapes of the alleged child victims being questioned sank the case. The jurors in Raymond Buckey's retrial... echoing jurors in the first McMartin trial... said interviewers asked leading questions and pressured the children by saying their friends had revealed- quote- ''yucky secrets.'' Buckey was acquitted of most charges in the first

trial... the second one ended today in a mistrial.

Mohawk Indian leaders are studying proposals by both Quebec and the federal government of Canada aimed at ending their standoff on land the tribe claims as its own. Quebec has offered to pull back a contingent of police officers surrounding the Indians if the Mohawks lay down their arms. Canadian officials have offered to buy the disputed land from its white owner.

#90208u2828 07/27/1990 ~United Press International

ANCHORAGE, AK (JULY 27) UPI - Alaska has been called the ''flyingest'' state in the nation, but until Friday regional administrators of the Federal Aviation Administration withheld information about alleged airline violations in Alaska even though national policy calls for public disclosure.

Alaska was the only place in the United States where the FAA ignored its own nationwide policy to inform the public, through the media, about legal actions against air carriers, Theodore Beckloff, Jr. said Friday in announcing that his first action as new FAA regional administrator was to end the secrecy.

''The Alaska region has heretofore not announced major proposed enforcement actions,'' Beckloff told a news conference. ''This has not been the policy throughout the United States. The policy throughout the United States has been that whenever a major proposed enforcement action is taken that information is made known to the public. We intend to follow that national procedure.''

Despite written national agency orders to disclose FAA enforcement actions against air carriers - such as penalty assessments, violation settlements, flying suspensions and carrier license revocations - the FAA in Alaska took the opposite stance and had a policy against routine release of information that was public elsewhere in the country, FAA spokesman Paul Steucke said.

FAA headquarters was unaware that Alaska was ignoring agency policy on public disclosure, Steucke said.

Steucke, public affairs officer for the FAA in Alaska, placed responsibility for secrecy with former regional administrator Franklin Cunningham who retired last month and could not be reached for comment. Steucke has been named to a new position at FAA headquarters, promoted to manager of the public and employee communications division, a position he starts next month.

''In the past six years, I tried on five occasions to get this policy changed,'' Steucke said. But he said he was unable to convince Cunningham and did not go over his head. Instead, for seven years, Steucke carried out what he said was an oral directive against disclosure.

Steucke said he considered the rejected policy to be Cunningham's prerogative and the national policy to be discretionary.

''Because the FAA is a government agency, the public has a legitimate interest in FAA's enforcement program,'' according to Chapter 13 on enforcement in the FAA national policy book.

''Publicizing enforcement actions also serves the government's strong interest in ensuring, through deterrence, compliance with Federal Aviation regulations,'' the FAA national policy book says.

Airlines are more likely to obey regulations ''to avoid adverse publicity rather than to avoid civil monetary liability,'' according to FAA policy.

FAA national policy says initial enforcement action, such as proposed penalties, ''should be made available to the media and the interested public'' and that in final enforcement actions, ''It is agency policy to publicize by news release significant legal enforcement actions against carriers ... whenever such action is likely to be of interest to the public or otherwise promotes the government's interest in deterrence.''

Beckloff declined to characterize the reasoning behind his predecessor's decision to withhold the very information that FAA policy says should be public.

Following some recent fatal air crashes in Alaska, it was later revealed that the FAA had taken previous actions against the air carriers for violating FAA regulations.

FAA actions in Alaska are of particular significance since FAA statistics, which also include non-commercial private aviation, portray the vast, largely roadless state as the flyingest in America:

Air commerce in Alaska carries the equivalent of seven times the state's population each year. Alaska has three times more air passengers per capita than other states. Alaska has eight times more pilots and 15 times more planes per capita, compared to the rest of the United States. Alaska ranks seventh in the number of airports, but first in the number of seaplane bases, including the world's busiest seaplane airport in Anchorage. Alaska has about 9,500 pilots and planes - one plane and one pilot for every 55 residents.

Beckloff also announced a new automated weather observing system was being

installed at 60 locations in Alaska this year and next year at a cost of $100,000 per site and that the same system will later be employed at sites elsewhere in the United States.

TEHERAN, (JULY 28) - An earthquake measuring 4.9 on the Richter scale shook the Roudbar region in the northwestern Iranian province of Gilan, leaving eight people injured and causing damage, Kayhan newspaper reported Saturday.

The quake hit early Friday in the same region devastated by a massive temblor on June 21 and destroyed many homes already damaged last month, the geophysics center at Teheran University said.

It said the latest quake's epicenter was also some 200 kilometers (125 miles) northwest of Teheran.

Gilan and neighbouring Zanjan province were devastated by the June 21 earthquake, measuring at least 7.3 on the Richter scale, that killed between 35,000 and 40,000 people.

KATHMANDU, (JULY 28) - A gastro-enteritis and cholera epidemic believed to have been caused by contaminated drinking water in this Himalayan kingdom has so far claimed 328 lives, Nepal television reported here Saturday,

quoting official sources.

Unofficial sources put the toll at over 500, noting that most fatalities were not reported to health authorities and that many patients do not visit hospitals or health posts.

The gastro-enteritis and cholera epidemic has been raging in Nepal for the past month and has spread to rural areas where medical facilities are poor.

According to Nepalese press reports, it is the worst epidemic of its kind for the past 40 years.

The epidemic has even reached such remote areas as Jumla, some 400 kilometres northwest of here, where it takes at least one week for medical teams from the nearest town to reach affected districts on foot.

PORT OF SPAIN, (JULY 28) - Acting President Eammon Carter Saturday declared a state of emergency throughout Trinidad and Tobago.

His announcement over state-operated radio came hours after a radical Moslem group seized Prime Minister Ray Robinson and members of his cabinet in the parliament building late Friday and claimed that an interim government had taken power.

The decree means that people are forbidden from going into the streets.

The state radio also reported that commercial buildings in the eastern sector of the capital were ablaze and that gunshots had been heard in the city's streets.

-30- 805

#90209d2920 07/28/1990 ~French/German News Agency

PORT OF SPAIN, July 28 - Acting President Eammon Carter Saturday declared a state of emergency throughout Trinidad and Tobago.

His announcement over state-operated radio came about 16 hours after a radical Moslem group seized Prime Minister Ray Robinson and members of his cabinet in the parliament building late Friday and claimed that an interim government had taken power.

The decree means that people are forbidden from going into the streets.

The state radio also reported that commercial buildings in the eastern sector of the capital were ablaze and that gunshots had been heard in the

city's streets.

Friday, Yasi Abu Bakr, the leader of the rebel group called Moslem Jamaat, took Mr. Robinson and some cabinet ministers hostage at the Parliament House.

In a radio broadcast Saturday, Mr. Bakr announced elections in 90 days and said charges would be brought against the "former prime minister and cabinet ministers."

But it was unclear whether the coup had succeeded.

Earlier in the day, acting President Eammon Carter said on government radio that the government had wrested control from the rebels and he appealed to citizens to stay off the streets.

Troops loyal to the Robinson government took up positions around the Parliament House early Saturday, local journalists reported.

Negotiations were said to be under way between the rebels and the government through the mediation of Anglican priest Knolly Clarke.

#90209d3450 07/28/1990 ~French/German News Agency

AMMAN, (JULY 28) - Jordan and Egypt said Saturday that an international conference for peace in the Middle East remained the best approach to a negotiated settlement to the Arab-Israeli conflict.

In a joint statement issued after a meeting between Jordan's Prime Minister Mudar Badran and his Egyptian counterpart Atef Sidki, the two sides dismissed the Israeli initiative as ''a waste of time'' and called for a negotiated settlement through an international peace conference.

Sidki, heading an Egyptian delegation in Amman to the Joint Jordanian-Egyptian Higher Committee for Economic Cooperation which met Saturday, said cooperation among the four member states of the Arab Cooperation Council -- Jordan, Egypt, Iraq and Yemen -- was ''the only guarantee for progress in confronting international challenges.''

He explained that changes in eastern Europe, the realisation of a united Europe in 1992 and economic alliances throughout the world ''showed that we have to join hands to be able to survive the current challenges.''

In a separate statement later, Badran stressed the importance of implementing agreements reached among the four Acc states in the field of economic cooperation.

-30- 1398
#90209d3940 07/28/1990 ~French/German News Agency
WARSAW, (JULY 28) - President Wojciech Jaruzelski, the last member of Poland's former communist top leadership still in power, Saturday rejected Solidarity-led calls for his immediate resignation.

Mr. Jaruzelski was responding to calls from legislators close to Polish union leader Lech Walesa who Friday said he should step down so as not to "brake Poland's development."

In a letter read out in parliament, the President said he would remain head of state as he considered his mandate "an integral part of an electoral calendar determined by socio-political necessities" in Poland.

Mr. Jaruzelski's mandate normally runs through 1995, following his election by a one-vote majority in parliament in July 1989.

But there has been a growing call for early presidential elections, by the end of this year or by early next year.

However in a conciliatory move, Mr. Jaruzelski promised support for a parliamentary debate to consider "constitutional questions and laws on presidential and parliamentary electoral procedures."

Deputies and Senators of the Alliance of the Centre are pressing for Mr. Walesa to stand as head of state and they want to speed up political reforms in Poland. They want a debate on constitutional questions to be held in September.

Meanwhile, the newly created Civil Movement-Democratic Action group, set up by a breakaway Solidarity faction opposing Mr. Walesa, held a founding congress Saturday.

This movement, headed by Zbigniew Bujak and Wladyslaw Frasyniuk, wants a president to be elected by universal suffrage, unlike the Alliance of the Centre which wants parliament to elect a leader, as the current constitution specifies.

At a press conference Saturday, the group's founder and editor of the daily Gazeta, Adam Michnik, said it would "definitely" put forward its own presidential candidate.

#90209u0031 07/28/1990 ~United Press International

(JULY 28) UPI - Anti-abortion lawmakers in the Louisiana legislature vowed Friday night to press for an UNprecedented special session to try and override Governor Buddy Roemer's veto of a strict abortion ban. Earlier in the day, Roemer vetoed a bill that would have made abortions illegal in Louisiana except when the woman had been raped or the victim of incest.

The vetoed measure stemmed from the failure of anti-abortion legislators to override a Roemer veto earlier this month. Roemer criticized the bill as hastily drawn up. He also said he could NOT allow the bill to become law because it did NOT- quote- ''provide necessary exceptions honoring the plight of illegally violated women.'' Pro-choice advocates applauded the veto.

Georgia officials say they have arrested three teen-agers in the firebombing of an N-Double-A-C-P office in Riverdale. Clayton Coutny Public Safety Director Ronnie Clackum said twoyear-olds and one 15-year-old were charged Friday with arson and criminal possession of an incendiary device. The Riverdale office was gutted by the firebombing. Authorities say the attack was racially motivated.

Two Dallas record stores will face misdemeanor obscenity charges if Dallas County Assistant District Attorney David Pickett follows through with his threat to prosecute. Pickett says each store sold a 13-year-old boy an album by the rap group 2-Live Crew earlier this week. A group of Dallas lawyers has volunteered to represent any stores prosecuted by Pickett's office.

#90209u0033 07/28/1990 ~United Press International

(JULY 28) UPI - A senior State Department official said Friday that fighting is expected to continue in Liberia even if President Samuel Doe is forced from office. The official told U-P-I that rival rebel groups headed by Charles Taylor and Prince Johnson are expected to vie for

control of the western African nation if Doe falls from power. Each group is fighting in the capital of Monrovia and approaching the city center from different directions.

Burma's military rulers are delaying the transition to a civilian government indefinitely. On Friday, the armed forces leaders said they will NOT hand over power until recently elected lawmakers account for campaign expenses and settle electoral disputes. A spokesman in Rangoon said the military government will form a new parliament with the winning candidates after the disputes are settled.

-30- 1006

#90209u0055 07/28/1990 ~United Press International

SEATTLE (JULY 28) UPI - The United States basketball team advanced to the gold medal game Friday but the Soviet Union squad that prevailed three days earlier failed to qualify for a rematch at the Goodwill Games.

Kenny Anderson scored 25 points and Billy Owens added 22 to lead the United States past previously unbeaten Brazil 112-95 and into the championship game Sunday against Yugoslavia, which eliminated the Soviet Union 84-78.

''We don't have a Soviet Union fetish,'' said U.S. coach Mike Krzyzewski. ''We just want to play good basketball. If we were playing the Soviets, we would be playing for the bronze medal.''

Soviet frustration extended to gymnastics despite a gold medal Friday in team competition. U.S. women scared the Soviets before settling for a silver, their best showing ever in a major meet against Soviet rivals. Furthermore, the top Soviet gymnast did so poorly her coaches pulled a technicality from the rule book to send her to Saturday's all-around finals.

While athletes competed in nine sports on the lightest medal day so far, one official hinted the Games might not even be worth contesting in 1994 as planned.

Paul Beckham, president of the Goodwill Games, hinted that Ted Turner may not stage a 1994 Games in the Soviet Union. Turner has told stockholders these Games could lose more than $26 million.

''It has to be fiscally prudent,'' Beckham said. ''That doesn't mean it has to make money. That's not what I mean. But it has to make sense. And it's a judgment decision between the quality of the event and what it cost to get there.''

Oksana Skaldina of the Soviet Union won the rhythmic gymnastics all-around

title at Spokane and the Soviet handball team edged Yugoslavia 29-27 in overtime for the gold medal. Spain beat the United States 24-19 for the handball bronze.

The United States has won 105 medals, 41 of them gold. With three gold medals Friday, the Soviet Union has taken 34 golds and 96 medals overall through 104 medal events.

Dino Radja scored 31 points to spark Yugoslavia's basketball triumph, which helped avenge a loss to the Soviets in the 1988 Olympic final. Yugoslavia shot 57 percent from the field and outrebounded the Soviets 37-25. Radja scored 8 points in a run of 12 straight by Yugoslavia over the final 4:42 of the first half, boosting the 1989 European champions to a 45-36 halftime lead. The Soviets had beaten the Americans in round-robin play but gave a hint they were struggling with a loss to Puerto Rico.

American gymnast Kim Zmeskal, suffering such pain from tendinitis that her participation was in doubt two days ago, led individual scorers with 39.661 points. Zmeskal, 14, of Houston, outscored Soviet Natalia Kalinina, 15.

''Her problem was well known, but all of our girls had injuries and problems to fight,'' said U.S. coach Bela Karolyi, the defected Romanian national coach who guided both Nadia Comaneci and Mary Lou Retton to Olympic championships. ''This is a very young team, and we gave the Soviets a very good run for their money. We issued a world-class challenge.''

The Soviets, defending Olympic champions, opened the door for a possible upset during their first event, making a series of uncharacteristic mistakes on uneven bars. World champion Svetlana Boguinskaia of the Soviet Union fell and failed to qualify for all-around competition. Boguinskaia, 17, had just performed a release move on the upper part of the bars and, as she came around to regrip, slipped and fell.

She was not injured but scored only a 9.275 after an automatic half-point deduction and finished 10th overall with 39.049 points.

The Soviets inserted her into all-around competition in place of Tatiana Lisenko, 15, the Soviet junior champion who finished ahead of Boguinskaia. Rules allow a team to substitute if a gymnast defaults for valid reasons, but the Soviets did not say why they switched.

Wrestling twins Jim and Bill Scherr celebrated their 29th birthday by overwhelming their opening foes and helping the U.S. team into the semifinals Saturday. The United States and Soviet teams both went 3-0 in round-robin competition.

Jim Scherr defeated Bulgaria's Draguya Rusev, 7-0, Japan's Akeo Akaishi, 16-0, and Turkey's Efraim Kamberoglu at 90 kilograms (198 pounds). Bill pinned Japan's Anabu Nakanishi in 1:47 of his only match at 100 kilograms (220 pounds).

Reliever Shigetoshi Hasagawa retired the first 15 Mexican batters he faced and Japan scored five runs in the eighth inning for an 11-4 baseball victory, setting up a showdown Saturday with the United States. Cuba, another medal favorite, opened with an 11-1 triumph over Taiwan shortened in the seventh by the mercy rule.

In another team sport, Jesus Rollan made 12 saves and Spain beat the United States 10-7 in water polo, eliminating the winless Americans from medal contention.

Andrew Gaze, who helped Seton Hall to the 1989 NCAA Final Four, scored 50 points in Australia's 106-78 consolation-round basketball victory over Italy. Gaze sank 9-of-12 3-point shots and 16-of-21 attempts from the field in Australia's first triumph of the tournament.

Jan Viktorsson scored 4:48 into the third period, lifting Sweden past Czechoslovakia 5-4 in the opening game of the round-robin hockey tournament. Canada edged Finland 6-5 in a night match.

-30- 5620

#90209u0080 07/28/1990 ~United Press International

NEW YORK (JULY 28) UPI - In what is being called an unprecedented act of generosity, Avianca Airlines has offered $75,000 to each survivor of a January crash on Long Island without requiring recipients to waive their right to future damages.

''It's the right thing to do,'' Avianca attorney George Tompkins said Friday. ''There's no need to hold families up.''

In a hearing before U.S. Court Judge Thomas Platt in U.S. District Court in Brooklyn, Tompkins said the Colombian airline would also continue to pay all medical expenses for the surviving victims at least until the end of the year.

''It's a great humanitarian gesture,'' said lawyer Robert Solomon, who represents two New Jersey crash survivors. ''This is an offer that has no apparent downside for any of the surviving passengers.''

Solomon said the offer was unusual because Avianca is agreeing to pay damages without a prolonged court battle and because families who accept the award will not have to give up their rights to sue for comepnsatory damages over the $75,000 limit set by the Warsaw Convention.

Avianca Flight 052, enroute from Colombia, crashed in Cove Neck, N.Y., on Jan. 25, killing 73 people and injuring 85.

Investigators determined that the jet had run out of fuel during a second approach to John F. Kennedy International Airport.

Marc Moller, whose law firm Kreindler & Kreindler represents 45 crash survivors, said he thought the airline from the drug-ravaged country was ''buying a certain amount of goodwill.''

''I think they were smart and did what was morally correct,'' Moller said.

In a possible sticking point, however, Tompkins said the airline will not give up its right to sue the Federal Aviation Administration and that the award would not be finalized until the government acknowledges this.

Platt asked the government to file an opinion by the end of the summer.

At a hearing by the National Transportation Safety Board, JFK air controllers defended their handling of the landing, saying the Avianca crew had not declared an emergency in describing their fuel situation.

At least 12 passengers injured in the crash are now suing the FAA, and approximately 100 suits have been filed against Avianca.

Moller said his clients will try to collect compensatory damages by proving that the airline is guilty of ''willful misconduct.''

He said he will argue that the pilots showed a ''reckless disregard for the safety of the passengers'' by not notifying the JFK control tower with sufficient urgency that they were almost out of fuel.

-30- 2781

#90209u0089 07/28/1990 ~United Press International

(JULY 28) UPI - Cody Risien, a 10-year veteran who has been a starter at right offensive tackle for the Cleveland Browns since the seventh game of his rookie year, announced in March he was retiring, changed his mind and reported to training camp, then had second thoughts about playing for an 11th season and left camp Thursday night.

''I just realized that that's not my focus anymore,'' Risen said. ''I don't have a burning desire to play football anymore.''

The announcement means the Browns could open the season with none of the starters from opening day a year ago in the same position on the line. Guards Dan Fike and Ted Banker are out with knee injuries. Gregg Rakoczy

has been moved from center to guard and left tackle Rickey Bolden missed most of last season with injuries.

At Wilmington, Ohio, Cincinnati Bengals All-Pro running back James Brooks skipped the veterans' first training camp practice Friday in an attempt to have his contract renegotiated.

Although Brooks is under contract for this season - for an estimated $600,000 - he wants he contract re-written to give him more money.

The Bengals say Brooks will not be fined for missing camp. Assistant general manager Mike Brown said he intends to talk with Brooks about his contract ''and see what happens.''

At Kirkland, Wash., the Seattle Seahawks signed 11-year veteran Dave Krieg for the 1990 season.

Krieg, 31, made his third Pro Bowl appearance after the 1989 season during which he became the Seahawks all-time leader in passing yards with 20,858 and completions with 1,644. Krieg also ranks first in career touchdown passes with 169 and in 300-yard games with nine.

At Platteville, Wis., referee Bob McElee and three other NFL officials held a seminar with the Chicago Bears Thursday night, answering questions about calls.

McElee said the guidelines regarding when to run the clock when the ball is out of bounds were adjusted, although the last two minutes of the first half and last five minutes of the game were not altered.

Also changed was a rule in which no part of the quarterback - hands or feet included - can cross the line of scrimmage before the ball is released.

What about instant replay?

''I find no fault with it at all,'' McElee said.

... Defensive tackle Steve McMichael skipped a costly second day of training camp. Bears Coach Mike Ditka said McMichael will be fined $2,000 for each day of camp missed, adding that Thursday's team meeting counted in the penalty.

''If you're not here and you have a contract, you're fined,'' Ditka said.

McMichael reportedly is seeking $800,000 this year and next. The Bears presented a $175,000 raise from his current $600,000 salary.

At San Marcos, Texas, the Houston Oilers released 11-year veteran tackle Bruce Davis. Davis, 34, had started 43 consecutive games for the Oilers since they obtained him from the Los Angeles Raiders in 1987. After undergoing arthroscopic surgery on both knees in the offseason, he had dropped to third team on the depth chart at left tackle.

Davis was holding out for a new contract after making $435,000 last season.

At Fredonia, N.Y., All-Pro Thurman Thomas was among seven veterans absent Friday when the Buffalo Bills opened training camp at Fredonia State College.

Running back Thomas is seeking to renegotiate his current contract, reportedly seeking about $1.3 million per year.

The Bills did sign first-round draft pick Jamies Williams, a cornerback from Fresno State, to a four-year contract. Veteran wide receiver Andre Reed agreed to a six-year contract extension worth a reported $7.5 million.

At Miami, the Dolphins signed first-round draft choice Raymond Webb, a 6-foot-6, 295-pound offensive tackle from Texas A&M and the NFL draft's ninth overall selection. Webb agreed to terms believed to be worth either $3 million over four years or $3.8 million over five years with a guaranteed signing bonus of about $1.1 million.

At Austin, Texas, the Dallas Cowboys, in another attempt to increase the pressure on first-round draft choice holdout Emmitt Smith, traded a conditional draft choice for Denver Broncos' running back Lorenzo Hampton.

(JULY 28) UPI - FRIDAY'S SPORTS TRANSACTIONS

Baseball

California - Recalled outfielder Devon White from Edmonton of the Pacific Coast League (AAA) and optioned pitcher Scott Bailes to Edmonton.

Houston - Assigned first baseman Glenn Davis to a rehabilitation program at Columbus, Georgia of the Southern League (AA); placed outfielder Javier Ortiz on 15-day disabled list; recalled outfielder Mark Davidson from Tucson of Pacific Coast League (AAA); reactivated shortstop Rafael Ramirez from 15-day disabled list; waived catcher Alex Trevino.

Kansas City - Placed pitcher Luis Aquino on the 21-day disabled list and purchased pitcher Luis Encarnacion from Omaha of the American Association (AAA).

Minnesota - Acquired infielder Nelson Liriano and outfielder Pedro Munoz from Toronto in exchange for pitcher John Candelaria; assigned Munoz to Portland of the Pacific Coast League (AAA).

New York (AL) - Placed first baseman Don Mattingly on 21-day disabled list; recalled catcher Brian Dorsett from Columbus of International League (AAA).

New York (NL) - Traded first baseman Mike Marshall to Boston for pitcher Greg Hansell, outfielder Ender Perozo and a player to be named.

Philadelphia - Released pitcher Warren Magee from Reading of Eastern League (AA); promoted pitcher Toby Borland from Clearwater of Florida State League (A) to Reading.

Oakland - Activated third baseman Carney Lansford from 15-day disabled list; optioned third baseman Scott Hemond to Tacoma of the Pacific Coast League (AAA).

Basketball

Philadelphia - Released forwards David Blackwell, Luke Jackson and Anthony Pullard and guard Troy Truvillion.

College

Arkansas - Voted to leave Southwest Conference pending official invitation from Southeastern Conference.

Jacksonville - Named Terry Alexander head baseball coach.

Northwestern - Announced basketball forward Evan Pedersen will not return to school.

UCLA - Released guard Darrin Dafney from basketball team.

Washington - Named Vic Belfiore, Cheryl Parker and Michael Wilson assistant trainers.

Football

Atlanta - Signed draft choice defensive tackle Oliver Barnett; waived tight ends Alex Higdon and Joe Meerton, running back Victor Floyd, safety John Norwood and quarterback Paul Singer.

Buffalo - Signed tight end Pete Metzelaars, fullback Jamie Mueller and first-round draft pick cornerback Jamie Williams.

Cleveland - Announced retirement of offensive tackle Cody Risien.

Dallas - Acquired running back Lorenzo Hampton from Denver for a conditional draft choice.

Denver - Signed nose tackle Greg Kragen to a three-year contract.

Houston - Released offensive tackle Bruce Davis; signed defensive tackle Jeff Alm, second round draft choice, and free agent linemen Byron Darby and Scott Camper.

Indianapolis - Signed kicker Dean Biasucci and running back Anthony Johnson.

Kansas City - Signed draft choices wide receiver Fred Jones and lineman Dave Szott; released wide receiver Howard Huckaby and defensive back Norman Floyd.

LA Raiders - Agreed to terms with running back Marcus Allen.

Miami - Signed first-round draft choice offensive tackle Richmond Webb to a five-year contract.

Minnesota - Signed center Chris Foote.

NY Jets - Acquired linebacker Willie Walker from Seattle for future draft pick.

New Orleans - Signed free-agent wide receiver Rogie Magee.

San Francisco - Agreed to terms with defensive tackle Dennis Brown; signed nose tackle Odell Haggins and safety Anthony Shelton.

Seattle - Signed quarterback Dave Krieg to a one-year contract and draft choice linebacker Terry Wooden; waived draft choice quarterback John Gromos; traded linebacker Lillie Walker to the NY Jets for a conditional draft pick.

Tampa Bay - Reached contract agreement with linebacker Winston Moss.

Hockey

Philadelphia - Named Bernie Parent goaltender instructor.

(JULY 28) UPI - The head of a group of Panamanian war widows says a mass grave of victims from the U-S invasion last December will be dug up this weekend. Isabel Corro says the grave includes the bodies of soldiers and civilians... but she says she is NOT sure how many bodies are in the grave. Corro estimates about four-thousand Panamanians died in the invasion. The U-S figure is 516.

Philadelphia police say a 19-year-old woman fell to her death Friday when she she was propelled from her small four-wheel drive vehicle. The accident occurred after the victim, Danielle Ferriar, struck a concrete barrier. The impact caused her to fly out the passenger window of her vehicle and off an expressway ramp.

100 freelance writers are scribbling away in an attempt to knock out a full-length movie script in 48 hours. The scribes kicked off the session Friday at a shopping center in Los Angeles. Each writer is scheduled to spend 30 minutes picking away at a word processor located in the middle of the mall. The finished product will be revised during the next seven weeks.

#90209u0169 07/28/1990 ~United Press International
RIVERDALE, GA (JULY 28) UPI - Three teenagers were arrested Friday night in an apparently racially motivated firebombing that gutted an NAACP office, police said.

Clayton County Public Safety Director Ronnie Clackum said two 16-year-olds and a 15-year-old were in police custody Friday evening, charged with arson and criminal possession of an incendiary device.

Earl Shinhoster, regional director of the NAACP, expressed shock at the age of the suspects.

''That's young. That is very young,'' Shinhoster said. ''It does give us cause to pause and wonder about what kind of indoctrination and orientation our young people are getting, and from where that is coming.''

Clackum said police were able to find suspects because of cooperation between federal, state and local investigators.

''Most crimes committed by cowards in the dead of the night certainly are more difficult to solve and bring to a conclusion,'' Clackum said.

Clackum said the Tuesday firebombing that destroyed the inside of the office apparently was racially motivated.

The attack was related to ongoing racial tensions among students from Riverdale Middle School, the safety director said, but he did not elaborate on the situation at the school.

He did say the racial antagonists were ''black as well as white.'' Shinhoster added that the NAACP had received reports of racial strife at several Clayton County schools, including Riverdale Middle School.

Clackum said the evidence leading to the arrest came from a fingerprint lifted from a piece of evidence found at the firebombing scene. He said that fingerprint matched one of the juvenile's fingerprints.

The 15-year-old also is a suspect in a July 16 bombing that slightly damagedthe exterior of the NAACP office. Clackum said the 15-year-old allegedly convinced the two 16-year-olds to help him with the second bombing.

#90209u0170 07/28/1990 ~United Press International

STARKE, FL (JULY 28) UPI - A 38-year-old man condemned for the fatal stabbing of a housewife in 1983 was put to death in Florida's first execution since the state's electric chair malfunctioned in May.

Anthony Bertolotti was pronounced dead at 7:07 p.m. EDT Friday, two minutes after the electric current was switched on. Officials said the electric chair performed without problems.

Bertolotti's lawyers had failed to win an 11th-hour stay from the U.S. Supreme Court, which previously had rejected his appeals. A federal appeals court earlier Friday also denied a stay for the man condemned for killing Carol Ward, an Orlando housewife who let him in her home to use the telephone.

''I would like to say I leave with peace and love in my heart, no animosity,'' Bertolotti said just before he was strapped into the electric chair. ''For those I love, be strong and know that God is with them.''

He was the first Florida inmate to be put to death since the botched execution of Jesse Tafero. Flames shot from the chair's headpiece during Tafero's execution May 4 and executioners had to send three surges of electricity through his body before he was declared dead.

Officials later said a replacement sponge in the headpiece was to blame.

Three small puffs of smoke rose from the electrode on Bertolotti's leg as he was executed. No flame or smoke was visible from the headpiece.

Bertolotti, who had been visibly reluctant as he was led into the death chamber by two guards, kept his eyes down except for six glances to his lawyer, Jerome Nickerson, who twice gave him a thumbs-up sign.

Bertolotti was the 135th person executed in the United States and the 23rd in Florida since the Supreme Court lifted its ban on capital punishment in 1976. He was the 15th executed in the nation this year.

The 11th U.S. Circuit Court of Appeals in Atlanta had previously granted stays of execution to three other Florida death row inmates after their lawyers argued in the wake of the Tafero execution that the state's electric chair was not in good working order.

The state tested the chair earlier this week and sent the results to the appeals panel, which denied Bertolotti's request for a stay after oral arguments Friday morning.

Gov. Bob Martinez said Bertolotti's death should put capital punishment back on track in Florida.

''As a result of today's court rulings, Florida should now be able to resume carrying out its capital punishment statute,'' he said. ''It is gratifying that the courts concluded Florida's electric chair does, in fact, work as it is designed to. That fact was borne out by extensive testing earlier this week, and the completion of this execution proves it conclusively.''

Bertolotti was sentenced for the Sept. 27, 1983, murder of Ward in Orlando. According to court records, he approached her while she was working in her yard and asked permission to use her telephone.

She allowed him inside her house, where he armed himself with a knife and robbed her of $30. Ward tried to persuade Bertolotti to put down the knife but he became angry and stabbed her, the court records said.

At some point, according to the records, the first knife broke, so Bertolotti got another and continued to stab until Ward died. An autopsy concluded there were 14 separate stab wounds and also revealed there had been sexual intercourse at some point during or after the attack.

#90209u0178 07/28/1990 ~United Press International

(JULY 28) UPI - Lebanese Christian General Michel Aoun is easing is hard-line opposition to an Arab-moderated peace accord for Lebanon. Aoun yesterday said he will accept the agreement if a few changes are made. Observers say Aoun is compromising to ensure himself an important military

post.

Florida executed a 38-year-old man last night for the 1983 fatal stabbing of a housewife. Anthony Bertolotti was put to death in the same electric chair that malfunctioned in May. Officials say the state's chair performed without a problem. The U-S Supreme Court earlier refused to stay the execution.

The defense in the drug and perjury trial of Washington, D-C, Mayor Marion Barry rested its case yesterday without putting Barry on the stand to testify on his own behalf. The mayor later said his attorney advised him there was NO need to take the stand. Quoting Barry- ''It'd have been good Perry Mason drama... but my life is on the line.''

Zsa Zsa Gabor began serving a three-day jail sentence yesterday for slapping a Beverly Hills motorcycle officer last summer. The former glamour queen will spend her prison time at a small facility 20 miles west of downtown Los Angeles where each inmate has a private cell.

Legendary actress Katharine Hepburn and jazz great Dizzy Gillespie are among this year's five Kennedy Center honorees. Other recipients are composer Jule Styne, director Billy Wilder and opera star Rise Stevens. The honorees will be recognized for their lifelong contributions to art... during the traditional Honors weekend in early December.

LOS ANGELES (JULY 28) UPI - Federal authorities are investigating reports of a near-collision over Long Beach Airport between a Dallas-bound American Airlines jet and a single-engine plane, it was reported Saturday.

The American Airlines jet with 127 passengers was forced to take evasive action Thursday after the pilot noticed the small Cessna heading into the jet's flight path, the Los Angeles Times reported.

Veteran American Airlines pilot T.R. Pollizi filed a complaint with the Federal Aviation Administration, reporting that the Cessna came within 300 to 400 feet of his MD-80 shortly after he took off about 11:45 a.m.

Airline officials said Pollizi was forced to immediately level off his plane to avoid a collision.

There were no injuries to the passengers and Flight 216 continued to Dallas, airline spokesman Tim Smith told the Times.

The student pilot at the controls of the Cessna was practicing takeoffs and landings when the incident occurred, FAA spokeswoman Elly Brekke said.

Brekke said an initial investigation ruled out air traffic controller error, since the student pilot had been warned to ''move further out from the airport before landing.''

Controllers had also issued an advisory to the American Airlines pilot that the Cessna was in the vicinity, Brekke said.

Polizzi reported that moments after taking off towards the northwest, he noticed the Cessna about a mile to his left and 200 feet above him. As he leveled off the jet, the Cessna passed 100 feet above the airliner and 300 to 400 feet off its left side.

The near-collision reportedly occurred at an altitude of about 700 feet and one-half mile northwest of Long Beach Airport.

Brekke told the Times such close calls are ''rare occurrences.'' The FAA's investigation is expected to determine, among other things, the accuracy of the American Airlines pilot's estimates.

In August 1989, an Alaska Airlines plane on a landing approach to Long Beach Airport reported being forced to swerve to avoid a light plane flying within 150 feet of the airliner.

#90209u0181 07/28/1990 ~United Press International

WASHINGTON (JULY 28) UPI - Despite promises of surprises in the defense half of the federal drug and perjury trial of Mayor Marion Barry, the embattled public official never took the stand to testify on his own behalf.

Barry's lawyer, R. Kenneth Mundy, rested his case Friday, telling U.S. District Judge Thomas Penfield Jackson the defense ''considered extensively'' having Barry testify but that it was the mayor's ''informed decision'' not to take the stand.

''The burden is on the government to prove Marion Barry guilty of all 14 counts,'' Barry said. ''My lawyers feel they have not done that, and therefore there is no need for me to (testify). It'd have been good Perry Mason drama, but I'm not about Perry Mason drama, not during this. My life is on the line.''

Barry, 54, faces three felony counts of perjury and 11 misdemeanor charges of cocaine possession and conspiracy. He could be sentenced to 26 years in prison and fined $1.85 million if convicted on all counts.

The jury could get the case next week.

The defense case lasted a week and followed two weeks of jury selection and five weeks in which the government presented witnesses who claimed they used cocaine with Barry at various times since 1983.

Mundy called 17 witnesses to testify in Barry's defense, attempting to cast doubt on specific dates and allegations from a number of the misdemeanor cocaine possession charges.

He also sought to discredit the testimony of the government's chief witnesses and question the motives of federal investigators in targeting the three-term Democratic mayor.

He alleged at a bench conference Thursday that the FBI agents who participated in Barry's Jan. 18 sting at the Vista International Hotel in Washington were part of an ''assault force'' targeting black elected officials nationwide.

The FBI denied the allegation, and Assistant U.S. Attorney Judith Retchin said in court Friday there is ''absolutely no truth to the charges.''

Retchin added that the female FBI agent who participated in the sting - posing as a friend of Barry's former lover, Rasheeda Moore, and eventually selling the crack cocaine Barry is seen smoking on a surveillance videotape - was the first agent asked to play the part.

Mundy had charged that ''several'' black female FBI agents turned down the role, calling it ''morally repulsive.''

Mundy's allegation that Barry is the target of a conspiracy against black officials was the first time the issue had arisen in the courtroom.

The government called three rebuttal witnesses Friday to respond to claims raised during the defense case, and planned to call at least one more Monday.

Mundy asked that the defense then be allowed to recall two more witnesses in ''surrebuttal.''

If the case ends Monday, Jackson said attorneys would likely be given Tuesday off to prepare before closing arguments Wednesday.

Delois Mise, who worked in the District of Columbia Police Department for 16 years, testified Friday she shared cocaine with Sgt. James Stays at a picnic in Maryland in 1985.

Stays has headed Barry's police security team throughout Barry's 12 years in office, and had testified he did not see Barry use cocaine on a trip to

the Virgin Islands and never used the drug himself.

Terry Lee Brenay, former captain of the ship Brigadoon in the Virgin Islands, then testified he smoked marijuana with Barry and former city worker Charles Lewis in the cabin of the boat on a 1986 trip.

Lewis is Barry's main accuser and detailed the 1986 trip in his testimony. Two defense witnesses had testified they were on that boat trip and did not see marijuana or cocaine use.

Brenay testified those witnesses - Albert and Carmen Benjamin - were aware of the marijuana use and ''expressed alarm ... disapproval.''

The government's case, highlighted by the videotape of Barry smoking crack included 26 witnesses - 10 of whom testified they used cocaine with Barry or supplied drugs to him in 20 homes, 15 hotels, four boats and two government offices in the District of Columbia, Atlanta, the Virgin Islands and the Bahamas.

#90209u0189 07/28/1990 ~United Press International

BATON ROUGE, LA (JULY 28) UPI - Anti-abortion lawmakers vowed to press for an unprecedented special session and an attempt to override Gov. Buddy Roemer's veto of an abortion ban he called an insult to women.

Roemer on Friday vetoed the bill, which had been designed to provide the Supreme Court with an opportunity to override the 1973 Roe vs. Wade decision allowing abortion on demand.

Roemer said abortion as a form of birth control must be curtailed, but contended the bill passed by the Louisiana Legislature before it adjourned July 9 ''flies in the face of common sense and our own constitution.''

Pro-choice activists hailed the governor's veto as a positive step for women and the state and and called on the Legislature to let the issue rest.

But the author of an even more restrictive anti-abortion measure vetoed by Roemer three weeks ago denounced Roemer and urged the Legislature to return to try to override the latest veto.

Rep. Louis ''Woody'' Jenkins, a Democrat, conceded the bill vetoed Friday was flawed. He said the Legislature passed it hurriedly in the closing days of its 1990 session to satisfy Roemer's demands for exceptions for victims of rape and incest, after the governor had vetoed Jenkins' original bill because it did not contain the exceptions.

An attempt to override that veto during the regular legislative session failed by a handful of votes in the state Senate, leading to the passage of the second bill. In order to override now that the session is over, the Legislature would have to call itself back to Baton Rouge for a veto session, something it has never done.

Roemer said the bill was insensitive to women and conflicted with existing criminal law in several respects.

It would make virtually all abortions a misdemeanor crime of simple battery, but with penalties of up to 10 years in prison and fines up to $100,000 for doctors who performed them. It would allow abortions to save a woman's life, but Roemer said the rape and incest exceptions were too restrictive and narrow.

The bill would have required rape victims to report the assault within seven days in order to obtain a legal abortion. It also failed to provide exceptions for victims of simple rape, meaning a woman who was mentally incapacitated by drugs or alcohol or a consenting woman who was mentally retarded would not be protected.

''A seven-day reporting period is totally unworkable and uncaring and unrealistic. To ignore simple rape as if it didn't exist is an insult to all women. The vulnerability of mentally retarded women under this bill is totally unacceptable,'' Roemer said.

''The fact that the bill does not provide necessary exceptions honoring the plight of illegally violated women is enough reason to veto this bill.''

He also had problems with the manner in which the bill was hastily drawn on the second-to-last day of the legislative session. It was created by amending a bill originally designed to reduce the penalty for attacking anyone who desecrates the flag.

In addition to the substantive weaknesses, Roemer said the bill was developed at the last minute without full scrutiny or open hearings, was enclosed in a non-germane flag-burning bill and was too vague.

Anti-abortion activists said they were betrayed by Roemer.

''Governor Roemer has abandoned thousands of unborn children who will continue to die needlessly in Louisiana,'' said Sharon Fontenot, legislative director of the Louisiana Right to Life Federation. ''He has bowed to the pro-abortion extremists who insist that abortion be available for any reason throughout all nine months of pregnancy.''

Roemer, who vetoed Jenkins' anti-abortion measure because it failed to provide exceptions for victims of rape and incest, said he believed abortion on demand should be curtailed but that the hastily created substitute did not meet his standards.

''We are appalled that the governor would veto this bill after he said he wanted rape and incest exceptions and the Legislature gave him that,'' Jenkins said. ''We are asking the Legislature to come back in a veto session and override his veto not of the flag-burner bill but of the original Louisiana Human Life Act, which Roemer vetoed during the regular session.''

-30- 4527

#90209u0203 07/28/1990 ~United Press International

(JULY 28) UPI - While banging out 10 runs, it took just 96 pitches from Frank Viola for the New York Mets to wrest the eastern divison lead from the Pittsburgh Pirates.

Viola, pitching on three days rest, breezed through eight innings Friday night to lead the Mets into sole possession of first place with a 10-1 victory over the St. Louis Cardinals.

Entering Friday's action, New York was in a first-place tie with the Pirates, who have led the division for all but four days since April 22.

In becoming the NL's first 14-game winner, Viola, 14-5, limited the

Cardinals to just three hits. The left-hander was helped supported by Dave Magadan's four RBI and an attack that posted all 10 runs by the third inning.

''Ten runs is 10 runs, you got to love that,'' Viola said. ''I just wanted to give us a chance to get ahead of Pittsburgh. After walking seven in the last start in Philadelphia, being able to come out tonight and throw strikes and get the guys off the field it was good.''

Viola, allowed singles by Milt Thompson and Rex Hudler in the third inning when the Cardinals scored their run and gave up a double to pitcher Scott Terry in the eighth. He walked one and struck out four.

Kevin Brown, making his major-league debut after being called up from Tidewater, pitched the ninth inning.

''I think Frankie felt real comfortable tonight with the early lead,'' Mets Manager Bud Harrelson said. ''On three days rest, it helped him not to have to throw so many pitches. he had 96 pitches in eight innings. And that was nice.''

Viola said he didn't have trouble with the fact that he was pitching on three days rest.

''I did it a lot in Minnesota (pitching on three days rest), fortunately for me I have an arm that comes back pretty quick,'' said Viola. ''When a team scores 10 runs for you it's a lot easier to throw it too. You put those ingredients together it's not too bad.''

New York scored five runs in the first off Bryn Smith, 7-8, added another run in the second and four more in the third when Magadan hit a bases-loaded triple.

''Viola's a real pro, it's a different game when Viola pitches when it's out of hand practically,'' Cardinals Manager Red Schoendienst said. ''He pitches different and knows how to get the outs.''

''Seemed like every time they hit the ball, if they hit it good it was a base hit. And if they didn't, it was a base hit anyway.''

Elsewhere in the National League, Philadelphia sunk Pittsburgh 5-3, Chicago blanked Montreal 2-0 in 10 innings, San Diego rocked Houston 6-2, San Francisco tripped Cincinnati 4-3 and Los Angeles scalped Atlanta 5-4 in 12 innings.

In the AL, it was: New York 3, Cleveland 0, game one; New York 4, Cleveland 1, game two; Toronto 1, Texas 0; Boston 1, Detroit 0; Chicago 7, Milwaukee 4; Minnesota 9, Oakland 4; Baltimore 9, Kansas City 2 and

Seattle 8, California 1.

Phillies 5, Pirates 3

At Pittsburgh, Charlie Hayes went 3 for 4 with a homer and Dennis Cook pitched five innings of two-hit relief to lift Philadelphia. Cook improved to 7-2 and Joe Boever recorded the final out for his ninth save. Reed, 2-2 allowed four runs on eight hits over 5 2-3 innings to take the loss.

Cubs 2, Expos 0, 10 innings

At Montreal, pinch-hitter Gary Varsho and Ryne Sandberg slashed 10th-inning RBI singles and Greg Maddux pitched a two-hitter over nine innings to lead Chicago. Bill Sampen, 8-3, allowed both runs and took the loss. Maddux, 7-9, and Montreal starter Mark Gardner each pitched nine shutout innings. Bill Long pitched a scoreless 10th to earn his third save.

Padres 6, Astros 2

At San Diego, Jack Clark belted a three-run homer, Joe Carter added a two-run shot and Andy Benes pitched 6 2-3 strong innings to power San Diego to its fifth straight victory. Benes, improved to 7-7. Bill Gullickson, 6-8, worked 5 2-3 innings and allowed six runs to take the loss.

Giants 4, Reds 3

At San Francisco, Scott Garrelts scored from second on pinch-hitter Bill Bathe's single with one-out in the ninth inning to lift San Francisco to its third straight win. The Reds extended their losing streak to five games. Scott Scudder 2-4, took the loss. Don Robinson, 7-1, pitched his first complete game of the season for the win.

Dodgers 5, Braves 4, 12 innings

At Los Angeles, Mike Sharperson singled home Juan Samuel with one out to lift Los Angeles in a five-hour game that featured a major-league record for runners left on base. In the longest game in the major leagues this season, the Dodgers left 25 runners on base, establishing an all-time high for a team in a 12-inning game. Los Angeles left the bases loaded six times. Ray Searage, 1-0, pitched the final two innings for the win. Rich Luecken, 1-3, took the loss.

(JULY 27) UPI - More strong thunderstorms roved through parts of the Midwest and Southwest early Saturday and Tropical Storm Bertha gained

strength in the ocean off Florida, threatening to ruin the weekend weather for beachgoers along the Eastern Seaboard.

Isolated strong thunderstorms dotted southern and central Iowa and southeast Nebraska, while widely scattered showers pelted northern Iowa counties, the National Weather Service said.

The heavy rains followed downpours Friday that flooded streets and underpasses in Des Moines, Iowa, and swamped highways in the Mason City area. A flood-flash flood watch was in effect early Saturday for most of the state.

Minor flooding was also a concern in Kansas, where thunderstorms from 45 miles west of Salina eastward to near Beverly pelted the ground with small hail and inundated soil already saturated from previous heavy rains. Storms Friday stirred up 60 mph winds in Longford, Kan., and caused flooding in Tescott, which was swamped with almost 3 inches of rain in one hour Friday evening.

Bands of scattered thunderstorms early Saturday also dotted western and central portions of Oklahoma and northern Texas. The heaviest rain was northwest of Guymon, Okla., in the state's panhandle. Elsewhere, patches of rain extended from eastern New Mexico into the area around Lubbock, Texas, and parts of the Texas Panhandle.

Forecasters said a tropical depression swirling in the Atlantic less than 300 miles east of Cape Caneveral, Fla., developed early Saturday into Bertha, the second Atlantic tropical storm of the season.

The National Weather Service said the storm, with winds to 50 mph, might eventually reach hurricane status and could stir up rain and stiff winds along the Atlantic coast, even if it remains well out at sea and moves to the northeast, as some computer projections indicate.

''It is so large, it could bring decent winds and rain onto the coast ... the entire mid-Atlantic coast, from Florida to goodness-knows-where,'' said meteorologist Jack Beven at the National Hurricane Center near Miami. ''It depends on how fast the system moves.''

Fair weather predominated over Washington, Oregon and California. Washington was expected to enjoy mostly sunny skies through the weekend, with highs along the coast near 80 and into the 90s inland. Oregon was enjoying fair skies with light winds and morning fog clinging to the coastal area.

Haze and fog cut early morning visibility in parts of northern and central Illinois, and skies were cloudy throughout the region. Fog also hung along the northern California coast.

Dense morning fog settled in over along the rivers in the tri-state area of Kentucky, Ohio and West Virginia.

#90209u0205 07/28/1990 ~United Press International

(JULY 28) UPI - Glenallen Hill may be afraid of spiders, but not of hanging knuckleballs ... or pennant races.

Hill's third inning homer backed the five-hit pitching of Dave Steib and two relievers Friday night to lead the Toronto Blue Jays to a 1-0 victory over the Texas Rangers. The win kept Toronto one game ahead of Boston, also a 1-0 winner, in the AL East.

''These are the last two months of the season and it's time to get serious '' Hill said. ''We're in first place and you know the other teams are going to start bearing down on us.

''Well when that happens, you have to start bearing down too.''

Earlier this year Hill, who suffers from arachnophobia - a fear of spiders - had spent time on the disabled list after injuring himself during a nightmare about them.

Charlie Hough's knuckler didn't look scary to Hill, though, as he took the veteran deep with one out in the third. Hough, 7-7, allowed only eight hits over seven innings, striking out six and walking one in dropping his third straight decision.

Pitching and defense picked up the slack for the rest of the Toronto hitters.

Stieb, 13-3, allowed five hits over seven innings while striking out three and walking four. Duane Ward and Tom Henke each contibuted a hitless inning of relief, with Henke picking up his 21st save.

Stieb, 8-1 in his last 12 starts, also got some help behind him.

''The two big plays of the game were by Mark Whiten in the field,'' Stieb said, referring to the right fielder's assist in the fifth inning and running catch in the sixth off Pete Incaviglia. ''It was good defense that won it for us today.

''I had good stuff, I was mixing up fastballs and breaking balls pretty good, although I would have liked to have walked fewer than I did.''

Stieb, on a pace for his first 20-win season, sounds as if he would prefer

some post-season action.

''My objective is to pitch as well as I can and hope we go and get some runs,'' he said. ''It doesn't matter who gets the wins, as long as we keep winning.''

The Rangers' best scoring chance came in the fifth inning. With runners on first and second and one out, Jeff Huson singled to right field. Steve Buechele tried to score from second base on the play but Whiten's throw to catcher Greg Myers easily nailed Buechele at the plate.

''Myers made a heck of play on that throw,'' Rangers Manager Bobby Valentine said. ''It was a tough job staying with a 90-mile-an-hour throw that came in on one hop.

''We knew Whiten could throw and it was a great play. He can throw as well as anybody out there.''

Texas threatened again in the sixth but Whiten made a good catch on a drive by Incaviglia and Stieb struck out Buechele with two runners on to end that threat.

''Good pitching always stops good hitting, and they've got a good hitting ballclub over there,'' Toronto Manager Cito Gaston said. ''But we made some great plays out there in the field tonight and that, combined with good pitching, wins ballgames.''

Elsewhere in the American League: New York swept Cleveland 3-0 and 4-1 in a doubleheader, Boston nipped Detroit 1-0, Chicago topped Milwaukee 7-4, Minnesota blasted Oakland 9-4, Baltimore slapped Kansas City 9-2 and Seattle crushed California 8-1.

In the NL, it was: Chicago 2, Montreal 0, in 10 innings; New York 10, St. Louis 1; Philadelphia 5, Pittsburgh 3; San Diego 6, Houston 2; San Francisco 4, Cincinnati 3; Los Angeles 5, Atlanta 4 in 12 innings.

Yankees 3, Indians 0, 1st game
Yankees 4, Indians 1, 2nd game

At Cleveland, Andy Hawkins pitched a three-hit shutout and Steve Balboni and Roberto Kelly hit home runs to lead New York in the opener. Hawkins, 2-8, who won for the first time since May 6, struck out five and walked none. Greg Swindell, 6-6, took the loss.

In the nightcap, Jeff Robinson pitched seven strong innings as the Yankees swept the Indians. Robinson, 3-6, gave up a run on eight hits in seven innings. Dave Righetti pitched the ninth for his 21st save. Mike Walker fell to 0-2.

Red Sox 1, Tigers 0

At Detroit, Tom Bolton and two relievers pitched a five-hit shutout to outduel Jack Morris. Bolton, 4-1, gave up four hits over 7 2-3 innings. Rob Murphy worked the ninth for his fifth save. Morris, 8-13, surrendered only four singles in pitching his fifth complete game of the season.

White Sox 7, Brewers 4

At Chicago, Carlton Fisk and Dan Pasqua slammed home runs to power Chicago. Jack McDowell, 6-5, gave up seven hits and three runs while walking three and striking out four over 6 1-3 innings. Ron Robinson, 4-2, gave up five runs and eight hits in just 3 2-3 innings.

Twins 9, Athletics 4

At Minneapolis, Brian Harper extended his hitting streak to 16 games with a two-run double to highlight a six-run fifth inning and make a winner of Roy Smith, 5-8. Mike Moore, 9-9, gave up nine hits and eight runs in 4 2-3 innings.

Orioles 9, Royals 2

At Kansas City, Mo., Phil Bradley went 4 for 5 and drove in two runs and rookie Ben McDonald won for the second time in two starts to lead Baltimore. McDonald, 2-0, gave up six hits and two runs, while walking four and striking out seven over 6 2-3 innings. Storm Davis, 4-7, gave up five runs in three-plus innings. George Brett had his 16-game hitting streak snapped.

Mariners 8, Angels 1

At Seattle, Erik Hanson tossed a four hitter, Ken Griffey contributed three hits and Henry Cotto added two hits and scored three runs to lead the Mariners. Hanson, 11-8, struck out five and walked two over eight innings. Mark Langston, 4-13, lasted only 2 2-3 innings, allowing seven hits and six runs.

#90209u0206 07/28/1990 ~United Press International

YUMA, AZ (JULY 28) UPI - Two Marines were killed and three others were injured in the crash of a military helicopter during a night training mission, a spokesman said Saturday.

The crash of the Marine Corps UH-1N Huey helicopter occurred at 9:25 p.m. MST Friday during training some 55 miles west of the Marine Corps Air

Station Yuma in the Chocolate Mountain bombing range, Gunnery Sgt. H.L. Wheeler said.

The identities of the dead and injured were not immediately released, pending notification of relatives by Marine Corps officials.

The three injured Marines were transported to the Yuma Regional Medical Center, where they were listed in stable condition.

Wheeler said the helicopter was carrying only practice rockets and small-caliber ammunition. The crash site was located on government land and no civilian property was involved.

The helicopter and its crew were assigned to the Medium Light Attack Helicopter Squadron-367 of the Third Marine Aircraft Wing from Camp Pendelton, Calif.

Wheeler said the unit flying the Huey has been training in Yuma since July 20 and will continue operations through Aug. 3. The cause of the crash is under investigation, he said.

#90209u0239 07/28/1990 ~United Press International
FORT CHAFFEE, AR (JULY 28) UPI - An Army Blackhawk helicopter crashed in a densely wooded area of Fort Chaffee late Friday, killing five of the 13 soldiers aboard, the second fatal crash of a military helicopter within hours.

Officials at Fort Chaffee said the crash occurred about 11:25 p.m. while

the helicopter was taking part in a military exercise.

A base official who declined to be identified said Saturday the crash occurred about 20 miles east of Fort Smith on the Oklahoma border.

''It's some of the roughest part of Fort Chaffee. It went down in a densely wooded area,'' he said. ''It's extremely rough.''

The official said the survivors of the crash all were transported to a Fort Smith hospital.

''They were in varying degrees of injury . A couple of them walked away from the crash,'' he said.

The official said the troops aboard the helicopter were not stationed at Fort Chaffee but he did not know exactly where they were from.

Names of the dead were being withheld Saturday until their families are notified.

The Army Safety Center at Fort Rucker, Ala. will investigate the cause of the crash.

The Marine Corps announced that a UH-1N Huey chopper went down Friday night during a training flight west of Yuma, Ariz., killing two Marines and injuring three others.

The crash was under investigation.

#90209u0241 07/28/1990 ~United Press International

NEW YORK (JULY 28) UPI - An AIDS-infected teacher is suing for insurance money to fund a bone-marrow transplant from his identical twin brother.

State Supreme Court Justice Elliott Wilk ordered hearings to begin Monday.

''To them, it's money. To me it's my life,'' Thomas Bradley told the New York Post.

Empire Blue Cross and Blue Shield, the carrier that Bradley is suing, said in court Friday the insurance contract excludes coverage for experimental and investigative procedures such as bone-marrow transplants.

But Mark Scherzer, Bradley's lawyer, argued the procedure isn't experimental. The procedure would be performed at Johns Hopkins Oncology Center in Baltimore.

Bradley has tested IV positive and said he has no symptoms of the disease yet. His twin, Robert Bradley, told the Post he is willing to give his brother the bone marrow to save his life. ''We're more than brothers. We're best friends,'' he said.

The 46-year-old bachelorve together in Queens and have taught in the Bayport-Blue Point School district in Suffolk County on Long Island.

Johns Hopkins has performed six bone-marrow transplants on AIDS patients, using marrow from identical twins. Transplants appear to have eradicated the virus in two of the recipients, according to the New York Daily News.

#90209u0253 07/28/1990 ~United Press International

FORT CHAFFEE, AK (JULY 28) UPI - An Army Blackhawk helicopter crashed in a densely wooded area of Fort Chaffee late Friday, killing five of the 13 soldiers aboard, the second fatal crash of a military helicopter within hours.

Cecil Green, Fort Chaffee information officer, said the chopper went down during a training exercise at 11:25 p.m., about 20 miles east of Fort Smith on the Oklahoma border.

It took over an hour for rescue teams to hike in from nearest road to the crash site, Green said.

''It's some of the roughest part of Fort Chaffee. It went down in a densely wooded area,'' said another base official who declined to be identified. ''It's extremely rough.''

Green said names of the dead and injured were withheld until relatives were notified.

Green said two Army helicopters airlifted the eight survivors to St. Edward Mercy Medical Center in Ft. Smith. Some of the soldiers walked away from the crash but others are believed to be seriously injured.

The troops aboard the helicopter were not stationed at Fort Chaffee but their home base was not released.

Green said the exercise was routine and part of the Joint Readiness Training Center activities.

It was the third helicopter crash in the two years JRTC has been at Fort Chaffee. No injuries were reported in the other two crashes.

The Marine Corps announced that a UH-1N Huey chopper went down Friday

night during a training flight west of Yuma, Ariz., killing two Marines and injuring three others.

Both crashes are under investigation.

#90209u0255 07/28/1990 ~United Press International

ROME (JULY 28) UPI - Italian Prime Minister Giulio Andreotti won a parliamentary vote of confidence Saturday approving his rapid replacement of five ministers who resigned in a dispute over a new broadcasting law.

The Chamber of Deputies supported a government resolution approving the prime minister's appointments, 356-177.

The rebel ministers from the left-wing faction of the dominant Christian Democratic Party resigned this week over the government's decision to force a confidence vote on a law governing the allocation of advertising space on public and private television.

The vote on the broadcasting law is scheduled to be held late Tuesday and the government is expected to win comfortably as the opposition Communist Party has announced it will not participate.

The five parties of the government coalition - Christian Democrats, Socialists, Social Democrats, Republicans and Liberals - have all said they will support a government-sponsored amendment to the bill.

Even the disgruntled left-wing faction of the Christian Democrat Party has said it will accept party discipline and support the government in Tuesday's vote.

The ministerial resignations were the first major crisis of Andreotti's year-old government and forced the 70-year-old statesman to hurry back Thursday from talks in Moscow with President Mikhail Gorbachev.

At the heart of the row over the broadcast advertising law was an attempt to clip the wings of buccaneering television entrepreneur Silvio Berlusconi, whose three private networks dominate the advertising market.

Berlusconi is backed by the Socialist Party, whose support is vital for the survival of the government coalition.

The left-wing Christian Democratic faction, led by former Prime Minister Ciriaco de Mita, has been battling to safeguard the position of the state broadcasting corporation RAI and to enable it to compete more effectively with Berlusconi's channels.

Political commentators said there were other political issues behind the feud within Christian Democrat Party ranks as well.

Some saw the battle as the beginning of a comeback by de Mita, who was ousted from the dual role of prime minister and party leader last year.

Andreotti was particularly keen to avert the embarrassment of a government collapse as Italy has just begun a six-month term as president of the 12-nation European Community.

-30- 2621

#90209u0266 07/28/1990 ~United Press International

CARMEL, IN (JULY 28) UPI - Hoping to avoid the controversy besetting this year's PGA Championship, the all-white club hosting next year's tournament is spreading the word that it welcomes applications from blacks.

Crooked Stick Golf Club president Michael Browning said no blacks have ever applied for membership there, but that the club has no policies that would exclude black members.

''That you pay your dues and can get around the golf course in 4 hours and 15 minutes are about the only requirements we have,'' said Browning, who also serves as general chairman of the 1991 PGA Championship.

''We've never had a black member, but that's because we've never had a black apply and that is not a self-serving statement,'' Browning said. ''I just know our membership, and I've talked with past presidents and board members about it, and I can assure you that it is not a problem at Crooked Stick. If a guy meets the requirements, he could be purple and be accepted.''

This year's PGA Championship site, Shoal Creek Country Club of Birmingham, Ala., became the center of controversy when founder Hall Thompson said the club did not accept black members and would not be pressured into doing so.

Thompson later apologized, and Shoal Creek officials denied the club ever had a policy prohibiting black members and gave assurance that blacks would be accepted.

However, the Southern Christian Leadership Conference, a civil rights group, plans to protest the Aug. 9-12 event, and four major sponsors have withdrawn.

Browning said he was offended by Thompson's commments.

''I think they were wrong. I think they were an embarassment to the PGA, and I think it's very sad those things were said,'' Browning said. ''I

think he's sorry he said them, and I'm happy he retracted his statements and apologized.''

Officials at three other clubs scheduled to host the PGA Championships echoed Browning's contention that, despite having no black members, they would welcome them.

The PGA championship will be played at Bellerive Country Club in St. Louis in 1992; at Aronomink Golf Club in Newton Square, Pa., in 1993, and at Oak Tree Golf Club in Edmond, Okla., in 1994.

Forrest Jones, a black who is head professional at Coffin Golf Club in Indianpaolis and a member of the PGA of America, said economics rather than racism is the reason PGA country clubs lack black members. For example, membership fees for Crooked Stick are $22,000 for initiation and $3,900 annual dues.

''It's not the PGA. I think it's the system, the overall socioeconomic makeup of America as it relates to golf,'' Jones said. ''Blacks aren't in the mainstream of golf.

''I'm sure because (Thompson's) statements were made that the membership process will be monitored by someone. It behooves Shoal Creek to do some recruiting (of blacks) to show what they're all about. There certainly are people in the Birmingham area qualified educationally and financially to recruit.''

A PGA Tour representative said the tour will make an announcement as early as Monday limiting its events to clubs that have open membership.

CHICAGO (JULY 28) UPI - The chairman of Cosmopolitan National Bank resigned his position amid expectations federal regulators will take action against the family owned financial institution next week, it was reported Saturday.

James E. Wells, whose family bought 56 percent of Cosmopolitan Bankcorp Inc. in 1986, Friday stepped down as chairman, chief executive officer and director, the Chicago Sun-Times reported.

Cosmopolitan President Alex Vercillo will take over Wells' duties until a new chairman is selected, bank officials said.

In April the U.S. Comptroller's office charged the bank overpaid a construction company owned by Wells' wife by $200,000 for remodeling a branch office in Chicago.

Regulators said Friday they expected to make a new announcement concerning Wells and the bank next week, the newspaper reported.

The comptroller has the power to remove any officer or director of a national bank if illegal activities are proven and may prohibit that individual from participating in the bank's future business activities.

Wells, a former Democratic precinct captain and one-time candidate for alderman, tried to use his political connections to expand the bank through aggressive pursuit of government deposits, the newspaper said.

Illinois Treasurer Jerry Cosentino at one time deposited up to $23 million in state money in interest-bearing accounts with the bank. The state also picked Cosmopolitan to handle some non-interest bearing accounts.

The bank is also embroiled in the controversy surrounding Cosentino, the Democratic candidate for Illinois Secretary of State, over a loan for his

financially troubled trucking company.

Cosmopolitan loaned the treasurer $400,000 for his company after it began to receive state deposits.

#90209u0300 07/28/1990 ~United Press International

WASHINGTON (JULY 28) UPI - Senate challengers, unlike their House counterparts, are amassing impressive sums of money from political action committees, which typically support incumbents, an analysis of campaign funding showed Saturday.

The United Press International study of the top recipients of interest group donations indicates that many candidates seeking to unseat senators are the top money leaders among business, labor and ideological PACs.

Three of the top 15 business PAC recipients and four of the leading labor PAC recipients are challengers, the review showed. While all three business PAC challengers are members of the House, none of the four labor PAC leaders has ever served in Congress.

The analysis also found that five Democratic challengers were among the top 15 recipients of liberal group donations, while four Republican challengers were among leaders of conservative group contributions.

Rep. Hank Brown, R-Colo., seeking to win the seat being vacated by Sen. William Armstrong, R-Colo., ranked eighth in business support, with $621,700 from those groups, from January 1989 through June 1990, the analysis showed. Sen. Phil Gramm, R-Texas, ranked first, netting $861,300 during that period.

The two other House members who made the top 15 list are engaged in close contests. Rep. Tom Tauke, R-Iowa, who is running against incumbent Sen. Tom Harkin, D-Iowa, ranked 12th among all Senate competitors, receiving $582,200 from business groups. In Illinois, Rep. Lynn Martin, a Republican is engaged in a struggle that many political analysts consider the most competitive Senate race in the nation, against Democrat Sen. Paul Simon. Martin ranked 13th, with $557,600, the UPI survey found.

Harkin and Simon were not among the top business PAC recipients, but received lucrative amounts of money from labor groups, elderly and veterans groups, supporters of Israel and liberal groups.

Simon ranked first in labor and Israel support, collecting $301,000 and $162,600, respectively from the groups, while Harkin ranked third in both categories, receiving $222,100 from labor and $131,000 from supporters of Israel.

The PAC figures were assembled from Federal Election Commission records of some 4,300 interest groups.

While the UPI results suggest that members of the Senate do not by definition collect the lion's share of available PAC money, the rules of the House appear far different.

None of the top 15 House recipients among business or labor groups was a challenger, the survey found, while only a few ranked among the top 15 in support from ideological, veterans, elderly and pro-Israel groups.

In the House, where Democrats have an overwhelming majority and the rate of re-election among incumbents exceeds 99 percent, all of the top recipients are in leadership positions.

Rep. John Dingell, D-Mich., chairman of the Energy and Commerce Committee, ranked first among business PAC recipients, with $393,000. He was followed by Rep. Richard Gephardt, D-Mo., the House Democratic leader, with $371,500, and Rep. Bob Michel, R-Ill., the Republican leader, with $363,000.

Similarly, Gephardt led House members in labor support, netting $172,500 from union groups such as the AFL-CIO and the Teamsters. Not surprisingly, all 15 leaders among labor groups are Democrats.

Political analysts cited several factors contributing to the improved fund-raising positions of Senate challengers, including the struggle by Republicans to regain the majority of the Senate and the Democrats' intent to keep it. Democrats outnumber Republicans, 55 to 45.

''Because the party balance has been so close and it's widely perceived that it could change, that gives an incentive to the (Republican) Party and the PACs to reshape the Senate,'' said David Magleby, a political scientist at Brigham Young University and co-author of ''The Money Chase '' which explores campaign finances and reform efforts.

To a lesser degree the same dynamic has contributed to the lucrative PAC receipts among relative unknowns, several who are considered competitive by party officials.

Labor groups, following the lead of Democratic Party officials, have contributed $552,000 to four Democratic Senate challengers, an amount that catapulted each of the four to the top 15 list in the labor category.

Baron Hill, of Indiana, who is hoping to unseat Republican Sen. Dan Coats, ranked fifth nationwide, with $180,000. He was followed by Harvey Sloane of Kentucky, who is running against Sen. Mitch McConnell, and ranks 11th

with $148,200 in labor PAC money. Theodore Muenster ranked 14th with $110,000 and is seeking to oust Sen. Larry Pressler of South Dakota. Hugh Parmer, who faces an uphill battle against Gramm, ranked 13th with $113,500.

Tauke credited the strong business PAC support enjoyed by him, Martin and Brown to their long-standing public posture favoring business interests.

''In our case we are kind of a breed apart,'' he said. ''We aren't pure challengers, yet we aren't incumbents, either. But we have many of the advantages of incumbency in that we have been in Congress for awhile and built a relationship with these groups.''

Tauke was elected to the House in 1978, while Martin and Brown were both elected in 1980.

#90209u0308 07/28/1990 ~United Press International

SMYRNA, GA (JULY 28) UPI - Navy investigators said Saturday the crash of a fighter jet in suburban Atlanta that killed two people in November was likely caused by the pilot who might have mistakenly cut off his own fuel supply.

Two residents died and a 6-year-old girl was severely burned when the A-7E Corsair II crashed Nov. 9 about 15 miles northwest of Atlanta, engulfing at least three buildings of the Pine North Village in flames.

The pilot, Naval Reserve Lt. Cmdr. Robert M. Conlyn, ejected immediately before the plane went down, surviving the crash but suffering serious head injuries in the fall.

''Fuel starvation to the engine was most probably caused by inadvertent closure of the master fuel shutoff valve inflight by the mishap pilot,'' said the report by the Navy's Judge Advocate General's office in Alexandria, Va.

The report added that the pilot sustained serious head injuries ''because his protective helmet fell from his head prior to ground impact.''

The helmet was torn from his head from the force of the wind, the report said.

Conlyn, a reservist who also worked for Delta Air Lines, had flown with the Navy for 15 years.

The fighter jet, attached to the Navy Reserve's V-205 Green Falcons Squadron at Dobbins Air Force Base, crashed about a mile south of the

sprawling military installation.

Cmdr. Randy Schultz, who heads the Reserve unit, said the mishap was possible because the fuel shutoff valve and the throttle in the aircraft's cockpit are located about two inches apart.

But Schultz said he found it hard to believe a veteran pilot such as Conlyn could have pulled the wrong lever because the throttle is eight inches long and the shut-off valve is one inch.

''He was extremely competent, top-notch,'' Schultz said. ''I can't believe error with this pilot.''

Thirty-two units of the complex were destroyed by fire.

The victim's families have filed $36 million in claims against the Navy.

#90209u0320 07/28/1990 ~United Press International

LOS ANGELES (JULY 28) UPI - The family of the man shot to death in Marlon Brando's home said he warned his son that he ''could die'' because of his relationship with the film star's daughter, it was reported Saturday.

Jacques Drollet told the Los Angeles Times that his son, Dag, had been trying to end his love affair with a ''spoiled, unstable'' Cheyenne Brando and trying to distance himself from her ''unhappy'' family when he was shot and killed in the Brando compound in May.

The elder Drollet also said Marlon Brando, as an ''adopted Polynesian,'' failed to protect Dag Drollet according to Polynesian rules of hospitality and described the Brando home as ''a bunker with many weapons.

Christian Brando, one of the star's nine children, was ordered this week to stand trial for Drollet's death.

Christian Brando, 32, has told police that Cheyenne, his half-sister, had told him Drollet was abusing her and that he accidentally shot Drollet in a struggle.

Dag Drollet's father and his mother and stepfather, Lissette and Albert Lecaill, attended Brando's preliminary hearing in Los Angeles and spoke to the Times before their planned return to Tahiti late Friday.

The killing has shocked placid Tahiti, where the Drollets, the Lecaills and Brandos are prominent. The actor owns the atoll of Tetiaroa and Jacques Drollet is a retired high-ranking official.

Neither Jacques Drollet nor the Lecaills expressed a desire to talk to Brando. Albert Lecaill said the actor called hours after the shooting to say it was an accident but has refused to see them since they have been in Los Angeles.

Drollet said that before his 26-year-old son left Tahiti to accompany pregnant Cheyenne Brando to Los Angeles, he told him, ''Dag, stop this life with Cheyenne because she's not balanced ... you will have great difficulties - perhaps suicide, perhaps she can kill you, or you can die, both of you, because of her.''

Drollet said the couple was already living apart, but it was not soon enough.

''... I didn't do what I had to do, insist he not come,'' said the elderly Drollet. ''I said you're going to meet a tragedy with that girl, your life together smells of tragedy, it smells of death.''

Drollet said Brando ''knew his daughter was not very well balanced'' and knew that Christian was ''bad-tempered. He knew there could be some friction between people in his own house (but) he didn't protect my son.

''On the contrary, my son was just killed like a dog in his house.''

Dag Drollet's stepfather said Marlon Brando paid for the couple's trip to Los Angeles because he wanted his daughter to have her baby in California and to be treated by American doctors for medical and psychiatric effects of a serious 1989 auto accident.

''What he (Dag) did coming to Los Angeles was the last thing to help (Cheyenne), the last act,'' Albert Lacaill said.

Drollet said the son told his family that Cheyenne Brando had become ''impossible'' to live with and had changed since the car accident, at times ''very violent in her words and manner.''

#90209u0326 07/28/1990 ~United Press International

MIAMI (JULY 28) UPI - Tropical Storm Bertha formed Saturday in the Atlantic off Florida and was predicted to begin moving north within 24 hours, possibly bringing strong winds and rain to the nation's East Coast.

Bertha, the second tropical storm of the Atlantic-Caribbean hurricane season, was stationary in the Atlantic about 280 miles east of Cape Canaveral, where NASA officials were deciding whether to roll the space shuttle Atlantis off its launch pad and back into a hanger out of danger.

Reconnaissance aircraft clocked the system's winds at 50 mph with strong gusts in squalls north and east of the storm's center.

Forecasters at the National Hurricane Center in Miami upgraded Bertha from a depression to a tropical storm at 6 a.m. and located it near latitude 28.5 north, longitude 75.5 west.

''Bertha has not affected Florida's weather yet. There are a few showers near Cape Canaveral but they are not associated with the system,'' said Mark Zimmer, a meteorologist at the hurricane center.

Unlike most systems, Bertha formed from the remnants of a large low pressure area and did not come out of the deep tropics.

''The depression set out in the ocean covering a pretty broad area and then gradually began to turn a little more. Conditions are favorable for additional strengthening,'' Zimmer said.

Small craft from St. Augustine, Fla., to Savannah, Ga., were warned to stay in port and those from Jupiter Inlet south to Key Largo were advised to stay close to port.

Despite the presence of Bertha, lobster lovers took advantage of the state's two-day-long lobster season for sports fishermen, braving the choppy waters and stiff breezes to dive in search of the spiny crustaceans.

Arthur, the first tropical storm of the season, dissipated in the western Caribbean and was downgraded to a tropical wave.

Forecasters also are monitoring another tropical wave near the Lesser Antilles that is moving west at 15 mph.

The Atlantic-Caribbean hurricane season runs from June 1 to Nov. 30.

#90209u0356 07/28/1990 ~United Press International

(JULY 28) UPI - A Moslem group claims to have taken control of the Caribbean island nation of Trinidad and Tobago and says it is holding prisoner Prime Minister Arthur Robinson and his Cabinet. But the acting prime minister says the goverment is functioning and Robinson may NOT be in rebel custody. Only six percent of the nation's population is Moslem. About one-third of the people are Roman Catholic.

In Louisiana, anti-abortion lawmakers say they will push for a special session in an effort to override Governor Buddy Roemer's veto of an abortion ban. Roemer vetoed the bill yesterday... saying it was insensitive to women. Pro-choice activists hailed his veto as a positive

step for women and the state... and called on the Legislature to let the issue rest.

Police in Riverdale, Georgia, arrested three teens last night in a possibly racially motivated bombing that gutted an N-double-A-C-P office. Authorities say two 16-year-olds and a 15-year-old are charged with arson and criminal possession of an incendiary device. One N-double-A-C-P official expressed shock at their ages, saying... ''That's young. That is very young.''

G-O-P lawmakers say President Bush is floating his first tax hike proposal... a higher tax on beer and wine, and new limits on state tax deductions. Supporters say the proposal could raise up to three-BILLION dollars in the next fiscal year. Bush has NOT formally presented the idea, which observers say is likely to spark complaints from states and localities.

#90209u0369 07/28/1990 ~United Press International

ANALYSIS BY JOSEPH MIANOWANY

WASHINGTON (JULY 28) UPI - Ever since Chief Justice Earl Warren led the Supreme Court on an aggressive liberal drive beginning in the 1950s, political conservatives have railed against ''judicial activism.'' That may be about to change - and it wouldn't be the first time.

For more than 30 years, a favorite rallying cry of the political right has been that the high court has abandoned its proper role. Instead of merely interpreting the law, they have argued, the justices have too often created new laws - in effect ''legislating from the bench.''

It was precisely that type of activism, conservatives have complained, that was behind the 1973 Roe vs. Wade opinion guaranteeing a woman's right to abortion.

But now that President Bush has nominated David Souter to replace retiring liberal Justice William Brennan and conservatives may be about to enjoy their biggest majority on the court in years, some legal analysts say the traditional arguments may be up for review.

Political conservatives, hoping that the new high court will now hand down decisions solidly in their favor, may suddenly find themselves wanting the justices to move aggressively in that direction.

At the same time, political liberals hoping to preserve the Warren Court's legacy may now be looking for cautious judges who will not try to tear apart precedents.

Although more than a generation of Americans have come to equate judicial activism with liberalism, constitutional experts say it wasn't always that way.

''We have lived through an era in which an activist court has been by and large a liberal court, so it's easy to slip into a belief that activism equals liberalism,'' noted University of Virginia law professor A.E. Dick Howard.

''It is the custom of dissenters to accuse the majority of judicial activism,'' he added. ''In the early part of this century it was the liberals who hurled the charges of judicial activism at the conservatives.''

Conservative legal scholar Bruce Fein contends there is a dramatic difference between conservative politicians and conservative legal experts and argues that can cause confusion with the public.

''Political conservatives basically don't understand the Constitution. They just want results,'' noted Fein. ''Political conservatives will do anything, so long as the results are good.''

''Conservatives weren't always against activism,'' added Feid. ''In the 1930s, conservatives were very pro-activism - so long as the results went the right way.''

Both Howard and Fein noted that one of the sharpest examples of how political and constitutional conservatives can differ came during the last two court terms in rulings that declared flag burning was protected free speech.

In those decisions, the court's traditional liberals were joined by conservative Justices Antonin Scalia and Anthony Kennedy in writing the majority opinion.

Although many political conservatives sided with the minority, most traditional conservative legal scholars argued that Scalia and Kennedy had decided the issue in true conservative, or even libertarian, fashion.

''The flag case is a great example of people crossing over to rule against (what had been expected),'' said Howard.

As the new court takes shape and political liberals and conservatives stake out their positions, there also are likely to be differences over what constitutes an ''activist'' court.

Some people believe that a basic underpinning of a true legal conservative

should be to respect precedent and not move quickly to overturn long-standing decisions such as Roe vs. Wade.

But others contend that is expecting too much.

''Some people define activism as overturning rulings and not correcting wrong decisions. I think that's silly,'' said Fein. ''I view activism as going beyond any of that. It's ... moving according to fashionable social policy.''

''I do think the early phases of the newly emerging conservative court will see a trimming back on the opinions of the Warren and Burger courts '' added Howard, who is more politically moderate than Fein. ''It seems to me that activism usually only means a court making a decision in place of a legislative or political body.''

#90209u0371 07/28/1990 ~United Press International

SAN FRANCISCO (JULY 28) UPI - Prosecutors aimed to squelch any political fireworks that defense lawyers might try to loft in Monday's start of the pared-back corruption retrial of U.S. District Judge Robert Aguilar.

The 59-year-old jurist's first trial ended March 19 with acquittal on one count of obstruction of justice and with jurors deadlocked on the remaining seven counts.

Aguilar's second trial, which begins jury selection Monday, has been trimmed considerably to just four charges of conspiracy to obstruct justice, lying to the FBI and disclosure of wiretap information.

The judge faces five years in prison if convicted on each of the five counts.

The heart of Aguilar's original 1989 indictment was the allegation of racketeering, the first ever brought against a federal judge. That charge has been dropped.

The government charged in the original eight-count indictment that Aguilar used his judicial office to influence other judges in the handling of criminal cases involving Aguilar's friends.

During the first trial, defense lawyers suggested the Republican administration in Washington was out to get Aguilar, a liberal Hispanic judge appointed by President Jimmy Carter in 1980.

Jurors in the first trial voted heavily for acquittal on the deadlocked counts. After the trial, jury foreman Carl D'Amico, a bank vice president,

called the government's indictment of Aguilar ''outrageous.''

On July 26, prosecutors filed a motion urging U.S. District Judge Louis Bechtle to curtail any defense attempt to tell jurors Aguilar was targeted by a government opposed to his liberal rulings.

''There has never been a shred of evidence to suggest that defendant Aguilar was singled out for prosecution,'' wrote Sara Lord, Justice Department attorney,in a motion to exclude defense allegations of bias by the government.

Prosecutors succeeded in getting Aguilar's retrial severed from the retrials of two co-defendants, convicted embezzler and ex-Teamsters Union leader Rudy Tham, 66, and Abe Chapman, 84, an Aguilar relative-by-marriage and a 1930s convicted drug dealer and self-described mob hitman.

Tham was convicted last month in a separate trial on charges of conspiracy and attempted obstruction of justice.

The former union boss, already serving five years in prison, faces an additional five years in prison on the current convictions. He will be sentenced Sept. 24.

Aguilar stands accused of conspiring with Tham and Chapman between 1987 and 1988 to ''romance'' or ''brainwash'' U.S. District Judge Stanley Weigel into overturning Tham's 1980 conviction for embezzling $2,000 from Teamster funds.

Weigel testified in the first trial that he was approached twice by Aguilar about the Tham case. But Weigel insisted Aguilar never said or did anything improper in those conversations.

Weigel later stepped off the Tham case because of repeated FBI conversations with him about the possibility Aguilar might attempt to influence the case.

Aguilar was also charged in two counts with revealing wiretap information in August 1987 and again in February 1988 to his nephew.

The judge allegedly wanted his nephew to tell Chapman to stay away from Aguilar because of a wiretap on Chapman's telephone.

Aguilar is also accused of attempting to obstruct justice on May 26, 1988, when he allegedly urged Tham's lawyer, Edward Solomon, to lie to a grand jury investigating possible improprieties in the case.

Solomon secretly taped the conversation for the FBI.

Aguilar is charged with lying to the FBI on June 22, 1988, when he was questioned about his involvement in the Tham case.

Defense lawyers argued Aguilar was singled out for his strong rulings against the government in a number of important cases.

During his 10-year career on the bench, Aguilar blocked federal aerial herbicide spraying of suspected marijuana fields and halted a nationwide immigration service program of sweeping and unannounced factory raids in search of illegal aliens.

Aguilar also temporarily stopped deportation of an Irish Republican Army supporter wanted on a murder charge in London. The U.S. Administration was forced to make changes in the U.S. treaty with Britain to get the man deported.

-30- 4504

#90209u0377 07/28/1990 ~United Press International

WASHINGTON (JULY 28) UPI - Judge David Souter, a bashful New Hampshire jurist thrust into the spotlight by his nomination to the Supreme Court, eagerly hitched a ride home on Air Force One at week's end.

Though administration confidence was growing that Senate confirmation hearings would go smoothly, before he headed back home Friday compliments of President Bush, Souter shook his head in amazement at the glare of publicity suddenly surrounding him.

''You're going to see a different suit next week,'' he said of the gray pin-striped attire he had worn for days because he only brought one suit with him, not sure he would be Bush's choice.

''Actually, it's holding up a lot better than I am,'' he said.

Bush extended the offer of a free trip Friday as he was headed to Kennebunkport, Maine, for the weekend.

En route to his summer vacation home, Bush said confidently that the New Englander would get through the Senate confirmation process easily.

''He is not the most well-known figure in the country,'' Bush said in answering one of the few complaints that arose since Souter's selection Monday.

But, Bush added, ''He will be well-known when he gets to testifying and through this process, which I think he will do with flying colors.''

A quick round of morning meetings followed by the flight home rounded out

the extraordinary week for the 50-year-old conservative selected by the president to succeed retired William Brennan, 84, who stepped down a week ago Friday after 34 years on the Supreme Court.

And for Bush, who picked the reserved and virtually unknown jurist for the job, the nomination did appear to be on track.

There were few words of criticism for Souter, a former attorney general and Superior Court and Supreme Court justice in New Hampshire, and special interest groups had come up almost empty-handed in their search for clues on how the taciturn and almost reclusive candidate might vote on such causes of abortion and women's rights, church-state relations and labor-management issues.

The White House stuck purposefully to the line that Bush never asked the candidate those kind of questions and Sen. Warren Rudman, R-N.H., said Souter himself sought and obtained assurances that he would not be asked how he might vote on certain issues before subjecting himself to a White House interview for the job.

Vice President Dan Quayle was the point-man for praise on Friday.

''I say - no way. No litmus tests,'' Quayle told a group of college Republicans. ''It's wrong to seek a commitment from a justice before he hears a case. ... Judge Souter is a first-rate jurist (and) now it is up to the Senate to confirm (him).''

But Bush, Quayle and Souter were all reluctant to respond to one of the only critiques of the nomination - a suprisingly virulent volley fired by a current member of the court.

Justice Thurgood Marshall said he had never heard of Souter and suggested someone other than Bush was ''calling (the) shots'' on the issue, pointing to White House chief of staff John Sununu, the conservative lightning rod of the administration, as the possible culprit.

''I don't understand what he (Bush) is doing,'' Marshall told ABC. ''I think somebody's calling his shots. ... They're saying (Sununu) is.''

Sununu, while governor of New Hampshire, appointed Souter to the New Hampshire Supreme Court, where he served for seven years. Bush has maintained firmly that while he was counseled by top advisers on the nomination, the final decision was his.

The question of where Souter stands will be a critical one for senators who announced Friday the Senate Judiciary Committee will take up the nomination Sept. 13. They will come under considerable pressure to pry out of him some indication of his views because Brennan's retirement, coupled

with a Bush selection to the court, is widely viewed as the key to confirming a conservative majority that could dramatically affect laws on abortion, civil rights and the death penalty.

Aside from the discovery of a letter Souter wrote in 1981 opposing the need for minors to get permission for an abortion from their parents or a judge, practically nothing is known about where he stands on that and other controversial questions, and Souter kept his views to himself as he met this week with members of the Senate.

Nonetheless, a weeklong flurry of praise was forthcoming, including from judiciary panel members Sens. Arlen Specter, R-Pa., and Strom Thurmond, R-S.C.

Thurmond went so far as to personally assure Bush that the nomination would do ''just fine'' and no one on the committee intended to oppose it.

After Quayle hosted Souter for their get-acquainted session, the stunned nominee headed to Capitol Hill for a final time before the weekend's respite.

There, after another senator praised him, he pointed to the crush of television cameras and photographers and said, ''You do at some point just wish you could get away from it.''

#90209u0384 07/28/1990 ~United Press International

STONE MOUNTAIN, GA (JULY 28) UPI - Former President Jimmy Carter, for the first time since leaving the White House, has endorsed an aspiring politician.

Political newcomer Chris Mitchell, an employee at the Carter Center and lifetime fan of the former president, was bestowed the honor Friday at a private gathering in Stone Mountain, a suburb east of Atlanta.

Mitchell, 26, will attempt to unseat Republican state Rep. Tom Lawrence in the November general election.

Carter endorsed the fellow Democrat before a crowd of about 200 people at the home of a friend of the candidate.

''First, Chris Mitchell is a special young man in my opinion,'' Carter said. ''Mostly, I stay away from partisan politics, but this is a special occasion because of how I feel about Chris Mitchell.''

Mitchell said the endorsement was a dream come true.

''Personally, it just means a great deal to me,'' Mitchell said. ''I've always dreamed of the day where I could be amongst friends and thank Jimmy and Rosalynn Carter for everything they've done in the White House and ever since.''

Mitchell, director of correspondence at the Carter Center, has tried to follow in the former president's footsteps. He left Massachusetts in the early 1980s to attend Georgia Southwestern College, the school Carter attended for one year and where Rosalynn Carter attended.

After years of trying to meet Carter, Mitchell met Carter's daughter, Amy, in Americus, Ga., one night. The two became friends, and the rest is history for Mitchell.

#90209u0401 07/28/1990 ~United Press International

SAN JOSE, CA (JULY 28) UPI - Jerre Jackson, declared dead without documentation by the Social Security Administration, needed two forms of identification Friday to prove she's still among the living.

But Jackson, 48, said she was relieved the death snafu ended well.

It all began with quite a shock, when she went to her bank on Wednesday and was told the government confiscated the money in her account - because the Social Security Admistration had sent out notice of her demise.

Jackson quickly set the record straight, prompting the bureaucrats to resurrect her in their files and return her $741 to the bank.

''I'm very relieved,'' Jackson said. ''I would have been sitting her with what I had in my pocket, which is $1.50.''

A spokeswoman in the nearby Sunnyvale Social Security office said about a half dozen erroneous death reports occur each year among its 28,000 clients.

Normally the problem occurs when a death notice is received from an outside agency that contains an incorrect Social Security number, operations manager Gail Breckenridge said. The state and other agencies report deaths directly to Social Security by computer, she said.

But in Jackson's case, the error apparently originated last April somehwere within the Social Security Administration itself, Breckenridge said. However, she could not say how the problem occurred, or how it escaped the administration's fact-checking procedures.

#90209u0412 07/28/1990 ~United Press International
(JULY 28) UPI - A small Moslem group that may have ties to Libya says it has overthrown the government of Trinidad and Tobago, twin islands off Venezuela's Atlantic Coast. The rebel leader appeared on television last night to say the group was holding Prime Minister Arthur Robinson and his Cabinet hostage.

Acting Prime Minister Winston Dookeran said on state-run radio that the government and armed forces still are functioning. He said negotiations are under way to determine whether Robinson is in fact being held by rebels.

Competing rebels in the West African nation of Liberia are tightening control over the capital city of Monrovia, and are advancing on the palace stronghold of President Samuel Doe. He rejects offers of sanctuary and says he WON'T surrender.

A Marine spokesman says two Marines were killed and three others injured last night when a military helicopter crashed 55 miles west of the Marine Corps Air Station Yuma in Arizona. The helicopter was on a night training mission.

A published report says federal officials are looking into the near-collision of an American Airlines jet and a single-engine plane. The incident occurred Thursday over Long Beach Airport. There were NO injuries.

Avianca Airlines is offering 75-thousand dollars to each survivor of a January crash on Long Island... without requiring recipients to waive their rights to future damages. The move is being called an unprecedented act of generosity.

-30- 1631
#90209u0417 07/28/1990 ~United Press International
(JULY 28) UPI - Anti-abortion lawmakers in Louisiana say they'll push for an unprecedented special session in a bid to override Governor Buddy Roemer's veto of the bill. Roemer said the measure was an insult to women.

The Maryland Supreme Court ruled yesterday that former Governor Marvin Mandel enjoys the same immunity accorded to U-S presidents and canNOT be sued for a 1971 veto of legislation that sparked his prosecution on federal charges.

Researchers at the University of Utah say fall-out from above-ground nuclear testing appears to be responsible for three to six percent of the leukemia deaths in Utah from 1952 to 1981. The study was the first of its kind.

Doctors in Vienna say they have successfully separated Libyan-born Siamese twins who were joined at the head. The three-year-old brothers are reported to be in ''relatively good condition'' after yesterday's 11-hour operation.

Britain's Queen Elizabeth yesterday won an injunction that will prevent a former employee from publishing a book in Britain that paints a NOT-so-perfect picture of life inside Buckingham Palace. A High Court judge ruled author Malcolm Barker breached an oath of confidentiality that he signed in 1980.

The rock-n-roll band ''The Greatful Dead'' plans to continue its East Coast and European tours, despite the sudden death of keyboardist Brent Mydland earlier this week. Mydland was found dead in his San Francisco home Thursday morning.

#90209u0484 07/28/1990 ~United Press International
PORT-OF-SPAIN, TRINIDAD (JULY 28) UPI - A small Moslem group believed to have ties to Libya took the island nation's prime minister hostage and claimed to have toppled the government, but the acting president said Saturday the government was still in control.

Iman Yasin Abu Bakr, leader of the rebel group Jamaat Al Muslimeen, appeared on state-run television several times Friday night to say his group took Prime Minister Arthur Robinson and some of his Cabinet members hostage.

Acting President Emannuel Carter went on state-run radio Saturday morning to assure citizens the government is still in power. Acting Prime Minister Winston Dookeran and Roman Catholic Archbishop Antony Pantin made similar broadcast statements.

There were reports Saturday that fires still burned on the main street of Port of Spain, the capital, after fire gutted the national police headquarters Friday night. Residents said they still heard gunfire and could see blood in the street. Most residents appeared to be staying indoors.

An employee of the Hilton hotel in Port of Spain, who asked to remain anonymous, said a state of emergency had been called.

There were unconfirmed reports of three deaths Friday night.

Abu Bakr said he promised to hold a general election in 90 days. He has accused the government, which has been power for more than three years, of corruption and gross mismanagement of the Trinidad and Tobago economy.

Observers said Saturday it has been many hours since Abu Bahr's last telecast.

In Kennebunkport, Me., where President Bush is spending the weekend, deputy White House press secretary Alixe Glen said the United States is maintaining ''strong support of the democratic government of Prime Minister Robinson.''

Glen, speaking with reporters after conferring with national security adviser Brent Scowcroft, said, ''It appears that no American citizens are in any danger.''

An administration source, speaking on condition of anonymity, said it appears ''the army is still loyal.''

Amoco, the U.S. oil company, was considering a plan to evacuate 50 employees from Trinidad, corporate security director Jonathan Tetzlaff said from Chicago.

The streets around the U.S. Embassy were calm, Charge d'Affaires Lacy Wright said Saturday morning. He recommended that U.S. nationals stay inside their homes.

Abu Bakr, a former police officer who formed his Moslem community 10 years ago and claims about 300 followers, said he launched the coup to rid the oil-rich country of corruption, bigotry, racism and hatred.

The two islands of Trinidad and Tobago, with a population of 1.2 million, are united by one government but have been split by racial and economic tensions. Trinidad is less than 20 miles off Venezuela's Atlantic Coast and Tobago is 20 miles northeast of the larger island.

The number of casualties was not available, but Abu Bakr said, ''The population must cooperate to avoid further bloodshed.'' Reports that three people had been killed could not be independently confirmed.

Abu Bakr appeared on television sitting next to the station's news director, Joans Madeira, and said the prime minister and his Cabinet were under arrest.

''We are asking people not to be involved in any looting or they will pay the costs,'' Abu Bakr said.

Abu Bakr, who appeared on television at least four times Friday between 6:30 p.m. and 11 p.m. urging the population to stay calm and remain indoors, also said that police throughout the country ''are commanded to lay down their arms and cooperate with the new authority.''

At least some government soldiers appeared to be backing the rebels, who have been linked to Libya. The small Moslem community, in its newspaper, ''The Light,'' has often praised Libyan leader Moammar Ghadafi for his assistance.

Air traffic in and out of Trinidad was stopped and the airport in Port-of-Spain was closed.

President Noor Hassanali was out of the country on holiday in Britain.

Abu Bakr assured the diplomatic corps and foreign governments that all was calm and that their representatives were safe.

Trinidad and Tobago gained independence from Britain in 1962. The country's English-speaking population is about 40 percent black and 40 percent Indian, with the rest made up of whites and other ethnic groups.

Only about 6 percent of the population is Moslem. About a third are Roman Catholic and a quarter are Hindu.

Robinson and his National Alliance for Reconstruction rose to power with an overwhelming majority in the last general elections on Dec. 15, 1986 but his economic policies and austerity measures have unnerved the population.

Robinson was to attend a heads of government meeting of Caribbean countries in Jamaica on Friday, but did not arrive.

#90209u0490 07/28/1990 ~United Press International

(JULY 28) UPI - More strong thunderstorms roved through the Midwest and

Southwest Saturday and Tropical Storm Bertha was born off Florida, threatening to ruin the weekend for East Coast beachgoers and prompting concern among space officials at Cape Canaveral.

Isolated thunderstorms dotted southern and central Iowa and southeast Nebraska and scattered showers pelted northern Iowa, the National Weather Service said.

The heavy rains followed downpours Friday that flooded streets and underpasses in Des Moines, Iowa, and swamped highways in the Mason City area. A flood-flash flood watch was in effect early Saturday for most of the state.

Heavy rains produced minor flooding in south-central Minnesota and forced guests of a motel to evacuate when a basement wall collapsed in Glencoe, authorities said Saturday. ''To the best of my knowledge, nobody was injured,'' said a spokeswoman for the McLeod County Sherriff's Department.

Minor flooding was also a concern in Kansas, where thunderstorms from 45 miles west of Salina eastward to near Beverly pelted the ground with small hail and inundated soil saturated from previous heavy rains. Storms Friday stirred up 60 mph winds in Longford, Kan., and caused flooding in Tescott, which was swamped with almost 3 inches of rain in one hour Friday evening.

Bands of scattered thunderstorms early Saturday also dotted western and central Oklahoma and northern Texas. The heaviest rain was northwest of Guymon, Okla., in the state's panhandle. Elsewhere, patches of rain extended from eastern New Mexico to Lubbock, Texas, and the Texas Panhandle.

Forecasters said a tropical depression swirling in the Atlantic less than 300 miles east of Cape Caneveral, Fla., developed early Saturday into Bertha, the second Atlantic tropical storm of the season.

Hurricane forecasters expected the storm, with winds to 50 mph, to begin moving north and to stir up rain and stiff winds along the Atlantic Coast. even if it remains well out at sea and moves to the northeast, as some computer projections indicate.

''It is so large, it could bring decent winds and rain onto the coast ... the entire mid-Atlantic coast, from Florida to goodness-knows-where,'' said meteorologist Jack Beven at the National Hurricane Center near Miami. ''It depends on how fast the system moves.''

Small craft warnings were posted as far north as Savannah, Ga., and NASA officials at Cape Canaveral were deciding whether to roll the space shuttle Atlantis off its launch pad and back into a hanger out of danger.

Fair weather predominated over Washington, Oregon and California. Washington was expected to enjoy mostly sunny skies through the weekend, with highs along the coast near 80 and into the 90s inland. Oregon was enjoying fair skies with light winds and morning fog clinging to the coastal area.

Hazy hot and humid weather was expected to result in showers and thunderstorms in eastern Virginia, southern Maryland and the Atlantic shore areas of Virginia, Maryland and Delaware.

#90209u0501 07/28/1990 ~United Press International

(JULY 28) UPI - An Army Blackhawk helicopter crashed late last night in a heavily wooded area of Fort Chaffee, Arkansas, killing five of 13 soldiers aboard. Officials at Fort Chaffee say the helicopter, which was NOT stationed at the base, was taking part in a military exercise. The crash occurred 20 miles east of Fort Smith on the Oklahoma border. Also last night, a Huey helicopter crashed west of Yuma, Arizona, killing two Marines and injuring three others.

A Moslem rebel group says it has seized power on the twin-island nation of Trinidad and Tobago. A rebel leader appeared on television last night and said his group was holding Prime Minister Arthur Robinson and his Cabinet hostage. But acting Prime Minister Winston Dookeran broadcast a statement on radio contradicting the rebels' claims. Trinidad is about 20 miles off Venezuela's Atlantic coast.

A man and a woman who were pulled alive after 11 days beneath the earthquake rubble in the Philippines say they stayed alive by drinking rainwater and singing praises to God. The 20-year-old casino employee and 27-year-old hotel security guard were rescued yesterday by Filipino miners burrowing through the flattened Hyatt Terraces Hotel. Doctors say the two are in stable condition with minor bruises.

Southeast Asian ministers are angered by Secretary of State Baker's refusal to agree to the forced repatriation of Vietnamese boat people. The ministers meeting in Jakarta, Indonesia, say their nations still bear the socio-economic and political costs of providing asylum to the boat people 15 years after the fall of Saigon. The European Community is offering a multi-Million-dollar plan to help with the repatriation.

#90209u0517 07/28/1990 ~United Press International

SAN FRANCISCO (JULY 28) UPI - Romance reigns, a compilation of facts showed Saturday.

Romance writers crank out 100 new novels each month to feed a $1 billion paperback market supported by some 200 million women readers worldwide, according to figures presented at the 10th annual Romance Writers of America convention.

A highlight for fans Saturday was an autograph session with their favorite heart-throb authors at the Hyatt Regency hotel convention site in downtown San Francisco. Other activities included writing workshops and meetings on publishing goals by some 600 participating novelists and aspiring authors.

Among those present was award-winning writer Nora Roberts, the first author inducted into the Romance Writer's of America Hall of Fame, who just published ''Public Secrets'' for Bantam Books.

With 23 million books in print - 70 titles - the Maryland writer, who lives in the rural hills near the Antietam battle fields, likes to give encouraging advice to fledgling writers.

''There are a lot of talented people that just don't have the confidence to begin,'' said Roberts. ''I try to give them a little of that confidence

and some knowledge to point them in the right direction.''

Figures compiled by Bantam Books gave the following facts about romance genre readers, who are predominantly women:

-60 percent own their own homes.

-59 percent are employed.

-70 percent are married.

-64 percent are between the ages of 16 and 45, with the primary readership being between the ages of 25 and 49.

-16.3 percent hold a college degree.

-58 percent support the Equal Rights Amendment.

Characteristics that Bantam said readers like to see in a romance novel are mixed hero/heroine point of view; mature humor; a fairly complicated plot; several love scenes and detailed sexual descriptions.

The average reader, said Bantam, spends up to $30 a month on romance books.

(JULY 28) UPI - Trinidad's government is in crisis today. A small Moslem group believed linked to Libya claims to have toppled the government. The rebel leader appeared on state-run television last night saying his group has taken Trinidad's prime minister and his cabinet hostage. The guerrilla leader said he's running the twin-island state of Trinidad and Tobago. But acting President Emannuel Carter said on state-run radio this morning the government is still in power and warned of fighting in the streets.

In Italy, Prime Minister Giulio Andreotti today won a parliamentary vote of confidence. The Chamber of Deputies supported a government resolution approving Andreotti's rapid replacement of five ministers who resigned in a dispute over a new broadcasting law. The ministerial resignations were the first major crisis of Andreotti's year-old government and forced the 70-year-old statesman to hurry back Thursday from talks in Moscow with Soviet President Gorbachev .

Five soldiers are dead in the crash of an Army Blackhawk helicopter at Fort Chaffee, Arkansas. Fort Chaffee Information officer Cecil Green says the chopper with 13 soldiers aboard went down in a densely wooded area on the Oklahoma border during a training exercise. Some of the soldiers walked away from the crash but others are believed to be seriously

injured. Green says two Army helicopters airlifted the eight survivors to St. Edward Mercy Medical Center in Ft. Smith.

That crash came just hours after the Marine Corps announced that a U-HN Huey chopper went down last night during a training flight west of Yuma, Arizona. Two Marines died and three others were injured.

#90209u0610 07/28/1990 ~United Press International

(JULY 28) UPI - In New York, hearings will be held Monday in State Supreme Court in Manhattan in the case of an AIDS-infected teacher who is suing for insurance money to fund a bone-marrow transplant from his identical twin brother. Thomas Bradley is suing Empire Blue Cross and Blue Shield, which says Bradley's insurance contract excludes coverage for experimental and investigative procedures such as bone-marrow transplants.

Anti-abortion lawmakers in Louisiana are promising to try to override Governor Buddy Roemer's veto of a strict abortion ban he calls an insult to women. Roemer vetoed the bill yesterday. And in order to override it now that the session is over, the Legislature would have to call itself back to Baton Rouge for a veto session, something it has never done.

-30- 943

#90209u0620 07/28/1990 ~United Press International

FORT LAUDERDALE, FL (JULY 28) UPI - A rabbi who united two young lawyers in marriage last year has been sued by the couple for $130,000 in damages because he allegedly arrived late for the ceremony.

The St. Petersburg Times reported Saturday Christine and Russell B. Adler claimed in their suit that Rabbi Loring J. Frank's late arrival for their wedding ceremony in April 1989 caused them pain, suffering and inconvenience.

According to their filing, Frank was an hour and a half late. That led to a chain reaction of calamities - an inflated liquor bill as bored guests turned to drinking, vicious gossip that the marriage might be off, a long wait in a stifling room for the bride, the re-emergence of an old back injury for the groom, and ''a rift between the plaintiffs.''

Russell Adler, who is a sole practitioner, and Christine Adler, a public defender, are not only seeking $130,000 in damages - more than seven times the cost of their wedding - but are about to amend their complaint to assert that Frank isn't a rabbi at all.

Frank and his attorneys, however, insist he is a rabbi, that he was no more than five minutes late for the ceremony, and that the suit is a

perfect example of a legal system run amok, in which people - especially lawyers - run for the courthouse over the slightest slight.

''A responsible, seasoned lawyer would never in his wildest dreams either (a) be a plaintiff in this lawsuit, or (b) file it for anybody else,'' Robert A. Kasky of Hollywood, Fla., one of two attorneys representing Frank, told the Times.

''It shows the depths that some people in our profession will sink. The case boils down to a couple of ill-guided children, both of whom have law degrees, trying to squeeze blood out of a rock,'' Kasky said.

''It's just tasteless. When I first read the complaint, I thought it was a script for 'L.A. Law,''' he said.

The Adlers' attorney, Kenneth B. Whitman of Fort Lauderdale, insists there is nothing frivolous about the lawsuit, that his clients are taking the only course they can take to redress a wrong.

Frank does not dispute that he was late; he had been officiating at a bar mitzvah and encountered delays on the highway to the resort where the wedding was being held. But he said he arrived with his robes on and ready to perform the ceremony, only to find himself waiting for the bride and groom.

Frank's suspicion, the newspaper reported, is that the Adlers, as new lawyers, were looking for a high-publicity case to attract attention to themselves. If that's the case, they've succeeded. The story has caught the eye of publications ranging from the local newspaper to the National Law Journal and the National Enquirer.

He also speculated the couple may have been encouraged to press their case by more traditional rabbis who dislike him because he performs interfaith marriages.

#90209u0628 07/28/1990 ~United Press International

NORCROSS, GA (JULY 28) UPI - An ankle injury forced Arantxa Sanchez Vicario to retire from her match against Natalia Zvereva Saturday, lifting the Soviet Union to a 1-1 tie with Spain in their Federation Cup semifinal.

The United States moved one step closer to defending its title with a 2-0 victory over Austria behind singles victories from Wimbledon runner-up Zina Garrison and 14-year-old Floridian Jennifer Capriati.

The Federation Cup is the women's version of the Davis Cup.

Capriati beat Barbara Paulus 6-3, 6-4, and Garrison overwhelmed Austrian No. 1 Judith Wiesner 6-3, 6-4.

Spain took an early lead against the Soviet Union on the strength of Conchita Martinez's 6-3, 7-5 triumph over Leila Meskhi in the No. 2 singles match.

Prior to Saturday, Zvereva had never won a set from Sanchez Vicario, losing twice to the Spainard in Federation Cup play. The Soviet won the opening set 6-4 after fighting off five break points in the ninth game, capping the set with a backhand winner.

Upon winning the set, the 18-year-old Zvereva, who has feuded openly with the Soviet tennis federation over how much of her prize money she can keep made a finger gesture that earned her a warning for a visible obscenity.

With the score tied at deuce in the first game of the second set, Sanchez Vicario lunged to retrieve a smash from Zvereva and fell on her right ankle.

After a five-minute injury timeout, Sanchez Vicario returned to action only to have Zvereva win the game with a drop shot that the Spaniard could only stare at from behind the baseline.

Although limping badly, Sanchez Vicario lasted one more game and actually came within a point of squaring the set at 1-1 before she retired.

With Sanchez Vicario out of the lineup, the experienced Soviet doubles team of Zvereva and Larissa Savchenko was heavily favored over Martinez and 17-year-old Pilar Perez, ranked only 245.

Capriati controlled her 70-minute match on the hard courts with the pace and length of her groundstrokes, forcing the normally steady Paulus into dozens of errors from the backcourt.

The two traded service breaks early in the match, then tied 3-3 before the 14-year-old Floridian held serve for a 4-3 advantage. Capriati notched the critical break in the eighth game with help from Paulus, who netted a backhand and a forehand on consecutive points. Capriati closed out the 28 minute set in the next game with her second ace and a service winner.

The American used a single service break in the third game of the second set to secure the victory. She whipped a crosscourt backhand passing shot past a stunned Paulus to set up match point and then closed out the contest when the Austrian pushed a backhand into the net.

Garrison's serve-and-volley attack proved too much for Wiesner, who is ranked 15th. The Texan closed out the match with a topspin lob and a

volley into the open court.

Martinez and Meskhi, playing for the first time, ran each other around the court with deep groundstrokes and delicate drop shots. The 18-year-old Spainard's versatality and power proved too much for Meshki, whose victory in the Virginia Slims of Nashville, Tenn., last fall made her the first Soviet woman to win a major tournament since Olga Morozova in 1974.

After dominating the opening set, Martinez achieved the critical break in the 11th game of the second set, hitting a forehand winner for a 6-5 lead.

The Spainard then fought off a break point, ripped a forehand pass by Meshki and closed out the match with a severely slice backhand that Meskhi netted.

The United States is the defending champion in the $480,000 tournament, which is sponsored by NEC.

The Americans beat Spain 3-0 last fall in Tokyo in Chris Evert's final tournament.

#90209u0731 07/28/1990 ~United Press International

LIMA, PERU (JULY 28) UPI - President Alberto Fujimori's effort to achieve national unity took off to a shaky start on the day of his inauguration Saturday, which was marred by unruly behavior by legislators in Congress and a walkout of a major political party.

Minutes after the uproar in the Legislature, Fujimori said in his inaugural speech that he would govern with ''a new language of national understanding, which is the language of dialogue, agreement and the search for consensus.''

Fujimori asked Congress to grant him emergency authority for 180 days to deal with Peru's economic problems, but again failed to provide concrete measures to combat the crisis he called ''the worst in the history of the republic.''

In the past week, prices have been shooting up daily at rates ranging from 3 to 100 percent. Inflation was 2,296 percent in the 12-month period ending June 30 and was expected to be over 60 percent for July alone, bringing the cost living increase officially to what economists call hyperinflation, meaning a rate greater than 50 percent a month.

Lima shop owners who are usually open seven days a week closed their doors Saturday, awaiting new specific policies, such as a devaluation.

Fujimori instead asked Congress to revoke a law nationalizing private banks, a measure approved three years ago that was never implemented, and he said he would try to undo the virtual default on Peru's foreign debt decreed by outgoing President Alan Garcia in 1985.

He offered a dialogue with the United States on ''a more just and rational collaboration'' to combat illegal drug traffic, and he repeated his offer to negotiate with terrorists ''if they lay down their arms.''

Just before his appeal for national unity, Congress went into an uproar when deputies and senators of the conservative Democratic Front, the party Fujimori defeated in elections, disrupted Garcia's farewell address.

The Democratic Front legislators banged their desks. Members of Garcia's center-left party, Apra, in retaliation, banged their desks and shouted, ''The right will not pass.''

Members of the diplomatic corps and the presidents of Argentina, Chile, Venezuela, Chile and Bolivia looked on in dismay as Vice President Maximo San Roman banged his gavel and delivered stern warnings.

The disorder, which took place before Fujimori arrived in the chamber, did not end until over 80 Democratic Front legislators departed from the Chamber of Deputies where the joint session with the Senate was being held for the inaguration.

The son of Japanese immigrants, an independent who put together an ad hoc political party known as ''Change 90,'' Fujimori, who celebrated his 52nd birthday Saturday, defeated the conservative presidential candidate, novelist Mario Vargas Llosa, by promising a more gradual and humane approach to combatting inflation than the ''shock plan'' proposed by his opponent.

In recent weeks, however, Fujimori has shifted his position and has warned he will take drastic stabilization measures, such as raising the price of gasoline and public services.

And random interviews with city residents reflected widespread anticipation of upcoming economic sacrifices.

''We are waiting for the economy minister to speak,'' said Francisco Mendoza, 40, a merchant of hardware products. ''Now we don't know what prices will be. We don't know what the exchange rate will be. We can't do business.''

Alberto Durand, 29, an economics student who also is an office worker in a government agency, said ''There is a lot of uncertainty.''

''His message now is different than the one of his campaign. Then he said there would not be a shock. Now he says there will be a shock.

A 21-year-old money changer of Japanese descent, Carlos Katekaru, said he voted for Fujimori because he promised not to take drastic austerity measures but that he feels betrayed.

''He has betrayed us,'' he said. ''He named people of Popular Action to his Cabinet to be in charge of the economy. I didn't vote against Vargas

Llosa. I voted against his shock plan.''

Major areas of downtown Lima, including the central Plaza San Martin, were blocked off to both motor vehicle and pedestrian traffic Saturday as part of the strict security measures to guard against possible attacks by left-wing terrorist groups active in Peru.

Fujimori's inauguration represents the first time in Peru that three constitutionally elected presidents have taken office consecutively without an interruption by a military coup or revolution.

#90209u0763 07/28/1990 ~United Press International

FAIRBANKS, AK (JULY 28) UPI - Lightning-sparked wildfires have scorched more than 2 million acres across the middle of Alaska this summer and most of that was still burning Saturday, fire officials said.

Fires have been growing at a rate of more than 100,000 acres every day, and 2,700 firefighters - every available forest fire crew in the state of Alaska - were trying to contain a dangerous dozen of the 118 fires burning across the state.

Cooler temperatures and scattered showers chased away the smoke that has been a nuisance and health hazard in Denali National Park, Fairbanks and other towns, and which interfered with traffic along the roads to Canada and to the Prudhoe Bay oil fields, said fire information officer Trish Hogervorst-Rukke.

But despite the improved weather conditions, the fires continued to move across the interior of Alaska.

''We're still coming in with a quite a few more acres every day,'' Hogervorst-Rukke said.

Since thousands of lightning strikes ignited dry timber four weeks ago, wildfires have burned 2,075,408 acres, Hogervorst-Rukke said. She said fires were burning Saturday on 1,963,000 acres.

The joint federal-state Alaska Fire Service estimated the cost of fighting the fires at $33 million, with $10.5 million spent by federal agencies and $22.4 million spent by the state of Alaska, which saw its entire $3 million annual firefighting budget go up in smoke weeks ago in the defense of the town of Tok in eastern Alaska.

About a third of the firefighters were battling the 81,800-acre blaze that has threatened Tok, the Indian village of Tetlin, a Coast Guard communications station and highway traffic.

Firefighters also were concentrating on three fires burning toward each other on 250,000 acres inside a triangle formed by the towns of McGrath, Telida and Nikolai.

The 210,000-acre fire on the Kanuti National Wildlife Refuge was actively burning on two flanks but was no longer a threat on its eastern side, 1 1/2 miles from the trans-Alaska oil pipeline and the Dalton Highway, the supply road from Fairbanks to the North Slope oil fields.

Most of the fires were burning wildlife refuge land managed by the U.S. Fish and Wildlife Service. But other federal lands, state lands and Indian lands also were on fire.

(JULY 28) UPI - Government officials in the twin-island state of Trinidad and Tobago deny Moslem rebel claims that the government of Prime Minister Arthur Robinson has been toppled. Acting President Emmanuel Carter went on state-run radio this morning to assure that the rebels' claim was false. A group of Moslem radicals used force yesterday to take over the government-controlled radio and T-V headquarters.

Israel Radio says 18 people were injured today when a pipe bomb exploded on a crowded Tel Aviv beach. The radio reports most of the injuries were minor. The blast prompted Israelis at the beach to attack nearby Arabs. Three Arabs were injured in the melee, which was broken up by security forces. Israeli authorities said they detained 11 Arab suspects for the explosion.

A Navy report made public today indicates an inadvertent mistake by a pilot may have led to the November crash of a jet in suburban Atlanta. Two people on the ground died when the AE Corsair jet piloted by Lieutenant Commander Robert Conlyn plummetted into a row of buildings November 9th. Navy investigators suggest the crash may have been caused by Conlyn's mistakenly cutting his fuel supply.

The Department of Energy says the condition of the Hanford Nuclear reservation in Washington state may be worse than previously expected. In a one-thousand page report released yesterday, the D-O-E said radiation contamination at the facility is spreading quicker than efforts to contain its spread. State and environmental officials say they were NOT surprised by the contents of the report.

China said today it would NOT recognize a British law that grants 50-thousand Hong Kong residents the right to emigrate to Britain after Hong Kong reverts to Chinese rule in 1997. The British Nationality Act was

passed last week in hopes that its presence would give key Hong Kong residents the confidence to remain in the British territory after China assumes control in seven years.

KENNEBUNKPORT, ME (JULY 28) UPI - President Bush interrupted a weekend of golf and boating Saturday to attend the wedding of a second cousin, Reuben Andrus Holden V.

Bush, accompanied by his wife, Barbara, and dozens of friends and relatives, witnessed the exchange of vows between Holden and Pamela Anne Grindle at St. Ann's Episcopal Church.

Immediately after the ceremony, Bush shook hands with the groom and kissed the bride on the steps of the stone church along Maine's rugged coastline.

The church is located less than a mile from the Bushes' summer home in the seaside village.

Holden is from Marshfield, Mass., Grindle from Boston.

Bush arrived in Kennebunkport on Friday afternoon. He returns to Washington Sunday.

#90209u1190 07/28/1990 ~United Press International

GRAND BLANC, Mich. (JULY 29) UPI - Hale Irwin, gunning to become the first golfer since 1978 to win three straight PGA Tour starts, sank an 8-foot birdie putt on the 18th hole Saturday to take a one-stroke lead over Billy Andrade after three rounds of the $1 million Buick Open.

Irwin, 45, started the round tied at 12-under with Don Pooley in the race for first-place money of $180,000 and shot 5-under 67 for a three-round total of 17-under 199.

Third-year pro Andrade, co-runnerup in the 1989 Buick Open, began the round two strokes behind Irwin and actually drew into a tie at 16-under with a 15-foot birdie putt on the closing hole. He shot 66 for his tour of the 7,014-yard course, as did veteran Fuzzy Zoeller, another stroke back at 201.

No golfer has won three straight PGA Tour events he has entered since 1978 when Gary Player took the Masters, Tournament of Champions and the event in Houston.

Irwin won the U.S. Open and Buick Classic back-to-back in his last two PGA Tour starts. There have been three intervening tournaments but the Frontenac, Mo., resident skipped them.

The only event he entered prior to the Buick Open was the British Open, a non-PGA Tour event in which he finished 17 strokes off the lead.

''That's fine, I have no problems with that,'' Irwin quipped at the prospect of winning three in a row. In just 12 events this year, the 23-year veteran has won $571,694 to more than double his previous best earnings season.

The winner of the 1981 Buick Open went without a bogey on the Warwick Hills Golf and Country Club course and has now played eight straight PGA Tour rounds in less than 70 strokes.

''I don't know,'' he responded when asked to explain his hot streak, ''other than the fact ... in order for me to do well, I have to do the fundamental things well. I have changed my driver and I have changed my sand wedge but that hasn't changed my game that much.''

Zoeller, who started the round 9-under, eagled the 490-yard par-5 13th hole to drop 13 shots under par, then birdied the par-4 15th and 18th holes to pull within two shots of the lead.

At 14-under 202 was Doug Tewell, another of the 1989 Buick Open runners-up. U.S. Open runner-up Mike Donald was at 13-under 203 with Dave Barr. At 12-under 204 were 1987 Buick Open winner Robert Wrenn, Mike Sullivan and Pooley. Ken Green, the 1985 Buick Open winner, stood at 11-under 205 with Jerry Haas and defending champion Leonard Thompson.

Andrade has won $129,345 and $397,538 in his two pro seasons and is at $120,345 for 18 events this year. He has never won on Tour but was close in last year's Buick Open.

''I don't have to make up as many shot as I did last year,'' said Andrade, who began the fourth round a year ago too far off the pace to win, even with a 67. ''This is what you work for. You have to take advantage of your opportunities.

''I want to go out and do just what I've been doing the first three rounds. You're going to get passed by everybody on the golf course unless you get it going here.''

''There's not a score you can post and feel safe with,'' Irwin said, ''unless it's absurd. There are so many good golfers out here.''

#90209u1561 07/28/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Spuds McKenzie, the black-and-white dog that peddles a brand of beer, could be headed for the endangered species list if industry fears about a measure now before Congress come true.

Legislation by Rep. Joseph Kennedy, D-Mass., would require that all print, radio and television advertisements and promotional displays for alcoholic beverages include a prominent health and safety warning message detailing specific risks related to drinking.

''As a society, we seem to be unwilling to even give the basic warnings,'' Kennedy said. ''We'll let tens and tens of thousands of ads to be shown on television to our children to have them think if they want to win that race, if they want to get the good car, find the prettiest girl, they have to drink.

''Let's take advantage of the brains that God gave us and recognize that if there's some problem with a particular product, we probably ought to use it moderately or avoid it under certain circumstances,'' Kennedy said.

But groups representing the alcohol, broadcasting and advertising industries have massed in opposition to the plan. They call it a ''draconian'' step that would effectively lead to a ban on virtually all forms of advertising for beer, wine and liquor.

Saying alcohol is a factor in half the nation's motor vehicle deaths and homicides and causes 100,000 deaths annually, Kennedy says his legislation is designed to combat alcohol abuse by giving the public the ability to make a ''balanced and informed choice.''

James Sanders, president of the Beer Institute, called the legislation ''prohibitionist.'' The trade association represents firms that produce and sell some 90 percent of the nation's beer, including industry giants Anheuser-Busch, Miller, Stroh's and Coors.

''If they can tax it enough, if they can eliminate advertising, if they can mix it in with the drug war, then they will have achieved a prohibition without passing a prohibition amendment,'' Sanders said. ''They feel that alcohol is the problem, not the people who drink it.

''It's just an exercise to make some congressman feel good and look good, I suppose, in a superficial way,'' Sanders said. ''If it were to pass, it would be pretty much the end of advertising in this industry.''

The legislation calls for a rotation of five warnings in advertisements:

-''Drinking during pregnancy may cause mental retardation and other birth defects;''

-''Alcohol impairs your ability to drive a car or operate machinery;''

-''Alcohol may be hazardous if you are using any other drugs such as over-the-counter, prescription or illicit drugs;''

-''Drinking alcohol may become addictive;'' and

-''It's against the law to purchase alcohol for persons under age 21.''

In print advertisements, the warnings will include a toll-free telephone number operated by the Federal Trade Commission to give information about alcohol abuse. In broadcast advertisments, the warnings must be read ''in an audible and deliberate manner and in a length of time that allows for a clear understanding.''

Companion legislation sponsored by Sen. Albert Gore, D-Tenn., is pending in the Senate.

Health warnings have been required on alcohol product labels since last year.

The alcohol industry, which totalled $90 billion in sales in 1989, spent about $2 billion annually on advertising and promotions. Beer and wine commercials, featuring popular sports celebrities and such characters as Spuds McKenzie, represent an important source of revenue for the television networks, along with local stations and radio outlets.

Consumer groups and substance abuse experts have given strong support for the measure. The American Civil Liberties Union, however, has expressed its doubts about the constitutionality of the legislation.

Barry Lynn, the ACLU's legislative counsel, testified before a House subcommittee that the requirements of the measure ''are so onerous as to amount to a de facto ban on many broadcast advertisements of alcoholic beverages'' and that a ban even on commercial speech is a First Amendment violation. Lynn pointed out alcohol is a legal product and Congress has not demonstrated that advertisements are misleading.

Lynn contended that the length of the proposed health warnings could consume so much of the advertiser's time that the advertiser would opt not to promote the products on the nation's airwaves, saying the warnings particularly would overwhelm 15-second advertisements.

Industry officials estimate that the proposed warnings, on average, would eat up seven seconds.

Industry officials warn that the legislation could have a far-reaching impact on the media, with television and radio stations finding it extremely difficult to replace revenues lost by alcohol ads, thus restricting monies for sports, news and political event coverage. It also could force the industry to reevaluate its sponsorship of sports events.

Kennedy said the measure is warranted.

''There is a very strong double standard that exists in America when it comes to alcohol, and that's what we're taking on,'' Kennedy said. ''I think beer and alcohol are perfectly reasonable to drink and be enjoyed taken in reasonable amounts. But in this country alcohol kills three times as many people as all other drugs combined, more than heroine, crack, cocaine, PCP and all the rest of that stuff.''

MOSCOW (JULY 29) - The Soviet Government has announced that Agroprombank, the Soviet bank for the agro-industry, is to transformed into a joint stock commercial bank, Tass news agency reported here Sunday.

Soviet and foreign citizens, along with Soviet and foreign businesses, will

be able to buy stocks in the bank for rbles and foreign currency.

Tass did not specify the amount or value of the stock for sale.

Agroprombank was originally part of Gosbank, the state bank, which was split up into five separate parts in January 1988.

Soviet President Mikhail Gorbachev has indicated he intends to carry out a reform of the country's banking system in the very near future as a step towards establishing a market economy.

BEIJING (JULY 29) - The West German conglomerate Krupp is to hold a 30 percent stake in a 400 million dollar steel project in Shanxi province, northern China, it was reported Sunday.

The project, to be situated in Taiyuan city, will produce 415,000 tonnes of special steel and 350,000 tonnes of rolled steel, with China's auto industry seen as a prime market, the official China Daily said.

It said the three partners in the joint venture have agreed on their respective equity stakes - 40 percent for Taiyuan Iron and Steel Corp. (TISCO), 30 percent for China International Trust and Investment Corp. (CITIC) and 30 percent for Krupp.

Chinese and West German experts now are undertaking feasibility studies, it added.

TISCO, which dates back to 1934, is a state-run mill with a 1989 steel output of 1.68 million tonnes. CITIC is a Beijing-based state investment agency with interests in a wide range of sectors.

Jakarta (JULY 29) - The Association of South East Asian Nations (Asean) and the United States and other industrialised countries wound up three days of talks Sunday still at odds on how best to end the Cambodian conflict.

U.S. Secretary of State James Baker told reporters at the close of the meeting that Washington continued to subscribe to the goal of a comprehensive settlement that would include United Nations-supervised elections in Cambodia.

The Jakarta talks followed Asean's annual ministerial meeting and were

attended by the foreign ministers of the six Asean countries and their counterparts from Australia, Canada, the European Community, Japan, New Zealand and the United States.

Baker said U.S. commitment remained unchanged regarding the need for a verified withdrawal of Vientamese troops from Cambodia, preventing the Khmer Rouge from returning to power and ensuring genuine self-determination for the Cambodians through free elections.

It was in the effort to broaden and intensify the search for peace in Cambodia, he explained, that the U.S. had chosen to pursue an active dialogue with Hanoi and was considering contacts with the Phnom Penh regime.

MOGADISHU (JULY 29) - A Somali army military commander, General Abdi Osman Mohamed, was shot dead Saturday night at Guriel in central Somalia, a defence ministry statement said Sunday.

It said Gen. Mohamed, commander of the army's 21st division, was killed by "armed gangs" soon after he was transferred from Dhusomareb division, some 500 kms (300 miles) north of here while on his way to the capital.

The statement said the gangs attempted to block traffic on the main road which links the southern part of the country to the north and that they were carrying out similar operations in central Somalia.

JAKARTA (JULY 29) - The Association of Southeast Asian Nations (ASEAN) and its major trading partners plan to boost private sector cooperation in order to strengthen existing ties, regional diplomats said Sunday.

Greater private sector involvement was deemed necessary to complement existing government-to-government ties, diplomats said at the conclusion of a three-day ministerial meeting between ASEAN and its six "dialogue partners."

The foreign ministers of the ASEAN nations - Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand - ended their annual conference with their counterparts from the United States, Japan, the European Community (EC), Canada, Australia and New Zealand.

"Our cooperative relations are moving well," Foreign Minister Ali Alatas of host nation Indonesia said at a joint press conference at the end of the

meeting.

"Every time we meet, it strikes me that new and sometimes innovative programs are being added while existing ones are being implemented," he said.

Delegation sources said some ministers during the meeting stressed the need to encourage private sector involvement in existing bilateral forums between ASEAN and its six trading partners.

The proposals were generally welcomed since they complemented the declaration by ASEAN heads of states at their last summit in Manila in 1987 to emphasize cooperation among member countries' private sectors, the sources said.

The business sector had previously been involved in the ASEAN-Australia forum and plans are now afoot to expand ASEAN forums with private sector participation with Japan, the United States and Canada, diplomats said.

Baghdad (JULY 29) - Scheduled talks between Iraq and Kuwait to discuss their dispute over oil and border demarcation have been postponed and appear unlikely to take place at all this week, the Iraqi government said Sunday.

The official Iraq News Agency (Ina) stressed in a statement that Iraq ''did not know the reasons behind it, nor has it asked for postponing the meeting''.

Two days of discussions between senior Iraqi and Kuwaiti officials had been due to open Sunday in Jeddah, Saudi Arabia.

The Ina announcement came as King Hussein of Jordan arrived in Baghdad and was met at the airport by Iraqi President Saddam Hussein. Official statements gave no indication whether talks between the two leaders would cover the Iraq-Kuwait feud.

The Ina statement said the Jeddah meeting, agreed upon by Saddam Hussein and Egyptian President Hosny Mubarak, would not convene on Sunday ''and it does not seem it will be held during this week''.

Kuwait has so far made no comment on the postponement of the meeting.

The conflict surfaced nearly two weeks ago when Iraq lashed out verbally at Kuwait and the United Arab Emirates for weakening the Iraqi economy by selling cheap oil on the international market. Baghdad also accused Kuwait

of stealing 2.4 billion dollars' worth of Iraqi crude from oil fields along the two countries' joint border.

#90210d6800 07/29/1990 ~French/German News Agency

LISBON (JULY 29) - The rebel National Union for the Total Independence of Angola (UNITA) Sunday called on Portugal to announce "without delay" the date of more peace negotiations with the Angolan government.

"UNITA is prepared to do all it can to stop the war this year," it said in a communique, adding that it was ready to "open immediately the process towards democratisation" in Angola.

The third direct meeting between U.S.-backed UNITA and the Angolan government could possibly take place during the first two weeks of August, according to Portuguese Prime Minister Anibal Cavaco Silva.

The first two meetings between the two sides took place at the end of April and in mid-June, also in Portugal, the former colonial power in Angola.

In its communique, UNITA welcomed an Angolan government decision to accept its proposal that "peace corridors" be created to send aid and supplies to victims of the drought that has hit several provinces in the country.

"The principle of peace corridors must be enforced firmly so that neighbouring countries who want to aid our people in drought-stricken areas can successfully accomplish their work," said UNITA.

UNITA said it undertook not to endanger United Nations workers or obstruct their relief work in the country so long as U.N. markings were displayed on their vehicles.

It said U.N. efforts must be coordinated with those of other countries involved in the peace process.

UNITA also said that "the necessary time" must be given to both sides in the Angolan conflict so they can each inform their troops of the creation of the peace corridors.

Saturday, the Angolan army command said that 14 crude oil production pipelines were destroyed Wednesday by UNITA rebels in the northern part of the country, in Zaire province.

"The sabotage took place at a time when the two parties are attempting to establish an appropriate climate for the inauguration of a cease-fire," the army statement said.

The action, it said, contradicted UNITA's proclaimed peaceful intentions.

COLOMBO (JULY 29) - Government troops shot dead at least 15 Tamil guerrillas and the Tiger rebels killed five Moslems in Sri Lanka's troubled northeast, military officials and sources said Sunday.

Troops backed by the navy killed seven guerrillas of the Liberation Tigers of Tamil Eelam (LTTE) in northern Talaimannar Saturday, military officials said here, adding that the security forces suffered no losses.

In continued attacks on army camps in the north, Tamil guerrillas fired mortars and rifle-fired grenades, leaving at least 10 troops injured across the Tamil-majority region, officials said.

In the island's multi-racial east, at least five Moslems were killed late Saturday when heavily armed LTTE cadres attacked a mosque south of Sampanthurai town in Ampara district, official sources here said.

Sampanthurai is one of many Moslem-dominated areas in the region that have been subjected to attacks by the LTTE, which has accused Moslems of siding with security forces.

Intense fighting broke out last week between troops and the LTTE in the northern district of Kilinochchi where the Kilinochchi, Paranthan and Elephant Pass army camps are located.

The Elephant Pass causeway links Kilinochchi with the Jaffna peninsula, a known rebel stronghold.

More than 2,250 people have died in the violence in Sri Lanka's primarily Tamil northeast while thousands more have been made refugees.

The fighting erupted when the LTTE seized hundreds of policemen from many stations in the northeast on June 11, shattering 14 months of peace talks between Colombo and the guerrillas.

Jerusalem (JULY 29) - A senior Housing Ministry official said Sunday that Israel should ask the Soviet Union to halt the flow of Jewish immigrants as the government postponed a decision on a controversial plan designed to solve the country's housing crisis.

The scheme was formulated for Housing Minister Ariel Sharon by a private

construction company which also acts as an importer of various makes of prefabricated homes.

The plan assumes 1 million immigrants over the coming five years and calls for the import of 50,000 mobile homes and 40,000 prefabricated homes, in addition to the construction of some 385,000 permanent apartments.

At present upwards of 20,000 immigants arrive in Israel every month.

Sharon is opposed on the plan by Finance Minister Itzhai Moda'i, who inisted the government could not afford the budget deficits that would result from it.

KABUL (JULY 29) - Heavy fighting between government troops and Afghan rebels raged in two regions near the capital Kabul as security forces moved to capture guerrilla strongholds, an official spokesman said here Sunday.

Intense artillery and aerial attacks were directed on positions of the mujahedeen entrenched in Pashae valley of the mountainous Paghman region, 20 kilometres (12 miles) northwest of here, the spokesman said.

He said the fighting started about two weeks ago but troop advances were essentially slow because the entire region had been heavily mined by the mujahedeen guerrillas.

The government had earlier claimed that it had dislodged the mujahedeen from Paghman, used by the rebels as the main launching pad for their rocket attacks on Kabul, a city of 2.5 million people.

"Pashae valley is the last postition of the opposition (mujahedeen). There is no denying that very heavy blows have been dealt on them," the foreign ministry spokesman said.

He had no casualty figures of the past two weeks of fighting, but said security forces have captured large quantities of surface rockets, ammunition and explosives and destroyed several ammunition dumps of the guerrillas.

However, the rebels continued their rocket attacks on the capital and a 90-year-old woman was killed and six others, including two children, were seriously wounded in attacks on Kabul Saturday, the spokesman said.

He said most of the rockets fell short of the city-centre and residential areas and were now pounding farmlands because the guerrillas had been

pushed back almost out of firing range.

Heavy fighting was also continuing in Musae, about 60 kilometres (35 miles) south of Kabul, where troops killed at least 22 rebels in the past four days of combat, the spokesman said.

The guerrillas backed by Saudi Arabia, the United States and Pakistan are battling to overthrow the communist government of President Najibullah, who was installed in Afghanistan after the 1979 intervention of the country by the Soviet Union.

At least a million people have lost their lives in the past 12 years of civil war.

#90210d7250 07/29/1990 ~French/German News Agency

HAVANA (JULY 29) - Cuba and Spain have toned down their dispute over the handling of 18 Cubans who have taken refuge in the Spanish Embassy here, officials said.

"Polemics doesn't pay," Cuban President Fidel Castro told reporters during a reception at the Peruvian Embassy here late Saturday.

Mr. Castro also expressed regret that he was not able to attend Saturday's inauguration in Lima of Peruvian President Alberto Fujimori because of the embassy refugee crisis.

Of the 44 Cuban refugees who entered embassies and diplomatic residences of Czechoslovakia, Italy, Switzerland and Spain beginning July 9, only 18 remain in the Spanish Embassy.

During the reception at the Peruvian Embassy, Mr. Castro and Spanish Charge d'affaires Ignacio Ruperez had a "very friendly conversation," said the Spanish diplomat.

He added that Mr. Castro had expressed confidence that a rapid solution would be found to the affair.

Mr. Castro told reporters he did not intend to "irritate or annoy" Spain in a speech he made Thursday marking the guerrilla attack which started the Cuban revolution 37 years ago.

He had accused Spain of being an accomplice of the United States and said that the move into the embassies by disgruntled Cubans was an "American plot."

Spain recalled its ambassador in Havana for consultations and cut off

economic aid following an official communique issued July 18 by the Cuban government which sharply criticized Spanish Foreign Minister Fernandez Ordonez.

PRETORIA (JULY 29) - Two men were killed, five injured, including a policeman, and 59 people arrested in political violence over the weekend, police said Sunday.

Violence was reported in Natal Province, eastern Transvaal and to a lesser extent in the Cape and Witwatersrand area.

A total 3,000 people have died in violence in Natal over the past four years between the supporters of the mainly-Zulu conservative Inkatha movement and the anti-apartheid United Democratic Front.

Police also said a limpet mine exploded Saturday night extensively damaging police offices in Langa in the western Cape.

No-one was injured in the blast and no group claimed responsibility.

#90210d7380 07/29/1990 ~French/German News Agency

PARIS (JULY 29) - A meeting called for Monday by former Cambodian premier Son Sann to bring together the various factions in the Cambodian conflict has been postponed, Mr. Son Sann's chief of staff Penn Thol said Sunday.

Mr. Penn Thol said Monday's meeting was "impossible" because the factions, especially the communist Khmer Rouge which is the largest military group, had still not responded to Mr. Son Sann's invitation.

But he did not give a new date for a possible meeting.

In the wake of the U.S. policy shift on Cambodia, Mr. Son Sann, who leads one of the two non-communist factions, invited the Khmer Rouge and the faction of resistance leader Prince Norodom Sihanouk to hold a "working meeting" here Monday and Tuesday.

He invited Cambodian Prime Minister Hun Sen, who heads the Vietnamese-installed government in Phnom Penh, to join the session Wednesday. The talks were expected to focus on the composition of an interim government.

But Mr. Hun Sen responded negatively in an interview with the Phnom Penh news agency SPK monitored in Bangkok on Sunday.

Mr. Hun Sen said he would be prepared to attend the first meeting of the provisional government, or Supreme National Council, only if it was established in accordance with the joint communique signed in Tokyo in June.

He would not, he stressed, go to a meeting simply to set up the SNC.

Mr. Hun Sen and Prince Sihanouk signed a joint communique in Tokyo agreeing to a cease-fire, and to quickly set up a Supreme National Council -- to be seated by six resistance and six government representatives -- to pave the way for general elections in Cambodia.

The Khmer Rouge refused to endorse the Tokyo accord.

But the parties remain divided, however, over the makeup and the duties of the council, which was to govern Cambodia before elections.

#90210d7430 07/29/1990 ~French/German News Agency

BRINDISI, Italy (JULY 29) - The last 26 Albanian refugees bound for Germany were to leave Brindisi by train late Sunday after administrative problems prompted 24 of them to go on a hunger strike.

The 26 refugees were hospitalised on arrival in Brindisi two weeks ago, then sent to the Restinco refugee camp, where refugees due to stay in Italy were being kept, while other West German bound refugees left Italy by train.

The refugees were part of a group of 4,786 evacuated from Tirana under U.N. -supervision after they had taken refuge in 11 foreign embassies.

Believing themselves forgotten or held up by official red tape, the refugees last Wednesay refused to sleep in camp dormitories and 24 of them began a hunger strike.

The commander of the southern military region announced Sunday the refugees would leave for Germany by train at 1630 GMT.

Meanwhile, six Albanians, who came ashore at Ostranto, Apulia, in a small boat July 10, arrived Saturday at the Restinco camp.

They will be looked after for a month by the Roman Catholic organisation Caritas which will try to resolve their problems. Unlike the "official" Albanian refugees, the six Albanians do not have passports.

The arrival of the six refugees brings to 823 the number of Albanian

refugees at the Restinco camp who will remain in Italy.

OUTSKIRTS OF MONROVIA (JULY 29) - Heavy fighting raged around a radio station on the outskirts of Monrovia Sunday as rebels struggled to dislodge government troops loyal to besieged president Samuel Doe, an AFP correspondent reported.

The rebels attacking the FM radio station about seven kilometres (four miles) from the centre of the city met serious trouble as they crossed with other government soldiers apparently fighting their way out of Scheiffelin army camp.

Heavy machinegun fire whizzed across the road from the radio station to a background of crackling automatic weapons and the crump of an intermittent mortars.

#90210d7720 07/29/1990 ~French/German News Agency

ULAN BATOR (JULY 29) - More than 90 percent of Mongolia's voters turned out Sunday in the country's first ever multi-party elections, the national election commission said.

Commission secretary general Sharvamdym told a news conference here late Sunday that an estimated 91.9 percent of Mongolia's million eligible voters had cast their ballots according to the latest tallies.

Earlier this week he had put the number of voters at 730,000, then raised that figure to 970,000 early Sunday only to raise it again to "more than a million" at the press conference.

Mr. Sharvamdym said the different figures were due to the fact that many people had left the capital for the steppes during the summer.

Several regions of the country bordering China and the Soviet Union had not been able to supply any information about the polling because heavy rain had cut telephone lines, he said, adding that aircraft had been sent to three of the affected areas.

In Ulan Bator's first voting district, the Social Democratic Party and the Mongolian Peoples Revolutionary Party were jointly protesting the presence of 30 extra ballots in the ballot box.

Mr. Sharvamdym suggested to the more than 20 foreign poll observers here to send in any remarks about the elections in writing, adding that he had not

yet received any complaints as officials began counting the ballot papers by hand.

Most of the observers said they had seen no evidence of any desire to fix the voting although there had been some "unintentional" irregularities.

The first official results are expected Tuesday.

#90210d7940 07/29/1990 ~French/German News Agency

KINGSTON (JULY 29) - Trinidad and Tobago's Caribbean neighbors were in a state of alert Sunday ready to respond to any call for military aid from authorities in Port of Spain where armed Moslem rebels were holding the prime minister and some of his cabinet ministers hostage, Caribbean officials said.

The entire English-speaking Caribbean is prepared to help the government of Trinidad and Tobago, said Barbados Prime Minister Lynden Pindling.

Specific offers of military and police assistance came from Jamaica and Barbados.

In an announcement Saturday before a summit meeting here of CARICOM, the Caribbean community which groups the 13 English-speaking countries of the region, Jamaica and Barbados said they had put their armed forces on alert.

CARICOM condemned the uprising and the detention of Trinidian Prime Minister Ray Robinson and members of his cabinet. Barbadian Prime Minister Erskine Sandiford said the Trinidad crisis "would constitute an important item" on the Caricom meeting agenda.

The Port of Spain rebellion is led by former policeman Yasin Abu Bakr, who heads a 250-strong black Moslem commune on the outskirts of Port of Spain.

Mr. Robinson was to have attended the 11th annual Caricom summit but delayed his departure to assess damage from tropical storm Arthur on Tobago.

Speaking for the small islands of the eastern Caribbean - Antigua and Barbuda, Dominica, Grenada, Montserrat, St. Kitts-Nevis, St. Vincent and the Grenadines and St. Lucia - Dominica Prime Minister Eugenia Charles said the Port of Spain uprising underscored the need for an effective regional security system.

She said the current system covering Barbados and the smaller countries of the eastern Caribbean - 300 policemen drawn from these countries took part in the U.S.-led invasion of Grenada that ousted a marxist regime in 1983 -

needed to be expanded to encompass the entire Caribbean.

"I think we should go further afield and join hands with each other and recognize that we are responsible for each other's difficulties," she added.

-30- 2267

#90210d8710 07/29/1990 ~French/German News Agency

BUDAPEST (JULY 29) - Hungarian electoral officials Sunday declared invalid a referendum on whether to choose the next Hungarian president via universal suffrage, because of an insufficient voter turnout.

The chairman of the national electoral commission, Janos Nemeth, told reporters that judging from 80 percent of the ballots counted so far, the turnout was no higher than 13.8 percent of registered voters.

In order for the referendum result to be valid, some 50 percent of the 7.8 million-strong electorate must take part.

Mr. Nemeth said that of the votes counted, those in favour of electing the president in a direct vote had 85.9 percent of the vote, and those opposed 14.1 percent.

But he added: "I can say that whatever happens, the referendum will not be valid."

The referendum's cancellation, which had been expected because of voter fatigue and the summer vacation, means that the current system of presidential election remains in place, under which the head of state is chosen by parliament.

Electoral participation was weak throughout the country, and according to the election commission, in one village only one person had voted.

Mr. Nemeth said that the highest turnout was 17.3 percent in Budapest, and the lowest was 10.2 percent in the eastern district of Hajdu-Bihar.

The former communist Socialist Party had spearheaded the effort to put the proposal to a vote. But the party accused the ruling conservatives of sabotaging the referendum by holding it during the summer vacation period, and by neglecting to campaign against the proposed measure.

#90210e0028 07/29/1990 ~Latin America New Agency

WARSAW (JULY 30) EFE - Polish Solidarity President Lech Walesa said over the weekend that he supported both sides in a split that has divided the

ruling movement between Walesa supporters and a group backing the prime minister.

Walesa said Sunday he backed both the "Central Alliance" formed by his supporters and the breakaway "Citizens' Movement Democratic Action" (ROAD) party created last week by 100 prominent Solidarity members behind Prime Minister Tadeusz Mazowiecki.

Addressing a meeting of the national Citizens Committee, which is Solidarity's ruling body, he justified his stance by saying, "I have friends and comrades in both"".

But Walesa indirectly attacked Mazowiecki saying he was ashamed of former colleagues who, he said, "accused us of demogoguery, populism and anti-Semitism".

"For this reason I want to take advantage of this occasion to repeat once again that I never was, nor ever will be anti-Semitic," he said.

Asked whether he thought ROAD was a Jewish party, Walsea said Jewish people should not attempt to hide their origins because this generated anti-Semitism.

"I think Jews are great patriots and have made a great contribution to culture, but I cannot understand why they hide their origins and why they are not proud of being Jewish as I am proud to be Polish," said Walesa.

Walesa said he was pleased by the exodus of pro-Mazowiecki supporters because "it will be much easier to define our tasks and direct our struggle in the way we want it."

Walesa also attacked Mazowiecki supporters for impeding progress towards a fully-democratic Poland and for trying to put off elections for the presidency.

Walesa nominated Mazowiecki last August to lead the Solidarity-Communist coalition government.

Walesa's reported presidential ambitions and his attacks on Mazowiecki for slowing political reforms and imposing harsh economic austerity measures are blamed for the split in Solidarity.

Walesa said the lack of a leader accepted by all members of Solidarity was seriously affecting the running of the country.

"It would be much easier to lead the country if we had a single leader, in the way that it is safer to drive a car with a single driver," said Walesa.

Until free and fair elections were held, Walesa said he felt responsible for stimulating political life in Poland.

"I assume that responsiblity because I am the reforms, I am Solidarity," he said.

Walesa denied he had asked the current president, communist Gen. Wojciech Jaruzelski, to stand down five years before his constitutional term ends.

On Saturday, the pro-Walesa Central Alliance began collecting signatures across the country in a bid to force the resignation of Gen. Jaruzelski, who imposed martial law in 1981 to crack down on the nascent Solidarity movement.

#90210p9886 07/29/1990 ~PR Newswire

COLUMBUS, Ohio (JULY 29) PR NEWSWIRE - The Limited, Inc. (NYSE/LSE/TSE: LTD) today announced that it will develop a major regional shopping mall on property it owns in the city of Columbus at the southwest corner of Morse Road and I-270. The project will occupy between 175 and 200 acres of the 1,100-acre site, and will cost approximately $300 million to $325 million.

The center will be anchored by more than 100,000 square feet of The Limited's own stores, including Abercrombie & Fitch, Express, The Limited, Limited Too, Cacique, Lane Bryant, Structure, Lerner and Victoria's Secret and Victoria's Secret Bath Shop. A major department store will also anchor the project, which will be part of an overall development that ultimately will include limited office and warehouse facilities, and a major office development by Ross Laboratories.

The Limited, Inc. will co-develop with a major national developer. This project is adjacent to the Ross Laboratories office and research development that will occupy approximately 500,000 square feet located on the 60-acre site.

"I believe the site is the premier shopping center, distribution center and office park site in central Ohio," commented Leslie H. Wexner, founder and chairman of The Limited, Inc. "I believe that this 1,100-contiguous-acre site is uniquely positioned in the dominant growth area in Columbus. It is five minutes from the airport, 10 minutes from downtown and a short distance from Bexley Whitehall, Worthington, Westerville and other population centers of Columbus. It is on I-270 near the new I-670. And most important, it is stratigically located to capture the business residents of northeast Columbus and the north- east subarbs, an area that will soon undergo the same kind of growth the past 15 years has produced in Worthington and Dublin."

Wexner concluded, "It is our hope and intention to create a unique shopping environment equal to and hopefully better than the Columbus City Center. Our vision includes social and entertainment amenities that are consistent to the aspirations of the surrounding neighborhoods, the quality of the Ross Laboratories project and our own efforts in Columbus."

The site is located in the city of Columbus and the Columbus School District. The Limited currently employs 4,600 people in Franklin County. Founded in 1963, it has grown to be the nation's premier women's specialty apparel retailer, with 1990 sales estimated at approximately $5.4 billion.

The Limited Inc., through the Limited, Express, Victoria's Secret, Henri Bendel, Lerner, Lane Bryant, Abercrombie & Fitch and Penhaligon's, presently operates 3,255 specialty apparal stores, and distributes apparel nationally through the Victoria's Secret, Lerner Direct, Lane Bryant Direct and Roaman's catalogs.

#90210u0049 07/29/1990 ~United Press International

(JULY 29) UPI - The attorney general of Trinidad and Tobago says efforts are under way to resolve the crisis in the Caribbean island nation. Attorney General Anthony Smart told Trinidad's government-run radio station Saturday night that Prime Minister Arthur Robinson and other hostages are in good health and good pirits. Robinson is being held by rebels who staged a coup attempt Friday night.

It is NOT clear how many people died in the unrest in Trinidad and Tobago. Government-run Trinidad radio says somewhere between 20 and 60 people died in the attempt to dislodge the elected government. A state of emergency and a dusk-to-dawn curfew are in effect in Trinidad.

A Malysian government official says ''the United States deports people every day'' and he does NOT understand the U-S position on Asian boat people. Malysia's foreign minister told Secretary of State State Baker in Indonesia Saturday that Asian nations want a commitment from the United States to solve the refugee problem.

Forecasters say the first hurricane of the 1990 Atlantic-Caribbean season will cause some big waves, but will probably NOT be a threat to land. At last report, Hurricane Bertha was about 520 miles east of Jacksonville, Florida and was moving northeast at about 10 miles an hour.

The Houston Ship Channel is closed following a shipping accident. The Coast Guard says a tanker hit three barges carrying fuel oil, partially sinking one barge. Two of the barges leaked fuel oil, with workers busy cleaning up the spill Saturday night.

Massachusetts police say a twin-engine plane crashed in a wooded area southeast of the Greater Lawrence Airport, killing all three people aboard. State Trooper Roger Carroll says a thick fog covered the area. In

his words- ''we are NOT even sure if the plane was taking off or landing.''

Zsa Zsa Gabor may be spending the night in a Los Angeles jail, but she still has some of the comforts of home- at least her home. The husband of the jailed actress says he took his wife pillows, silk comforters, diet soft drinks and ice cream. Gabor is serving a 72-hour sentence for slapping a police officer last year.

SEATTLE (JULY 29) UPI - The Soviet Union overwhelmed with finesse and the United States dominated with strength Saturday at the Goodwill Games.

The most noise, however, was made by Kojiro Machida - who with one loud clang of his aluminum bat produced a 14th-inning home run that brought Japan a dramatic baseball decision over the United States.

As the Games passed the halfway point, Saturday turned out to be a bizarre day in which three gold medals were awarded in one event and for a brief time none were awarded in another.

By day's end, the Soviet Union had overtaken the United States in total medals, but the United States led in golds by one.

The Soviet Union's Oksana Skaldina won three golds in rhythmic gymnastics and the Americans captured five of the 11 gold medals awarded in wrestling despite complaints of unsportsmanship on both sides.

One of those golds went to John Smith of Stillwater, Okla., who beat Stepan Sarkiayan of the Soviet Union in a rematch of the 1988 Olympic 136-pound gold medal match.

''That is the fourth time I have wrestled him and all four times he has had some type of ointment on his body,'' Smith said after his 3-1 victory. ''I've asked the officials to check him and they know about it from our previous matches.

''But they never do anything about it. I can't grab him because anytime I touch him I slip off. I went to get hold of him in this match and I couldn't because I kept slipping off his back. It upsets me that they know

exactly what I'm talking about, but nothing is done.''

After Smith's complaints, the Soviets filed a protest about judging in two of the American victories - protests that were eventually denied to bring the United States the wrestling team title.

''I don't care what they do with the protests,'' said American Coach Bill Seay of Oklahoma State. ''We beat them tonight. For the first time in a major world competition we beat them. And we beat their best team. That's all that matters.''

Natalia Kalinina of the Soviet Union claimed the all-around gymnastics gold over Svetlana Boguinskaia, the defending world champ who rebounded from a dismal performance during the team event Friday night to claim the silver.

American champion Kim Zmeskal slipped off the uneven parallel bars in her first routine of the night and did well to finish sixth after being next-to-last out of 16 competitors following the opening rotation.

In rhythmic gymnastics, Skaldina won in the hoop, rope and ball and finished tied for second behind Alexandra Timoshenko in the ribbon. Skaldina, Timoshenko and Mila Marinova all won golds in the rope after tying with scores of 9.90.

While there were three golds awarded in that event, none were given away for a brief time in the 198-pound wrestling class where both the gold medal bout participants were disqualified. In such cases, both wrestlers are given silver medals. Later, however, the judges allowed two competitors to compete for the gold in that weight class and it was won by Elmadi Jabrailov of the Soviet Union.

After the day's 18 finals, the Soviets used their rush of success in gymnastics and rhythmic gymnastics to run their overall medal total to 118. The United States had 115 total medals. The Americans had 46 golds, to 45 for the Soviet Union.

#90210u0124 07/29/1990 ~United Press International

PORT VILA, Vanuatu (JULY 29) UPI - Proposals by the United States to dispose of chemical weapons in the South Pacific will come under scrutiny at the South Pacific Forum this week.

Leaders of 13 South Pacific nations, ranging from Australia and New Zealand to tiny Niue with a population of 3,500, were gathering in Port Vila Sunday for their annual meeting.

U.S. briefing teams have visited South Pacific countries in recent weeks outlining proposals to dispose of tens of thousands of tons of chemical weapons on America's Johnston Island in Micronesia, 700 miles southwest of Honolulu, Hawaii.

The Australian government has said it hopes for a consensus in support of the U.S. proposals to incinerate chemicals already stored there, as well as material to be withdrawn from West Germany.

A number of forum countries, including Papua New Guinea, Vanuatu, the Marshall Islands and the Federated States of Micronesia, are understood to be opposed to the U.S. plans, officials said.

New Zealand Prime Minister Geoffrey Palmer also voiced concerns, particularly over plans to ship weapons from West Germany for destruction on the island.

Palmer said, however, that it seemed ''appropriate'' to dispose of stocks already held on the island.

''The point where New Zealand becomes concerned is if we are going to have large amounts of chemical weapons transported around the Pacific,'' he said on the eve of his departure for the forum.

Palmer, also New Zealand's minister for environment, refused, however, to detail his government's position until the forum meets formally.

According to newspaper reports, there are some 300,000 chemical weapons already stored on Johnston Island, including mustard gas shells, some of them leaking. Transport has already begun to the island of another 100,000 U.S. shells believed to contain Sarin and VX nerve gases from West Germany.

Johnston Island, 15.5 miles in circumference, reportedly has no indigenous population. It was annexed by the United States and Kingdom of Hawaii in 1858.

The island was taken over by the United States in 1934 for defensive purposes and a seaplane base was built. Juristiction was transferred to the U.S. Air Force in 1948, which led to many improvements and a landing field which takes up almost the island's full length.

The island now also has a sophisticated high-temperature incinerator operated from a computerized control room to dispose of the chemical weapons.

State Department officials said they expected criticism of the Bush administration's refusal to adhere to the South Pacific Nuclear Free Zone Treaty drafted by the forum five years ago at its meeting in Rarotonga, in the Cook Islands.

The treaty protocols, since signed by the Soviet Union and China, prohibit storage or use of nuclear weapons in the South Pacific.

The U.S. position has been that, although it does not engage in such practices, it believes the signing of the treaty might encourage other nuclear free zones, which might impose strategic difficulties.

New Zealand's banning of warships with nuclear weapons from its ports led to the breakup of the Australia, New Zealand and U.S. defense alliance, or ANZUS.

A welcome announcement on the eve of the forum was Japan's decision to discontinue drift net ''wall of death'' fishing in the South Pacific.

This practice was condemned by last year's forum in Kiribati. Later, the United States and New Zealand worked to secure a U.N. resolution against the use of the nets.

Other environmental issues at the forum will include concern over forestry depletion in the region and proposals by the United States to take Californian waste to the Marshall Islands to use as landfill.

The forum began with an informal retreat for the leaders Sunday, to be followed by 10th anniversary indepenence celebrations Monday. The forum will meet in formal sessions on Tuesday and Wednesday.

#90210u0149 07/29/1990 ~United Press International

(JULY 29) UPI - Athletic's pitching ace Bob Welch underwent his shortest performance on the mound in six years Saturday. Twin's rookie hurler Scott Erickson was still dreaming of the major leagues back then.

The Oakland Athletics sent two of the American League's best pitchers to face the Minnesota Twins in a Saturday night double-header. With Dave Stewart on the mound, the first game went according to plan and the A's won 4-1. But with Bob Welch throwing in the nightcap, it was a different story indeed.

Welch, who leads the major leagues in wins with 16, lasted only two-plus innings against the Twins. He yielded seven runs on seven hits and gave up three walks, including free passes to the first two batters he faced.

It was the earliest Welch had been knocked out of a game since June 30, 1984, when he was with the Los Angeles Dodgers as Oakland went on to lose 9-4.

''I felt good physically after the ball game,'' Welch said, now in his 12th season in the majors. ''I had good stuff out there tonight, I just couldn't use it.

''I was never able to apply myself pitch-by-pitch. I was just throwing the ball. The worst thing you can do is walk the first guy. After that, I spent all my time thinking about what I was doing wrong, not what I should have been doing.''

To contrast the cerebral strategies of Welch, the Twins had rookie Scott Erickson on the mound simply throwing as hard as he could.

''I just threw fastballs and let them hit it. I just tried to throw strikes because I didn't want to walk anybody,'' said Erickson, a Bay Area native. ''It is nice to be able to beat Oakland, especially when they hit me good the last time I faced them.''

The fire-balling right hander gave up 10 hits including two solo homers through his 6 1-3 innings to even a 2-2.

Erickson, 2-2, set the tone for the game in the first inning against lead-off hitter Rickie Henderson. Down 3-0 to the speedy outfielder, he

eventually worked the count to 3-2 and got Henderson to ground out to short for the out.

''That first at-bat might have been the big play of the game,'' said Twins' manager Tom Kelly. ''Scottie did a super job.''

Elsewhere in the American League: Kansas City outscored Baltimore, 10-9 in the opener, and Baltimore took the second game, 3-1 for the split; Detroit pounded Boston, 17-9; Chicago stopped Milwaukee, 5-4; Texas outlasted Toronto, 3-2 in 13 innings; Cleveland beat New York, 1-2; and Seattle knocked off Seattle, 2-1.

At Kansas City, Cal Ripken Jr. singled home the go-ahead run with two outs in the eighth inning, boosting Baltimore Orioles to a second game double-header split with the Royals.

In the second game, Baltimore starter David Johnson, 10-6, allowed four hits through seven innings, with two coming from consecutive batters. Gregg Olson recorded six outs for his 22nd save. Reliever Steve Farr, 8-5, took the loss.

The firt game featured Cal Ripken Jr.'s first error in a record 95 games.

Steve Crawford, 4-2, collected the opener victory with Jeff Montgomery recording save number 14. Kirt Stillwell's seventh inning blast put Kansas City ahead and beat Mark Williamson, 8-2.

Tigers 17, Red Sox 9

At Detroit, Larry Sheets collected six RBI with a three-run homer in the first inning and a bases-loaded triple in a 10-run sixth to carry the Tigers. The 10 runs were the most in an inning by the Tigers since they scored 11 in the first inning against Baltimore on Sept. 20, 1983. Paul Gibson improved to 3-2. Dennis Lamp evened to 3-3.

Brewers 5, White Sox 4

At Chicago, Ozzie Guillen smacked a two-run single with no outs in the ninth inning to rally the White Sox. Scott Radinsky, 6-0, retired the last four batters for the win. Don Plesac, 2-4, added a loss.

Rangers 3, Blue Jays 2, 13 innings

At Toronto, Harold Baines hit a two-out solo home run in the 13th inning to boost Texas. Baines hit the first pitch from Frank Wills, 5-3, over the center-field fence for his 10th homer of the season. Brad Arnsberg, 4-1, worked 1 2-3 innings for the win. John Barfield retired the final batter for his first save.

Indians 2, Yankees 1

At Cleveland, Alan Mills walked Brook Jacoby with the bases loaded in the seventh inning to force in the Indians' winning run. Tom Candiotti, 11-6, gave Cleveland just its third win in its last 11 games. Doug Jones pitched the ninth to earn his 27th save. Mills fell to 4-7.

Mariners 2, Angels 1

At Seattle, Ken Griffey Jr. doubled in one run and scored another and Brian Holman scattered eight hits over 6 2-3 innings, pacing the Seattle Mariners. Holman, 10-7, allowed one run, while walking two and striking out one. Mike Schooler threw in the ninth for his 28th save. Kirk McCaskill, 7-7, yielded just three hits over seven innings.

#90210u0155 07/29/1990 ~United Press International

(JULY 29) UPI - Around the world, around the clock, the latest news from U-P-I...

A truce has reportedly been reached to end a political crisis in Trinidad and Tobago. State-run radio Trinidad says an amnesty has been reached between rebels and the government. The radio says Prime Minister Arthur Robinson... still being held hostage in parliament... is suffering from a bullet wound in the ankle, and the minister of national security has been shot in the leg.

Forecasters say they do NOT expect a hurricane off Florida's coast to cause severe weather on land, but they did predict it would stir up rain and stiff winds. One meteorologist says the hurricane is large enough to bring winds and rain onto the entire mid-Atlantic Coast- in his words- ''from Florida to goodness-knows-where.''

A scene of mourning changed to panic Saturday in Linden, New Jersey. Police say four gunmen opened fire during the burial of a Vietnamese gang member, shooting at least four people. Police Captain Raymond Beckman says the shooting appears to be the result of a turf war between rival gangs.

Italy's ambassador to Liberia said the obvious in a cable to his government- there is NO longer any effective government in control of the west African nation. Rebel forces fought government troops in the heart of Monrovia Saturday, while civilians tried to hide in their crumbling houses.

A Navy officer faces seven years in prison in the rape of a female officer last April aboard an ammunitions ship. A judge in Rota, Spain, sentenced the lieutenant to prison and dismissed him from the Navy. Lieutenant J-G

Robin Brown is expected to be flown to a U-S naval station in Philadelphia within a week.

Jimmy Carter broke with tradition in making his first political endorsement since leaving the White House. The former president is giving his backing to aspiring Georgia politican Chris Mitchell, who will try to unseat a Republican state representative in November.

#90210u0173 07/29/1990 ~United Press International

VIENNA (JULY 29) UPI - Former Chancellor Bruno Kreisky, a staunch Socialist and one of post-war Austria's most popular and longest-serving leaders, died Sunday of heart failure. He was 79.

Known internationally for his strong ties with the Arab world and sometimes prickly relations with the United States, Kreisky steered the powerful Austrian Socialist Party through three decades and served as chancellor from 1970 to 1983.

He was regarded as one of the last of Europe's old-style Socialist leaders having cultivated his political sensibilities in Austria's underground Socialist movement in the 1930s. He fled his native country when Austria was annexed to Nazi Germany in 1938 and spent the war years in Sweden.

His death early Sunday at Vienna's Lainz Hospital followed a lengthy battle with heart disease. He had been hospitalized for about a week.

Although he was a skillful politician and powerful orator, he once said of himself: ''I am the only amateur among all these career politicians.''

Born to middle-class Jewish parents, he barely escaped arrest by the Nazi Gestapo when in fled to Sweden in 1938.

After the war, he returned to Austria and rose to become head of the Socialist Party in 1967. He also served as foreign minister in the neutral Socialist government.

Adopting a pragmatic approach to the realities of Cold War-era Europe, Kreiskybecame the first Western foreign minister to visit Bulgaria, Romania and Hungary.

Following his election as chancellor in 1970, he expanded his close relations with Arab leaders, becoming the first Western head of government to host Libyan leader Moammar Gadhafi and Palestine Liberation Organization chairman Yasser Arafat in official state visits.

His ties with such controversial figures drew criticism from the United

States, but enabled him to serve as a mediator in numerous Middle East conflicts.

At home, he remained enormously popular, partly because of his support for his efforts to combat unemployment. In his later years, however, Kreisky was increasingly at odds with the new breed of technocrats in the party, who he accused of forsaking the ideals of socialism.

In January 1986, at a gala honoring him on his 75th birthday, Kreisky credited the Socialist movement in Austria with giving the country a sense of national identity after the collapse of the Hapsburg empire in 1918.

''This new patriotism made us finally so strong that we were able to survive the long years of the occupation with the strong confidence that we could build a land that could be perceived by its citizens as their own fatherland,'' Kreisky said.

''The fact that I could share in that process was the greatest stroke of luck in my life.''

-30- 2943

#90210u0182 07/29/1990 ~United Press International

ULAN BATOR, Mongolia (JULY 29) UPI - The president of Mongolia conceded 69 years of absolute power have come to an end and opposition groups predicted a more progressive government, as Mongolians Sunday voted in large numbers during their first free election.

Nearly half the country's 2 million people were eligible to vote when polling stations across the vast nation opened at 7 a.m. The polls were to close at 10 p.m., but preliminary official results were not expected before Tuesday.

Long lines formed during the day outside polling stations in schools, libraries and other public offices in Ulan Bator. In rural areas, many voters arrived at balloting sites on horseback, decked out in their best traditional robes and colorful sashes.

Along with regional and local representatives, voters were choosing a new national parliament, the 430-seat Great People's Hural, in their first free election since the warrior Genghis Khan founded the Mongol Empire nearly eight centuries ago.

Three fledgling opposition parties, legalized just two months ago, were challenging the Mongolian People's Revolutionary Party, the communists who have held power since 1921 but have moved toward reform since a tiny pro-democracy movement sprang up last December.

By midday, 332,000 of the 987,000 eligible voters had cast ballots at the 1,620 polling stations, said D. Sharvavny, a spokesman for the National Election Commission. He said counting would be difficult because nomadic herdsmen with no fixed residence account for half the population.

The election is the outcome of a breathtaking eight months of change in one of the world's most isolated, backward nations, spurred by reforms in Eastern Europe and the Soviet Union, which had long controlled Mongolia as a military satellite and economic colony.

Both the communists and the opposition are pledging economic and political reforms, but differ on how fast and how far to go on issues such as private enterprise to improve an economy left impoverished by seven decades of Stalinist-brand rule.

Voting at mid-morning in Ulan Bator, Mongolian President Punsalmaagyn Ochirbat told reporters he had conceded his ruling communists would be forced to share power in parliament.

''The opposition could get as much as 20 percent,'' Ochirbat said. ''But my party's victory is very safe.''

His forecast was higher than that of the opposition. S. Zorig, a 28-year-old college lecturer who founded the pro-democracy movement and leads the affiliated association of the main opposition Mongolian Democratic Party, predicted a 13 percent share.

''I'm very optimistic,'' Zorig said, adding the opposition would do even better in the selection for the key Small Hural, a new standing body that will make major legislative decisions and will be elected on the basis of a party preference poll also on Sunday's ballot.

Opposition leaders predicted they could win up to half the 50 seats in the Small Hural, asserting that whatever the outcome, the next government would be considerably more reform-minded.

''We have no doubt Mongolia will be greatly more progressive after this election,'' said a senior activist of the opposition Party for National Progress, with along with the MDP and the Social Democratic Party forms the opposition coalition.

Numerically, there were 801 candidates for parliament, with 59 seats uncontested. The ruling party had 632 members, the opposition 101 members and 68 were listed as independent.

But at least two dozen communists and many independents were running as opposition supporters, and are expected to join forces with the opposition - and the sizeable progressive wing of the ruling party - against older

conservatives in the new government.

There were no reports of voting irregularities as officials checked voters through identification cards and registration lists at polling places. Officials even brought ballot boxes to hospitals and apartments so patients and shut-ins could vote.

Clifford Hart, a U.S. diplomat heading the American team among two dozen foreign observers from five nations monitoring the voting, said there were some problems with marking ballots and concern over a closed military zone north of Ulan Bator where soldiers voted.

''But there are a lot of observers from opposition parties out at the polling stations, and we haven't found one person who says the election is rigged,'' Hart said.

''We've seen no sign of abuse so far,'' agreed John Gilbert, a British member of parliament on the British observer team.

State television carried special election programming throughout the day and many voters appeared enthused about their first chance to choose their destiny freely.

''This is the beginning of great times for Mongolia,'' said a young Soviet-educated intellectual.

The 2-month-old opposition has been hampered by its lack of organization and funding, by an inability to show comprehensive policies and a sharp difference with the communists' calls for Mongolian versions of glasnost and perestroika.

''There are some differences, but they are not great enough,'' observed a senior government official. ''People will not vote for, but they will probably vote against, and here the opposition promises change.''

#90210u0234 07/29/1990 ~United Press International

WASHINGTON (JULY 29) UPI - Business lobbyists say that a national energy sales tax may emerge from deficit-reduction negotiations between President Bush and congressional leaders.

Business and environmental lobbyists, and congressional aides, report that an emerging consensus favors a tax on energy use. They warn it would boost heating and utility bills, particularly in the Northeast.

The Northwest, because of a reliance on hydroelectric power, could fare better under such a scheme, they said.

Nationally, a hastily formed coalition of business groups has warned that any type of broad-based energy tax would harm economic growth and jobs, and the poor would suffer the most.

The business groups also warn that their increased costs will be passed on to consumers.

George Lawrence, president of the American Gas Association, said, ''I do think there's momentum behind an energy tax.''

''The nickel and dime stuff doesn't work any more,'' said Paul Huard, a vice president of the National Association of Manufacturers. ''They're looking for $25 billion to $30 billion of new revenue.''

Huard said, ''They're going to go for the 'big bang' approach. And the energy tax is obviously a 'big bang.' You can get $20 billion without batting an eyelash.''

Because of the pressure on negotiators to come up with easily collectible new tax monies before the new fiscal year in October, Huard said, ''There's a time crunch.''

Although business is ''bitterly opposed to it,'' Huard said, an energy sales tax ''could make it. This is on the short list of things likely to happen.''

Such a surcharge would sharply drive up costs for energy producers - particularly coal - and big energy users such as the steel, paper, oil and chemical industries, he said.

Known technically as an ''ad valorem tax,'' it would work like a state sales tax. At 5 percent, for instance, a $100 electric or gas bill would increase to $105.

Bush and congressional leaders last week completed their 11th week of negotiations in an effort to reduce the massive federal budget deficit.

Many people who have closely followed the nominally private talks said congressional negotiators have virtually abandoned hope of reaching agreement before they leave for their month-long recess in August.

''I think we're in for the long haul,'' Huard said. ''I don't think the deal will be sealed until sometime in November.

''I never felt they'd have an agreement before the August recess,'' he added. ''They're just not going to go home and get mercilessly pounded for four weeks by constituents whose taxes were put up for auction.''

Michael Chakarun, a tax expert for the American Mining Congress, agreed.

''I don't see much happening until after the recess - and then a great rush to get something done,'' Chakarun said.

An energy tax, ''in one way, shape or another,'' remains on the negotiating table, Chakarun said.

There are several approaches - raising the federal excise tax on gasoline, adding a surcharge based on the carbon content of various fuels, or the ''ad valorem'' solution: taxing energy use at the production and retail levels.

Some lobbyists said it appeared unlikely that budget negotiators would embrace the ''carbon tax,'' which has received support from environmental groups intent on reducing carbon dioxide emissions from power plants and factories.

Carbon dioxide is considered the main culprit in the global warming phenomenon.

Environmentalists say the carbon tax is preferable because it would vary according to the carbon content of different fuels. The tax would be lowest for fuels with less carbon that make a reduced contribution to global warming.

Whether or not the ''carbon tax'' survives the negotiations, however, some lobbyists believe environment-related taxes are inevitable.

''To a growing number in Congress, using the tax code to improve the environment is an idea whose time has come and, being backed by a strong environmental movement, they are ready to push their cause,'' Chakarun warned mining executives in a recent newsletter.

A gasoline excise tax is unlikely in an election-year environment, many observers said.

That leaves the ''ad valorem tax'' - essentially a sales levy on energy use.

A lobbyist for a major environmental group, who asked to remain anonymous, said the idea of the national energy tax is ''interesting,'' but could have a disproportionate impact on Northeast states while favoring the Northwest.

''Rate systems around the country are so different,'' the environmental lobbyist said. ''The Northwest relies extensively on hydroelectric power,

which keeps actual costs very low.

''Coal and imported gas are used much more in the Northeast. So if you add a percentage tax increase, people in the Northeast pay a lot more than the rest of the country. I don't know if the budget negotiators have figured this out yet.''

The environmental lobbyist said, ''Another option, which I don't think has been discussed, is just a flat tax - so many pennies per Btu. It has a fairness element that's more appealing.''

''Btu'' refers to the British Thermal Unit - that is, the heat required to raise the temperature of a pound of water by 1 degree Fahrenheit.

#90210u0249 07/29/1990 ~United Press International

WASHINGTON (JULY 29) UPI - The first possible case of a medical worker infecting a patient with the deadly AIDS virus has given Americans yet another reason to worry when they visit the dentist or doctor, and has rekindled debate about how best to ensure patient safety.

Last week, the federal Centers for Disease Control reported a young woman apparently was infected with the AIDS-causing human immunodeficiency virus or HIV, by her dentist during a surgical procedure to remove two teeth.

The dentist, who was diagnosed with acquired immune deficiency syndrome three months before the operation, did not tell the patient that he was infected with HIV. He was wearing both gloves and a mask, and neither he nor the patient recall him bleeding during the tooth extraction.

The report attracted a flood of publicity and provided people who are afraid of going to the dentist with an additional, albeit rather farfetched, excuse to shun tooth care.

Enid Neidle, director of scientific affairs for the American Dental Association, called the CDC report incomplete and ''kooky,'' saying she cannot understand how the patient was infected by the dentist.

''People should not avoid the dentist and let their teeth rot because of a freak accident that is not well understood,'' said Neidle, whose group Friday said some dentists were reporting patients cancelling appointments after hearing of the CDC report.

No previous cases of a dentist or any other type of health care worker transimitting the AIDS virus to a patient has been brought to the attention of the CDC since AIDS was first recognized in 1981.

About 140,000 AIDS cases - about 5,300 among health care workers - have been reported in the United States over the past 10 years, so the risk of a health worker infecting a patient ''must be awfully small,'' said Dr. Harold Jaffe of the CDC.

A recent study in the Journal of the American Medical Association found a Tennessee surgeon who died of AIDS apparently did not infect any of about 2,000 patients upon whom he operated while infected.

However, the possibility that the dentist infected his patient has prompted the CDC to scheduled an Aug. 13-14 meeting to review its guidelines for patient care by health workers infected with HIV.

Currently, the CDC recommends health care workers infected with HIV use their judgment in deciding what procedures they can safely perform. The agency has no guidelines on whether health care workers with AIDS should tell patients of their condition.

The American Medical Association and American Dental Association have similar policies that leave conduct up to the discretion of HIV-infected doctors or dentists.

''I'm a little surprised at the sort of fudging, hemming and hawing and tap-dancing going on about this subject. The answers are very clear,'' said Arthur Caplan, director of the biomedical ethics center at the University of Minnesota in Minneapolis.

Like any person who has been involved in behavior that puts them at high risk of HIV infection, health care workers who think they are in a high-risk group should be tested and counseled, Caplan said. High-risk activities include multiple sex partners, intravenous drug use and working with blood products.

Health workers who test HIV positive should not take part in any medical procedure that could involve the exchange of blood or other bodily fluids with a patient, Caplan said. Procedures that fall into that category include orthopedic surgery, some obstetric procedures and some dental work that involves a medical professional working with sharp instruments mainly by ''feel'' rather than by sight.

Other medical activities, such as a pediatrician examining a child, a surgeon performing an eye operation or a psychiatrist counseling a patient pose virtually no risk, he added.

''Health care workers do not have an ethical obligation to tell their patients if they are infected with HIV, but they do have an ethical obligation not to do anything to put their patients at risk,'' said George Annas, director of the Law, Medicine and Ethics program at Boston

University School of Medicine.

Annas said he thinks both HIV-positive health care workers and HIV-positive patients should notify other participants in bloody medical procedures about their HIV status. ''Just to play fair, both sides should operate on the same rules,'' the lawyer said.

Annas and Caplan agreed that current conduct guidelines for HIV-infected medical workers are too vague and precautions to protect patients should be spelled out more clearly.

Although a health worker who reveals he or she is HIV infected faces a real threat of losing his or her job or medical practice, Annas said he thinks most health workers would take that difficult step.

''The last thing you would want to do is spread the virus if you are a health care professional. It goes against everything you have been taught '' he said.

#90210u0272 07/29/1990 ~United Press International
SINGAPORE (JULY 29) UPI - Prime Minister Lee Kuan Yew urged leaders of 12 nations Sunday to turn a fledgling economic grouping into a powerhouse that can strengthen open trade and make ''Europeans and Americans more aware of the dangers of racially biased blocs.''

Secretary of State James Baker was among the dignitaries to rush from the concluding meeting of the Association of Southeast Asian Nations in Jakarta to participate in the second session of the Asia-Pacific Economic Cooperation forum.

APEC is the result of an initiative by Australian Prime Minister Bob Hawke for greater economic cooperation among countries of the fast-growing Asia-Pacific region. It has been enthusiastically endorsed by the United States, Japan and the other Western partners, and its inaugural meeting was held in Canberra last November.

Baker, who spent the last three days attempting to justify Washington's decision to withdraw recognition of the Cambodian resistance coalition at the United Nations to skeptical Asian foreign ministers, has no critics here. He has strongly endorsed APEC and said Pacific Rim cooperation is an idea whose time has come.

Joining him at the APEC meeting were officials from Indonesia, Malaysia, Thailand, the Philippines, Brunei, Canada, Australia, New Zealand, South Korea and Japan.

Delegates are expected to make concrete decisions on the critical issue of what institutional form OPEC will take and whether China, Taiwan and Hong Kong will be allowed to join.

They will also support efforts to ensure a fair and open trading system, particularly the Uruguay Round of trade negotiations.

Japanese International Trade and Industry Minister Kabun Muto said the cost of funding APEC projects should be shared by all particiants, but added that Japan would contribute ''accordingly.''

Given its high level of technological development, Muto said Japan was anxious to share its expertise and experience with the other participants.

Opening the two-day ministerial meeting, Lee cited the proliferation of blocs. He cited the single European market in 1992, the U.S. free trade agreement with Canada last year and the impending U.S.-Mexican agreement, which could later widen to include central and South America.

He also mentioned British Prime Minister Margaret Thatcher's remark at the Group of Seven meeting in Houston earlier this month, referring to the three great groups of nations based on the deutsche mark, dollar and yen.

''A defacto emergence of such blocs will mean a world fraught with conflicts,'' said Lee, who is planning on stepping down in November after 31 years as prime minister of the island republic.

Noting the ominous possibility Asians will feel they have been excluded from the markets of prosperous Europeans and Americans, Lee said, ''An economic division of the world on racial lines would add bitterness and animosity to the normal interests between states.''

''If APEC can strengthen the open trade and investment environment which spans the Pacific, and make the Europeans and Americans more aware of the dangers of racially biased blocs, it will do world peace a service.''

Indonesia and Malaysia, initially the most reluctant participants in the grouping, shed their trepidations amid worries over the single European market, trends toward mounting protectionism and fears that the investment lures of the East European countries will result in diminished interest in Southeast Asia.

Both originally adopted cautious approaches, afraid their interests would be dwarfed in a group containing economic giants like the United States and Japan.

''Asia Pacific economic cooperation can only exist if there is security and stability not only in the region, but also in the world,'' Lee said.

''This means maintaining a balance in Europe through cooperation between America and the European Community and a balance in the Pacific through cooperation between America and the other 11 member countries of Apec.''

APEC, Lee said, ''has a significant contribution to make to a more stable and a better world.''

#90210u0313 07/29/1990 ~United Press International

GALVESTON, Texas (JULY 29) UPI - The busy Houston Ship Channel was closed for a second day Sunday while workers tried to refloat two barges that collided with a Liberian tanker and leaked an estimated 50,000 gallons of

oil into Galveston Bay.

The 601-foot Liberian-flagged tanker, which was carrying 29,450 metric tons of jet fuel, was slightly damaged but its double hull saved the Texas coast from a ''catastrophic'' explosion and spill like last month's Mega Borg disaster, Coast Guard Petty Officer Gene Maestas said.

''We're really fortunate that it's basically a brand new vessel and it has a double-skinned hull,'' he said.

Salvage workers hoped to begin removing the remaining oil from the leaking barges Sunday afternoon in preparation for refloating them, he said.

Three barges carrying ''fairly heavy oil similar to a No. 5 crude'' were being pushed by a tug toward Houston at 3 p.m. Saturday when two of the barges collided with the outward-bound Liberian-flagged tanker Shinoussa.

The leading barge, carrying 17,000 barrels of No. 2 fuel oil, sank in shallow water on the edge of the channel with its bow above the waterline and was leaking. The second barge, containing 23,000 barrels of fuel oil, remained attached to the tug, but it also was leaking. The barges were about 300 yards apart. A barrel contains 55 gallons.

The tanker suffered hull damage but did not leak. A third barge and tug were undamaged.

Maestas estimated 50,000 gallons of oil had spilled from the two barges, but a double line of booms around each barge was keeping most of the oil contained.

The accident caused two oil slicks, a small slick that appeared to have dissipated by Sunday and a three-mile-long slick that extended northeast into Galveston Bay and posed no immediate threat to the mainland.

''It looks like if it does hit the shore it will probably not be not as great a hazard as we thought,'' he said. ''Apparently, currents are causing it to drift away.''

Although the barges were not in the line of traffic, the Houston Ship Channel remained closed between mile markers 56 and 60 in Galveston Bay because of the danger of dislodging the sunken barge, which was held in place by two tugs.

''We're advising people not to go through that area, but I don't know if anybody's sneaking around it or not,'' Maestas said.

''One of the barges is sitting on the bank and if a large vessel went through there and the wake was big enough it could dislodge the barge from

where it's at and sink it right down into the channel. It would float and it would leak and cause a greater hazard to navigation. That would be a real problem,'' he said.

Officials boomed off Dickinson Bay and Dickinson Bayou - both located south of San Leon - to protect the marshland breeding grounds for shrimp and other wildlife.

The tug and barges involved in the accident are owned by Apex RE&T Inc. of St. Louis, which hired a private company that was to clean up the spill, he said.

The accident happened near Redfish Island, about 20 miles north of Galveston near the center of Galveston Bay.

The tanker continued to Port Bolivar, where it dropped anchor. Coast Guard spokesmen said the ship suffered some damage but the extent of damage was not known.

#90210u0336 07/29/1990 ~United Press International

SRINAGAR, India (JULY 29) UPI - Separatist violence in India's northern Kashmir Valley left at least 17 people dead, including 12 Moslem militants killed by security forces along the Indo-Pakistan border early Sunday, police and official sources said.

The militants were attempting to cross the border from Pakistan into India early Sunday when security forces ordered the group to stop, official sources said.

The sources said the group opened fire on security forces who shot back, killing 12 militants. They did not say if any members of the security force unit were killed or wounded and further details were not available.

Clashes between militants and security forces along the Indo-Pakistan border have been reported regularly since a violent anti-India uprising erupted earlier this year in the Kashmir Valley.

India claims that Pakistan is arming and training militants active in the Kashmir separatist movement, which is supported by virtually all of the region's 4 million Moslems.

Pakistan denies the allegation but admits to providing moral support to the independence drive.

In a separate incident in the village of Pattan, about 15 miles north of Srinagar, two bystanders were killed when militants and security forces

clashed late Saturday, official sources said.

The victims were killed when the truck in which they were riding was struck by gunfire, the sources said.

Three other people were killed in incidents in other parts of the region, sources said.

Violence has rocked the picturesque Kashmir Valley since mid-January when a simmering 2-year-old separatist movement transformed overnight into a popular uprising against Indian rule after security forces opened fire on demonstrators, killing at least 35 people.

Since then, at least 600 people have been killed in near-daily arson, bombings, assassinations and clashes between militants and security forces.

Tens of thousands of troops and paramilitary forces deployed to the area have failed to crush the uprising.

Kashmiri Moslems believe that separation from India is necessary because of years of alleged discrimination against them by successive Hindu-dominated New Delhi administrations.

They also complain that New Delhi reneged on a promise to hold a plebiscite so that Kashmiris could decide if they wanted to remain a part of India or join neighboring Pakistan. Several militant groups advocate independence.

#90210u0339 07/29/1990 ~United Press International

JERUSALEM, Israel (JULY 29) UPI - Police investigators questioned eight Arab suspects Sunday in connection with a weekend bombing at a crowded Tel Aviv beach that killed a teenage Canadian girl and wounded at least 15 other people.

They said they were investigating whether security should be stepped up at crowded areas because of the explosion, for which no organization has claimed responsibility.

Asked whether he believed more could be done to make Israel's beaches safer, Tel Aviv Mayor Shlomo Lahat replied, ''Practically, I don't think so.''

''We must be realistic,'' the mayor said. ''To my sorrow and under our conditions, when you have tens of thousands of people exposed along the beaches, ... if somebody comes and he has the intention to put some explosives he can do it.''

In May, Israeli forces thwarted a seaborne infiltration attempt claimed by the Palestine Liberation Front and reportedly directed toward the Tel Aviv seaside tourist district. None of the guerrilla boats made it to Tel Aviv, but one made it ashore about 20 miles to the south.

Four guerrillas were killed and 12 were captured, while no Israelis were injured. In the wake of the infiltration attempt by the Palestine Liberation Organization-aligned organization, the United States suspended its dialogue with the PLO.

Saturday's explosion came at a time when thousands of young Jews from abroad are participating in summer programs in Israel. The Canadian tourist killed, Marnie Kimmelman, 17, of Willowdale, Ont., was a member of a student group visiting Israel on a tour sponsored by the Canadian Zionist Federation. She died of severe stomach and lung wounds.

At least 15 other people were injured in the blast, including three Canadians on the same program as Kimmelman, who died during surgery at Tel Aviv's Ihilov Hospital. All of the injured were treated at Ihilov and released.

''She (Kimmelman) was the closest person to the bomb and apparently she absorbed the main thrust of the explosion,'' hospital director Dr. Dan Michaeli said.

Psychologists were brought in to counsel the Canadian students present when the explosion went off, Israel Radio reported.

''She was sitting an arm's length away from me when the explosion happened '' Hilary Mason told Israel Radio. ''It's not fair. I don't understand why it happened.''

The eight Palestinian suspects, residents of the Israeli-occupied territories, remained in police custody Sunday. Two are teenagers. Police declined further comment on the investigation.

A device, believed to be a homemade pipebomb, exploded at about 2:30 p.m. Saturday at Tel Aviv's crowded Jerusalem Beach. After the blast, angry Israelis assaulted Arab bystanders and several later attacked Arabs in a Tel Aviv hotel.

Seven Arabs were injured and seven Jews arrested in connection with the attacks, hospital officials and Israel Radio reported. Lahat condemned the assaults and said, ''It's a disgrace, it's a shame, that in our country innocent people just because they are Arabs were beaten.''

Last month, two German tourists and two Israelis were wounded by a small

bomb that exploded inside a trash container at the Dead Sea resort of En Gedi.

In Jerusalem Sunday, Police Minister Roni Milo asked the Israeli Cabinet for an increased budget to add 250 more police officers to Jerusalem's force. Milo's request came after Jerusalem endured one of its worst weekends of arson attacks involving cars.

Police reported 11 autos were set afire between Thursday and Saturday night, most of them rental vehicles in areas ranging from outlying Jerusalem Jewish neighborhoods to Arab East Jerusalem.

In the occupied territories Sunday, Palestinians observed a general strike called by the underground leadership of the nearly 32-month-old Palestinian uprising. The strike was called to protest the continued closure of universities in the territories that have been shut for most of the uprising.

Israeli officials recently allowed the opening of a small college for health professions, but it was not clear when the larger universities would resume classes.

Police also extended the closure order for offices affiliated with prominent Palestinian Faisal Husseini's Arab Studies Society. The society was first closed in July 1988.

#90210u0341 07/29/1990 ~United Press International

(JULY 29) UPI - British police say a man believed to be an Arab is holding several people hostage in a London nightclub. As many as 100 people originally were held, but most managed to escape. News reports say 12 to 20 captives remain in the posh Tokyo Joe's nightclub. Police negotiators are trying to talk the man into releasing the rest of the hostages. Police declined to release details of the situation, but various reports say the man is demanding transportation to Lebanon.

A coup attempt on the island of Trinidad appears to be ending. Moslem rebels say they have reached an agreement with the government that calls for the resignation of Prime Minister Arthur Robinson. The rebels are holding Robinson and other officials hostage, but they are expected to be released soon. Under the agreement, an interim government headed by acting Prime Minster Winston Dookeran would take over for three months, and then general elections would be held.

Israeli doctors say a 17-year-old Canadian tourist died following yesterday's mid-day bomb attack on a crowded Tel Aviv beach. Doctors say the girl died during surgery to repair her liver and abdominal blood

vessels. 17 others were injured in the explosion, which was caused by a homemade pipe bomb placed in a bag near a lifeguard station. 13 Arab suspects were arrested.

Police in Linden, New Jersey, say a new war may be heating up between rival Asian-American gangs. Four men pulled guns from bouquets of flowers and opened fire yesterday during a burial ceremony for a Vietnamese gang member. Authorities say at least four mourners were wounded in the attack. Police say the dispute appears to be between Chinese and Vietnamese gangs.

-30- 1872
#90210u0346 07/29/1990 ~United Press International
(JULY 29) UPI - New York police say a livery cab driver was shot to death in the Bronx last night. That brings to 19 the number of cab drivers killed in New York City this year. A police spokeswoman says last night's shooting took place during an apparent robbery. The spokewoman says two men who were in the cab shot the driver and jumped out of the vehicle before it smashed into a parked car.

Fire officials in Alaska say improved weather conditions have done little to help extinguish the fires that are raging across the central part of the state. 118 lightning-sparked wildfires have consumed more than two-Million acres of forestland this summer, and officials say most of them still are burning. About 27-hundred firefighters are battling 12 of the worst fires.

The husband of jailed actress Zsa Zsa Gabor brought his wife pillows, silk comforters, diet soft drinks and ice cream yesterday. The former beauty queen is serving a 72-hour prison sentence for slapping a Beverly Hills motorcycle officer last year. Gabor's husband, Prince Frederick Von Anhalt says he and his wife plan to go to Europe for a rest after she is released Monday.

-30- 1310
#90210u0405 07/29/1990 ~United Press International
(JULY 29) UPI - An armed man who took more than 100 people hostage in a London nightclub ended his siege peacefully. Most of the hostages managed to escape during the night. There were six hostages at the time the gunman surrendered to authorities about 12 hours after the standoff began. The man, thought to be from Kuwait or Lebanon, was armed with a shotgun, a rifle and what police describe as a replica of a pistol. Various reports say he wanted transportation to Lebanon.

It appears the prime minister of Trinidad might step down as part of an agreement between Moslem rebels and the government to end a stand-off. A rebel spokesman says a new interim government will take over for three

months until general elections are held. The rebels continue to hold Robinson and other officials hostage, but they are expected to be freed later today.

New York City Mayor David Dinkins is urging black doctors to play a bigger role in the inner cities. Speaking to a convention of black and minority doctors in Las Vegas last night, Dinkins said the blame for inadequate care for minorities does NOT rest solely with the federal government. Said Dinkins- quoting here- ''There are too few of you in my neighborhoods to care for those who need care.''

A Navy judge in Rota, Spain, sentenced Lieutenant Robin Brown to seven years in prison for raping a female officer last April. Navy Captain Thomas Lawrence also dismissed Brown from the Navy, which is tantamount to a dishonorable discharge. The incident occurred aboard the U-S-S Suribachi which was docked in Spain at the time. Brown might be sent to federal prison at Leavenworth, Kansas.

-30- 1823

#90210u0434 07/29/1990 ~United Press International

(JULY 29) UPI - The president of Mongolia concedes that absolute communist rule in his country has come an end... as Mongolians go to the polls today in their first free elections. Voter turn-out is heavy and opposition groups predict a more progressive government. Mongolia, situated between China and the Soviet Union, is one of the world's most isolated countries. During the past eight months, it has adopted Soviet-style reforms.

Leaders of 12 South Pacific nations meet on the island of Vanuatu this week for the annual South Pacific Forum. U-S proposals to dispose of chemical weapons stored in the South Pacific are expected to be on the conference agenda. The Australian goverment says it hopes the leaders can agree on U-S plans to incinerate the chemicals, but it's clear some forum nations are opposed to the idea.

Hurricane Bertha, the first of the 1990 Atlantic-Caribbean storm season, veered out into the open Atlantic today. At last report, Bertha was 335 miles southeast of Cape Hatteras, North Carolina, and was moving northeast. Forecasters say they do NOT expect it to hit land. They say the main threat is to shipping. The National Weather Service also reports the Southwest and Midwest were drenched by scattered but heavy thunderstorms early this morning.

More than 12 unsuspecting patients in New York hospitals have received enemas at the order of a phony physician. A police spokesman says ''well over a dozen'' fake orders for enemas have been reported since April. All incidents involve women at private, upper Manhattan hospitals. Detectives

believe the culprit is an executive at a corporation linked to the hospital industry.

-30- 1838

#90210u0447 07/29/1990 ~United Press International

WASHINGTON (JULY 29) UPI - The spokesman for the Republican National Committee said Sunday his party's chief, Lee Atwater, is recovering well after treatment for a brain tumor and predicted Atwater is ''going to be back soon.''

GOP spokesman Charles Black, appearing on the CBS program ''Face the Nation,'' said Atwater ''is doing very well.''

''The radiation treatment that he had for his tumor has worked. The tumor is under control and is shrinking,'' Black said.

''Lee still has to go through many hours a day of physical therapy and other measures necessary to his recovery,'' he said.

Atwater, 39, who helped engineer George Bush's presidential campaign two years ago, has been ''working hard on the telephones and doing meetings,'' Black said. But while recovering, Atwater has not been able to devote a lot of time to public events.

Earlier this year, the Republican Party chairman collapsed at a fund-raiser and was found to have a non-malignant brain tumor in his right frontal lobe. Doctors determined the tumor was ''agressive and dangerous '' and Atwater chose to undergo intense radiation therapy and chemotheraphy treatments.

''The treatment for the tumor is on track,'' Black said. ''The tumor is shrinking and the other things he must do in order to restore his stamina and his mobility are also on track, and Lee's going to be back soon.''

-30- 1576

#90210u0468 07/29/1990 ~United Press International

CHICAGO (JULY 29) UPI - Fire in a power generating station left about 40,000 West Side and suburban customers without electricity Sunday in a blackout that triggered looting and another blaze that killed three people and injured four others, authorities said.

The fire in a 12,000-volt coal-burning transformer broke out at about 10 p.m. Saturday and burned until about 4:30 a.m. Sunday, Commonwealth Edison spokeswoman Margaret Winters said. She said no injuries were reported in the blaze.

The fire caused damages ''in the millions'' and affected not only the transformer, but also wires that distribute power to the West Side, and repairs and full restoration of power could take a few days, ComEd operating manager William Downey said.

''What we lost here was the nerve center,'' Downey said. ''We don't know the cause (of the fire), but the vicinity is where the power leaves the station.''

Tragedy struck a West Side home early Sunday when a family forgot to blow out the candles they used to light their home during the outage, causing a fire that killed three and injured four others, fire officials said.

The fire, which broke out in the two-story house around 4 a.m., was apparently started by the candles, Sgt. Edward O'Donnell said.

''They were using the candles for light because the electricity was out,'' O'Donnell said. ''They went to bed and left the candles burning.''

The dead were identified by the Cook County medical examiner's office as Adam Powell, 15, Ozell Powell, in his 30s, and Parnell Powell, 30. All died after being taken to hospitals.

Three other family members were in fair condition at Loretto Hospital suffering from smoke inhalation, hospital spokeswoman Sue Robinson said.

A firefighter was also injured in the blaze and was taken to Cook County Hospital, where he was treated for burns and later released, a hospital administrator said.

Police said looting of West Side businesses began soon after the outage provided the cover of darkness.

''As soon as people found out there was no power and no police, the looting started,'' said a Harrison District desk sargeant who declined to identify himself.

By late Sunday morning, 31 arrests of alleged looters had been processed, he said. He said those arrested faced charges of looting, burglary, disorderly conduct and mob action.

Estimates of the number of total arrests ranged as high as 75. No injuries were reported.

One businessman, who said his grocery store was unharmed, said the streets were dark, and he saw people running with clothes they had taken from a dry cleaning shop.

''You felt danger all around you ... you didn't know who was going to walk up on you,'' said Johnnie Mason, whose friends helped him guard his food store overnight.

Mason said police were doing a ''good job'' of patrolling the area and arresting looters.

Marquette District Patrolman James McGivney said businesses in his district suffered heavy looting.

''The stores were completely wiped out,'' he said. ''Anywhere where it was blacked out, they just emptied them out''

More than 100 hundred Marquette District officers were sent out to patrol the streets Sunday morning, and Police Superintendent LeRoy Martin was expected to announce a plan to discourage looting if power remained out Sunday night.

#90210u0501 07/29/1990 ~United Press International

(JULY 29) UPI - Moslem rebels who shot and wounded the prime minister of Trinidad and Tobago and held his Cabinet hostage in a coup attempt say they've reached an agreement with the government to end their standoff. A rebel spokesman says Prime Minister Arthur Robinson has agreed to resign immediately. The 250 to 500 Moslem rebels, who allegedly have ties to Libya, are expected to release Robinson and 19 other Parliament members when the agreement is signed later today.

The rebels say Robinson agreed that an interim government will be headed by Winston Dookeran, currently the minister of planning and mobilization. Dookeran has been serving as acting prime minister since the coup attempt began Friday night. There's NO indication what role, if any, the rebel group will play in the interim government. A state of emergency in the tiny Caribbean island nation remains in effect along with a dusk-to-dawn curfew in the capital of Port-of-Spain.

A gunman who took 105 people hostage at a posh nightclub in London early today surrendered to police about 12 hours later. The man- believed to be from Kuwait or Lebanon- had threatened to blow up the hostages with explosives strapped to his body. Many of the captives escaped during the night and negotiators secured the release of many others. There were six hostages remaining when the gunman ended his seige. The gunman was armed with a shotgun, rifle and what police believe was a replica of a pistol. Police said he did NOT have explosives strapped to his body as he claimed.

Authorities are looking for the cause of an explosion that devastated the downtown shopping area in Monroe, North Carolina, late last night. Police

say there were only two minor injuries, but there was extensive fire damage and most of the buildings in the area were damaged. Authorities suspect the explosion resulted from a natural gas leak.

-30- 2062

#90210u0504 07/29/1990 ~United Press International

(JULY 29) UPI - Mongolians are voting in large numbers today in their nation's first free elections. Nearly half of Mongolia's two-Million people are eligible to vote... many of them arriving at rural polling places on horseback. Voters are choosing regional and local representatives and a new national parliament in their first free election since the warrior Genghis Khan founded the Mongol Empire nearly eight centuries ago.

New York City Mayor David Dinkins told a convention of black and minority physicians in Las Vegas yesterday that all citizens have a right to equal access to health services. Dinkins urged the doctors to add their voices to those calling for a peace dividend to be used in part to share the miracles of modern medicine with the poor, as well as the rich. He also said black doctors must play bigger roles in the inner cities.

RANGOON, Burma (JULY 29) UPI - Elected parliamentarians in Burma, who remain powerless because the military still controls the government, called Sunday for a new parliament to be convened before October and the release of political prisoners.

The National League for Democracy, the party which carried the May 27 multi-party elections with a massive majority, also urged the military government to revoke all restrictions on civil liberties.

NLD representatives issued the demands Sunday at the conclusion of a two-day meeting organized by the group's leadership in the capital. The demands were sent in letters to the highest echelons of the military government and were signed by all the elected legislators present at the meeting.

NLD candidates captured 396 of the 485 parliamentary seats in the May elections, but remain essentially parliamentarians without a parliament.

The military has promised to respect the results of the election, but has not set a date for turning over power and insists a new constitution must be approved before the transfer can take place.

Some 379 representatives were present at the coordination meetings, held in the Gandhi Memorial Hall. On the street outside the meeting venue, a large crowd listened intently to the proceedings and cheered frequently during the speeches which were broadcast over loudspeakers.

Security police guarded approaches to the building, but made no attempt to interfere with the crowd.

The representatives adopted what was called the Gandhi Hall declaration, a document setting out the unanimous views of the representatives on three pressing political matters: convening a new parliament, transferring power to a new government and drawing up a new constitution.

Concerning parliament, the declaration said it should be convened as soon as possible to respect the wishes of the people and address the needs of the country. The parliament, the declaration maintained, is not a constituent assembly but a people's assembly, as has been defined in a 1989 election.

Transfer of power, the declaration said, should be effected under the interim constitution the NLD has written in consultation with other political organizations.

Regarding the drafting of a new constitution, the NLD said parliament is the only authority for such a task, adding that any constitution written and adopted by any body or organization other than parliament will lack parliamentary sanction and, therefore, legal validity.

The declaration and resolutions adopted by NLD representatives run counter to the military government's insistence that a new constitution must be in place first before power can be transferred to a new civilian government,

and that any government formed under any interim constitution will be treated as an illegal parallel government.

The declaration also expressed a firm belief in the need for a dialogue between the NLD and the military government, to discuss and find solutions to the country's problems in a spirit of national reconciliation.

''We believe we can successfully tackle these problems through dialogue, considering that even the very intricate and complex issue of the threat of nuclear holocaust has now been successfully pushed back through dialogue between the parties concerned,'' the declaration said.

#90210u0560 07/29/1990 ~United Press International

(JULY 29) UPI - A coup attempt in the island nation of Trinidad and Tobago appears to be ending. Moslem rebels who shot and wounded the prime minister and held his Cabinet hostage say they've reached a truce with the government. The rebels are still holding Prime Minister Arthur Robinson captive. But say he's agreed to resign immediately, giving way to a new 90-day interim government.

A heavily armed gunman who took more than 100 people hostage at a posh London nightclub ended his seige some 12 hours later. Police say the man, thought to be from Kuwait or Lebanon, had threatened to blow the captives up with explosives strapped to his body. But many escaped or were freed and only six remained when the gunman surrendered today.

In Chicago, a fire at a Commonwealth Edison generating station has knocked out power to the city's West Side. Power company officials say they have NO way to estimate how many people are without power. But officials say the power outage has triggered widespread looting. About 60 people were arrested.

Authorities are blaming the power outage for another fire that killed three people and injured three others. Fire officials say a blaze in a West side home was apparently started by candles that had been left burning after the residents went to bed.

Federal investigators are trying to find the cause of the crash of a small plane that went down in thick fog in a wooded area while trying to land at Greater Lawrence Airport in Massachusetts. Three people died. State police say the twin-engine plane went down less than one-half mile from the airport after missing a house by 25 feet.

Hurricane Bertha continues to veer out into the open Atlantic Ocean, where it poses little threat to land. Forecasters say Bertha, which grew off the coast of Florida yesterday, is NOT expected to make landfall or to

strengthen significantly. The storm with 75 mile-an-hour winds was moving steadily to the northeast early today and was 335 miles southeast of Cape Hatteras, North Carolina.

Elsewhere, scattered thunderstorms dotted the Southwest and Midwest early today. The National Weather Service says strong but scattered thunderstorms carried heavy rain into much of southern Minnesota, western Wisconsin and western Illinois. Thunderstorms were also reported in east-central Kansas.

Three Soviet warships are steaming toward the coast of San Diego, California. And for the first time on the West Coast, the Navy will play host to the Soviet sailors during a five-day visit scheduled to begin when the ships arrive Tuesday. 800 Soviets will come ashore for a round of official tours and off-duty fun.

#90210u0630 07/29/1990 ~United Press International

SIDON, Lebanon (JULY 29) UPI - The International Committee of the Red Cross Sunday urged warring Shiite Moslem forces to observe a cease-fire to facilitate the evacuation of victims from an embattled southern district.

The Red Cross made the appeal after failing to dispatch a relief team to the Iklim Al Tuffah region east of the port city of Sidon, 24 miles south of Beirut, because of sporadic cannon and rocket exchanges between pro-Syrian Shiite Amal militiamen and their fundamentalist Hezbollah rivals.

The Red Cross has not been able to move the wounded and dead from the region for several days, it said in a statement.

''The ICRC calls again upon all parties to consider its urgent appeal in favor of the victims of the conflict and to respond positively to its request for a humanitarian cease-fire,'' the statement said.

An 18-hour battle Saturday killed 31 people and wounded 80 others, security sources said.

The casualty toll in 13 days of violence rose to at least 140 killed and 330 wounded.

Witnesses said the rivals were still trading heavy artillery, rockets and machinegun fire Sunday, 24 hours after the violence broke out. They said the fighting inflicted heavy damage, set homes on fire and forced thousands of residents to flee for their lives.

Security sources sources said Amal gunmen launched a large-scale offensive

at noon Saturday and gained territory in the village of Kfar Milki in Iqlim Al Tuffah.

An Amal statement said its fighters tightened control over Kfar Milki and battles were still raging on the Kfar Fila-Jernaya-Kfar Milki axis.

Security sources said Amal captured an unknown number of Hezbollah fighters during the attack.

Hezbollah said its gunmen repulsed the attacks and accused Israeli forces stationed in overlooking hills of shelling its positions.

Medical sources said at least 30 Palestinian guerrillas were among the wounded during Saturday's battles.

Some 450 Palestinian guerrillas loyal to Palestine Liberation Organization Chief Yasser Arafat have deployed in the region for two weeks week as a disengagement force.

The guerrillas took up positions in the Amal-controlled villages. Hezbollah charged the Palestinians were providing artillery cover for Amal offensives.

About 1,700 Palestinian guerrillas backed by military vehicles have been deployed at 30 locations in Houmin, Kfar Abid and the Sarba hills overlooking Hezbollah and Amal positions since the Tuffah battles erupted late last December.

It was the Palestinians' biggest expansion in southern Lebanon since Israel crushed PLO's military infrastructure in southern Lebanon in the 1982 invasion.

Witnesses said clouds of black smoke covered the embattled areas as hundreds of civilians fled their homes carrying only essential belongings.

#90210u0641 07/29/1990 ~United Press International

CAIRO, Egypt (JULY 29) UPI - Relations between Iraq and Kuwait took a turn for the worse Sunday with the apparent postponement of a meeting called to hammer out an oil and border dispute, diplomatic sources said.

Arab diplomatic sources in Cairo, which has been mediating in the dispute, said Iraq's vice-president and the Kuwaiti crown prince would not be meeting in the Saudi Red Sea resort of Jeddah as planned.

State-run Baghdad Radio, in a broadcast monitored in Cairo, held Kuwait responsible for the postponement of the meeting. There was no immediate

word on when the meeting might take place.

The radio report did not say why the meeting was postponed, but Palestine Liberation Organization leader Yasser Arafat and Jordan's King Hussein flew to Kuwait and Baghdad respectively over the weekend to try to continue mediation efforts.

The Jordanian and PLO mediation efforts came after Saudi Foreign Minister Prince Saud al Faisal met over the weekend with Iraqi and Kuwaiti leaders.

The dispute erupted two weeks ago, when Iraq accused Kuwait and the United Arab Emirates of dumping crude on the world market and causing a drop in oil prices.

It grew more serious last week when Iraq staged military maneuvers along its border with Kuwait, and the emirate moved Soviet-made missiles to the border.

''No one has shown up yet for the meeting in Jeddah,'' one diplomatic source said. ''This means relations between the two sides have taken a turn for the worse.''

Iraq also accused Kuwait of drilling for oil in Iraqi territory and had demanded $2.4 billion in compensation. Kuwait has denied the charges.

Iraq has also raised old border demarcation disputes with its tiny neighbor.

The United Arab Emirates, meanwhile, announced Sunday it would be sending its president to Cairo Tuesday for talks with Egyptian leader Hosni Mubarak. The UAE has tried to downplay the dispute with Iraq.

Egypt is allied with Iraq as a member of the four-nation Arab Cooperation Council but has tried to play a neutral diplomatic role in the dispute.

#90210u0669 07/29/1990 ~United Press International

GUATEMALA CITY (JULY 29) UPI - The Guatemalan army killed two rebels and lost two soldiers in clashes in western San Marcos province, military authorities said Sunday.

The army said the first clash occurred Saturday on the road between Malacatan and San Pablo, where rebels had set up a road block and demanded war taxes from passing motorists.

An army patrol arrived on the scene and in the ensuing firefight two soldiers and one rebel were killed and unspecified number of rebels

injured.

The second clash also took place Saturday in another part of the province when an army patrol ran into a group of rebel fighters. One rebel was killed and others wounded, but there were no government casualties, the army said in a statement.

Guatemala's left-wing rebels agreed at talks earlier this year not to carry out attacks against economic targets or against November elections, but on Saturday warned they would ''renew sabotage and all kinds of offensive action if repression and terror against the population is not suspended immediately.''

Kidnappings and killings, most attributed to the military, occur virtually every day in Guatemala where guerrillas have been fighting successive military and elected governments for the past 30 years.

#90210u0682 07/29/1990 ~United Press International

LONDON (JULY 29) UPI - An armed man thought to be an Arab took more than 100 people hostage in a posh private nightclub early Sunday, threatening to blow them up with explosives strapped to his body before surrendering to authorities some 10 hours later.

The man, believed to be from Kuwait or Lebanon, took 105 people hostage initially, but about half escaped during the night and negotiators secured the release of many others. There were six hostages, all Arab, remaining when the gunman ended his siege.

The gunman entered the club with a shotgun, rifle, bayonet, a large knife and what police believe was a replica of a pistol. He also carried a unknown amount of ammunition, police said.

The man said he had a bomb wrapped around his waist and threatened to blow up himself and the hostages, but police later said the bomb was a fake.

Detectives were questioning the man at a London police station and charges were expected to be filed late Sunday or early Monday. Police declined to release details of the hostage situation, but various reports said the man was demanding transportation to Lebanon, either by ground or by air.

''He came in, everyone realized he had a gun because he shot ... as soon as he came in,'' Tina Broderick, a patron of the club, said in an interview with British Broadcasting Corp. television. ''Everyone scrambled.''

The BBC said the gunman was Lebanese and wanted to be flown to Beirut,

where he said his brother had been kidnapped. It also reported that he threatened at one point to kill a hostage every five minutes, but Scotland Yard would not confirm the report.

A spokesman for Scotland Yard said the man, in his mid-30s, walked just before 2 a.m. into Tokyo Joe's nightclub in Piccadilly, opposite the swank Ritz Hotel, produced a gun and fired two warning shots into the ceiling.

The after-hours club is popular with visiting Middle Eastern businessmen and Arabs living in London.

He rounded up dozens of club guests - men and women - at gunpoint and made them lie on the floor of the fashionable basement club, declaring that he had explosives fastened to his body. After the gunman surrendered, police determined what he claimed was a detonator was in fact a cassette recorder.

Detective Superintendent Alec Edwards, the Scotland Yard incident commander, said the gunman had been drinking excessively, at one point falling to the floor and cutting himself on broken glass and may have been taking drugs. One of the hostages helped the gunman up the stairs when he surrendered, Edwards said.

Earlier, smoked salmon sandwiches were sent in for the gunman in return for releasing two hostages, Edwards said.

Edwards said Scotland Yard had received information the man may have been planning the incident since Wednesday, but declined to reveal further details.

Peter Antonello, 53, a bartender who fled the club, said the gunman declared at one point that ''God sent me to do it.''

''He had been drinking. He also said he was doing it for his wife, who had gone to Beirut today with their three children,'' Antonello said.

Other reports said the man wanted to go to Beirut with 60 people to negotiate the release of hostages held there.

At one point, the gunman forced four women in the club to form a human chain to shield him in case police stormed the building.

Police said the gunman's mood was volatile during the siege, sometimes acting calmly, other times screaming threats.

One witness said the situation was at times almost farcical.

''The gunman was at times quite laughable,'' the bartender said. ''Now that I look back, I don't know how we did it, but we laughed openly. It

was like a boosted-up child's game.''

#90210u0692 07/29/1990 ~United Press International

(JULY 29) UPI - Secretary of State Baker headed to Singapore today after making little progress in three days of talks in Indonesia on resolving the Cambodia conflict. Baker's meeting with Southeast Asian foreign ministers in Jakarta ended without resolving a breach over Washington's about-face on Cambodia and U-S refusal to agree to the forcible repatriation of Vietnamese boat people. He said after the session that ''differences'' remain.

Officials and opposition leaders in Mongolia say there are scattered voting problems but NO major irregularities during the country's first free elections today. Preliminary official results are NOT expected until late tomorrow or sometime Tuesday. But Mongolians went to the polls in heavy numbers in a vote that would end the communists' 69 years of absolute power.

A national referendum on whether to elect a president directly or leave the job to the National Assembly are under way in Hungary. But voter disinterest indicates the country's new president will be elected by the National Assembly. By midday, only 10 percent of the seven-Million eligible voters had cast ballots. Temperatures reaching 95 degrees and glorious sunshine may have combined to bring on the voter apathy.

In London, authorities are trying to figure out what prompted an armed man to walk into a posh nightclub early today and take more than 100 people hostage. The siege ended some 10 hours later when the gunman surrendered to authorities. Scotland Yard says the man, believed to be from Kuwait or Lebanon, had threatened to blow up himself and his captives with explosives strapped to his body. Police say it was only a sophisticated fake bomb.

Philippine President Aquino is vowing to ''erase all traces'' of the recent earthquake that killed more than 16-hundred people. Speaking during her weekly radio talk show, Aquino said the nation will rise from the rubble of devastated areas ''with renewed vigor and strength.'' Aquino says relief and rescue operations in quake-stricken areas should be completed this week and a special task force will implement a program to rebuild damaged roads, bridges, schoolhouses and irrigation systems.

#90210u0699 07/29/1990 ~United Press International

TAMPA, Fla. (JULY 29) UPI - Ousted dictator Manuel Noriega's personal banker and five other businessmen were convicted Sunday of laundering drug

money in a scheme federal authorities said involved $32 million.

In addition to the money laundering convictions, the six were also found guilty of conspiracy.

The jury deliberated seven days after nearly seven months of trial.

The deliberations were interruped last week when one of the jurors made a phone call to purported drug dealers in Colombia, using a number from an address book that had been submitted as evidence.

He told the judge he acted out of ''simple curiosity.'' U.S. District Judge Terrell Hodges dismissed that juror, and the 11 others continued deliberating. The defendants were a Colombian aircraft broker and five former officers for the Bank of Credit and Commerce International, with headquarters in Luxembourg.

Amjad Awan, who worked for BCCI in Miami, once served as personal banker for Manuel Noriega. He was convicted of conspiracy and 14 counts of money laundering.

As the verdicts were read, many of the defendants' relatives began to cry. After the hearing ended, one woman collapsed briefly in the spectators' gallery and another said, ''Lies, dirty evil lies.'' One man walked out of the courtroom muttering, ''America is evil. This is evil.''

Assistant U.S. Attorney Mark Jackowski said the case proved that even those ''in ivory towers'' who don't touch drugs will be convicted if they help smugglers skirt the law.

''The United States of America takes the drug trafficking problem very seriously,'' Jackowski said.

Through its London office, the bank released a prepared statement Sunday saying, ''BCCI is sympathetic to the families if its former employees. It is important to note that the evidence presented in the trial by the U.S. government established conclusively that the offenses charged were contrary to the expressed written policies of BCCI.

''Further, the government introduced evidence tht the transactions were not known to BCCI's senior management or to its board of directors.''

Two BCCI subsidiaries pleaded guilty to money laundering charges in January and forfeited $15 million to the government, the largest penalty ever assessed against a bank.

Sibte Hassan was convicted on three counts of money laundering and was found innocent on three other counts. He was the only defendant to be

aquitted on any of the charges.

Ian Howard was convicted of four counts of money laundering. He and Hassan worked in BCCI's Paris branch.

Akbar Bilgrami, who had worked in BCCI's Miami branch, was convicted on 20 counts of money laundering. Syed Aftab Hussain, who worked in Panama for BCCI, was found guilty on 20 counts of money laundering.

Rudolph Armbrecht, a Colombian aircraft broker, was convicted of eight counts of money laundering.

The conspiracy charge carries a maximum penalty of five years in prison, and each money laundering count carries a maximum penalty of 20 years in prison.

All six defendants were taken to the Hillsborough County Jail to await sentencing. No date was set.

Jackowski said it was likely each defendant would spend at least 10 years in prison.

Most of the defense attorneys declined to comment. But Awan's attorney, John Hume, said he wxpected to file an appeal based partly on the juror incident.

The bankers were arrested Oct. 6, 1988 at a bogus bachelor party staged by the U.S. Customs Service to lure the bankers to Tampa.

They were accused in a $32 million money laundering scheme staged by customs agents during a two-year sting operation.

#90210u0730 07/29/1990 ~United Press International

PORT-OF-SPAIN, Trinidad (JULY 29) UPI - Moslem rebels who shot Prime Minister Arthur Robinson and held his Cabinet hostage in a coup attempt negotiated with the government Sunday and appeared to win a promise from Robinson to leave office.

Rebel spokesman Bilal Abdulah said on state-run radio that Robinson, held captive in the Parliament building, had agreed to resign immediately, giving way to a new 90-day interim government to be followed by national elections.

Minister of Works Carson Charles acknowledged Sunday that negotiations for Robinson's resignation were continuing, but gave few details about the talks.

According to the rebels, headed by black Muslim leader Yasin Abu Bakr, Robinson agreed to an interim government led by Winston Dookeran, the minister of planning and mobilization. Dookeran, an economist of East Indian descent, has served as acting prime minister since the coup attempt began Friday night.

Reports on state-run radio said between 20 and 60 people died in the fighting.

Abu Bakr, speaking with the British Broadcasting Corporation, said Sunday, ''Whatever blood there is has cleansed us.''

He claimed widespread support for the revolt, saying, ''There has been a total insurrection from all the people.''

Abu Bakr refused to say where his group obtained weapons to take over the Red House, or Parliament building, but he said there were ''lots of weapons in Trinidad'' and acknowledged his group had received aid from Libya.

He said he was ''a friend'' of Libyan leader Moammar Gadhafi. ''We are Moslem. Libyans are Moslem, and we have in the past cooperated with Moslems. ... We have received mutual aid.''

A Bush administration official said Sunday that Trinidad government officials ''consulted with us yesterday'' and inquired whether the United States would ''entertain assistance requests if asked.''

The official, who spoke on condition of anonymity, said that the United States would do so, ''but as of this morning, no specific request has been made.''

The official stressed that the assistance Trinidad might want would be advisory and that no mention of U.S. military intervention was made. The official added that troops appeared to remain loyal to the Robinson government.

Deputy White House Press Secretary Alixe Glen said Sunday, ''We fully support the government of Prime Minister Robinson and hope for a peaceful solution to the situation.''

There was no indication Sunday what role, if any, the rebel group would play in an interim government.

The 250 to 500 insurgents in Abu Bakr's Jamaat Muslimeen group reportedly would be granted amnesty under a truce agreement. Some predicted an agreement would be signed Sunday, followed by the release of Robinson and

some 19 other Parliament and Cabinet members.

Charles said the airport in the capital city of Port-of-Spain had opened Sunday for daytime flights. Reports said the streets of the capital were calm early Sunday and gunfire had died down.

But a state of emergency remained in effect along with a dusk-to-dawn curfew. The government works minister said the situation in south and central Trinidad is peaceful but police and army reservists had been called to man stations throughout the island.

The rebels denied earlier reports they wanted to be flown to Libya.

''We are Trinidadians and we are living right here, and we don't intend to go to Libya,'' rebel spokesman Abdulah said.

The coup attempt sparked looting Friday, and Charles said reports of looting continued into Sunday.

A rebel spokesman said that Robinson, 63, had been shot and wounded in the ankle, but Charles said he had been shot in the arm. Charles said three other Cabinet ministers were wounded and that two were taken to the hospital. National Security Minister Selwain Richardson was shot in the leg, he said.

Roman Catholic Archbishop Anthony Pantin said Saturday in a radio broadcast that Abu Bakr had told him in a telephone conversation that Robinson had been tied to a chair in the Red House by the rebels and wired to explosives.

Abu Bakr, a former police officer who formed his Moslem community 10 years ago, said he launched the coup to rid the oil-rich country of corruption, bigotry, racism and hatred.

The two islands of Trinidad and Tobago have a population of 1.2 million. Trinidad is about 7 miles off Venezuela's coast. Tobago is 20 miles northeast of the larger island. The current government was elected in 1986.

Trinidad and Tobago gained independence from Britain in 1962. The country's English-speaking population is about 40 percent black and 40 percent Indian, with the rest made up of whites and other ethnic groups.

Only about 6 percent of the population is Moslem. About a third are Roman Catholic and a quarter are Hindu.

#90210u0757 07/29/1990 ~United Press International

MOSCOW (JULY 29) UPI - Russian Republic President Boris Yeltsin said Sunday he will sign agreements with the three Baltic republics within six weeks but stressed he was not calling on them to leave the Soviet Union, the Tass agency said.

Yeltsin, who met the presidents of the Baltic republics Friday in Jurmala near the Latvian capital of Riga, said Estonia, Latvia and Lithuania had agreed to work to elaborate state agreements with the Russian Federation, largest of the 15 Soviet republics.

But the official Tass news agency, citing Yeltsin's remarks, carefully reported that Yeltsin was not calling on the Baltic republics to leave the Soviet Union.

''Yeltsin noted,'' said Tass, ''that he favored the republic's maximum sovereignty but did not call for their secession from the Soviet Union.''

Yeltsin said, however, ''he will sign agreements with the Baltic republics within four to six weeks,'' Tass said.

Yeltsin's remarks were also reported on Soviet television news. They clearly illustrated his stance of willingness to deal with the fractious Baltic republics while not urging them to leave the Soviet Union.

Saturday, the three Baltic republics said they would not participate in work on the new union treaty that Soviet President Mikhail Gorbachev wants to sign with the 15 republics to give them greater sovereignty.

Baltic refusal to take part in the treaty's discussion would seriously hamper its effectiveness and Gorbachev's goal to work out a new constitutional framework for the world's largest state.

Lithuania, the Baltic republic that is shortly to begin negotiations with Moscow on its status, maintains that it is a sovereign state and not a consituent republic of the Soviet Union.

Estonia, Latvia and Lithuania were independent states between World Wars I and II, but were annexed by the Soviet Union in 1940 as part of a secret deal between Soviet dictator Josef Stalin and Adolf Hitler.

#90210u0925 07/29/1990 ~United Press International

TORONTO (JULY 29) UPI - Michael Chang's recovery from a serious hip injury would seem to be complete following his victory over Jay Berger Sunday in the $1.2 million Players International.

Chang defeated Berger, 4-6, 6-3, 7-6 (7-3), for his first victory of the season. It was worth $155,000 to the No. 7 seed, moving him over the $1 million mark in career earnings while Berger, who was seeded fourth, collected $95,000.

For the 18-year-old Chang the win culminated a long and tedious comeback from a stress fracture to his left hip he sustained while practicing in Florida last December. The injury kept the 1989 French Open winner out of tennis for three months, and he is just now pronouncing himself fit.

''This win is a real confidence booster, it's nice to be back in the winner's circle,'' said Chang, a resident of Placentia, Calif. ''Hopefully the players will see that I'm back but I don't think the top players worry about it until they have to play you.''

The road back was not a smooth one as Chang, who entered the tournament ranked 24th in the world, endured first round losses in four tournaments, including the Italian Open.

''I think people were writing me off to a certain extent going from French Open winner to first round loser,'' said Chang. ''I guess the toughest time was the European trip, right before the French, when I lost three consecutive times in the first round.

''It was discouraging, I didn't know what to think.''

For the third consecutive day Chang was involved in match that went three gruelling sets in temperatures well over 100 degrees.

Chang began the final the same way he started his two previous matches, by dropping the first set. Berger broke him at 4-4, then held serve to win the set.

Chang reciprocated in the second set, breaking Berger to go up 5-3 and holding to even the match.

A wild third set featured six of the matches 12 service breaks but still required a tie-breaker to settle the issue.

Helped along by Berger's double fault, Chang took a 3-1 lead and control of the tie-breaker. Berger was never able to recover as Chang maintained an edge.

''It was a real tough match,'' said Berger, 23, the world's 15th ranked player. ''I let him back in too many times but he hung in there. That's what Michael does, that's how he wins matches.

''It was hot out there but it was hot for both of us, he just got to me at the end.''

Paul Annacone of East Hampton, N.Y., and David Wheaton of Minneapolis won the doubles title and $62,000 by defeating Broderick Dyke of Australia and Peter Lundgren of Sweden, 6-1, 7-6 (7-4).

#90210u0967 07/29/1990 ~United Press International

FAIRBANKS, AK (JULY 29) UPI - Although the most critical danger may be

over across the fire-ravaged middle of Alaska, blazes continued to consume more than 100,000 acres of wilderness daily in one of the worst fire seasons in state history, officials said Sunday.

More than 2.1 million acres have gone up in smoke in the past month - an area equivalent to three times the size of Rhode Island. Over 2 million acres were still on fire, but cool, moist air had lessened the danger posed by many of the 119 fires.

''But we're not done yet,'' said Barry Rose, a spokesman for the joint federal-state firefighting effort. ''It's just going to continue to expand.''

The total amount of land burned was expected to hit 2.2 million acres Monday, equal to the bad fire years of 1988 and 1977. Only once since Alaska became a state have fires consumed more land - 4.2 million acres in 1969. The worst fire year occurred in 1957 before statehood when fires blackened 5 million acres. This year was expected to rank third in the number of acres burned.

''It's not the acres that alarm people here,'' Rose said from the Alaska Interagency Fire headquarters. ''It's the threat to structures and villages that alarms people. I think the alarm stage might be behind us.''

More than 1,000 firefighters - out of a total force of 2,700 - continued to battle an 87,800-acre eastern Alaska fire that has at times threatened the towns of Tok and Tetlin, surrounded a Coast Guard communications site, jumped across the Alaska-Canada Highway disrupting traffic and, remarkably burned no more than a few abandoned buildings.

Tetlin, like many of the places threatened by fire, is a small native village in a roadless wilderness area. Bulldozers for carving fire containment lines to protect Tetlin had to be brought in by Sikorksy Skycrane helicopters.

There also have been threats to other villages in Alaska and the Yukon Territory, but days of cool, wet weather have dampened the fuel and slowed the ravenous advance of the lightning-sparked fires, including many that have burned for more than four weeks.

''Fuel is getting damper and fires are slowing down,'' Rose said, ''but it hasn't been that wet. We haven't had inches of rain. The fuels are abnormally dry so it's going to take a lot of moisture to keep fires from spreading.''

Only 19 of the 119 fires were manned, Rose said. Some of largest, like three fires burning 250,465 acres inside a triangle formed by the towns of McGrath, Telida and Nikolai, were not being fought because they posed no

immediate threat. But a 5,070-acre fire a few miles from cabins and the town of Crooked Creek was being fought.

State and federal agencies have spent $33.4 million fighting the outbreak of fires during July, spokeswoman Trish Hogervorst-Rukke said. That includes $22.4 million in state funds - seven times the annual state of Alaska firefighting budget for fiscal year 1991, which began July 1, when the fires started.

(JULY 29) UPI - A state of emergency remains in effect in Trinidad, where Moslem rebels continue to hold Prime Minister Robinson and at least 18 Cabinet members hostage. There are reports that rebel and government negotiators are close to ending the stand-off. The U-S State Department describes the rebels as ''a fringe extremist group'' which does NOT have the support of the people.

The International Committee of the Red Cross today asked warring Moslem forces in Lebanon to observe a cease-fire so victims can be evacuated. The Red Cross made the appeal after sporadic cannon and rocket fire kept rescue workers from reaching an embattled area south of Beirut.

A jury in Tampa, Florida, has convicted a banker and five other businessmen of laundering 32-Million dollars in drug money for ousted Panamanian dictator Manuel Noriega. The verdict came after seven days of deliberation and seven months of testimony. Prosecutors say the case should prove America takes the drug war seriously.

The South Pacific Forum this week will take a close look at proposals by the United States to dispose of chemical weapons in the region. Leaders of 13 South Pacific nations are gathering today in Port Vila, Vanuatu, for their annual meeting. New Zealand has raised concerns about U-S transportion of chemicals across the Pacific from West Germany.

The first hurricane of the Atlantic-Caribbean season headed out to sea without following up a threat to the southeastern U-S coast. Forecasters say Hurricane Bertha was moving northeast into the Atlantic Ocean and posed NO threat to land... though its 75-mile-an-hour winds should whip up some rough surf.

What's believed to be the largest sevengill shark ever recorded has been captured and is on display in the Monterey Bay Aquarium in California. The shark is expected to give birth to up to 100 baby sharks... perhaps in the spring. Officials say they plan to film the delivery and open the event to the public.

New York police say they managed to coax five Frenchmen from the swirling rapids of Niagara Falls this morning. The men apparently decided to take a dip in the water and had brought their snorkels and swimming fins with them. None of them spoke English. One policeman says in his 23 years on the force, he's never seen anyone play in the dangerous waters.

The spirit of glasnost will hit California this week as the U-S Navy hosts a fleet of Soviet sailors. Three Soviet warships are expected to arrive in San Diego on Tuesday for a five-day exchange and Navy officials say U-S seamen are already brushing up on their Russian. It's the third such U-S-Soviet military exchange in two years.

#90210u1130 07/29/1990 ~United Press International

CAIRO, EGYPT (JULY 29) UPI - An Iraqi spokesman criticized the United States and the West for their silence after an Israeli Cabinet minister revealed that Israel has access to chemical weapons, Radio Baghdad reported Sunday.

The Iraqi radio report, monitored in Cairo, said a spokesman of the Iraqi Foreign Ministry criticized the silence with which ''the United States and the West have received the recent statement by the Israeli minister of Science, Yuval Neeman, in which he confirmed that Israel is able to use chemical weapons.''

The Iraqi spokesman appeared to be referring to a statement by the Israeli science minister a few days ago in which he reminded Iraq that if it ever was to contemplate an attack on Israel with chemical weapons, Israel would be able to reply in the same way.

In an obvious reference to recent Western reactions to Iraqi threasts to burn ''half of Israel'' with chemical weapons an to interceptions of illegal Iraqi arms shipments, the Iraqi spokesman was quoted as saying that the Western silence came ''at a time when the West was denying Iraq and other countries the right to defend themselves.''

According to the Iraqi spokesman, quoted on Iraqi radio, the Western silence was new evidence of the Western policy in the region. The policy shows the West wants to maintain Israel as the strongest force while denying the Arabs the means fo their ''legitimate defence against their enemies and the Zionists,'' the spokesman said.

He added that Neeman's statement made it clear, despite previous Israeli attempts to hide the facts, that Israel had chemical weapons ''and is preparing to use them.''

#90210u1229 07/29/1990 ~United Press International
(JULY 29) UPI - State-run radio in Trinidad and Tobago reports between 20 and 60 people have died in fighting during a small armed rebellion in the Caribbean nation. The government is still negotiating with Moslem rebels who hold wounded Prime Minister Arthur Robinson hostage. The rebels say Robinson has promised to leave office, to be replaced by the government's minister of planning. A Bush administration official says the United States is prepared to offer advisory help.

U-S prosecutors are hailing the verdict of a Tampa, Florida, jury that found six businessmen guilty today of laundering 32-Million dollars in drug money for ousted dictator Manuel Noriega. The jury's verdict followed seven days of deliberations that were briefly interrupted when one juror called alleged Colombian drug dealers with a phone number presented as testimony. The juror... who was replaced... says he phoned out of curiosity.

The Soviet news agency Tass says Boris Yeltsin will sign agreements with the three Baltic republics within the next six weeks. The renegade president of the Russian republic reportedly agreed to work directly with Latvia, Lithuania and Estonia during a meeting with their leaders Friday. Tass also says Yeltsin supports Baltic sovereignty, but is NOT pushing for their secession from the Soviet Union.

The Red Cross says the latest fighting between Moslem factions in Lebanon

has kept rescue workers from reaching victims for several days. The International Committee of the Red Cross today asked warring Shiites for a cease-fire to let volunteers evacuate victims from a battle zone south of Beirut. Security sources say an 18-hour fight yesterday killed 31 people and wounded 80 others.

#90210u1252 07/29/1990 ~United Press International

(JULY 29) UPI - South Africa's communist party staged its first public rally since it was outlawed four decades ago... and its leaders denied widespread allegations they plan to violently overthrow the apartheid government. Activists told a crowd of some 45-thousand people in Johannesburg that the government spread rumors of the insurrection to whip up- quote- ''anti-communist hysteria.''

Business lobbyists say support for a national energy sales tax is gaining momentum in budget negotiations between President Bush and congressional leaders. The tax could take one of several forms... including a flat tax on utility bills, or a ''carbon tax'' to reduce emissions from power plants and factories. One business accountant says a growing number of lawmakers feel the time has come to use the tax code to improve the environment.

Several industries are lobbying hard against pending legislation that would require all liquor advertisements to carry prominent health and warning labels. Democratic Representative Joseph Kennedy of Massachusetts introduced the bill on grounds alcohol is a factor in half of the nation's car accidents and homicides. But groups representing the alcohol, broadcasting and advertising industries say the measure is a throwback to prohibition.

A team from the Minneapolis area is heading for China in September to try to recover remnants of a World War Two bombing team that crashed. A team known as Doolittle's Raiders went on a bombing raid over Tokyo in 1942... but the 18 B-25's crashed in China after running out of fuel. Although the daring raid did little damage to Tokyo, it lifted American morale. The 80 crew members parachuted to safety. One of them will be on the search mission.

#90210u1261 07/29/1990 ~United Press International

NEW YORK (JULY 29) UPI - The nosegear of a Pan Am Express flight from Boston to New York collapsed as the plane was landing Sunday at Kennedy International Airport, but there were no injuries, officials said.

Pan Am Flight 4805 missed its first attempt at landing when the crew could

not confirm the nosegear was down and locked into position for landing, said a spokesman for the Port Authority of New York and New Jersey, which operates the airport.

On the second landing attempt, at 5:53 p.m. on runway 22 right, the landing gear collapsed, the spokesman said.

There were no injuries among the 41 passengers and three crew members aboard the four-engine DeHaviland turboprop, officials said. The passengers disembarked normally and did not have not to use emergency procedures.

The flight, which originated in Boston, was landing at Kennedy to deliver passengers to international flights, said Pamela Hanlon, a spokesman for the airline.

Pan Am Express, a regional feeder airline, is a subsidiary of Pan Am Corp. which also owns Pan Am World Airways and the Pan Am Shuttle, Hanlon said.

#90210u1325 07/29/1990 ~United Press International

(JULY 29) UPI - Firefighters in Alaska continue to battle blazes that are consuming more than 100-thousand acres of parched wilderness each day in one of the worst fire seasons in state history. Officials say fires have charred more than two-point-one-Million acres in the past month- an area equivalent to three times the size of Rhode Island. But they say cooler, moister weather is slowing the spread of the remaining 119 wildfires.

Police in Cambridge, Massachusetts, say they spent most of today trying to catalogue a huge assortment of weapons seized from a private home last night. Authorities confiscated hundreds of guns- most of them legal- while conducting a search. A city official says a complaint will be filed tomorrow against the gunowner for weapon violations and possession of a mortar launcher.

Peru's new president announced today that banks will be closed the next two days to give the government time to deal with the nation's economic crisis. President Alberto Fujimori also decreed public utility rates and the price of gasoline will go up to bring them in line with market forces. Fujimori says he will offer specifics on his economic plan later this week.

A New York consumer watchdog group says prices for identical airline tickets can vary depending on where the ticket is bought. A Consumers Affairs survey asked 49 New York travel agencies for the lowest possible weekend direct round-trip fare to the same cities and found prices varied by as much as 53 percent. A spokesman blamed the discrepancies on lazy, negligent and poorly trained travel agents.

#90210u1335 07/29/1990 ~United Press International
(JULY 29) UPI - Diplomatic sources say a scheduled meeting between representatives of Iraq and Kuwait fell through today. Says one diplomatic source- ''This means relations between the two sides have taken a turn for the worse.'' Iraq has accused Kuwait and the United Arab Emirates of dumping crude oil on the world market and causing a drop in oil prices. Last week, Iraq raised international concerns by staging military maneuvers along its border with Kuwait.

The Israeli Cabinet today postponed a decision on a 13-and-a-half-BILLION-dollar plan to help Soviet immigrants settle into new lives in the Jewish state. The Cabinet put off the vote after a five-hour debate during which opponents said the costly plan would lead to rampant inflation. Debate is expected to continue later this week. Nearly 70-thousand immigrants... mostly Soviet Jews... have arrived in Israel since January.

The nations involved say peace talks between Cambodian political factions that were to be held in Paris tomorrow have been postponed indefinitely. Cambodia's Vietnamese-installed prime minister said he saw NO reason for traveling thousands of miles to discuss what has already been solved. Khmer Rouge rebels called for the next meeting to be in Beijing instead of Paris.

The former chancellor of Austria and longtime head of the nation's Socialist Party died today of heart failure in Vienna. Bruno Kreisky was 79. He fled Austria for Sweden during the second world war... but returned to become one of Austria's most popular leaders. As chancellor from 1970 to 1983, Kreisky expanded relations with Arab leaders. He prided himself on helping to forge the socialist movement in Austria.

#90210u1570 07/29/1990 ~United Press International
(JULY 29) UPI - The Coast Guard says NO decision has been made as to how to refloat two barges that struck a tanker last night in the Houston Barge Channel. Both barges are leaking oil, with an estimated 50-thousand gallons entering the channel since the incident occurred. Officials say the NONE of the nearly 30-thousand metric tons of jet fuel being carried by the tanker leaked... a fact they credit to the vessel's double hull design.

In the Philippines, a fitness instructor has been found alive after spending two weeks under the wreckage of a hotel which collapsed in an earthquake two weeks ago. A doctor who examined the survivor in the city of Baguio... where it is Monday... says the man survived by drinking his own urine- just as three other survivors did before they were found three days ago.

The Hungarian government says just more than 14 percent of the electorate turned out today for a referendum on how to elect their next president. Of those who turned out, 86 percent favored direct election. But the paltry turnout fell far short of the minimum turnout needed to validate the decision. That means Hungary's National Assembly will elect the next president.

Soviet newspapers reported today the Soviet economy stumbled in the first half of 1990 because supply was outpaced by consumer demand. The Gross National Product fell one percent from the same period last year and national income suffered a two-percent drop. Newspapers also said the foreign trade deficit worsened by two-point-five percent over last year.

-30- 1714
#90210u1576 07/29/1990 ~United Press International
(JULY 29) UPI - London police are questioning a gunman who surrendered this morning after holding 105 nightclub patrons and workers hostage overnight. The man stormed the famous Tokyo Joe's nightspot, carrying an assortment of weapons and what seemed to be a bomb. Broadcast reports suggest he demanded safe passage to Lebanon. Police say they've made two other arrests related to the hostage stand-off.

Turkish troops reportedly have killed at least 40 Kurdish rebels in clashes in the southeastern countryside during the past four days. An Istanbul newspaper said the rebels were believed to be members of the Kurdish Workers Party. The rebels have been fighting for six years to create an independent Kurdish state in the region.

An UNexplained explosion in a North Carolina town leveled six buildings... but miraculously did NOT kill or seriously injure anyone. Eight businesses

on Main Street were blown apart by last night's blast in the town of Monroe. The police chief says investigators have an open mind about whether the explosion was caused by natural gas or something else.

One of the most prominent golf clubs in the United States is trying to enroll its first black member following a controversy an Alabama golf club. The chairman of Augusta National... host of the Masters tournament... said yesterday the club has NO minorities. But he says Augusta has been seeking minorities.

#90211b0006 07/30/1990 ~Business Wire

KENT, WA (JULY 30) BUSINESS WIRE - Sun Sportswear Inc. (NASDAQ: SSPW) Monday announced record net sales for the first half ended June 30, 1990, of $46.9 million compared to net sales for the first half ended June 30, 1989, of $41.5 million.

The year to date sales increase resulted from continued strength in sales to the company's three major customers, and the success of two of its licensed products. Sales to the company's three largest customers, Wal-Mart, Target and K mart, represented 77 percent of first half 1990 sales, up from 72 percent for the comparable 1989 period.

Net sales and net income for the second quarter ended June 30, 1990, were $22.3 million and $1.1 million, respectively, compared to $25.1 million and $2.1 million, respectively, for the comparable 1989 quarter. The second quarter 1990 results were impacted by aggressive customer purchases in the first quarter, cool spring weather and popularity of competing licensed products.

In addition, the second quarter and first half of 1990 include provisions for bad debts for the Ames Department Stores bankruptcy of approximately 3 cents per share (after tax) and 6 cents per share (after tax), respectively. This combination of factors resulted in 1990 year to date net income and earnings per share of $2.3 million and 42 cents, respectively, being below comparable 1989 results of $2.8 million and 62 cents, respectively.

Sun has recently been approved by the University of Notre Dame to sell the college's licensed products to Sun's customers. Sun has been selected to join a relatively small group of preeminent approved licenses for this college.

Sun Sportswear is one of the nation's largest screen printers of casual sportswear for the mass-merchandising segment.

#90211b0012 07/30/1990 ~Business Wire

PHOENIX (JULY 30) BUSINESS WIRE - Pinnacle West Capital Corp. Chairman Richard Snell said Saturday that the reduction in the Arizona Public Service Co. (APS) common stock dividend is within the range factored into the holding company's recovery plan for a planning period extending through 1993.

The APS board of directors today announced a reduction in its common stock dividend from $52.7 million per quarter to $42.5 million per quarter. Pinnacle West owns all APS common stock.

''In developing a schedule for debt repayment, we anticipated a lower dividend from APS,'' Snell said. ''For that reason, we do not plan to reduce the rate of our debt repayment, nor will the dividend reduction impact our projections of increased equity in the company or our hope of restoring a dividend to Pinnacle West shareholders by year-end 1993.''

Snell said that Pinnacle West still expects to repay approximately $600 million in debt by Dec. 31, 1993, including $200 million by the end of this year. Since March, Pinnacle West has paid down debt by $115 million $50 million ahead of schedule.

Snell said that in addition to the APS dividend, Pinnacle West will pay down debt using proceeds from the pending sale of Malapai Resources Co. as well as positive cash flow from non-utility subsidiaries SunCor Development Co. and El Dorado Investment Co.

Separately, the Pinnacle West board voted today to terminate, as of June 30, 1990, the annual $10,000 cash retainer fee that had been paid to each director. Instead, each director will receive a stock option to purchase 3,500 shares of Pinnacle West stock for a price of $16.25 per share. That was the market price at the beginning of the 12-month period starting immediately after June 30.

It is expected that similar options will be granted as of July 1, 1991, and July 1, 1992.

In anticipation that Pinnacle West will restore a dividend to its shareholders by the end of 1993, the board limited today's action until mid-1993.

Pinnacle West is a Phoenix-based holding company with consolidated assets of more than $7 billion.

#90211b0014 07/30/1990 ~Business Wire

MUNCIE, IN (JULY 30) BUSINESS WIRE - Ball Corporation (NYSE:BLL), in a move that would nearly triple its 1989 sales of $1.2 billion, announced today the signing of definitive agreements to acquire the European packaging interests of Continental Can Company, Inc. (CCC), and to buy the remaining interest in its 50 percent-owned Ball-InCon Glass Packaging Corp. joint venture.

CCC is a privately held business of Peter Kiewit Sons' Inc., Omaha, Neb., while Ball's joint venture partner in Ball- InCon is Holland-American Investment Corporation.

Ball will pay $1,025 million for the CCC businesses, consisting of $625 million in cash and $400 million in the form of preferred and common stock of Ball. The cash portion of the purchase price will be obtained through bank financing. The CCC businesses are essentially debt free and are projected to have a substantial cash surplus upon closing of the transaction. The Ball-InCon purchase will be for $65 million in cash. Both will be operated as wholly owned subsidiaries of Ball Corporation, with Ball-InCon retaining its own financing.

The $400 million of Ball stock to be issued to Kiewit as part of the purchase price will be composed of $200 million of common stock, $129 million of voting and $71 million of non- voting convertible exchangeable preferred stock. The Kiewit stock will represent a 29 percent voting interest in Ball. The preferred stock will have a 7 3/4 percent annual dividend, will be convertible into common stock at $37.08 a share and will be redeemed in three consecutive annual installments, concluding in the year 2002.

The preferred and common stock issued to Kiewit in the transaction will be subject to an agreement which restricts the manner in which it may be voted and sold and restricts Kiewit from purchasing additional Ball shares. As long as Kiewit holds 20 percent or more of the combined voting stock of Ball, Ball will nominate two Kiewit designees to the Ball board of directors.

Founded 110 years ago, Ball Corporation entered the metal beverage container industry in 1969. During the past two decades, that product line has grown to be the company's largest, with 58 percent of total sales last year coming from aluminum and steel beer and soft drink cans and easy-opening ends. Ball's total packaging products sales for 1989 were $780.9 million, or 63.9 percent of its total sales. Packaging sales of

Ball, CCE and Ball-InCon in 1989 would have been $2.78 billion, or 86.3 percent of total combined sales.

Both acquisitions are expected to become final before year-end. The CCE transaction is subject to the approval of Ball's shareholders and receipt of certain U.S. and foreign governmental approvals. Both transactions are subject to Ball's obtaining financing. The First National Bank of Chicago and Citibank N.A. are working with Ball to arrange the necessary financing. Ball is being advised by Morgan Stanley & Co. Incorporated on the CCE transaction.

#90211b0019 07/30/1990 ~Business Wire

BOHEMIA, N.Y. (JULY 30) BUSINESS WIRE - Millions of American women are alive today because the Pap smear can detect cancer of the cervix at its earliest stages.

Yet an alarming number of women die each year of cervical cancer which is virtually 100 percent curable if detected and treated early. The American Cancer Society estimates that one-third of the 90 million American women aged 20 and above who are at risk for cervical cancer do not receive periodic screening.

Many studies have shown that a majority of women suffering from the advanced stages of cervical cancer have either never had a Pap smear or did not participate in a regular screening program.

Although the U.S. Department of Health and Human Services has mandated new rules to improve the quality and accuracy of the laboratories performing Pap smear evaluation, lack of participation in testing programs among women most at risk from the disease is still a problem.

Even when a public figure like Marilyn Quayle gets cervical cancer, many women still postpone obtaining a Pap smear. Considered by doctors to be the best defense against cervical cancer, the Pap smear remains an underutilized test by millions of American women at risk.

Those women not in regular screening programs may have an answer: an investigational device that will allow women to collect their own samples at home. Called the MY-PAP kit, it has been developed by Medtech Diagnostics of Bohemia, and is currently being reviewed by the Federal Drug Administration (FDA).

When approved, the MY-PAP kit will permit a woman to safely and conveniently collect a sample of cellular material from her vagina, which contains the same cells that are normally scraped from the cervix during a Pap smear examination.

Truglio, who holds a master's degree in biology, is an early detection specialist. To set up phone interviews, please call The Halsted Organization at 800/522-8877.

HERNDON, VA. (JULY 30) BUSINESS WIRE - EDS announced Monday that it has signed the Small Multi-user Computer (SMC) contract with the U.S. Army Information Systems Selection and Acquisition Agency to provide multi-user micro-computer systems and services to the Army, the Navy and the Defense Logistics Agency.

The indefinite delivery/indefinite quantity contract runs for eight years in one-year increments. Depending on orders, the value of the contract could reach $700 million or more.

In addition to supplying multi-user computer systems, EDS will provide peripherals, operating systems software, maintenance, systems engineering, training and systems integration in both UNIX and DOS environments.

EDS will also install Government Open Systems Interconnection Profile (GOSIP)-compliant local area networks. Estimates are that up to 20,000 multi-user systems will be procured by the three customers. The three agencies will be able to order hardware and services from the SMC contract during a five-year window after initial acceptance tests at Fort Huachuca, Az. Maintenance is available for the entire term of the contract.

The systems available through the SMC contract range from single user personal computers with the DOS and UNIX operating systems to multiple four to sixteen user systems connected via GOSIP-based local area networks. The new systems will build on and enhance existing technology investments while meeting all government requirements.

''The SMC program will provide reliable, cost-effective productivity-enhancing support while maximizing past, present and future office automation investments,'' said Robert McCashin, Group Executive for EDS' Federal Government business. ''This contract establishes EDS as the UNIX integrator for our military customers.''

EDS has operations in 27 countries and is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

AMERICAN FORK, Utah (JULY 30) BUSINESS WIRE - TEL electronics inc. (NASDAQ:TELS) announced its new national sales force that is nearly double its previous size.

It has only been a month since the reorganization and already sales are showing improvement.

''We're committed to increased sales and we're not afraid to make changes '' said Tracy Tolbert, vice president of sales. ''We took our existing sales force and brought in outside talent specifically trained in technical sales.'' Not only did TEL increase their sales force, but they took a unique approach and instituted team selling.

TEL's sales approach combines two sales people into one team. One advantage is that twice the chance of a personality match between buyer and seller now exists. In addition, this approach provides better service for the customer. If one sales person is out of the office, there will still be a partner available who is familiar with the buyer and his account.

In the past, each sales person was responsible for various states throughout the United States. An individual could have Texas and at the same time have Maine. Under the new sales program, the United States is divided into sales regions such as the Northwest or Southeast. This new program allows a sales team to become familiar with a region's culture and habits which enable the team to better sell to their buyers.

One of the biggest advantages of this approach is that it promotes team work and produces synergy within a sales team whose members were selected for the specific talents they bring to that team.

According to Mark Phillips, co-manager of regional sales over the Western Region, ''In areas in which I am weak, my sales partner has strengths. The sum of both our talents increases our sales.'' Not only have sales increased, but the number of new dealers signed a month has also increased. Currently TEL signs 15-20 dealers each month, and under the new plan, by the end of 1990 TEL should be signing between 35-40 dealers monthly.

TEL electronics inc. designs, produces, and markets microprocessor-based telephone call accounting, telephone management, line scanners, voice/mail processing systems, automated attendants and other telecommunications systems. All of TEL's products are designed and produced in the United States for use by the lodging industry, professional firms, government agencies and general business organizations.

DAVIS, Calif. (JULY 30) BUSINESS WIRE - Calgene Inc. Monday announced that it has received a U.S. patent which covers the genetic regulatory sequences, or ''promoter'' of a naturally occurring tomato gene, designated the 2A11 gene.

The company also announced that it has selected ''FLAVR SAVR'' as the commercial trademark for its antisense polygalacturonase (A-PG) gene.

The 2A11 gene is normally expressed in tomato fruit, but not in roots, stems or leaves of tomato plants, and is highly active during fruit development and ripening.

Calgene scientists are using this proprietary fruit-specific promotor to selectively control the expression of genes which will enhance tomato fruit quality traits such as solids, color, taste and shelf-life.

''This is the first U.S. patent to be issued covering fruit-specific expression in genetically engineered plants,'' stated Dr. Catherine Houck, who has led the expression group of Calgene's tomato program.

''The patent protects the use of the 2A11 promoter with a variety of fruit quality genes and in transgenic tomato plants and will be a valuable tool in our program to engineer improved fresh market and processing tomatoes.''

Calgene previously announced that it had received a U.S. patent on the use of antisense recombinant DNA technology to reduce the levels of a naturally occurring tomato enzyme, polygalacturonase (PG), to produce fruit with substantially extended shelf-life and improved flavor.

The company has selected ''FLAVR SAVR'' as the commercial trademark for this gene.

Calgene successfully harvested over two tons of proprietary genetically engineered fresh market tomatoes from its field trial in Florida this spring.

Tomato handling and shelf-life studies validated the improved characteristics of the tomatoes. Calgene is presently conducting additional FLAVR SAVR tomato trials in Yolo County, Calif., to generate compositional and safety data in support of regulatory approval of these products.

Campbell Institute for Research and Technology, who owns the rights to the polygalacturonase antisense gene in tomato, is co-funding the tomato research program and is Calgene's commercialization partner for tomato products developed from biotechnology.

Calgene Inc. is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries.

The company has five operating subsidiaries - Ameri-Can Pedigreed Seed Co. Calgene Chemical, NobleBear Inc., Plant Genetics Inc. and Stoneville Pedigreed Seed Co.

PHOENIX (JULY 30) BUSINESS WIRE - Verit Industries Monday announced that it has completed the private sale of 61,500 shares of Series B convertible preferred stock to a Liechtenstein investment company for $15,375,000.

Each Series B share is convertible into 100 shares of common stock of Verit following listing approval of the common shares on the American Stock Exchange. In connection with the purchase, the purchaser has agreed to vote its shares in the same manner as the existing management of Verit for an approximate five-year period. In addition, the agreement places a limitation on the number of common shares which may be sold by the purchaser in any 12-month period for an approximate five-year period.

From the proceeds of the sale, $14,770,000 was used to acquire approximately 67 percent of Touristic Club International A.G. Vaduz, a leisure company, whose principal asset is the Hotel Viking, a five-star resort hotel in a prime ocean-front location in the Algarve area of Southern Portugal. The hotel has a recent appraised value of approximately $23.8 million and has debt of approximately $250,000.

Residential rights (time share) in the hotel were actively sold beginning in early 1989. These rights were sold, together with shares in TCI. Approximately 33 percent of the shares were sold and in the purchase, Verit acquired a receivable of approximately $7,218,170 from the prior sales. These receivables are secured by the shares in TCI and nonpayment of a receivable will result in an increase in the ownership of the shares of TCI by Verit. The purchase also included two recently constructed apartment buildings.

As a result of the sale of shares, the book value of Verit has increased from approximately $27 million to $42 million.

''We are looking forward to taking advantage of the total economic unification of Europe in 1992 as well as the sweeping changes that are occuring in the Eastern Bloc countries,'' stated Philip Polich, Verit's president. ''This acquisition is the initial entry of Verit into European business, beginning in the leisure industry but with an eye to future acquisitions and diversification,'' Polich went on to say.

Verit's common shares are traded on the American Stock Exchange under the symbol VER.

LOS ANGELES (JULY 30) BUSINESS WIRE - Edward's Alvarado Steak House, the landmark 44-year-old Los Angeles restaurant near MacArthur Park that announced May 2 that it was losing a years-long battle against crime and urban blight in the neighborhood, will close forever at the end of business July 31.

Ken Rausch, son of founder Edward Rausch and president of the family business, said that no special activity is planned in connection with the closing, ''except perhaps a few of the restaurant's long-time customers dropping in for a last dinner or drink.''

''We'll close the door at 10:15 p.m. and that will be it,'' said Rausch. ''On Wednesday we will begin to pack and store the restaurant's Victorian furnishings and fixtures, and we will vacate the premises by Aug. 7.''

Rausch added that coincidentally Aug. 7 is the same day that the demise of the popular restaurant is scheduld to be a featured segment on the new NBC network prime time show, ''Real Life with Jane Pauley.''

Edward's has been noted for its modestly priced food and ambience

including Tiffany lamps, antique bar, oil paintings, historic photos, oak and brass furnishings and sawdust on the floor.

Rausch said the restaurant at 731 S. Alvarado St. in the once-fashionable Westlake district has been purchased by a group of investors who plan to raze the building and construct bazaar-like shops.

Commenting on the recently launched efforts of the Los Angeles Police Department to reclaim MacArthur Park, Rausch said he is highly dubious about the effort of the city to deal with the crime, drug-dealing, prostitution and other problems that have driven Edward's out of the deteriorated neighborhood.

''But we wish them well,'' he added, ''and we are sad indeed that any success they may achieve is too late for Edward's.''

He said that about half of Edward's 40 employees already have been placed in other jobs as a result of a successful job fair he held for personnel directors of Los Angeles hotels and restaurants, and he expects the balance to have jobs soon.

WASHINGTON (JULY 30) BUSINESS WIRE - US Sprint Monday announced that it had filed a price reduction for 56Kbps data services on FTS2000, the federal government's telecommunications system.

The price reduction, if approved by the General Service Administration, would be the seventh time the company has moved to lower its prices on various FTS2000 services.

''On each occasion, we've voluntarily modified our prices,'' said Gary D. Forsee, chief operating officer of the network systems division, which markets and manages US Sprint's portion of the FTS2000 network. ''FTS2000 must offer agencies the most advanced features and services at costs that are competitive with those in the commercial marketplace,'' he said. ''Changes in the marketplace, as well as greater-than-anticipated call volumes, are allowing us to reduce prices for a number of different services.''

GSA approved an additional round of US Sprint-initiated price reductions

in April for switched data transport, packet transport and Dedicated Transmission Service access prices.

In the past 13 months, GSA has granted six other requests by US Sprint for price reductions on the following services:

-- T-1 Circuits

-- Enhanced 800

-- Packet switched data

-- Miscellaneous access areas

-- A group of data services, including switched data video and

packet data

-- Virtual On-Net Service

''We will continue to assure that our services and prices are responsive to the changing marketplace,'' said Forsee. ''We are now working on many options that will allow us to offer services more attractively to government users, and look forward to announcing these progressive actions in the near future as well as throughout the 10 years of the FTS2000 contract.''

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

#90211b0123 07/30/1990 ~Business Wire

SEATTLE (JULY 30) BUSINESS WIRE - With the full support of the Port of Seattle Commission, Executive Director Zeger van Asch van Wijck Monday announced a major reorganization of the public agency's management structure.

The reorganization is intended to streamline the Port's operations and make it more competitive in the global trade marketplace through the 21st Century.

The reorganization is the first step of a review of the Port's organization and reflects participation by employees across all the Port's

functions. The reorganization plan addresses far more than reporting relationships, according to van Asch van Wijck. ''The new management structure is unique, but we heard from our employees and our customers that we had far more to tackle than just who reports to whom. We are changing how we do business, encouraging teamwork and an entrepreneurial spirit, and we are re-thinking in every division how we allocate resources to achieve our mission. In a time of fierce trade competition, it's the smart thing to do.''

These initial changes in the Port's senior management will take effect Sept. 1. The Port will refine other elements of the reorganization plan in the coming months, with all managers responsible for restructuring their areas of responsibility by Jan. 1. Parallel with that, Port policies and procedures, including information management systems, will be reviewed.

Central to the adoption of the new executive office concept is the creation of the new position of chief operating officer (COO), responsible for day-to-day oversight of Port operations. Mic Dinsmore, head of the Marine Division for three years until his departure from the Port two and a half years ago, has been appointed to the COO position, effective Sept. 1. Van Asch van Wijck will change titles to chief executive officer from executive director.

Dinsmore will be responsible for day-to-day operations and will oversee four major divisions: the existing Aviation and Marine Divisions, headed by Andrea Riniker and Frank Clark respectively; a new Administrative Services Division, headed by Candace Jonson; and a newly formed Logistics Division.

Joining van Asch van Wijck and Dinsmore in the executive office will be current General Counsel Stephen Sewell in the newly created position of Corporate Secretary/General Counsel.

Departments comprising the corporate staff include:

-- Strategic and Financial Management, to be headed by current Budget Director Maud Smith-Daudon.

-- Marketing and Business Development, to be headed by Mark Reis, currently the director of Marine Policy and Business Development.

-- Equal Employment Opportunities.

-- Public Information.

-- Legal and Government Relations.

-- Employee and Labor Relations, a newly created department that combines the Human Resources and Labor Relations functions.

The Marketing and Business Development Department will develop a coordinated Port-wide general marketing strategy, centralizing related market research, analysis and innovative business development creation, including special projects such as the Central Waterfront Project. The Strategic and Financial Management Department will monitor agreed upon performance indicators and finances, develop and coordinate the annual budget process and integrate that with the Port's strategic plan.

Van Asch van Wijck also announced a major regrouping of responsibilities throughout existing Port departments, including the creation of a Logistics Division. The study also determined that commercial real estate development is not one of the core functions of the Port, and therefore does not warrant a separate division. Development Director Dan Dingfield has decided to resign, but will continue as a senior consultant on the Central Waterfront Project.

When van Asch van Wijck, a former Port of Rotterdam executive, took over the helm in Seattle at the beginning of 1989, the Commission directed him to improve the Port's competitive position, strengthen financial results, and build better relationships with community groups in the Puget Sound region.

MOUNTAIN VIEW, CA (JULY 30) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) announced Monday that Ned Bunnell has joined the company as director of typography.

At Adobe, Bunnell will manage and direct all of Adobe's type-related activities. He will be responsible for solidifying and extending the position of the PostScript font software format as the industry standard and expansion of the Adobe Type Library, which already includes software for nearly 700 fonts.

''I'm excited about joining Adobe and the opportunity to focus on expanding the Adobe Originals typeface library as well as increasing the number of PostScript format typefaces available for Kanji and other non-latin character sets,'' Bunnell said.

Bunnell joins Adobe from AGFA Compugraphic, where he was director of marketing, peripherals, responsible for product planning, marketing and

new business development. He developed the company's plans for marketing PostScript language compatible typefaces for the Macintosh and for marketing and distributing PostScript printers and high-resolution scanners.

Prior to joining AGFA, he was managing director--U.S. operations for URW Unternehmensberatung. He opened URW's first American office and was responsible for marketing URW typefaces, font scaling technology and IKARUS digitizing systems. Before coming to URW, he was a product line manager for page printers and type development at NEC Information Systems.

Bunnell has studied book publishing and computer science at Northeastern University in Boston, and holds a Bachelor of Arts degree in Design from the San Francisco Art Institute. He is the author of ''Understanding Digital Type,'' published by the National Composition Association.

Adobe Systems Inc. is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays.

In addition, the company develops and markets the Adobe Type Library and a line of application software products. Revenues for 1989 were over $120 million.

#90211b0130 07/30/1990 ~Business Wire

MOUNTAIN VIEW, Calif. (JULY 30) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) and Digital F/X announced Monday that they have signed an agreement giving Digital F/X licensing rights to Adobe's PostScript interpreter.

Digital F/X is the first company to use PostScript technology to overlay graphics created on Macintosh onto Videotape.

Digital F/X is incorporating PostScript software into its Video F/X product, which it is announcing today. Video F/X is the first desktop video production system. It integrates the Macintosh II with professional-quality video production capabilities to provide a system that gives novices and professionals the ability to create high-quality videos.

''Digital F/X's new Video F/X system brings a new power to communicate to the desktop,'' said John Warnock, chairman and chief executive officer,

Adobe Systems Inc. ''I believe corporations will find the combination of the power of PostScript and a professional-quality video system both productive and cost effective.

''This is the first link between the powerful device independent graphics and creation tools on the Macintosh and the world of video communication.'' In the Video F/X product, PostScript software translates digital graphics for overlay onto analog video. Digital F/X has created proprietary enhancements to PostScript software for converting graphics to the National Television Standards Committee video format.

Video F/X users can import graphics in several formats, including encapsulated PostScript language, or EPS, and superimpose them onto live video action. Adobe Illustrator and Adobe Photoshop are among the Macintosh graphics applications that create EPS format graphics which are compatible with Video F/X.

Video F/X includes an interactive titler that supports any PostScript language font on the user's disk. Users can interactively reposition and scale titles such as corporate logos, and place them on arbitrary backgrounds.

Video F/X uses a mix of custom and commercial analog and digital chip technologies that capture, translate and render video signals to digital computer format and back to videotape. Video F/X's hardware comprises a video/audio control box and digital frame buffer add-in card.

Video F/X is in beta testing now, with first volume shipments beginning in October. Video F/X will be available for $9,995 from Macintosh and video system dealers. Digital F/X Inc., based in Mountain View, Calif., designs, manufactures and markets digital-based video post-production systems. Digital F/X was founded in 1986 by an experienced team of broadcast equipment and computer graphics professionals who shared a common vision of merging video and computer technology.

The company builds platforms which integrate previously separate functions offer superior performance, improve productivity and provide a solid upgrade path to totally digital graphics production and video post production. Video F/X joins a product line which includes Paint F/X, Composium and DF/X 200.

Adobe Systems Inc. is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays.

In addition, the company develops and markets a line of application software products. Revenues for 1989 were over $120 million.

#90211b0132 07/30/1990 ~Business Wire

SAN DIEGO (JULY 30) BUSINESS WIRE - Ventura Software Inc., a Xerox company, has begun shipment of new Windows 3.0 versions of its Ventura Publisher and FormBase software products to major resellers nationwide, including Ingram Micro D of Santa Ana, Calif., Merisel of Inglewood, Calif., and Egghead Discount Software of Issaquah, Wash.

Ventura Publisher, Windows Edition, has an entirely new user interface that allows this desktop publishing software to take full advantage of the recently released Windows 3.0 graphical environment. The new product has a suggested retail price of $895. FormBase 1.1, which automates the design, manipulation and management of forms and forms-related data, also operates under Microsoft's recently released Windows graphical environment version 3.0, and has a suggested retail price of $495.

Ventura Publisher, Windows Edition, includes advanced publishing features and networking capabilities found in Ventura Publisher Professional Extension and Network Server plus additional features. Extended memory support increases the size and complexity of documents that can be created.

Other enhancements common to the Windows environment include automatic mouse scrolling for easier screen access and support for the Windows Clipboard. Pull down menus and the Windows toolbox increase ease of use and easy of learning.

Speed and performance on the Windows version will match the powerful GEM-based product. Documents created in Ventura Publisher 1.1 or 2.0 will be upwardly compatible in the Windows Edition.

Ventura Software is announcing a new policy for registered users of the Ventura Publisher 2.0, 1.0 or 1.1 base products to upgrade to the Windows Edition for $195. Customers who recently upgraded to, or purchased, the 3.0 DOS/GEM Edition will also be able to purchase the Windows Edition for $195. These prices are available through Dec. 31.

FormBase transparently integrates a forms drawing package and a relational database manager, allowing users to create and alter a database simply by drawing a form. Upgraded features of the new product include: powerful design tools and enhanced viewing modes, increased printing speed (up to four times faster than the original version) and sorting performance, and support for the development of international versions.

FormBase allows users to manage information faster, easier and less expensively than existing forms processors or database products, and applications in the total office automation environment for the product span a variety of critical vertical markets.

Currently registered users of FormBase 1.0 can upgrade for $49, at any time.

Ventura Software Inc., a Xerox company, is a leading supplier of publishing, forms processing and database management software solutions for IBM PCs and compatibles and versions are planned for the Macintosh and UNIX platforms.

The company markets its software solutions through a dealership network of more than 4,000 outlets. Ventura Software Inc. has its headquarters in San Diego.

#90211b0134 07/30/1990 ~Business Wire

SAN DIEGO (JULY 30) BUSINESS WIRE - Ventura Software Inc., a Xerox company, Monday announced a new upgrade pricing strategy for registered users of the Ventura Publisher Gold Series, DOS/GEM Edition. Under this new policy, customers who recently upgraded to the 3.0 GEM Edition will be able to purchase the Windows or OS/2 Editions for $195 until Dec. 31.

''Our decision to develop and provide this migration path was driven by requests from our current Ventura Publisher, GEM users,'' said Larry Gerhard, president and chief executive officer of Ventura Software Inc. ''We have a tremendous following of Ventura Publisher users who have expressed an interest in migrating to multiple platforms and we are pleased to offer them an affordable solution.''

Registered users of Ventura Publisher 2.0 base product, 1.0 or 1.1 can upgrade to the GEM Edition for $160 or the Windows or OS/2 Editions for $195. Users who own either Ventura Publisher: Network Server or Ventura Publisher: Professional Extension can upgrade to the GEM Edition for $80.

Prior to this, Gold Series customers were offered a one-time $250 upgrade to the platform of their choice. This new policy will allow customers who have upgraded to the GEM 3.0 Edition the option to upgrade again for $195

to the Windows or OS/2 Editions through Dec. 31.

The Gold Series, which includes new DOS/GEM, Windows and OS/2 Presentation Manager versions of Ventura Publisher, expands functionality and platform availability to serve a broader desktop publishing customer base.

Each product in the series has a suggested retail price of $895, which represents a saving of more than 50 percent compared to the combined price of the previously separate products. The GEM and Windows Editions are both currently available and the OS/2 Edition is scheduled to ship in North America in the third quarter of 1990.

Customers will receive information regarding this new upgrade policy in August.

Ventura Software Inc., a Xerox company, is a leading supplier of publishing, forms processing and database management software solutions for IBM PCs and compatibles and versions are planned for the Macintosh and UNIX platforms. The company markets its software solutions through a dealership network of more than 4,000 outlets. Ventura Software Inc. has its headquarters in San Diego.

MEDFORD, OR (JULY 30) BUSINESS WIRE - Jackson County Federal Bank, F.S.B. (JCF) has announced the declaration of a 19 cent per share cash dividend on its Series A preferred stock for the quarter ended June 30, 1990.

In accordance with the recently promulgated capital distribution regulation and the prior approval from the Office of Thrift Supervision (the ''OTS'') JCF submitted the 30 day advance notice of such dividend to the OTS on July 20, 1990, that the dividend will be payable on Aug. 20, 1990, to shareholders of record on July 30, 1990. This is the bank's first quarterly dividend on the Series A preferred stock, which was issued pursuant to an exchange offer consummated on May 11, 1990.

JCF also announced net earnings of $376,000 (45 cents per common share) for the quarter ended June 30, 1990 (fourth quarter fiscal 1990), compared to $311,000 (37 cents per common share) for the same quarter last year. Net earnings for the year amounted to $1,397,000 ($1.68 per common share) for a 17.65 percent return on average shareholder equity.

Total assets of $335.4 million at June 30, 1990, were up $18.3 million, or 5.8 percent, from $317.1 million at June 30, 1989. Total deposits increased $31.6 million or 12.0 percent to $295.7 million compared to $264.1 million at June 30, 1989. Net loans and mortgage-backed securities increased $50.7 million, or 23.8 percent, to $263.6 million from $212.9 million at June 30, 1989.

Chairman Carl D. Gustavson stated that he was ''very pleased with JCF's continuing improvement in earnings and most gratified by the strong support exhibited by JCF's shareholders as demonstrated by their overwhelming participation in the exchange offer'' -- with 93.9 percent of the shareholders exchanging their debentures for the Series A preferred stock.

Founded in 1909, JCF is the oldest and largest financial institution headquartered in Southern Oregon. Medford-based JCF has branches in Medford, Ashland, Grants Pass, Central Point and Jacksonville.

SAN JOSE, CA (JULY 30) BUSINESS WIRE - Interactive Media Technologies Inc. (NASDAQ: IMTX) made delivery of the first IMTX 8000 multimedia integration system to officials of Apple Computer Inc. during ceremonies Monday in San Jose.

IMT Chairman and Chief Executive Officer R. Glenn Williamson personally handed the first IMTX 8000 to Sonny Najera, Apple Integrated Systems Business Relations Manager. ''This marks a major milestone in the marriage of computers and video,'' Williamson said. ''From this day forward, anyone who can operate a Macintosh can now become a video producer.''

The IMTX 8000 is the industry's first multimedia integration system. It is a combination hardware and software product that will enable desktop users to produce studio-quality videos at a fraction of the time and cost involved using current technology. ''We at Apple Integrated Systems look forward to evaluating the IMTX 8000, to determine it's applicability in the multimedia solution development with our system integration customers '' said Najera.

The IMTX 8000 is manufactured in Scottsdale, Ariz., and will soon be available on the American market at a cost of less than $10,000. IMT recently announced a letter of intent agreement with Canon Sales Inc., for

sales and distribution of the IMTX 8000 in the Japanese market. Canon Sales, a publicly traded division of Canon International, also provides exclusive sales and distribution for Apple products throughout Japan.

RICHARDSON, TX (JULY 30) BUSINESS WIRE - Micrografx Inc. (NASDAQ:MGXI) Monday reported record revenues of $5,395,000 for its first quarter of fiscal 1991 ended June 30, 1990, a 38 percent increase over $3,917,000 in revenues for the three month period ended June 30, 1989.

Net income for the first quarter of fiscal 1991 was $641,000, or 15 cents per share, compared with net income of $272,000, or 7 cents per share, for the like period a year ago.

Micrografx is a leading developer of personal computer graphics application software products for the Microsoft Windows environment and recently completed an initial public offering of 1,529,280 shares of common stock at $16 per share.

Introduced in late June, Micrografx Charisma is a $495 integrated business graphics program which combines data driven charting with word charting, illustration and presentation features.

Micrografx products are used in most Fortune 500 companies as well as thousands of smaller firms.

Micrografx introduced the first Windows application, a high-end drawing program named In a Vision, in July of 1985, several months before Microsoft shipped Windows 1.0. Since that time, Micrografx has continually introduced new Windows applications, as well as clipart products, device drivers and systems software products for the Windows and OS/2 environments.

The company's most popular product today is Micrografx Designer 3.0, a $695 application targeted to illustrators, designers and other professional users of graphics.

The company's other products include Micrografx Draw Plus, a $229 basic drawing package, Micrografx XPort, a $199 utility which allows users to exchange graphics among a number of popular software packages, and a variety of clipart collections, priced from $89 to $249, for users who need ''pre-fabricated'' art.

Micrografx was founded in 1982 and has been profitable in each year of its history. The company develops all of its products internally and markets its software products worldwide through a network of distributors and dealers.

Micrografx generates nearly half of its revenues through sales outside the United States and has over 170 employees in the United States, Canada, Denmark, France, Germany and the United Kingdom.

CLEVELAND (JULY 30) BUSINESS WIRE - Mr. Gasket Co. (NASDAQ:MRGC) today reported results for the quarter ended June 30, 1990.

Net income for the quarter was $1,358,000 (or 13 cents per share), compared with net income of $952,000 (or 9 cents per share) for the quarter ended June 30, 1989. Net sales for the quarter were $31,531,000 compared with $33,909,000 for the quarter ended June 30, 1989.

Net income for the six months ended June 30, 1990 was $1,745,000 (17 cents per share) compared with net income of $321,000 (3 cents per share) for the six months ended June 30, 1989, an increase of $1,424,000. Net sales for the six months ended June 30, 1990, were $58,155,000, compared to $60,983,000 in the six months ended June 30, 1989.

Net sales for the quarter were negatively affected by a fire at its Mexicali, Mexico, manufacturing facility in December of 1989, and the elimination of its Accessories Group in 1989.

The company's continued emphasis on cost containment, efficiency and cash flow management is continuing to result in improved profitability. The company is currently taking steps to further its cost reduction and efficiency program by combining its California Wheel & Tire Group with its Exhaust & Off Road Group in Tempe, Ariz. Administrative and marketing departments and distribution facilities will be located together in Tempe. Although the favorable financial impact of the combination will not be totally realized until 1991, the company will realize immediate benefits of improved customer service and improved internal controls during the 4th quarter of 1990.

Mr. Gasket Co. manufactures, imports and distributes an extensive line of products for the automotive aftermarket. The company's products are designed to improve the performance and/or appearance of automobiles and light trucks. The products include exterior automobile accessories,

exhaust systems, custom wire, steel and aluminum wheels, transmission shifters and other performance products.

CHARDON, Ohio (JULY 30) BUSINESS WIRE - Essef Corp. Monday reported financial results for the third quarter ended June 30, 1990.

Third quarter sales of $33,805,000 decreased 19 percent from the $41,777,000 reported in the third quarter of 1989. A net loss of $1,787,000 or (37 cents) per share compares with a net income of $1,645,000 or 34 cents per share for last year's third quarter.

For the nine months ended June 30, 1990, net sales of $112,488,000 increased 15 percent from the prior year nine month sales of $98,175,000. A net loss of $2,120,000 or (44 cents) per share for the current nine

months compares to a net income of $472,000 or 10 cents per share last year.

Third quarter sales in the water treatment and systems equipment segment increased 13 percent to $11.2 million compared to the 1989 third quarter. This increase resulted principally from continuing increases in the International Group and in the company's hazardous waste product businesses, ENPAC Corp. and Contaminant Recovery Systems.

Additionally, the corporation's domestic water systems business is exceeding forecast and prior year results. The swimming pool and spa equipment segment recorded a 2 percent increase in sales to $13.9 compared to one year ago. While the domestic sales in this segment were off slightly during the quarter, the International Group sales increased sufficiently to show an overall increase compared to last year. The business machine and computer segment showed a 52 percent decrease in sales to $8.7 million in this year's third quarter compared to sales recorded one year ago. The decrease was caused by a substantial reduction in volume from FAME Plastics Inc.'s largest customer.

For the nine months ended June 30, net sales in the water treatment and systems equipment segment and in the business machine and computer segments increased 14 percent and 27 percent respectively from the prior year, while sales remained unchanged in the swimming pool and spa equipment segment.

In the third quarter, income from operations for the water treatment and systems equipment segment decreased by $200,000 or 27 percent from the prior year's quarter. Weakness in the water treatment portion of the segment was a significant contributor to this decrease. Other portions of the segment showed increases compared to the prior year's quarter.

The swimming pool and spa equipment segment reported a 22 percent increase in income from operations for the quarter to $2.4 million. Despite continued domestic weakness in certain sections of this market, aggressive cost and inventory controls and growth in the International Group contributed to the increase over the prior year's quarter.

The impact of a significant reduction in sales volume during the third quarter contributed to a loss from operations of $3 million in the business machine and computer segment compared to a $1.8 million income from operations last year.

MOUNT OLIVE, NJ (JULY 30) BUSINESS WIRE - Zycad Federal Services Group (FSG) has been awarded a 12-month, $2.3 million contract modification by the Department of Defense Joint Integrated Avionics Working Group (JIAWG) to evaluate two computer software operating systems.

The Input/Output Built-in-test Interface Description Specification (IOBIDS) Demonstration Project is a modification to the 18-month JIAWG/AACU Interoperability Demonstration (JAID) Program, a Zycad FSG prime contract originally awarded at a value of $3.4 million on Feb. 20.

The projects are in support of the JIAWG charter to establish commonality and exchangeability among avionics modules and associated software.

Both the Air Force and the Navy have vested interests in the results of the IOBIDS Demonstration Project. The results of these demonstrations may directly influence decisions that will impact the degree of commonality for 16-bit computing between the Air Force's ATF and the Navy's A-12 aircraft.

Zycad Federal Services Group, headquartered in Mount Olive, was formed in November 1988 to provide risk reduction engineering services -- specifically: simulation, verification and test support -- for the design of complex military electronic systems.

The staff of about 40 professionals, including specialists in systems engineering, test and analysis, computer science and software development, is organized to help agencies and contractors meet stringent federal quality and cost-effectiveness standards for integrating electronic subsystems designed by multiple vendors.

Zycad Corp. designs, manufactures and markets high-performance logic simulation, design verification and test-generation tools for the computer-aided engineering (CAE) industry.

Zycad's simulation products consist of very high speed, special-purpose supercomputers, integrated simulation software and simulators based on the VHDL (IEEE 1076) hardware description language. Zycad products are used to substantially increase engineering productivity in the design, development and test of sophisticated electronic systems and integrated circuits.

HOUSTON (JULY 30) BUSINESS WIRE - Texas Eastern Products Pipeline Co. (TEPPCO) Monday elected Leander W. Jennings as a member of the board of directors.

Jennings, 61, is president of Jennings & Associates, a Chicago-based consulting firm specializing in strategic and tactical management for privately held or closely held operating companies. He is also a director on the corporate boards of Alberto Culver Corp., A.O. Smith Company Inc., Manville Corp. and Prime Capital Corp.

A resident of Chicago, he is an active board member of many non-profit groups such as the Commercial Club of Chicago, the Chicago Symphony Orchestra, the Lyric Opera of Chicago, the Economic Club of Chicago and the Northwestern Memorial Hospital.

Before opening his consulting firm in 1985, Jennings was the managing partner of the Chicago office of the accounting firm of KPMG Peat Marwick. He joined the company in Dallas in 1963 as a consultant specializing in corporate organizations, executive compensation, and financing, accounting and marketing issues.

Within two years he was promoted to manager and transferred to Houston to start a consulting practice. He continued to serve in a variety of management positions with increasing responsibility until he started his own company.

He began his career in 1957 with the treasury department of Shell Chemical Corp. in 1957, became controller of Commercial Oil Transport in 1962 and was chief financial officer of A.L. Davis Food Stores in Fort Worth before joining KPMG Peat Marwick.

Jennings received his bachelor's degree in accounting from Texas Christian University in Fort Worth and a master of business administration degree in industrial management from the University of Houston.

TE Products Pipeline Co., Limited Partnership, with headquarters in Houston, was recently formed to acquire, own and operate the refined petroleum products and liquefied petroleum gases (LPGs) pipeline business of Texas Eastern Products Pipeline Co., the general partner of the partnership.

The company is one of the largest pipeline common carriers of refined petroleum products and LPGs in the United States.

OVERLAND PARK, KS (JULY 30) BUSINESS WIRE - Global Telecom is using US Sprint's fiber-optic telecommunications network to offer daily inspirational messages to the public from his holiness Pope John Paul II.

The service uses Sprint Gateways' Voice 900(tm) Service Bureau in the United States.

Global Telecom was estabished to provide Christian messaging services around the world. The worldwide facility reaches into third world and emerging eastern block countries and now, for the first time, this global message is available.

The new service provides a way for Americans to hear Pope John Paul II's daily inspirational message in his own voice. In addition, a worldwide voice messaging system called ''World Info,'' recently launched by O.T.C., the government owned Australian International Telephone Company, is being used by Global worldwide.

The Pope's inspirational message in English is available by dialing 1-900-230-POPE and in Spanish by dialing 1-900-230-PAPA.

A portion of the proceeds from the calls goes to the Catholic Church to support the mission of the Pope. There are plans to expand the service to include world coverage of special Christian events and messages.

Sprint Gateways entered the 900 (audiotext) services market early in 1989 and now carries hundreds of interactive and passive audiotext programs and services through the all-digital, fiber-optic network of US Sprint.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

LOS ANGELES (JULY 30) BUSINESS WIRE - New World Entertainment and Turner

Broadcasting System Inc., have entered into a distribution agreement whereby ''The Wonder Years,'' one of the most popular and acclaimed comedy series of recent seasons, will be distributed in the United States, Canada and Puerto Rico by Turner Program Services (TPS).

The companies are working together in finalizing a comprehensive marketing and sales strategy that will be announced at a future date.

The agreement marks a first for both companies. It is the first time New World has chosen another company to market its programming, and it is the first off-network series acquired for distribution by TPS.

'''The Wonder Years' is a perfect program for TPS,'' said Jack Petrik, TBS vice president, syndication and TPS board chairman. ''The series offers an ideal combination of high-quality comedy and timeless family values to appeal to programmers and advertisers.''

''We're especially pleased to have been able to conclude this agreement with the Turner organization,'' states Jon Feltheimer, president and chief executive officer, New World Entertainment. ''We feel their overall resources make them uniquely qualified to maximize the potential of this very special series.''

Feltheimer added, ''Our two companies have had continuing discussions in several areas where our respective operating strengths can be complemented to mutual benefit. This pact is a significant first step in the development of other ventures between us.''

''The Wonder Years'' debuted on ABC in March 1988 and became an overnight sensation. The comic look at growing up in suburban America in the late 60s placed among Nielsen's ten highest-rated series of the season and captured the Emmy for Outstanding Comedy Series of 1987-88. Since then, it has ranked consistently among the ten top-rated shows of the week and has received a Directors Guild Award, the Golden Globe for Best Television Series, a Writers Guild Award to creators Carol Black and Neal Marlens and a Gold Seal from the Parents Choice Awards. In addition, it was named Best Television Series of 1989 by television critics polled in Electronic Media.

Fred Savage stars as Kevin Arnold, a 12-year-old facing the trials of growing up during the years of Beatles music, Vietnam protests and the excitement of the space program. Film actor Daniel Stern provides the affectionate, comic narration as the voice of the adult Kevin. Also starring are Jason Hervey as Kevin's older brother, Olivia d'Abo as his sister, Alley Mills and Dan Lauria as his parents, Josh Savlano as his friend and classmate at Robert F. Kennedy Junior High School and Danica McKellar as the girl of his dreams. The series is executive produced by Bob Brush and produced by Ken Topolsky.

SAN FRANCISCO (JULY 30) BUSINESS WIRE - Pacific Gas Transmission Co. (PGT) Friday received approval from the Federal Energy Regulatory Commission (FERC) to implement Order 500 open access blanket transportation service.

''We're glad to be able to join others in the pipeline industry who have Order 500 blanket certificates,'' said Stephen P. Reynolds, PGT president and chief executive officer. ''This authority brings PGT one step closer to having a capacity brokering program.''

On May 7, PGT applied to the FERC for approval of a capacity brokering program which relies on Order 500 blanket authority.

Last August, PGT began open access transportation under FERC Section 311. Under the approved blanket certificate, existing interruptible shippers can remain under Section 311 or switch to Order 500 service. The choice will not affect each shipper's position on the PGT queue. Future PGT shippers can also join the interruptible queue under either Section 311 or Order 500 service.

PGT owns and operates a natural gas pipeline extending from the U.S.-Canada border to the Oregon-California border. In 1989, PGT transported a total of 477 for billion cubic feet (Bcf) of gas for PG&E, Pacific Interstate Transmission Co. and Northwest Pipeline Corp., and approximately 12 Bcf in interruptible service 27 other shippers.

ALAMEDA, CA (JULY 30) BUSINESS WIRE - Ingres Corp. (NASDAQ, NMS: RELY) Monday announced net income of $517,000 or 4 cents per share, for its fourth quarter ended June 30, 1990 compared to $4.5 million or 37 cents per share for the like period last year.

The fourth quarter revenues were $49.3 million up $2.1 million from $47.2 million in the fourth quarter of fiscal 1989.

The company, which had a loss through the first nine months, was able to post a slight profit and recorded net income for the full year of $76,000 or 1 cent per share compared to $6.2 million or 50 cents per share in fiscal 1989. Fiscal 1990 revenues rose to $157 million up 20 percent from $130 million in the prior year.

AUSTIN, TX (JULY 30) BUSINESS WIRE - Gas Transmission Ltd. confirmed in London Monday that it has appointed Sir Philip Jones, chairman of Total Oil Marine plc and former chairman of the electricity council -- the central policy formulating body for the electricity supply industry in England and Wales -- as a non-executive director.

Gas Transmission Ltd. has recently filed a permit to construct the first major independent high pressure industrial natural gas transmission pipeline in the U.K. The pipeline will extend from the Bacton Terminal on the Norfolk coast to the heavy industrialized area of the Thames Estuary, downstream of the City of London. The pipeline is designed to serve large electric power plants and industrial natural gas users.

''We are delighted to have such a distinguished individual as Sir Philip on our board of directors. His distinguished career in the service of Her Majesty's government as well as his outstanding private business experience shall be of great benefit to the future development of Gas Transmission. We welcome his advice and counsel,'' said Gale L. Galloway,

chairman of the board.

TEMPE, AZ (JULY 30) BUSINESS WIRE - MicroAge Computer Centers has announced the release of the 90-page MicroAge Computer Products Catalog, which features hardware, software, supplies and accessories from the world's leading manufacturers.

The publication presents products from such top manufacturers as IBM, Compaq, Hewlett-Packard, Epson, NEC Technologies, AST Research, AT&T and many more, in an easy-to-read format.

In fact, the MicroAge Computer Products Catalog is more than a catalog, according to William Keiper, president of MicroAge Computer Centers Inc.

''We believe end-users will see the publication as more of an information guide offering exposure to the wide variety of computer products and expertise the MicroAge network has to offer,'' said Keiper. ''In addition the publication helps reinforce MicroAge's position as the leader in value-added service and support.''

Through the catalog and MicroAge headquarters' product management activities, the MicroAge network provides access to more than 9,000 products from more than 550 manufacturers.

MicroAge markets and distributes information technology products and services through an international network of more than 700 franchised, dealer and company-owned locations.

CHICAGO (JULY 30) BUSINESS WIRE - AM International Inc. (NYSE/PSE/MSE:AM) Monday reported that as previously announced its lenders have waived certain requirements of the company's Revolving Credit Agreement while the parties continue negotiations on an amended agreement.

The waiver runs until Aug. 31, 1990. AM said the amended revolving credit agreement under negotiation would provide for a commitment of approximately $30 to $50 million.

AM International, with world headquarters in Chicago, sells and services products and supplies to the worldwide graphics industry. The company conducts its business through three divisions, 17 subsidiaries and a dealer organization located in over 100 counties. AM International's annual's revenues are about $900 million.

AM International's common and preferred shares are traded on the New York, Pacific and Midwest stock exchanges under the ticker symbol ''AM.'' The company's warrants are traded on the American Stock Exchange under the ticker symbol (AML.WS).

NEWPORT BEACH, CA (JULY 31) BUSINESS WIRE - John C. Warner, chief executive officer of Quiksilver Inc. (NASDAQ:QUIK), Monday announced that the company had named Mel Matsui as general manager of its ''QSD'' division (Quiksilver Salt Water Denim).

Matsui, 47, was the founder, president and chief executive officer of Code Bleu International which was acquired by The Cherokee Group in 1988. Since November 1989, he has served as managing director of LA Gear's denim division.

Warner stated that Matsui is recognized as one of the most successful and creative individuals in the denim business and brings much experience and talent to Quiksilver as it actively pursues the denim business.

Quiksilver designs, arranges for the manufacture of, and distributes beachwear, skiwear, casual clothing and jeans for the young men and boys under the Quiksilver label. The company's products are made primarily in the United States and sold in approximately 2,000 surf shop, specialty store and selected department store locations.

SAN FRANCISCO (JULY 31) BUSINESS WIRE - Newsbytes News Network, the most widely read newswire on technology and computers, will also be available on fax, as of Aug. 1.

The new distribution method, which coincides with the sudden growth of fax machines around the world, is designed to make technology news available automatically to office desks, every weekday.

The system processes the entire Newsbytes feed and prepares an abstract index which is sent to the fax subscribers.

If a customer needs full text of a story, the Newsbytes office will fax the desired article to the reader for a small fee.

On an average day, at least 30 articles are available on technology subjects. These include financial reports, market reports, new products and computers, and telecommunications stories.

Newsbytes' team of reporters in 11 offices around the world ensure that the stories offered are the most up-to-date available.

Newsbytes-by-Fax is available in both the United States and Europe for $995 per year. Each additional story requested by a customer costs an additional $5.

Newsbytes News Network is a newswire concentrating on computers and technology. It has won the ''Best Online Publication'' award from the Computer Press Association and is read by more than 5 million people worldwide.

#90211b0290 07/30/1990 ~Business Wire

WASHINGTON (JULY 31) BUSINESS WIRE - Cetus officials said they were disappointed that the FDA Biological Response Modifiers Advisory Committee failed to recommend Proleukin interleukin-2 for approval at the drug's first hearing.

Proleukin is the subject of a Product License Application (PLA) before the FDA for the treatment of metastatic renal cell carcinoma (kidney cancer).

Metastatic renal cell carcinoma is a rapidly fatal disease for which there is no approved therapy. Nearly 10,000 Americans are diagnosed with the metastatic form of kidney cancer annually. Median survival for these patients is less than twelve months and the spontaneous remission rate is less than one percent.

Proleukin is the first therapy to produce significant and lasting responses in human clinical testing, providing benefit to approximately twenty percent of kidney cancer patients. As with many anticancer agents, Proleukin administration is accompanied by numerous side effects, but experienced clinical investigators have demonstrated that the drug's side effects are generally predictable and manageable, only occuring during the

short time the drug is administered and reversing themselves after therapy is concluded.

Kidney cancer was one of the first diseases in which Proleukin was found to produce promising results after the drug was taken into human clinical testing in 1984. Proleukin was awarded Orphan Drug status for this cancer in 1987. Cetus filed the PLA for metastatic renal cell carcinoma with the FDA in November 1988.

Proleukin is currently approved for treatment of kidney cancer in nine European countries. Human clinical trials are ongoing in Europe and the United States, exploring the potential use of Proleukin in the treatment of a wide range of cancers, infectious diseases, immune deficiencies and as a vaccine adjuvant.

The Biological Response Modifiers Advisory Committee is a new committee consisting of nine members experienced in the field of immunology.

Cetus Corp. (NASDAQ:CTUS) is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases. The company also is developing commercial applications of its GeneAmp polymerase chain reaction (PCR) technology.

LOS ANGELES (JULY 31) BUSINESS WIRE - UnionFed Financial Corp. (NYSE:UFF), parent of Union Federal Savings Bank (the ''bank''), Monday reported that it established provisions for loan losses of $9.4 million in its fourth fiscal quarter of 1990.

As a result, the company reported a net loss in the fourth quarter of $1.72 million, or 23 cents per share fully diluted, compared with earnings of $5.6 million, or 81 cents per share fully diluted, in the comparable quarter of the prior year.

Earnings for the fiscal year ended June 30, 1990, decreased to $11.1 million, or $1.53 per share, from $18.1 million and $2.66 per share in the prior year. Book value per share fully diluted was $22.27 at June 30, 1990, compared with $20.81 a year earlier, an increase of 7 percent.

Net interest margin, one of the key components of the company's core earnings, increased significantly in the fiscal year. Net interest margin before provision for loan losses was $55.3 million for the year ending June 30, 1990, compared with $46.2 million for the previous year, an increase of 19.8 percent. The end-of-period spread increased to 2.52 percent at June 30, 1990, compared with 2.02 percent at June 30, 1989.

For the entire fiscal year, the loan loss provision was $16.2 million in 1990 compared with $3.9 million in 1989. At June 30, 1990, the allowance for loan losses totalled $13.3 million. This represented .65 percent of loans and mortgage-backed securities outstanding.

Non-performing assets net of loss reserves were $34.4 million, or 1.38 percent of assets at June 30, 1990, compared with $33.6 million, or 1.40 percent of assets at March 31, 1990. Non-performing assets, defined as non-accrual loans ($18.5 million) and real estate owned ($29.8 million, including $20.2 million of in-substance foreclosures), were $48.4 million, or 1.93 percent of asssets at June 30, 1990, compared with $41.3 million, or 1.71 percent of assets at March 31, 1990.

At June 30, 1990, the allowance for loan and real estate owned losses equaled 28.8 percent of non-performing assets, compared with 18.1 percent at March 31, 1990. The allowance equaled 19.5 percent of the sum of non-accrual loans and troubled debt restructurings, compared with 17.8 percent of March 31, 1990.

SCOTTS VALLEY, CA (JULY 30) BUSINESS WIRE - Borland International's (NASDAQ:BORL) Paradox is the top choice among corporations currently considering the purchase of PC database software, according to the latest PC/Market Opinion Survey by Techtel Corp.

This marks the first time a competing database product has moved ahead of Ashton-Tate's dBASE in the ''currently considering purchase'' category in the five years Techtel has been tracking market demand.

''Achieving the top rating in the category of 'currently considering purchase' clearly indicates that interest in Paradox has now surpassed that of dBASE IV,'' said Michael F. Kelly, president of Techtel Corp.

''dBASE IV has had acceptance difficulties because of problems with the software, but even if dBASE IV were suddenly made perfect, it would take a minimum of 12 to 18 months to restore a competitive opinion,'' Kelly said.

''PC users worldwide are selecting Paradox for its power and reliability '' said Rob Dickerson, vice president and general manager of Borland's database products business unit.

''We plan to extend the reach of Paradox in corporations when we ship a structured query language product later this year that will allow users to tap into enterprise-wide data stored on minicomputers, mainframes and database servers.''

Techtel's PC/Market Opinion Surveys are based on responses from a national panel of more than 900 people, in business and government, who are influential in deciding which PC software and hardware products their organizations will purchase. PC/Market Opinion is an independent survey conducted by Techtel Corp. No manufacturer or publisher sponsors the survey, although many subscribe to the published findings.

The most recent survey was conducted and analyzed in April 1990.

Techtel Corp., located in the San Francisco Bay Area, is a national full-service market research firm founded in 1983. The company has produced the PC/Market Opinion series of quarterly surveys since 1984, covering an average of 110 PC/Mac products each quarter.

Borland International Inc. is a leading developer of high-performance software products. Borland offers some of the world's most widely used

business applications and software development tools, such as Paradox, Quattro Pro, Sidekick, Turbo Pascal, Turbo C, Turbo C++ and Turbo Debugger & Tools.

#90211b0612 07/30/1990 ~Business Wire

SAN JOSE, CA (JULY 30) BUSINESS WIRE - Novell Inc., (NASDAQ:NOVL) Monday announced a new LANalyzer network analyzer that enables network managers and service organizations to resolve real-life network problems significantly faster and more accurately than any other product of its kind.

Key to LANalyzer's capability is its unique Application Test Suite (ATS), which allows both experienced and novice users to take advantage of LANalyzer's analysis and diagnostic capabilities. The test suite is a predefined testing routine, similar to a spreadsheet model.

The most a network manager has to do is input the criteria; the test is already there. For example, to verify connectivity to NetWare servers, the network manager simply selects ''svrview.'' LANalyzer automatically completes the test.

In addition to the preprogrammed tests, the new LANalyzer allows experienced network managers to develop customized tests embodying their knowledge. These tests, which can then be used by relatively inexperienced personnel, can speed up later analysis.

On-Line Troubleshooting Guide

A second unique feature of the new LANalyzer, its menu-driven troubleshooting guide, directs users step by step through the testing process by suggesting probable causes for network disruptions and recommending the next testing procedures to confirm diagnosis.

A third unique feature of the new LANalyzer is its multi-channel monitoring. A channel is a set of conditions for categorizing network traffic in real time. Multi-channel monitoring, which offers a real-time graphic display of network activity, gives users a previously unavailable view of the complete network.

LANalyzer can simultaneously gather information on up to nine separate channels, monitoring overall network activity and proactively alerting network managers to impending problems. No other network analyzer offers so many monitoring channels.

These channels come configured for specific types of data, such as good packets, bad packets or Ethernet packets. If desired, the user can customize eight of the channels.

Each channel can filter up to 16 distinct criteria. Users can set these filters to capture specific information, separating pertinent data from the large volume of unrelated network traffic. For example, network managers might set filters to analyze traffic through a gateway. This data is displayed in real time and can be captured for later analysis and report generation. Novell's LANalyzer Network Management Strategy

Additional Key Features of LANalyzer include:

--User-definable triggers -- LANalyzer can be programmed to start and stop capturing data based on the needs of network managers. Criteria can include time of day and levels of network traffic.

--Multiple, user-definable alarms -- Another impact of the multiple channels is the product's multiple alarm capability. LANalyzer offers more alarms than the competition. Alarms can be linked to a given situation, for example, a threshold of acceptable activity.

When the threshold is exceeded, LANalyzer alerts monitoring personnel. Alarms can also help maintain network security. For example, when an intruder is detected on the network, the product alerts the manager in time to take preventive action.

--Full protocol decodes -- To address the needs of software developers, LANalyzer captures and displays all protocol layers of the OSI seven-layer model for NetWare, Novell NetBIOS, TCP/IP, SNMP, AppleTalk Phase I and II, DECnet and XNS protocols.

--Specialized hardware -- As in previous LANalyzer releases, the new version incorporates especially designed circuitry that offers significant advantages over the non-dedicated hardware used by most of the competition. These advantages include the capability to simultaneously transmit and receive packets. This allows a system manager to simulate traffic and monitor its impact at the same time.

Specialized hardware also enables users to get a global view of the network, permitting them to observe a number of network characteristics (such as collisions, bad packets and token rotation time) that are invisible to products using off-the-shelf controller cards. Pricing,

Availability and Upgrade Information

The new LANalyzer is available now for any combination of Ethernet, Starlan or token ring environments. The kit form has a list price of US $9,980. The price of the complete system, installed in any of several portable 80386-based computers, varies by platform.

A free upgrade kit may be obtained through Novell's LANalyzer Assurance Program or under the standard one-year LANalyzer product warranty. For the name of an authorized LANalyzer VAR in their area, interested parties should call 800/243-8526.

Novell's LANalyzer Products Division provides monitoring, diagnostic and analysis solutions for computer network managers, service organizations and software developers. Its products include the LANtern network monitor and the LANalyzer network analyzer.

Novell Inc., develops NetWare systems software products that manage and control the sharing of data across a variety of network computing environments, including computer workgroups, departmental networks and business-wide information systems.

PHOENIX (JULY 30) BUSINESS WIRE - Homeplex Mortgage Investments Corp. (NYSE:HPX) Monday announced that it had net earnings of $2,609,000 or 27 cents per share for the quarter ended June 30, 1990 as compared to net earnings of $1,070,000 or 12 cents per share for the comparable quarter in 1989.

This also compares to net earnings of $2,290,000 or 24 cents per share for the quarter ended March 31, 1990. The company's net income for the six months ended June 30, 1990 was $4,899,000 or 51 cents per share as compared to $3,175,000 or 36 cents per share for the comparable six months in 1989.

Alan D. Hamberlin, president of the company, attributed the increase in earnings to lower short-term interest rates and lower hedging costs in the first quarter and six months of 1990 as compared to the comparable periods in 1989.

#90211b0616 07/30/1990 ~Business Wire

SUNNYVALE, CA (JULY 30) BUSINESS WIRE - Philips Components-Signetics Monday announced the introduction of its first FLASH memory.

The one-megabit 48F010 is presently being sampled and will be in full production in the third quarter.

Signetics' 48F010 is the first product from a technology partnership with SEEQ technology. In November 1989, SEEQ and Signetics signed a multiyear, development and production agreement. As part of the agreement Signetics implemented FLASH technology on its 6-inch memory wafer fabrication line in Albuquerque, N.M.

The process transfer to the Signetics plant began in January 1990, and was completed in March. The first products were fully functional.

The Signetics 48F010 is a 1 megabit, byte wide, FLASH memory. It features sector and chip erase as well as overerase protection. Unlike other FLASH memories, Signetics 1-megabit devices can either be bulk erased or selectively erased in 128 increments (sectors of 1024 bytes).

The sector erase function permits users to erase just those portions which need to be reprogrammed and retain those portions which do not. In many cases, by keeping a section of code intact the device can still support startup functions and maintain system operation.

FLASH can be used in many systems that already contain many other Philips Components-Signetics products such as automotive electronics and telecommunications and personal computers.

In high-volume applications, like telephone sets, FLASH memories store important numbers and functions. And in automotive control systems, FLASH memories can store engine operating information such as fuel mixtures and other adjustments that can be easily altered when necessary.

FLASH memories are programmed like EPROMs and erased like EEPROMs. The FLASH memory cell is very similar in size and layout to an EPROM cell, and uses the same programming method. Unlike EPROMs, FLASH memories can be erased on-board and in-system without the use of UV light.

Philips Components-Signetics is a division of North American Philips Corp. a wholly owned subsidiary of N.V. Philips, the Netherlands. Philips Components-Signetics currently has more than 7,000 employees. Philips' integrated circuit operation worldwide is the 11th largest semiconductor manufacturer in the world.

#90211b0617 07/30/1990 ~Business Wire

SUNNYVALE, CA (JULY 30) BUSINESS WIRE - IKOS Systems Inc. Monday announced revenues and earnings for its third quarter which ended June 30.

These results were included in the company's final prospectus for its initial public offering on July 25, 1990 but are not otherwise publicly available.

Revenues for the quarter were $4,835,000 compared to $1,756,000 reported for the third quarter of 1989. Net income before provision for income taxes and net income for the quarter were $675,000 (8 cents per share) and $649,000 (7 cents per share) respectively, as compared to a net los of $942,000 (11 cents per share) in the third quarter of 1989.

Revenue for the first nine months of 1990 were $12,002,000, compared to $4,885,000 for the first nine months of 1989. Net income before provision for income taxes and net income for the first nine months of 1990 were $1,582,000 (18 cents per share) and $1,543,000 (17 cents per share) respectively, compared to a net loss of $2,222,000 (28 cents per share) for the first nine month period of 1989.

IKOS develops, markets and supports high-performance hardware-assisted

systems for the simulation of application-specific integrated circuits (ASICs) and ASIC-based electronic systems. The company's systems can be integrated with a variety of electronic design automation tools and workstations to design ASICs produced by all major manufacturers.

#90211b0619 07/30/1990 ~Business Wire

HOUSTON (JULY 30) BUSINESS WIRE - Landmark Graphics Corp. Monday announced revenues and earnings for the year ended June 30.

Revenues for the year were $56.7 million, a 37 percent increase over the $41.4 million reported for the prior year. Net income for the year was $5.8 million compared to $5.1 million reported last year. This resulted in earnings per share of 68 cents for the current year, as compared with 70 cents per share for fiscal 1989, which included 4 cents per share related to an extraordinary credit.

(The extraordinary credit resulted from tax benefits attributable to an operating loss carry-forward from prior years of $314,000.) Revenues grew at a higher rate than net income as a result of costs associated with restructuring to a more decentralized business approach and the transition to standard, off-the-shelf computers for the company's seismic interpretation workstations.

Revenues for the quarter ended June 30 rose to $18.4 million, compared to revenues of $10 million during the like quarter last year. Net income increased to $1.8 million from $1.1 million for the prior year quarter, while earnings per share increased to 21 cents from 14 cents.

Landmark President and Chief Executive Officer C.E. Ennis attributed the company's 1990 revenue growth to implementation of several strategic programs which gained immediate market acceptance. These programs include: the transition to Sun Microsystem's SPARCstation, introduction of new 3D technology, decentralization of sales and support operations and corporate acquisitions.

Landmark is the leading supplier of computer-aided exploration (CAEX) technology with more than 550 systems installed in over 27 countries. The company's user base encompasses 18 of the 20 largest multi-national oil companies, national oil companies, large independents and young exploration and production companies.

#90211b0622 07/30/1990 ~Business Wire

IRVINE, CA (JULY 30) BUSINESS WIRE - National Health Care Systems Inc. (NASDAQ:NHCS) Monday announced that on July 25, 1990, the California Department of Corporations served an order dated July 20, 1990, on Denticare of California Inc., the company's dental-plan subsidiary, which requires the company to cease the solicitation and enrollment of new members as well as terminate all indemnity-type contracts with enrollees within forty days.

Although the order was dated July 20, 1990, the company had no knowledge of it until it was served on July 25, 1990.

The department has alleged that Denticare has been offering indemnity-type plan coverage which is not currently authorized under the license granted Denticare as a specialized health-care-service plan. Denticare presently has some 240,000 members, approximately 95 percent of whom are enrolled under various prepaid plans.

Approximately 9,000 of its members are enrolled within the Alliance 1000 and Dual Choice option plans which provide indemnity- type coverage. Premiums from these plans contribute less than 4 percent of the company's revenues.

Denticare believes that it has always conducted its business in a manner

consistent with the rules and regulations governing its license and that its Alliance 1000 and Dual Option plans are financially sound and prudently managed.

The company and its counsel are presently reviewing the scope and validity of the order issued by the department and at this time believe that such order is not justified and is overbroad therefore may not be enforceable.

However, for the benefit of the company's enrollees and to avoid the expense and uncertainty of litigation, Denticare on July 26, 1990, commenced negotiations with the Department of Corporations to resolve this matter expeditiously.

Additional developments will be announced by the company.

NEW YORK/SANTA CLARA, CALIF. (JULY 30) BUSINESS WIRE - Nazem and Co. Monday announced completion of the acquisition of Metrologix, a Santa Clara, Calif., based developer of critical dimension (CD) metrology tools providing greater precision in the manufacture of semiconductor chips with submicron geometries.

Terms of the transaction were not disclosed.

''As the trend in semiconductor manufacture drives toward putting more and more power on a single chip, and in turn toward building a new generation of equipment to make them, metrology has become a critical front-end process,'' said Emile J. Geisenheimer, general partner of Nazem and Co., a New York based venture-capital firm which earlier this year led a management buyout of plasma etch manufacturer Tegal from Motorola.

''Metrologix has the technology to meet the needs of the next decade,'' continued Geisenheimer. ''We will help them fund their product development and bring their technology to market worldwide.''

Metrologix began as part of the instruments division of Philips Electronics in 1985. Its charter was to develop automated, nondestructive, sub-half-micron metrology tools for wafer inspection, using E-beam-based technology.

Nazem and Co., based in New York and founded in 1976, is one of the oldest most successful venture-capital firms in the industry, with broad experience nurturing companies from seed financing to public offerings.

Its investments include Cirrus Logic, Apollo Computer, Xyvision and CAE Systems.

CHATSWORTH, CALIF. (JULY 30) BUSINESS WIRE - NMB Technologies Inc., Monday announced the availability of SmartFan, the latest addition to its DC cooling fan product line.

This new SmartFan provides significant noise reduction and maintains a consistent temperature level. SmartFan has an increased life, estimated at up to 50 percent, since it normally runs at a reduced speed.

''With this custom design, NMB Technologies provides its customers with leading edge cooling solutions,'' said Gary Yomantas, president of NMB Technologies. ''SmartFan and the closed-loop technology is expected to gain widespread use in office automation equipment in the 1990s.''

SmartFan is a self-contained, closed-loop temperature-regulating system which automatically controls cooling air flow to hold the temperature within an electronic equipment enclosure constant against changes in room temperature, system power dissipation, flow resistance, and/or altitude.

Significant noise reduction -- up to 15dB(A) -- results when the fan operates in normal office conditions.

Initially, SmartFan will be available in the 4.7-inch square by 1.5-inch thick fan size and can be interchanged with any existing fan of like size -- no additional wiring or remote sensors are required. In October, the 3.1-inch by 1-inch SmartFan will be available in the NMB Low Noise Series. 3.6-inch by 1-inch and 4.7-inch by 1-inch SmartFans will be available in the NMB Low Noise Series in November.

NMB Technologies is the world's leading supplier of broad-based products for the EDP market. NMB Technologies is the electronic marketing division of NMB (USA) Inc., the North American headquarters of the Minebea Group of companies. Minebea produces a wide variety of electronic components, including DRAMs, keyboards, step motors, sensors, axial fans and audio speakers.

RICHMOND, CA (JULY 30) BUSINESS WIRE - Reporting Monday on first half results, Tinsley Laboratories said sales were $4,137,617, compared to six month sales in 1989 of $4,843,704, a reduction of 15 percent from the prior year.

Net income of $325,110, or 36 cents a share, was down 12 percent from earnings for the first half a year ago of $369,999, or 42 cents a share. Second quarter sales of $2,133,199 compare to sales for the June quarter last year of $2,527,092. Second quarter net earnings came to $179,525, or 20 cents a share, against earnings for the 1989 period of $208,713 or 24 cents a share.

The company attributed lower operating results for the first half to reduced shipments under two major contracts that had reached peak levels in the fourth quarter of 1989.

Backlog of $8,587,000 at the end of the first half was down from the company's $9 million backlog at the start of the year.

Per share earnings reflect the 3-for-2 split of the company's common stock approved by Tinsley's directors in April 1990.

CALGARY, ALBERTA (JULY 30) BUSINESS WIRE - ORS Corp. (NASDAQ:ORSC) Monday announced that it has obtained a working capital line of credit for $1 million.

The line of credit was obtained through a loan by E.R. Albert Jr., who has been serving on the board of directors. The note calls for interest to accrue at Chase Manhattan prime rate plus 1 percent and is due 18 months from now.

Management of the company is hopeful that working capital afforded by this loan will enable it to continue operations to the point where positive cash flow can be obtained.

Now that immediate needs for working capital have been satisfied, ORS intends to devote its full attentions to the marketing and installing of its electromagnetic enhanced oil recovery technology through the majority owned joint venture company, EOR International Inc., concentrating its future marketing efforts in Canada and the United States.

Robert Case, upon making the funding announcement, expressed the company's gratitude to Mr. Albert for his efforts in serving on the board of directors and for his financial support of the company on behalf of all shareholders.

Now that working capital funding is in place, Mr. Albert has resigned as a director in order that he may place primary attentions on his other business interests.

LAS VEGAS (JULY 30) BUSINESS WIRE - Western Acceptance Corp. (WACO) announced that it has retained the New York investment banking firm of Oppenheimer & Co. to be its investment banker and financial advisor.

Oppenheimer has been retained to help WACO increase the resources it has available for insurance premium financing, either through debt or equity offerings of WACO's securities, or by the issuance of asset backed securities using WACO's high yield - low risk insurance premium finance receivables as collateral.

Robert J. Jirovec, president and chief executive officer said, ''We are fortunate to have a firm of Oppenheimer's caliber helping us build our company. Thanks to suggestions they have already proposed, we are intensely increasing our efforts to locate, acquire and fund additional insurance premium finance loans.''

Additionally, WACO announced that commencing on July 30, its common stock will be traded on the NASDAQ system under the symbol ''WACOD''. The shares will trade on a post-reverse split basis as a result of WACO's

shareholders overwhelmingly approving a reverse split of its shares on the basis of 100 for 1.

Western Acceptance Corp. makes loans to individuals and businesses for them to acquire their property and casualty insurance. The company is headquartered in Las Vegas and operates in Maryland, Missouri, Nevada and Texas.

WACO recently announced the completion of acquisitions in Texas and Missouri.

CUPERTINO, CALIF. (JULY 30) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Monday announced that Cellular Technical Services Co. of Seattle has become a Tandem Alliance member.

The Tandem Alliance is a program that encourages development of application software to run on Tandem computer systems.

Cellular Technical Services develops real-time billing systems for providers of cellular phone service. With real-time billing, cellular service carriers can immediately see charges incurred by customers. Traditionally, carriers wait 30 days or longer to receive this information from a billing service.

''Through this strategic relationship, cellular telephone carriers gain the combined advantages of real-time billing and fault-tolerant computers to bring new and more attractive options to their customers,'' said Greg Amadon, Cellular Technical Services president.

Cellular Technical Services is a joint venture of Nationwide Cellular Services and NYNEX Mobile Communications Co. Its headquarters are located at 2401 Fourth Ave., Suite 808, Seattle, Wash., 98121. The telephone number is 206/443-6400.

Tandem Computers manufactures and markets computer systems and networks for online transaction processing, large database applications and for the UNIX system marketplace. Tandem's world headquarters are located at 19333 Vallco Parkway, Cupertino, Calif. 95014. Telephone number is 408/725-6000.

ALEXANDRIA, VA (JULY 30) BUSINESS WIRE - Kay Jewelers, Inc. (NYSE:KJI) Monday reported results for the second quarter and six months ended June 30, 1990.

Net revenues for the second quarter were $86,698,000, compared to $91,183,000 reported for the same period of 1989. The net loss for the quarter increased to $4,387,000 or $0.35 per share, compared to a net loss of $975,000 or $0.08 per share for the second quarter of 1989.

For the six months, net revenues were $163,207,000, compared to $170,566,000 reported for the first half of 1989. The net loss for the first six months of 1990 was $9,981,000 or $0.80 per share, compared to a net loss of $4,810,000 or $0.39 per share in the same period of 1989.

Same store sales decreased by 5 percent in the second quarter, with a 6 percent decrease for the six month period as compared to their respective periods in 1989.

Due to the nature of jewelry retailing, Kay Jewelers typically reports a seasonal loss in the first three quarters of the year. The 1990 results were further impacted by difficult industry conditions combined with more stringent credit policies implemented in February 1989.

The policies have improved credit quality, but have continued to adversely affect second quarter credit sales. In addition, higher interest costs resulting from last year's debt offering are reflected in the loss for the period. At the same time, 53 new stores opened in 1989 are not expected to contribute to profits until the fourth quarter of 1990.

Given the uncertain economic and industry climate, the company is continuing its strategy of containing costs and reducing capital expenditures, while increasing marketing efforts.

On July 3, 1990 Ratners Group plc and the company announced an agreement under which Ratners would acquire Kay Jewelers. The agreement, which is subject to certain conditions including approval by Kay Jewelers shareholders, has been approved by the Board of Directors of both companies.

Kay Jewelers, Inc. is the second largest specialty fine jewelry retailer in the United States with 494 stores and leased departments in 32 states.

The Company's sales units include Kay Jewelers Stores, J.B. Robinson Jewelers, Marcus & Co. and Black Starr & Frost, Ltd.

CHARLOTTE, N.C. (JULY 30) BUSINESS WIRE - CEM Corp. (NASDAQ/NMS:CEMX) Monday announced record net sales and earnings for its fiscal year ended June 30, 1990.

For the year, net sales rose 18 percent to $18,638,000 vs. $15,761,000 in the prior year. Net income for fiscal 1990 totaled $2,592,000, compared with $2,457,000; and earnings amounted to 55 cents per share vs. 53 cents per share.

Net sales for the fourth quarter were $5,075,000, up 18 percent from $4,304,000 in the year-earlier period. Net income for the quarter totaled $649,000, or 14 cents per share, compared with $663,000, or 14 cents per share, a year ago.

In announcing results, Michael J. Collins, president and chief executive officer, said that CEM's continued progress for fiscal 1990 was highlighted by a broadened worldwide use of the company's microwave-based instruments.

He remarked: ''Export sales contributed over 30 percent of our total revenues for fiscal 1990. We expect this contribution from overseas shipments to continue accelerating, supported by an increasing base of business in the United States.

''Costs associated with establishing our own marketing and service offices in England and Germany left earnings in the fourth quarter essentially unchanged from the prior year. We believe, however, that this investment will yield a rapid and attractive return by enabling us to know and service these significant markets more effectively.''

CEM produces microwave-based instrumentation for testing and analysis. The Company's products are used in many manufacturing and processing industries, including chemical and food processing, and the general analytical laboratory market.

BURLINGTON, MA (JULY 30) BUSINESS WIRE - Semicon Inc. announced that the National Association of Securities Dealers (NASD) delisted the common stock of Semicon on July 27, 1990 from the Additional NASDAQ Quotes List.

Semicon no longer meets NASD capital and surplus requirements.

Prices for Semicon common stock will be quoted on NASD's new electronic OTC Bulletin Board and on the National Quotation Bureau's ''pink sheets.''

Harold W. Mahar Jr., Semicon president, said, ''Investors will no longer be able to check bid and asked prices in the newspaper. Instead, they will have to call their brokers for quotations.'' Mahar added, ''Because of NASD's proposed revised listing standards, we do not expect Semicon common stock to be qualified for NASDAQ listing in the near future.''

Semicon Inc. through its operating subsidiary, Semicon Components Inc., supplies rectifiers, zener diodes, transient voltage suppressors and custom assemblies to the military-aerospace, computer and telecommunications markets.

PHOENIX (JULY 30) BUSINESS WIRE - The Circle K Corp., which on May 15

filed for protection under Chapter 11 of the Federal Bankruptcy Code, Monday reported net losses of $772.9 million or $17.91 per share fully diluted for the 12 months ended April 30, 1990, compared with net earnings of $15.4 million or 20 cents per share fully diluted for the preceding fiscal year.

These results include a fourth quarter reorganization and restructuring charge of $639.3 million.

Circle K took this charge as a result of its financial condition, reorganization efforts and Chapter 11 filings. The stockholders equity of the company at April 30, 1990 is a negative $451.6 million.

Circle K and its affiliated subsidiaries in the bankruptcy proceedings expect to file a list of all liabilities and assets on or about August 28, 1990.

At this time, the company cannot predict the scheduling or ultimate outcome of the bankruptcy proceedings nor the effect upon the value of any of its outstanding securities. The company expects to file a bankruptcy reorganization plan as soon as practicable.

At April 30, 1990, Circle K operated 4,631 convenience stores in 32 states and had approximately 1,298 stores under license or joint venture agreements in 14 foreign countries.

EMERYVILLE, CALIF. (JULY 30) BUSINESS WIRE - Cetus Corp. (NASDAQ:CTUS) has learned that a shareholder class action lawsuit has been filed against the company and several of its officers and directors.

The suit was filed by Steven G. Cooperman, who claims to be a Cetus shareholder and to represent other shareholders. Cooperman alleges securities law violations and misrepresentations concerning the company's business.

The complaint, which was filed in federal court in San Francisco and which has not yet been served on the company, seeks unspecified damages.

Cetus officials said that its attorneys are reviewing the complaint. The company believes that the suit is without merit and intends to oppose it vigorously.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases.

The company is also developing commercial applications of its GeneAmp polymerase chain reaction (PCR) technology. Founded in 1971, Cetus is based in Emeryville and also operates EuroCetus in Amsterdam, Netherlands.

FREMONT, CA (JULY 30) BUSINESS WIRE - MYLEX CORPORATION (NASDAQ:MYLX) Monday announced record sales and net income for its second quarter ended June 30, 1990.

Net sales increased to nearly $12.6 million which represents an increase of almost 50% from $8,418,700 in the second quarter of 1989 and a 24% increase from the first quarter of 1990.

Net income increased 392% to $1,038,800 in the second quarter of 1990 compared to $211,100 for the second quarter ended June 30, 1989 and approximately 100% from the first quarter of 1990. Primary earnings per share for the second quarter of 1990 were $.09 compared to $.02 for the second quarter of 1989.

For the six months ended June 30, 1990, sales reached a record $22,688,800 an increase of 10% from $20,589,000 reported for comparable six month

period in 1989. Future sales increases will continue to be dependent upon the availability of critical components supplied by Intel Corp. Net income for the first six months of 1990 was $1,560,900 or $.14 per share compared to $1,071,700, or $.10 per share in the first half of the prior year.

Dr. Akram Chowdry, President, commented that, ''The achievement of record sales and net income represents the results of the extensive research and development program undertaken by Mylex in 1989. The proportion of sales of our new 486 EISA system boards and peripherals increased from an almost imperceptible proportion of sales in fiscal 1989 to 32.3% of sales in the second quarter of 1990. This increase in sales for our newer products has improved our margins.''

Dr. Chowdry also added, ''We are optimistic about the second half of 1990 and the demand for our new products, especially peripherals which have been favorably evaluated by several new OEM customers.''

Mylex Corporation is engaged in the design, development, manufacture, and marketing of high-end technology electronic products, including a 386 and EISA 486 microprocessor board product line of system boards and peripheral controller devices as well as graphics boards. These products are used to enhance the performance of personal computers, microsystems, and workstations. Mylex products are recognized in the marketplace for both their high performance and high quality standards.

NEW YORK (JULY 30) BUSINESS WIRE - The Siemens companies in the United States reported an increase in sales and new orders for the first nine months (10/1/89-6/30/90) of the fiscal year ending Sept. 30.

Sales climbed 18 percent to $2.95 billion from $2.5 billion at this time last year. For the same nine month period, new orders rose 15 percent to $3.15 billion from $2.74 billion. Siemens expects sustained growth for the last quarter and anticipates about $4 billion in sales and orders for the 1990 fiscal year.

Continuous increases by individual companies, the intitial consolidation of the private networks company ROLM Systems, Inc. and substantial orders for Siemens KWU Inc. were responsible for the gain.

Siemens Medical Systems Inc. and Siemens Energy & Automation Inc. remain the largest Siemens companies in the United States.

While third quarter sales increased up to $1.05 billion from $980 million during the second quarter, new orders eased slightly to $1.05 billion from $1.09 during the quarter ending 3/31/90.

Majority owned companies had 29,911 employees, up from 28,187 for the first nine months of fiscal 1989. Siemens operates some 50 manufacturing and assembly facilities in the United States.

HAVERHILL, MA (JULY 30) BUSINESS WIRE - Family Bancorp (NASDAQ: FMLY) has negotiated a Purchase and Assumption agreement with the Federal Deposit Insurance Corp. (FDIC) to acquire the deposits and selected assets of The U.S. Savings Bank of America in Seabrook, N.H.

The New Hampshire Commissioner of Banks officially closed the insolvent $12.9 million U.S. Savings Bank at 6 p.m. on Friday, July 27. The bank's sole banking office reopened Saturday, July 28 as Family Savings Bank of New Hampshire, a full-service state chartered bank. There was no interruption of banking service to the bank's depositors and deposits continue to be insured by the FDIC.

Family Bancorp has infused $1.5 million of capital into the new bank giving it a strong 12.0 percent capital-to-asset ratio. Bancorp President and Chief Executive Officer, David D. Hindle, stated that "this acquisition affords us the opportunity to better serve our existing New Hampshire customers and to expand our New Hampshire franchise."

Family Bancorp is also the parent company of Family Bank, a Massachusetts state chartered savings bank headquartered in Haverhill, Mass.

DALLAS (JULY 30) BUSINESS WIRE - National Gypsum Co. Monday announced financial results for the three and six months ending June 30.

Second quarter net revenues were $336.9 million, compared with $338.8 million for the same quarter last year. A net loss of $18.3 million was realized in the 1990 second quarter, compared with a loss of $13.8 million in 1989, which included a gain of $782,000 from open-market debt purchases. Net cash used by continuing operations was $1.8 million, compared with net cash provided of $4.6 million in the second quarter of last year.

For the six months, net revenues were $665.7 million, compared with $668.7 million in the first six months of 1989. The company incurred a net loss of $30.5 million during the first half of 1990, compared with a loss of $25.1 million in the same period last year. Net cash provided by continuing operations was $6.7 million in 1990, compared with $12.5 million last year.

John P. Hayes, chairman and chief executive officer, said that net revenues for the second quarter remained even with those for the same period in 1989 because of increased billings by The Austin Co., which helped offset a 7.3 percent decline in average wallboard prices and a 2.3 percent decline in wallboard volume.

The decrease in net cash provided by continuing operations was primarily due to a March 31 interest payment of $17.1 million being made in April because the 31st was on a weekend. Hayes said that despite a 9 percent decrease in interest expense during this year's second quarter, the company experienced an increased net loss due to lower average wallboard prices, compared with the same period last year.

Hayes noted, however, that average wallboard prices for the 1990 second

quarter improved slightly over the first quarter of this year.

FARMINGTON, CT (JULY 30) BUSINESS WIRE - Otis Elevator Co. has signed an agreement with the Shcherbinka Lift Plant to form a joint venture in the Soviet Union.

Shcherbinka Lift Plant is a unit of Liftmash, the national agency responsible for the manufacture of elevators in the Soviet Union.

The enterprise will manufacture, install and maintain elevator equipment in the Soviet Union using Otis designs, manufacturing technology and installation and maintenance methods.

The new company, to be called Shcherbinka Otis Lift, will be 55 percent owned by Otis and 45 percent owned by the Soviet partner. A new facility is under construction at the existing Shcherbinka Lift Plant, 15 miles (25 kilometers) from Moscow, to produce elevator equipment for offices and small hotels for the Soviet domestic market. Otis will provide manufacturing equipment, management personel and training for Soviet workers.

The Otis negotiating team was led by Rudi Kunert, senior vice president, Otis ETO; and George H. Channin, Otis area director for the USSR.

The market demand for new equipment in the Soviet Union, at 60,000 units annually, is approximately three times as large as the present market in North America.

Otis is the world's largest elevator company. Revenues in 1989 totaled $3.3 billion, of which 70 percent came from outside of the United States. Otis employs 46,000 people at operations on every continent and sells its products in 163 countries.

Otis Elevator Co. is a wholly owned subsidiary of United Technologies Corp. United Technologies provides a broad range of products and support services to the aerospace, building systems and automotive industries.

The Hartford, Conn.-based corporation's best known products, in addition to Otis elevators, include Pratt & Whitney aircraft engines, Carrier heating and air conditioning systems, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems and United Technologies Automotive components and systems.

ROUYN-NORANDA, Quebec (JULY 30) BUSINESS WIRE - Lyon Lake Mines Ltd. (ME:LLL) announces that despite unfavourable financial market conditions, it has completed a $675,000 non flow-through public issue.

The proceeds derived from the issue will be used mainly to finance exploration work and a feasibility study for bringing into production the Beta Vargas gold deposit located in Costa Rica. Possible reserves of the Beta Vargas property are evaluated at 6,806,000 metric tonnes grading 0.034 ounce of gold per ton.

The drilling campaign currently under way on the property has the main purpose of delineating an ore zone with higher gold grades in the order of 0.08 to 0.12 ounce of gold per tonne, while exploring the deposit at depth.

Laboratory heap leaching tests will take place in the fall of 1990 as part of the feasibility study.

Mapping and sampling are also in progress on other targets located on the 79-square kilometre property.

Lyon Lake Mines has the right to acquire a 50 percent interest from Black Cliff Mines Limited in this Costa Rica property by incurring $200,000 of exploration work and by paying an amount of $128,500 to a Costa Rican company.

Lyon Lake Mines Ltd. is related to Audrey Resources Inc. by virtue of common management.

#90211b0707 07/30/1990 ~Business Wire

OSHKOSH, WI (JULY 30) BUSINESS WIRE - Oshkosh Truck Corp. (NASDAQ:OTRKB) reported today a net loss of $2,453,000, or 28 cents per share for the third quarter ended June 30 of its 1990 fiscal year.

This compares to net income of $4,471,000, or 50 cents per share for the

third quarter of fiscal 1989. Net shipments for the third quarter of the 1990 fiscal year were $128,190,000 compared to $126,346,000 a year ago.

According to R. Eugene Goodson, recently elected chairman and CEO, the loss was largely accounted for by the effects of a major inventory reduction program. About $27 million, or one-third of total inventories, were either sold or written off at a cost of $4 million. Much of this inventory was either excess or obsolete and included both finished and non-finished goods.

While sales of the chassis division were up 38 percent for the recent quarter compared to a year ago, a decline in commercial products sales largely offset the chassis division gain. Defense products sales remained essentially unchanged and accounted for approximately 60 percent of total sales in this and the previous year's quarter.

For the first nine months of fiscal year 1990, net income was $487,000, or 5 cents per share compared to $11,604,000, or $1.29 per share for the same period a year ago. Net shipments for the nine months ended June 30, 1990 increased 11 percent to $352,616,000 from $315,513,000 in the same 1989 period.

The backlog as of June 30, 1990, was $317 million compared to $405 million a year ago. The current backlog does not include the aforementioned new U.S. Army Contract which is expected to be signed shortly.

	Three Months Ended June 30		Nine Months Ended June 30	
	1990	1989	1990	1989

#90211b0712 07/30/1990 ~Business Wire

STUART, FL (JULY 30) BUSINESS WIRE - Seacoast Banking Corp. of Florida, whose subsidiary is First National Bank and Trust Co. of the Treasure Coast, announced that net income for the second quarter of 1990 was $409,000, or 11 cents per share compared to $826,000, or 24 cents per share during the second quarter a year ago.

Earnings for the second quarter reflect a $1,805,000 provision for loan losses compared to $1,007,000 in the like quarter of 1989. For the six months ending June 30, 1990, Seacoast recorded net income of $1,586,000,

or 45 cents per share, compared to $2,064,000, or 59 cents per share in 1989.

While the OCC examination and internal review significantly increased Seacoast's provision for loan losses for the quarter, net charge-offs and nonperforming assets were not materially affected. Net charge-offs for the second quarter of 1990 were $674,000, only 7.7 percent higher than the $626,000 reported for the first quarter of 1990.

Nonperforming assets (nonaccrual loans and other real estate owned) as a percent of loans outstanding and other real estate owned at June 30, 1990 totalled 1.82 percent, compared to 1.89 percent at March 31, 1990 and .80 percent at June 30, 1989.

Impacting this ratio over the past two quarters is a single large, well-secured commercial real estate loan currently in the process of collection and located in the company's market area, where the borrower has a substantial equity investment.

As a result of the perceived slowing of the economy throughout the country especially in commerical real estate lending, Seacoast reevaluated its allowance for loan loss methodology, taking into account current OCC examination and loan evaluation procedures and the company's own internal review, and strengthened its allowance for loan losses.

The ratio of the allowance for loan losses to loans outstanding at June 30 was 1.05 percent compared to .91 percent one year ago.

In its ongoing efforts to maintain a strong banking system, the OCC currently expects the company to maintain an allowance for loan losses at about peer group levels, and following the recent additions, the allowance is now comparable to other banks in Seacoast's ''peer group'' as defined by the OCC.

For the first six months of 1990, the provision for loan losses totalled $2,432,000 compared to $1,389,000 in 1989.

Although net income was negatively affected during the quarter by the increased provision for loan losses, operating earnings improved. Compared to the second quarter of 1989, net interest income (on a tax equivalent basis) increased to $5,542,000, with the company's net interest margin improving from 4.35 percent to 4.72 percent, and noninterest income increased 12.2 percent to $1,712,000.

For the six month period, net interest income (on a tax equivalent basis) rose 10.6 percent to $11,161,000 and noninterest income increased 12.4 percent to $3,277,000 vs. 1989 figures.

Seacoast's return on average assets (annualized) was impacted by the provision for loan losses and for the current quarter was .32 percent, compared to .66 percent one year earlier, and .62 percent for the first six months of 1990, vs. .84 percent in 1989.

The company's ratio of average equity to average assets increased from 6.69 percent in the second quarter last year to 7.13 percent in the current quarter, and the company's book value per share rose 7.8 percent to $10.14.

There were increases in assets, deposits and net loans in the year-to-year comparisons. Total assets at the end of the six months were $501.0 million compared to $492.9 million; deposits were $461.3 million compared to $455.1 million; and net loans were $343.8 million compared to $336.2 million.

Total risk adjusted capital to total assets at June 30, 1990 was 11.48 percent compared to 10.44 percent at Dec. 31, 1989.

Seacoast's banking subsidiary has more deposits and net loans than any other bank headquartered on the Treasure Coast, which is among Florida's most affluent areas.

LONDON (JULY 30) BUSINESS WIRE - British Gas (NYSE:BRG) has appointed Dr. Bob South to the new post of Director of Strategic Planning for the Gas Business.

Previously Dr. South was Head of Investor Relations.

South will report to the Managing Director, Gas Supply and Strategy, and will be responsible for strategic planning in the Gas Business within the economic, business and regulatory environments in Britain. He will take up his new position on October 1st.

South was educated at the Harvey Grammar School, Folkestone and Imperial College, London. After graduating in physics in 1966, he joined the Watson House research station as a research scientist and subsequently gained a PhD in mechanical engineering at the City University, London.

As co-author of technical papers on combustion research he was awarded a gold medal of the Institution of Gas Engineers, and a silver medal of the Society of British Gas Industries.

Subsequently, he held several managerial posts at the Watson House research station where in 1984 he became an Assistant Director responsible for R & D on the efficient utilization of gas. He became Head of Investor Relations in 1988 responsible to the Managing Director, Group Finance for establishing relationships between British Gas and the professional investment community in the UK and overseas.

Married with the two children, Dr. South lives in Wimbledon. His leisure interests include his family, tennis and ornithology.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to the ten ordinary shares.

GRAND PRAIRIE, Texas (JULY 30) BUSINESS WIRE - Craftmade International, Inc. (NASDAQ:CRFT), Monday announced that it has completed the acquisition of D.M.I. Products, Inc. for 149,999 shares of Craftmade.

Under the terms of the agreement, Craftmade issued to the shareholders of D.M.I. 75,001 shares at the closing and will issue 74,998 shares at the first anniversary date.

D.M.I. Products is a specialty lamp manufacturer based in Fort Worth, Texas. D.M.I.'s customer base includes major specialty retail chains. Its GEI division is a manufacturer of computer components and other

electrical accessories.

James R. Ridings, President of Craftmade, commented, ''With the acquisition of D.M.I. now consummated, we expect to rapidly expand the sale of D.M.I. products through Craftmade's distribution base of over 1,400 lighting showrooms.

''We look forward to establishing greater marketshare in the lighting industry and to further developing sales of D.M.I.'s electrical accessory products.''

Craftmade International, Inc. is engaged in the design, distribution and marketing of ceiling fans, light kits and accessories manufactured to its specifications. The Company currently markets 87 basic models of ceiling fans and 32 lighting fixture models under its CraftmadeR brand to over 1,400 retail outlets.

PLAINVIEW, NY (JULY 30) BUSINESS WIRE - Geraghty & Miller Inc. (NASDAQ: GMGW) Monday announced revenues and earnings for the three months and first half ended June 30.

In the second quarter, gross revenues were $25.8 million, an increase of 31 percent compared with the same period in 1989, while second quarter net revenue from services, the company's primary measure of business performance, increased by 33 percent to $17.3 million vs. $13.1 million in 1989. Net income for the second quarter was $804,000 and net income per share was 14 cents virtually unchanged from the 1989 result.

For the first half of 1990, gross revenue reached $51.8 million, a 47 percent increase from 1989 while net revenue from services was $34.5 million, a 39 percent increased vs. a year ago. Net income for the first half was $1,634,000, an increase of 24 percent from 1989, while net income per share increased 22 percent to 28 cents.

Commenting on second quarter results, David W. Miller, president and chief executive officer, said, "We did not experience the normal seasonal advance in billing and productivity as the quarter progressed and consequently results for the quarter were parallel to the first quarter. We therefore limited staff growth and are monitoring closely levels of incoming business."

Geraghty & Miller Inc. provides a wide spectrum of environmental services with special emphasis on the development, management and protection of groundwater resources and the correction of ground-water contamination.

#90211b0727 07/30/1990 ~Business Wire

VANCOUVER, B.C.(JULY 30) BUSINESS WIRE - Principal features of the second quarter for Cominco Resources:

Development work at the Maria copper mine in Mexico is well advanced and sales of high-grade ore will commence in the third quarter.

Step-out drilling at Sheep Creek in Montana has increased the known extent

of the Lower Zone mineralization to over two miles.

Core drilling has confirmed the presence of high-grade gold values over narrow widths within broad zones of low-grade mineralization on the Corak and Tac properties in northeast Turkey. Drilling is continuing.

Nickel production at the Glenbrook smelter has increased steadily throughout the quarter.

Gold production at the Marte operation in Chile was held back by continuing problems in the crushing and agglomeration systems. Maria Copper Project (49 percent)

Mine development in the high-grade zone is advancing on two levels to prepare for production at an increased rate of 500 tonnes per day. Several thousand tons of ore grading 10 to 15 percent copper have been stockpiled on surface. Agreements have been reached to sell the ore to outside concentrators.

The joint venture partners are studying the feasibility of installing a concentrator on the property and an option to purchase an existing facility has been acquired. Sales of ore to other concentrators would continue during the estimated 12 month period required for construction of a concentrator at the site.

Sheep Creek Copper Project (50 percent)

Three recent drill holes have intersected significant copper values and increased the known extent of the Lower Zone mineralization to over two miles. The holes were drilled around hole 39, reported in the first quarter, which intersected 16 feet grading 4.5 percent copper.

After deduction of exploration and other costs the net loss for the second quarter was $8,428,000 or 19 cents per share. In the quarter the Company's 76 percent share of the loss from the Buckhorn mine was $1,077,000. Higher ore grades in the Ghost pit, reduced stripping ratios and better operating conditions will improve profitability in the third quarter.

#90211b0732 07/30/1990 ~Business Wire

MALVERN, PA (JULY 30) BUSINESS WIRE - Rabbit Software Corp. (NASDAQ: RABT) Monday announced its 1990 second-quarter results.

Revenues were $2,055,400, compared to 1989 second-quarter revenues of $1,119,000. Operating losses continue to be significantly reduced. The loss for the quarter was $519,800 (3 cents per share), compared to a loss of $3,309,400 (20 cents per share) for the second quarter of 1989.

For the first half of 1990, revenues and loss were $4,240,500 and $1,117,500 (6 cents per share), respectively, compared to 1989 first-half revenues and loss of $2,581,100 and $5,163,900 (33 cents per share), respectively.

Alfred R. Berkeley III, Rabbit's chairman and CEO, said, ''Our revenues are not yet to the level we would like, but we are encouraged by the excellent response received from companies evaluating our products. The goal now is to be in more evaluations, especially focusing on prospective customers who would have the potential to order considerable amount of our product over an extended time frame.

''We continue to execute on our plan. The products are extremely competitive, and our development plans are exciting. Continued customer acceptance of our products is being experienced.

''We are especially pleased with a successful installation by the U.S. Customs Service that demonstrates the powerful benefits of our product's ability to connect personal computers simultaneously to multiple remote data bases.

''There is a need to increase our emphasis on sales and marketing. The existing sales force has gained in both experience and in productivity over the last quarter, and all vacancies have been filled. We are now concentrating on improved training and support in this area.

''Our marketing to date has been primarily telemarketing and direct mail. We are expanding our efforts to achieve more recognition in the press, to present sales seminars and to advertise selectively.

''Financially, we have received an additional equity infusion from Safeguard Scientifics Inc. (NYSE: SFE) of $1,650,000 through mid-year. Safeguard's continued support and assistance has been a key factor in Rabbit being able to refocus and redirect its corporate efforts, resulting in the improved performance so far in 1990.

''On balance, we are encouraged by our products' performance and acceptance in the market, and we expect our growing base of evaluations to increase sales.''

CHICAGO (JULY 30) BUSINESS WIRE - The board of trustees of Kemper Intermediate Government Trust have authorized the open market repurchase and retirement of up to 1.5 million shares of the fund's outstanding stock.

Repurchases will only be considered when the fund's shares are trading at less than net asset value and at such times and amounts as it is believed to be in the best interest of the fund's shareholders. At recent discount levels, Kemper Financial Services Inc., the fund's investment adviser, believes fund shares represent attractive investment opportunities for the fund and its shareholders.

Last month's dividend of $.0734 per share represents 88 cents per share on an annualized basis. We believe this represents an attractive yield.

The fund expects to declare a monthly dividend of $.0734 per share on July 31, payable Aug. 31 to shareholders of record on Aug. 15.

Kemper Intermediate Government Trust, one of six closed end mutual funds managed by Kemper Financial Services Inc., is listed on the New York Stock Exchange and the Midwest Stock Exchange Inc. Its symbol is KGT.

#90211b0742 07/30/1990 ~Business Wire

NEW YORK (JULY 30) BUSINESS WIRE - Frank B. Hall & Co. Inc. (NYSE: FBH) Monday reported financial results for the second quarter and six months ended June 30.

Revenues for the second quarter of 1990 rose 13 percent to $104.6 million, vs. $93 million in the same period last year. The company reported a pre-tax profit from continuing operations of $1 million in the quarter compared with a pre-tax loss of $11 million for the same period last year.

Net income for the quarter was $.6 million (a loss of 14 cents per share after preferred dividends) vs. a loss from continuing operations of $10.8 million (56 cents per share) for the second quarter of 1989. In the 1989 second quarter a charge to discontinued operations of $50 million increased the net loss in that period to $60.8 million ($2.43 per share).

For the first six months of 1990, revenues increased 12 percent to $216.5 million, compared to $193.2 million a year ago. Hall reported a pre-tax profit form continuing operations for the six-month period of $6.5 million compared with a pre-tax loss of $11.6 million in the comparable period of 1989.

Net income was $3.6 million (a loss of 21 cents per share after preferred dividends), vs. a loss from continuing operations of $13.9 million (86 cents per share) for the six-month period last year. The 1989 charge to discontinued operations increased that year's six-month net loss to $63.9 million ($2.77 per share).

Hall's Chairman and Chief Executive Officer, Donald R. Bell, commenting on the second quarter results said, ''We are encouraged by our second consecutive quarter of improved profitability and impressive revenue growth over last year. These gains resulted from continued strong new business development and the impact of strategic acquisitions completed in 1989, as well as our focus on the cost efficiency of our operations. We are especially gratified that these results have been accomplished in the face of continued soft premium rates.''

Frank B. Hall, headquartered in New York, is a leading provider of insurance brokerage and employee benefits consulting services in the United States and abroad. The company had revenues in 1989 of $384 million and has approximately 200 offices and affiliates in over 50 countries.

#90211b0748 07/30/1990 ~Business Wire

NORTH BERGEN, NJ (JULY 30) BUSINESS WIRE - Emerson Radio Corp. (NYSE:EME) reported its results for the first quarter ended June 30, 1990.

Consolidated net sales for the quarter totaled $167,810,000, down from $221,196,000 last year. The company reported a consolidated net loss for the three month period ended June 30, 1990 of $4,824,000 or $.13 per share. This compares to consolidated net income of $3,507,000 or $.10 per share for the same period last year.

''Sales were extremely disappointing for the first quarter, resulting in losses greater than expected,'' commented Stephen L. Lane, President, on the first quarter results.

''Due to continued softness in the retail marketplace, retailers have

remained cautious in acquiring inventory. In response, we have been conservative in our purchasing. In fact, despite the slow sales during the quarter, we have been able to reduce our inventories below fiscal year-end balances. In addition, we are currently scrutinizing our fixed costs in an effort to reduce our overhead.''

''As a result,'' Lane concluded, ''we expect the next two quarters to be profitable, assuming moderate improvement in the retail environment.''

Emerson Radio Corp. designs and markets a full line of popularly priced consumer electronic products. The range of the Company's products includes televisions, video cassette recorders, portable compact disc players, radios, stereo systems, tape players and recorders, microwave ovens, compact refrigerators, telephones and answering machines.

During the past year, the company, through newly formed subsidiaries, Emerson Computer Corp. and Emerson Technologies L.P., introduced a full line of high-technology personal computers and related peripheral products for the home office and consumer retail markets. H. H. Scott, Inc., a wholly-owned subsidiary, designs and markets a line of high-fidelity audio and video equipment.

#90211b0754 07/30/1990 ~Business Wire

CAMBRIDGE, MA (JULY 30) BUSINESS WIRE - Atlas Venture Monday announced the closing of a $4.1 million investment in GenPharm International Inc. by a group of European venture capital firms.

Atlas Venture acted as lead investor.

Founded in 1988, GenPharm International is a leader among start-up companies, specializing in the commercialization of transgenic animal technology for pharmaceutical, veterinary, and nutritional applications. Its operations are divided equally between facilities in Leiden, The Netherlands -- specializing in transgenic dairy cattle for production of high value proteins as well as improved livestock; and Mountain View in California's Silicon Valley -- specializing in transgenic laboratory animals and the production of human monoclonal antibodies.

GenPharm International represents a new breed of venture-backed start-up

companies -- companies which operate internationally from the outset in order to recruit outstanding international research talent and to better serve the needs of development partners in the pharmaceutical industry, which is itself international in scope. The markets for GenPharm's products and services are also international.

Dr. Jonathan MacQuitty, GenPharm International's president, acknowledges the additional challenge a small company faces when choosing international operations and recognizes the importance of developing a shareholder base and board of directors which reflects the business' international scope: ''Until now our shareholders and board have all been U.S.-based. Both our management team and investor group wanted to bring in European investors and board members who could bring European experience and contacts to our operations and strategic thinking.''

Michiel de Haan, a managing general partner of Atlas Venture's Amsterdam office, has joined GenPharm International's board of directors hoping to use Atlas Venture's international investing experience with start-up companies to give GenPharm International the assistance it seeks: ''We've long anticipated the emergence of companies like GenPharm, International with international development activities and have developed Atlas Venture's international structure precisely to provide the kind of support GenPharm is looking for.''

The European investors in this financing were Atlas Venture, Abingworth Management, Charterhouse Venture Fund, and Euroventures Benelux. Existing U.S. investors are Avalon Ventures; Delphi BioVentures; Fairfield Ventures Genencor International Inc.; Institutional Venture Partners; Kleiner, Perkins, Caufield & Byers; Leiden University; and Merrill Pickard, Anderson and Eyre.

Atlas Venture is an international venture capital group managing $100 million from offices in Boston, U.S.A.; Amsterdam, The Netherlands; and Munich, West Germany. The U.S. Partnership specializes in investments in the healthcare and information technology industries.

AKRON, OH (JULY 30) BUSINESS WIRE - Resource America Inc. (NASDAQ:REXI) (the ''company'') announced revenues and net income for the quarter and the nine months ended June 30, 1990, as follows:

Resource America Inc.

	Quarter Ended June 30,		Nine Months Ended June 30,	
	1990	1989	1990	1989
Revenues	$ 1,843,474	$ 1,505,467	$ 6,695,858	$ 4,703,629
Income from operations	243,014	160,674	1,281,495	257,454
Gain (loss) on sale of property	10,000	(1,970)	40,939	67,770
Provision for income taxes	63,000	19,000	328,000	49,000
Net income	190,014	139,704	994,434	276,224
Stockholders' equity		23,275,689	22,628,228	
Average shares	7,016,823	6,479,033	7,010,155	6,208,091
Net income per share	3 cents	2 cents	14 cents	4 cents

The company stated that improved revenues and income from operations in the three months ended June 30, 1990, over the corresponding fiscal 1989 period was primarily a result of well drilling and service operations conducted in fiscal 1990 on behalf of its 1989 Gas Development Drilling program, while revenues and income from operations in the nine months ended June 30, 1990, were substantially improved over a similar period in fiscal 1989 due to the completion of its 1989 Pipeline Income Program and the 1989 Gas Development Drilling program.

The company further announced that its board of directors has authorized the payment on Sept. 10, 1990, of a dividend in the amount of $.025 per share to all common stockholders of the company at the close of business on Aug. 20, 1990.

PALO ALTO, CALIF. (JULY 30) BUSINESS WIRE - Hewlett-Packard Co. (NYSE: HWP) Thursday announced it will reduce U.S. list prices on most models of the HP Vectra 286/12 PC and on all models of the HP Vectra QS/16S PC by $400, effective Aug. 1, 1990.

In addition, HP announced that all memory prices for the HP Vectra PC line will be reduced, most by approximately 40 percent to less than $300 per Mbyte.

The one exception, the 1-Mbyte RAM upgrade kit, which uses relatively expensive 256 Kbyte single-in-line memory modules (SIMMs), will be reduced 20 percent to $399 per Mbyte. These reductions also are effective Aug. 1 1990.

These two PCs are the most popular models of the HP Vectra PC product line. The key strengths of these industry-standard PCs are their fast hard disks and video, and room for expansion.

''The combination of these reductions and our 3-5-7 Free Printer promotion makes the price of the QS/16S, our best selling PC, especially attractive '' said Pradeep Jotwani, North American personal-computer marketing manager.

The 3-5-7 promotion is a marketing program in which large-volume purchasers of selected HP Vectra PCs, including the QS/16S, receive free HP printers.

HP Vectra PCs are available through HP authorized dealers and HP sales representatives.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries.

HP has 93,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

CLINTON, NJ (JULY 30) BUSINESS WIRE - Foster Wheeler Corp. Monday reported net earnings for the six months ended June 1990 amounting to $19,377,726 on revenues of $706,606,900. This amounts to earnings per share of 55 cents.

Net earnings for the similar period in 1989 were $17,854,756 on revenues of $630,852,065, amounting to 51 cents per share, which included 19 cents per share relating to the sale of future real estate rents receivable and nine cents per share from the curtailment and settlement of a foreign pension plan.

For the second quarter, net income was $11 million (31 cents per share) on revenues of $395.38 million, as compared with net income of $10.86 million (31 cents per share) on revenues of $367.74 million in the same quarter last year.

The backlog of orders for the corporation totalled $2,063,981,964 at the end of June 1990. The figure at the end of June 1989 was $1,347,698,256.

Foster Wheeler Corp. is an international organization offering a broad range of design, engineering, construction, manufacturing, management, real estate development and environmental services. The corporation's headquarters are at Clinton.

MORRISTOWN, NJ (JULY 30) BUSINESS WIRE - AT&T Computer Systems Monday announced it has been awarded a $14 million contract by the Washington, D.C. based National Railroad Passenger Corp. to assist Amtrak(R) in improving its reservation and ticketing systems.

Under terms of the agreement, AT&T will install and maintain more than 2,100 networked computers, custom software, and peripherals at more than 300 Amtrak stations, reservation centers, ticket offices and administrative offices around the country. Installation is scheduled to begin late next month and be completed within 18 months.

"This contract - the third major transportation agreement we have received in the past year - is further evidence of our ability to meet the specific networked computing needs of our customers," said Curtis J. Crawford, AT&T Computer Systems vice president - sales, service, and support.

Crawford noted AT&T Computer Systems customer applications engineers developed a custom windowing software package that will provide ticket agents and reservation clerks with the ability to have simultaneous access to schedules, pricing and booking information.

The contract is the cornerstone of Amtrak's Terminal Replacement Project that is designed to increase productivity of ticket agents and reservation personnel, reduce maintenance expenses, and improve customer service.

"When invited to bid on the project, AT&T Computer Systems provided an extensive, end-to-end solution," said Norris W. Overton, Amtrak vice president of Information Services.

"Key elements in their selection were AT&T's Professional Services, which provided the custom software package and systems integration, an aggressive installation schedule that meets our needs, and the quality of their product line and maintenance," he said.

The desktop platform will be the AT&T 6286/EL WorkGroup System (WGS), an entry-level workstation introduced earlier this year. The workstations will be connected to Amtrak's mainframe through AT&T cluster controllers.
Amtrak is a registered trademark of the National Railroad Passenger Corp.

WINSTON-SALEM, N.C. (JULY 30) BUSINESS WIRE - Stockholders of Integon Corp. (NASDAQ: ITGN) voted earlier Monday to approve the transaction involving the sale of substantially all of the insurance holding company's assets to Integon Holdings Corp., a company formed by investors Jupiter Industries Inc. and Head Insurance Investors L.P. and merger of Integon with a subsidiary of Southmark Life Group Inc.

The transaction, which provides for Integon's public stockholders to receive $6 a share cash, is scheduled to be completed later this week in New York.

''All of us at Integon look forward,'' said James R. Ridley, chairman of Integon's board of directors and the company's president and chief executive officer, ''to our new association with Jupiter Industries and Head Insurance Investors. Together, they provide the experience and expertise in business development and insurance that complement the strengths of Integon's management team.''

Jupiter Industries is a privately held corporation based in Chicago with diversified holdings that include business interests in construction, energy delivery systems, engineering and manufacturing, graphic arts, real estate, the retail trade and transportation industry.

Head Insurance Investors L.P., located in New York, specializes in investments in insurance companies providing services to the insurance industry.

Integon markets a diversified line of life insurance, annuities and property and casualty insurance in 46 states and the District of Columbia. All of Integon's insurance companies are rated ''A Excellent'' by A.M. Best Co., the insurance industry's independent financial analysts.

RUTLAND, Vt. (JULY 30) BUSINESS WIRE - Central Vermont Public Service Corp. (NYSE:CV) reported unaudited earnings for the second quarter 1990 of 26 cents per common share compared to 60 cents for the second quarter 1989.

For the six months ended June 30, earnings were $1.20 compared to $1.98 for the similar period last year.

The drop in earnings relates primarily to the slowing Vermont economy.

Jobs in the durable goods and construction industries have been particularly hard hit. The unemployment rate continues to rise and at the end of the quarter stood at 4.4 percent for Vermont vs. 4.5 percent for the nation.

Looking ahead, we see earnings improving. Sales in the residential sector were up in May and June and we expect them to continue to improve. The recently approved rate increase of 8.7 percent, which became effective May 1, 1990, is expected to generate additional revenues of $14 million annually.

In addition, we expect the diversified nature of our customer base to cushion any further decline.

SPRING HILL, TN (JULY 30) BUSINESS WIRE - At exactly 10:57 a.m. Monday, General Motors Chairman Roger B. Smith and UAW President Owen Bieber signaled the official start of Saturn production as they drove a red metallic four door sedan off the final assembly line here.

Smith and Bieber were joined by GM President Robert C. Stempel, GM Executive Vice President Lloyd E. Reuss, and UAW Region 8 Director George H. Smith in a private ceremony with Saturn's 2,600 team members.

"Today's milestone signals both the determination and enthusiasm of Saturn team members to achieve our mission - to market a high value, world-class quality car which will compete in the small car market against the best of the Japanese competition," Saturn President Richard G. "Skip" LeFauve told the assembled crowd. "Production is coming on line, retail facilities are under construction, and we can't wait to get to the marketplace this fall."

LeFauve said the car driven today will be retained by Saturn and put into the company's Spring Hill museum. Today's ceremony was kept private as part of Saturn's plans to focus national attention on the car's launch this fall.

It also provided an opportunity for team members to talk to Roger Smith who has provided solid, untiring commitment to the Saturn project. "Without Roger," LeFauve said, "there wouldn't be a Saturn."

Saturn Corp. began in 1982 as a special project within General Motors. On Jan. 7, 1985, following intensive work on both product feasibility and a new approach to the labor/management relationship, Saturn was incorporated as a subsidiary of GM.

The search for a suitable site for its four-million-square-foot manufacturing and assembly complex ended on July 30, 1985, when Spring Hill, was selected.

Since then, the facility in Spring Hill has been constructed, and virtually all equipment installed and tested. Approximately 2,600 team members are currently employed at the site. An additional 950 team members are located at Saturn's Michigan operations and at field locations in key automotive markets.

MARKHAM, Ontario and TROY, Mich. (JULY 30) BUSINESS WIRE - Siemens Automotive is acquiring MACI Industries Group from Magna International Inc. (TSE: MG.A, MG.B -- NASDAQ: MAGAF), the companies jointly announced Monday.

Financial terms of the agreement signed today were not disclosed. The transaction is set to close on Aug. 31.

The London, Ontario-based MACI Industries Group is a unit of Atoma International, a subsidiary of Magna. The divestiture is part of Magna's previously announced debt reduction program, Magna said.

MACI manufactures and markets fractional horse-power electric motors and related components for the North American automotive industry. MACI has about 1,200 employees, with annual sales of approximately $120 million (Canadian).

The acquisition includes MACI's four London-area plants, a Burlington plant and a distribution facility in Marysville, Mich.

''While we are sorry to be leaving the Magna family of business, we are pleased to team up with another world-class automotive systems supplier and to become part of Siemen's global automotive business,'' said Richard Hrga, president of MACI said.

Timothy D. Leuliette, member of the management board of the worldwide Siemens Automotive Group and chairman of Siemens Automotive Ltd. (Canada), said, ''MACI is a well respected name in the automotive industry. This reinforces our commitment to supply our global customers with the highest quality automotive systems available today.''

William B. Waite, president and CEO of Siemes Electric Ltd. in Toronto said, ''This investment affirms our long-term commitment to Canada. MACI will add another four plants to our existing base of nine manufacturing sites across the country and increase the number of Canadian employees to 4,100.''

Siemens Automotive is a worldwide leader in the design, manufacture and supply of technologically-advanced electrical and electronics systems and components for the global automotive industry. With headquarters in both Troy, Mich. and Regensburg, Germany, Siemes Automotive has sales, R&D, or manufacturing operations in 12 countries including facilities in Newport News, Va. and Chatham, Ontario.

With the acqusition of MACI, the company will employ more than 12,000 people globally and have a sales volume of $1.4 billion (U.S.).

Siemens Automotive and Siemens Electric Ltd. are operating units of Munich West Germany-based Siemens AG. Siemens AG has some 375,000 employees worldwide and operates 177 manufacturing facilities in 41 nations. With annual sales exceeding $34 billion, it serves customers in more than 120 countries.

NORWOOD, Mass. (JULY 30) BUSINESS WIRE - Telco Systems Inc. (OTC National Market: TELC) announced Monday that it has entered into a contract with BellSouth Services Inc. to supply network access multiplexers for customer premise applications in various BellSouth customer locations.

Under the agreement, deliveries will be made to Southern Bell and South Central Bell customers over a two-year period. Initial shipments under the agreement began in June.

Separately, Telco also announced that Robert J. Bauer, age 48, was named to the newly created position of senior vice president of Sales & Marketing for Telco Systems Inc., in Norwood, Mass. Bauer will have responsibility for coordination of company-wide Sales and Marketing activities, as well as new business development.

He joins Telco Systems from Infotron Systems Corp. where he served in several senior management positions since 1981, including vice president of Corporate Development, vice president of Marketing, and president of Infotron Canada's sales subsidiary. From 1973 to 1981, Bauer held a variety of management positions with IBM Canada Ltd., of Toronto. He received his BS degree from the University of Toronto. Bauer will report to Paul D. Lazay, president and chief executive officer of Telco Systems Inc.

Telco Systems Inc., based in Norwood, Mass., designs and manufactures high-speed digital fiber optic transmission terminals, digital multiplexing equipment for telephone and other applications, and access multiplexers for the customer premise T1 market.

RACINE, WI (JULY 30) BUSINESS WIRE - Modine Manufacturing Co. is forming two new groups in order to coordinate the growing scope of its businesses, Richard T. Savage, president and chief operating officer, announced today.

Modine's business will now be conducted under an Off-Highway Products Group and a Highway Products Group, in addition to the present Heating Division and European Operations, Savage explained.

The Off-Highway Products Group will include Modine's Heavy-Duty & Industrial Division. Victor S. Frangopoulos has been promoted to the new position of group vice president, off-highway products, from his former post as vice president and general manager of the Heavy-Duty & Industrial Division.

''Vic will be responsible for following through on the recently announced acquisition of Sundstrand Corp.'s heat-transfer operations, and for establishing Sundstrand's heat-transfer business as a new division in our company,'' Savage said.

The Highway Products Group will consist of Modine's Automotive Division and Aftermarket Division, combining the company's OEM (original equipment manufacturer) car and truck activities with the related replacement parts business.

Savage said, ''Donald R. Johnson has been promoted to group vice president highway products, from his former position as vice president and general manager of the Automotive Division, and has the responsibility of integrating Modine's approach to these two key markets.''

Modine is an independent, worldwide leader in heat-transfer technology, serving vehicular, industrial, and building HVAC (heating, ventilating, air-conditioning) markets. For the fiscal year ended March 31, 1990, Modine earned $25.2 million on sales of $436.3 million.

#90211b0802 07/30/1990 ~Business Wire

PROVIDENCE, R.I. (JULY 30) BUSINESS WIRE - Outlet Communications Inc. Monday reported a 69 percent net improvement in its 1990 second quarter results.

For the quarter, Outlet had a net loss of $590,000 or $.09 per share compared to last year's net loss of $1,908,000 or $.29 per share. This was a net quarterly improvement of $1,318,000 -- or 69 percent.

The effect of Outlet's recent sales of broadcast stations, including two television stations and two radio stations which were sold in this year's first quarter, has been to decrease revenue and operating earnings in comparison to prior year results. Thus, net revenue of $12,513,000 in the 1990 second quarter was less than last year's $26,673,000.

First half revenues of $31,368,000 were also down from last year's $49,153,000. However, because proceeds from the station sales were applied to reduce outstanding debt, Outlet significantly lowered its interest expense. The station sales also caused a reduction in charges for amortization of intangible assets. All such factors combined contributed toward earnings gains in both the second quarter and first half of 1990.

For the six months ended June 30, 1990, Outlet had net income of $4,328,000 or $.66 per share compared to prior year net income of $14,942,000 or $2.28 per share. Last year's results included larger non-recurring gains from radio station sales along with an extraordinary credit for tax benefits from net operating loss carryforwards.

Outlet Communications Inc., a public company headquartered in Providence, owns and operates two VHF television stations: WJAR-TV, Providence and WCMH-TV, Columbus, Ohio.

VAN NUYS, CA (JULY 30) BUSINESS WIRE - Kenfil Distribution, the largest software-only distributor, Monday announced the addition of four new Windows-related products to its inventory, two of which, StraightLine by First Genesis and DesktopSet by OKNA Corp., are new to the distribution channel.

Kenfil has a long history of quickly bringing new products into the channel. The latest additions include:

o Straight-Line from First Genesis, a utility tool that allows users to access applications and documents with a single keystroke.

o DesktopSet from OKNA Corp., an integrated desktop utility with file management accessories.

The other two products are:

o ClipArt from Art Right, which consists of high-quality images for use in desktop publishing and graphics presentations.

o ALL Chargecard 286 from ALL Computers Inc., a RAM memory management peripheral that allows users of 286-based PCs to increase the amount of addressable RAM memory from 640K to 940K.

All four of the new products will be demonstrated during Kenfil's ''Windows of Opportunity'' roadshow, the 10-city tour for resellers and corporate users being held August 30 through September 27. (See June 28 release.)

Kenfil Distribution Inc., the largest software-only distributor, specializes in business products for the IBM-compatible and Apple Macintosh markets. The privately held company helped pioneer the

utilities and forms-processing categories of business software, and today handles more than 5,000 different titles.

TERRE HAUTE, Ind. (JULY 30) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW) Monday reported net sales from continuing operations for the second calendar quarter of $14,921,000 cmpared to restated net sales for the same period in 1989 of $14,802,000 representing a 1 percent increase.

Income from continuing operations of $453,000, or 15 cents per share was 157 percent higher than restated net income for the year-earlier period of $176,000, or 6 cents per share.

For the first half, net sales from continuing operations were $30,728,000 compared to $32,581,000 for the first half of 1989, a decline of $1,853,000, or 5.7 percent. First half income from continuing operations of $965,000, or 32 cents per share was 81 percent higher than restated net income from continuing operations for the first half of 1989 of $534,000, or 18 cents per share.

Giving effect to first quarter losses associated with discontinued businesses and their disposition (which resulted in after tax charges of $1.4 million, or 47 cents per share), the company incurred a net loss for the first half of 1990 of $435,000, or 15 cents per share as compared to net income of $491,000, or 17 cents per share for the first half of 1989 (after recognizing a loss from discontinued operations of $43,000, or 1 cent per share).

In making the announcement, Paul A. Saxton, president and chief executive officer, stated ''Given the difficult retail environment, our sales results in the second quarter were very gratifying and underscore the effectiveness of our new direct sales organization. Our increased earnings reflect decreased interest payments and other benefits derived from our divestitures. We are beginning to realize incremental positive effects of our various cost reduction measures and we hope to benefit from an improved sales climate in the second half. In summary, we are on schedule with our plan for improved earnings for 1990.''

General Housewares Corp. is a leading manufacturer and marketer of cookware and cutlery products.

#90211b0811 07/30/1990 ~Business Wire

WARREN, Ohio (JULY 30) BUSINESS WIRE - The board of directors of Second Bancorp Inc. (NASDAQ:SECD) has declared a dividend of 23 cents per share payable July 31, 1990, to shareholders of record July 16, 1990.

This represents an increase in the dividends declared for the second quarter of 1990.

In order to strengthen the financial position of the company; to deal with an increase in charge-offs of a small number of commercial loans; and to position itself for the future, Second Bancorp Inc. committed resources in the second quarter to bolster the loan loss reserve of the company to 1.10 percent of loans.

Even with the increase in the reserve, accomplished through an increase in the provision for loan losses, Second Bancorp Inc. is able to report net earnings of $5,000 for the second quarter of 1990. This represents a decline in earnings from the $727,000 reported in the second quarter of 1989. The provision for loan losses for the second quarter of 1990 was $1,497,000 as compared to the provision of $320,000 for the second quarter of 1989.

''The charge-off action and resulting increase in the provision for loan losses mirrors recent action taken by local, regional and large banks. A sluggish economy and strengthened regulatory scrutiny have contributed to the need for the maintenance of adequate reserves. Without the abnormal increase in the provision for loan losses, net income for the second quarter of 1990 would have been $797,000 or a 9.6 percent increase from the same period last year,'' said Alan G. Brant, chairman, Second Bancorp.

Earnings performance is expected to improve for the remainder of 1990. The average asset size of Second National Bank has increased from the 1989 second quarter total of $422,811,000 to $440,240,000 for the second quarter of 1990. The increase represents a 4.1 percent growth in assets.

STAMFORD, CT (JULY 30) BUSINESS WIRE - Emission figures reported to the U.S. EPA earlier this month show that in 1989 Olin Corp. achieved a 12 percent reduction in air emissions and an 18 percent reduction in overall releases (air, water and off-site disposal).

As a result, Olin has now cut air emissions from its manufacturing facilities around the country by 30 percent and its overall emissions by 31 percent since 1987.

''We are pleased with the reductions achieved last year and the progress we are making toward the goals we announced in April,'' said John W. Johnstone Jr., Olin chairman and chief executive officer. At Olin's annual shareholders meeting, Johnstone announced environmental goals, including the reduction of air emissions by 70 percent by 1994.

Olin's report was in accordance with Section 313 of SARA (Superfund Amendments and Reauthorization Act), and the company is using 1987 as the base year since that was the first year industry reported SARA data.

In addressing environmental issues, Johnstone has stated that Olin is dedicated to improving its environmental performance beyond what is mandated by laws and regulations. Moreover, the goals are corporate-wide in scope and cover all units including Olin's chemicals, metals, defense and ammunition businesses.

VANCOUVER, BRITISH COLUMBIA (JULY 30) BUSINESS WIRE - The Tulsequah Chief project is a 60-percent Cominco Ltd., 40-percent Redfern Resources Ltd. joint venture exploring a massive sulphide deposit in northwestern British Columbia.

Cominco Ltd. act as operator and have informed the company that diamond

drill hole No. 22 (the first hole this year) has intersected a considerable thickness of well mineralized massive sulphides which may be 500 feet stratigraphically higher than the target horizon to which the hole is directed.

Massive sulphides are reported from 1,784 feet to 1,948 feet for a total length of 164 feet. A preliminary estimate of true width suggests the zone is about 110 feet thick.

Although it is too early to speculate on the full significance of this intercept, it would appear to represent either an up-faulted segment of the main zone or alternately, and more likely, it is a new massive sulphide lens.

Assays from the hole will be reported when received. The hole is continuing to target depth of about 2,900 feet where it will test the main horizon approximately 750 feet vertically below hole No. 18, which returned an intercept last year of 25 feet true width grading 0.87 percent copper, 2.16 percent lead, 11.87 percent zinc, 0.08 oz/ton gold and 5.2 oz/ton silver.

The main horizon contains a geologic reserve calculated by Redfern to be 5,800,000 tons at 1.6 percent copper, 1.3 percent lead, 7.03 percent zinc, 0.08 oz/ton gold and 2.93 oz/ton silver. This main zone remains open in all directions.

BOSTON (JULY 30) BUSINESS WIRE - 1st American Bancorp Inc. (NASDAQ:FAMB), the holding company for 1st American Bank for Savings, Monday announced a loss for the second quarter of $4.7 million or 46 cents per share.

For the six month period ending June 30, 1990, the company reported a loss of $14.8 million compared to a loss of $60.6 million for the first six months of 1989.

The second quarter and six month losses reflect a decline in interest income as well as increasingly higher expenses related to non-performing assets at 1st American Bank for Savings. Non-performing assets which were not in repayment at June 30, 1990 totaled $161.1 million.

An additional $7.2 million in loans made to finance the purchase of foreclosed real estate from the bank, and which were currently paying as agreed, were on non-accrual status at the end of the second quarter. This

compared to total non-performing assets of $170.9 million at March 31, 1990. The company's reserves for possible losses on loans and other real estate owned was $31.5 million at June 30, 1990.

David A. Tapley, chairman and chief executive officer, stated that the bank is continuing its efforts to develop a capital restructuring plan as required by a supervisory order issued by the Federal Deposit Insurance Corporation (FDIC) in May of 1990.

Tapley said, ''Management's attention and energies are focused on complying with all of the terms of the supervisory order. However, as we have stated previously, there can be no assurance that the company will be successful in its efforts to raise additional capital.''

1st American Bancorp Inc. is a bank holding company with assets of $526.6 million. Its sole subsidiary, 1st American Bank for Savings, is a state-chartered savings bank with 11 offices in greater Boston. The bank's deposits are insured up to $100,000 per depositor by the FDIC and deposits over that amount are insured by the Deposit Insurance Fund of the Massachusetts Mutual Savings Central Fund.

JACKSONVILLE, FL (JULY 30) BUSINESS WIRE - Koger Properties Inc. (NYSE: KOG) reported revenues of $34,972,000 in the quarter ended June 30, 1990, compared to $20,633,000 in the like quarter last year.

Revenues for the quarter just ended included a sale of buildings to Koger Equity Inc. for approximately $15 million.

Funds from real estate operations for the quarter were $15,000,000, up 21 percent over the like period last year.

''The accomplishments of the company continue to be outstanding,'' said Ira M. Koger, chairman. ''During the quarter, 300,000 net rentable square feet of leased space were added to the rent roll.''

Combined annualized gross rents for the Koger system of centers are now approximately $138 million, compared to $120 million last year.

Koger Properties owns and manages 36 office parks throughout the Sun Belt.

MCLEAN, VA (JULY 30) BUSINESS WIRE - Unisys Corp. Monday announced that its Systems Management Group (SMG) has been awarded a $20 million contract to provide a wide range of systems support services for NASA's Langley Research Center (LaRC) in Hampton, Va.

The contract is for one year, with four one-year options.

According to Art Slotkin, vice president of SMG's Support Services Division, this is the third competitive-bid contract that LaRC has awarded to Unisys over the past 12 months.

The Business Data Systems Division (BDSD) is NASA LaRC's information services function; its mission is to provide an efficient and effective computer systems capability to serve the Center's operations and management personnel. Unisys SMG will assist BDSD in the development of an expanded business administration management information system.

By melding its administrative data processing, office automation, and telecommunications network activities, BDSD plans to improve NASA LaRC staff productivity by reducing paperwork and streamlining operating procedures.

Unisys SMG will integrate BDSD's homogeneous central computer systems, which employ IBM-compatible hardware, and the heterogeneous world of departmental and personal computers. Broadening user access to administrative information will enhance the value of the applications software residing on any of the interconnected platforms.

Headquartered in McLean, Va., SMG is part of Unisys United States Information Systems (USIS) division. Unisys is a $10 billion manufacturer of information systems and related services. It has more than 75,000 employees and 60,000 customers in over 100 countries.

LOS ANGELES (JULY 30) BUSINESS WIRE - Security Pacific Corporation and the Economic Development Corporation of Los Angeles County (EDC) announced today that they have jointly formed a Community Development Corporation (CDC) to encourage development in disinvested areas of Los Angeles County.

Security Pacific officials said receiving the approval of the Office of the Comptroller of the Currency removed the final barrier to the creation of California's first bank CDC. According to one of the CDC's chief architects, Hugh Loftus, first vice president and community reinvestment officer at Security Pacific Corporation, the purpose of the CDC is to engage in lending and investment activity that benefits small businesses and residents in low- or moderate-income areas of L.A. County. Its focus will be on areas which have received a formal designation by state or local government indicating distress or disinvestment such as enterprise zones, commercial revitalization areas and redevelopment districts.

The CDC will act as an equity investor and co-developer of primarily smaller commercial projects, providing clients with reduced rate loans and deferred loans not normally available through conventional lenders.

The CDC will also seek to combine available government resources with private sector resources for these projects, and provide ''gap'' support when necessary in order to keep these projects moving forward.

The CDC is governed by a 10-member board of directors including four Security Pacific representatives, four EDC representatives, and two community representatives. Representing Security Pacific are John W. Hancock, executive vice president heading the Real Estate Industries Group Ronald W. Lee, executive vice president heading the Real Estate Capital Company, Melvin T. Andrews, senior vice president heading the Joint Venture Capital Division, and Hugh Loftus.

EDC representatives are C. Robert Langslet, president of the Long Beach Harbor Commission, Robert J. Lowe and Thomas C. Wolff, Jr., Los Angeles-area developers, and Phillip R. Nicholson, the managing partner of the law firm Cox, Castle & Nicholson.

The EDC is a not-for-profit public benefit organization established in 1981 to promote economic development throughout Los Angeles County through joint public/private efforts such as the CDC. Security Pacific Corporation is the nation's fifth largest bank-holding company with more than $94 billion in assets.

SAN FRANCISCO (JULY 30) BUSINESS WIRE - Sierra Capital Realty Services, the asset and property management arm of the Sierra Capital Companies was recently certified as an Accredited Management Organization (AMO) by the prestigious Institute for Real Estate Management (IREM).

IREM, an association of more than 8,000 property and asset managers in the United States and Canada; is the only professional association dedicated to serving the needs of property management professionals. It is committed to developing and maintaining standards of excellence in the field of property management.

The AMO accreditation achieved by Sierra Capital is reserved for ''property management firms that meet and maintain the highest standards of experience, integrity and fiscal stability'' according to Donald M. Furbush, 1990 President of IREM. Thomas B. Swartz, chairman of Sierra Capital commented that ''it is an honor to be recognized for our excellent 10 year performance as an asset and property manager by the industry's preeminent professional association.''

Only 852 firms have received the AMO accreditation.

Sierra Capital manages a national portfolio of over 13.25 million square feet of light industrial, warehouse/distribution and community shopping centers nationally valued at $622 million on behalf of its institutional clients, which include the Sierra Capital Realty Trusts. The company, headquartered in San Francisco, maintains regional and management offices in Chicago, Dallas, Las Vegas, Los Angeles, Phoenix, and Southern New Jersey.

WALTHAM, MA (JULY 30) BUSINESS WIRE - Information Decisions (IDI) of Grand Rapids, Mich. a wholly owned subsidiary of SofTech Inc., announced that it had recently added two new major accounts to its client portfolio: Westinghouse and James River Corp.

IDI's Automated Engineering Group specializes in the integration of CADD/CAM tools into manufacturing environments. (CADD/CAM signifies Computer-Aided Design & Drafting/Computer-Aided Manufacturing). They recently helped both Westinghouse and James River integrate the latest in CADD tools into their operations.

Westinghouse has been utilizing traditional CADD systems for years and had been considering upgrading to new high performance automated engineering tools. The Westinghouse Furniture Division, after evaluating several companies, selected IDI as its source for CADD integration. Selection criteria included ease of design, short learning curve, and features allowing automated drafting and rapid photocopying.

IDI will be providing hardware, software and support, extensive training, engineering services, and on-site hardware maintenance.

James River Corp., a pulp and paper manufacturer based in Richmond, Va., had similar integration needs, and IDI was successful in implementing systems that met their specific requirements. James River's consumer brands include Northern bathroom tissue, Vanity Fair napkins, and Dixie cups.

Founded in 1969, SofTech Inc. is a publicly held company providing custom software design and development, systems engineering, and integration services to government agencies and commercial companies. Headquartered in Waltham, the company employs approximately 700 people in 18 locations throughout the United States. Information Decisions Inc. is a systems integrator and value added reseller of local area network products and services and automated engineering tools.

For more information on IDI's products and professional services, contact David Mahorney at (616) 957-2230.

#90211b0860 07/30/1990 ~Business Wire
CULVER CITY, CA (JULY 30) BUSINESS WIRE - MGM Grand Inc. (NYSE:MGG) Monday reported its results for the quarter and six months ended June 30, 1990.

For the quarter ending June 30, 1990, the company had net income of $.9 million, or 3 cents per share, compared with $19.2 million, or 92 cents per share, for the equivalent period in 1989. The 1989 period included a pre-tax gain of $26.5 million realized on the sale of the Sands Hotel on April 28, 1989, and a non-recurring tax benefit of $352,000.

Operating income for the quarter was $1.3 million, compared with $1.2 million for the same period in 1989. Hotel/casino revenues were $42.1 million vs. $40.5 million last year. The increase was primarily due to the acquisition of the Marina Hotel and Casino in January 1990. MGM Grand Air's revenues were $7.7 million, compared with $7.4 million in 1989 quarter.

For the six months ended June 30, 1990, the company realized a loss of $.7 million, or 3 cents per share, compared with net income of $25.1 million, or $1.20 per share, for the 1989 period which included the gain on the sale of the Sands Hotel and a non-recurring tax benefit of $1.8 million.

The decline in the six-month Hotel and Casino revenues was primarily due to the sale of the Sands Hotel and the unfavorable win percentage incurred during the first quarter of 1990.

Beginning Aug. 23, 1990, the company's wholly owned subsidiary, MGM Grand Air, will inaugurate two-class service between Los Angeles and New York, consisting of its present ''Grand Class First'' at standard first-class fares, and its new ''Grand Class Coach'' at standard coach fares.

The company is developing the 115 acres of land in Las Vegas, acquired early this year, into a 5,000-room hotel/casino and theme park. The project will be a novel and innovative step in the direction of combining gaming and entertainment. The design and engineering for the project will be completed in the latter part of this year and ground breaking will follow by December 1990. The company estimates that the facility will be completed in two years.

NEW YORK (JULY 30) BUSINESS WIRE - Cluett, Peabody & Co. announced Monday

that it has named Mathew E. Chamlin as president of the Cluett Shirt Group effective Aug. 6.

In this role, Chamlin will be responsible for all aspects of management and strategic planning for the Shirt Group's dress shirt and sportswear business consisting of domestic Arrow, Burberrys and Colours by Alexander Julian. All top executives of these subsidiaries will report directly to Chamlin.

Prior to the Cluett appointment, Chamlin was president of Ellesse USA, a Reebok International company. Previous to his joining Ellesse, he served in top executive positions at General Mills, Revlon and Burlington Industries.

Chamlin will report directly to Harris Hester, president and COO of Cluett Peabody Holding Co. which includes the Cluett, Peabody & Co. Inc. subsidiaries of Great American Knitting Mills Inc., J. Schoememan Inc., the Cluett Shirt Group and all Cluett International businesses.

''Matt Chamlin joins the Shirt Group at the beginning of a new decade,'' said Harris Hester, ''and we are confident that he will build a dynamic team that will position our brands as market leaders.''

Cluett, Peabody & Co. Inc. was acquired in March 1990 by Bidermann Industries, one of the largest manufacturers of men's and women's apparel in the world. Today Bidermann produces, markets and distributes such well-known branded apparel as ARROW shirts, GOLD TOE socks and BURBERRYS tailored clothing and dress furnishings. In addition to these, Bidermann is a leading producer and marketer of designer men's and womenswear offering labels by such prestigious international designers as Alexander Julian, Ralph Lauren, Bill Robinson and Yves Saint Laurent, among others.

OAK BROOK, Ill. (JULY 30) BUSINESS WIRE - McDonald's Corporation Monday announced that Duff & Phelps has upgraded the credit rating on its long-term debt to AA+ from AA.

Jack M. Greenberg, Senior Executive Vice President and Chief Financial Officer said, ''This rating recognizes McDonald's financial strength and ability to generate both significant and increasing cash flow. Cash

provided by operations surpassed $1.2 billion in 1989, reflecting a ten-year compound annual growth rate of 15 percent. We choose to reinvest a significant portion of earnings and cash flow back into our business which has earned an average return on equity of 21 percent over the past ten years.''

Daniel J. Donoghue, Vice President at Duff & Phelps commented, ''In our view, McDonald's is a world class company whose strong operating cash flow superior management team, and long-term growth potential assure it will remain a long-term fixed income investment of considerable safety.''

McDonald's long-term debt has been rated AA by Standard & Poor's and Aa2 by Moody's since 1982 and 1981, respectively. McDonald's commercial paper has the highest available rating from Moody's and Standard & Poor's.

McDonald's is the world's leading foodservice organization, serving 22 million people each day in more than 11,300 restaurants in 52 countries. Seventy-five percent of McDonald's restaurant businesses are locally owned and operated by independent entrepreneurs.

#90211b0884 07/30/1990 ~Business Wire

CONCORD, Mass. (JULY 30) BUSINESS WIRE - GenRad Inc. Monday reported a net loss for the second quarter, ended June 30, 1990, of $13,671,000, or 79 cents per share, which includes charges for restructuring and writeoffs of

$10,000,000, or 58 cents per share.

These charges include provisions for a Voluntary Retirement Program for which more than 100 employees are eligible; severance costs associated with the separation of more than 150 additional employees from the total work force, inventory writeoff of several mature product lines which the company will phase out over the next year and writeoffs related to software and other assets.

Revenues for the second quarter, 1990 were $46,593,000, an 8 percent sequential increase from the first quarter. A year ago, the company reported net income of $3,000, or $0.00 per share, on net sales and service revenues of $47,983,000.

For the six month period ended June 30, 1990, the net loss was $17,166,000 or 99 cents per share compared with net income of $964,000, or 6 cents per share for the first half 1989. Through the first half 1990, revenues were $89,738,000, compared to $97,320,000 in the 1989 period.

The company booked $49 million in orders during the quarter, a sequential increase over the first quarter and a 10 percent increase in orders compared to the year earlier period. Bookings for the quarter reached the highest order level attained since the first quarter, 1989. Revenues, orders and backlog recorded sequential advances during the quarter, the second consecutive positive book-to-bill quarter marked by GenRad since 1988.

President and chief executive officer, Robert E. Anderson pointed out, ''The pickup in orders and revenues during the second quarter reflected healthy international business and a very strong demand for the new GR 2286 high performance board test system.

''The loss from operations would have been similar to the first quarter's loss. However, further restructuring is necessary to reduce expenses in light of continuing market conditions, which have lagged domestically for the past year. Returning GenRad to profitability is our number one priority.

''Because we do not see a significant upturn in the domestic market in the near term, we are making substantial reductions in our expenses in order to hasten a return to profitability. For the balance of 1990, we will reduce our total work force of 1,860 by more than 200 employees.''

Most of the personnel separations associated with the restructuring will occur during the current third quarter and will result in lower expenses starting in the fourth quarter. These actions are expected to reduce annual payroll expenses by approximately $10 million.

''We also will cut back marginal product lines which produce low revenues but whose manufacture requires high transaction volume and complexity. These will be phased out on an accelerated basis,'' noted Anderson.

Anderson commented that during the second quarter the company advanced it program to reduce fixed overhead costs by leasing, for five years, approximately 105,000 sq. ft. of its Bolton, Mass. facility. That lease will have a positive effect on results of operations and cash flow beginning in January, 1991.

''We are determined to maintain and grow our market leadership position in the board test industry through a steady series of new product introductions this year and next. The product line phaseouts will allow us to focus our resources on potentially higher growth segments of our core business area,'' Anderson emphasized.

''In the current second half of this year, we will introduce a new board tester, new Design Automation products and technology, as well as new solutions for automotive electronics testing.''

AKRON, Ohio (JULY 30) BUSINESS WIRE - Chempower Inc., today announced second quarter revenues of $21.4 million, an 18 percent increase from the $18.1 million reported in the second quarter of 1989.

The company also reported net income of $2.2 million, a 22 percent increase from the $1.8 million reported in last year's second quarter. Per share earnings were 30 cents compared to 27 cents in the second quarter of 1989, based on 11 percent more weighted-average shares outstanding in 1990.

For the half-year, revenues were $35.9 million, compared to $30.7 million for the corresponding period in 1989. Net income was $3.1 million, or 43 cents a share, compared with $2.6 million, or 43 cents a share in 1989, based on 20 percent more weighted-average shares outstanding in 1990.

The Akron-based company provides asbestos abatement and insulation services and supplies. The company also operates offices in Cincinnati and Columbus, Ohio; Winfield, W. Va.; Washington, Pa.; and Waverly, Tenn.

#90211b0892 07/30/1990 ~Business Wire

HACKENSACK, N.J. (JULY 30) BUSINESS WIRE - The Alpine Group Inc. (ASE:AGI) reported net income of $3,846,000 ($.74 per share) for the year ended April 30, 1990 compared with a net loss of $11,671,000 ($2.84 per share) for the prior year.

Net income for the current year included a loss of $4,312,000 ($.87 per share) from continuing operations, a loss of $11,826,000 ($2.33 per share) from discontinued operations and an extraordinary gain of $19,984,000 ($3.94 per share) from extinguishment of debt. Net sales from continuing operations for the year ended April 30, 1990 were $7,937,000, as compared to net sales from continuing operations of $6,341,000 in fiscal 1989.

In addition, the Company announced that it has entered into a definitive agreement with Ontario Corporation, a privately-held company headquartered in Muncie, Indiana, for the sale of General Plasma, Inc., Alpine's wholly-owned subsidiary engaged in thermal spray coating operations, for $19,000,000 in cash. The agreement provides for a closing on August 31, 1990, subject to several conditions, including completion of financing arrangements by the purchaser. As part of the purchase Alpine will contribute to General Plasma in August 1991 a facility currently leased by General Plasma in Woburn, Massachusetts which Alpine is required to purchase from the lessor for $2,320,000.

Steven S. Elbaum, Chairman and Chief Executive Officer of Alpine, stated ''Fiscal 1990 results reflect the successful completion of our exchange offer in October 1989 of $30,106,000 (69 percent) of the Company's 13-1/2 percent Debentures for $22,579,500 face amount of Convertible Notes with an initial interest rate of 5-1/2 percent. The restructuring of the debt in equity securities owned by the company in American Trim Products Inc. which was sold by the company in 1988 and settlement of litigation, eliminates an uncertainty and strengthens our focus and commitment to the future. The company has determined to attribute no value to the $4.5 million face amount of preferred stock in American Trim which it continues to own. The restructuring resulted in a $12,150,000 non-cash charge to loss from discontinued operations.''

Elbaum continued, ''The recent determination to sell General Plasma, pursuant to an unsolicited offer, has resulted in that unit being characterized as a discontinued operation for fiscal 1990. As a result, continuing operations reflect a much diminished operating base and a disproportionately high corporate and other expense structure.

''We believe that this will be temporary as the Company transitions itself from a highly leveraged operation with a strong research and development commitment in its PolyVision flat panel display technology program to a focused information display business predicated upon building growth in information display operations and commercialization of our PolyVision

technology.''

The Alpine Group Inc. is a holding company with continuing operations in information display related businesses. Alpine is developing PolyVision, a proprietary flat panel display technology, for commercial applications in a wide variety of markets. Flat panel display technologies are utilized for the electronic display of information and graphics on screens and other display media including video displays, outdoor and indoor signage, point of purchase displays, public information, instrumentation and other media.

Alpine's information display activities also include the manufacture and sale of menuboard display systems and components to fast food, convenience store and restaurant markets through its Posterloid Corporation subsidiary and programmable controllers and other specialized products used in multi-image audio visual presentations through its Audio Visual Laboratories Inc. subsidiary.

#90211b0910 07/30/1990 ~Business Wire

IRVINE, CA (JULY 30) BUSINESS WIRE - Disease Detection International Inc. (NASDAQ:DDII) Monday announced the company has received shareholder approval at its recent annual meeting to amend its certificate of incorporation to effect a one-for-40 reverse stock split with respect to its outstanding Common Stock as of the close of business on Wednesday, Aug. 15, 1990.

After giving effect to the reverse stock split, the company's issued and outstanding Common Stock will be adjusted from 188,707,484 shares outstanding to approximately 4,717,484 shares.

Stockholders also approved an amendment to the company's certificate of incorporation which will increase its authorized number of shares of Common Stock, after giving effect to the reverse stock split, from 7.5 million to 15 million shares of Common Stock, par value 4 cents per share.

H. Thad Morris, president and chief executive officer of Disease Detection International, stated the company's board of directors recommended the reverse stock split in light of the National Association of Securities Dealers' proposed new rules that would remove from its automated quotation system (NASDAQ) any securities trading less than $1 per share for 10 straight days.

Morris also noted on July 16, 1990, the board of directors expanded the

board from three to six in number and elected three executive officers -- H. Thad Morris, president and chief executive officer; R. Darrell Phelps, vice president, marketing; and William Bradley Cooper, chief financial officer -- to the board.

DALLAS (JULY 30) BUSINESS WIRE - Zytec Systems Inc. (NASDAQ:ZSILFC) Friday announced financial results for the three and nine month periods ended June 30, 1990.

	Three Months Ended June 30,		Nine Months Ended June 30,	
	1990	1989	1990	1989
Revenues	$ 240,158	$299,529	$ 782,770	$1,106,989
Net (Loss) (a)	$(129,727)	$(68,605)	$(221,928)	$(292,112)
Net (Loss) (a) Per Share	$(.02)	$(.01)	$(.04)	$(.05)
Shares Outstanding	5,655,101	5,655,101	5,655,101	5,655,101

(a) For the three and nine month periods ended June 30, 1990, a change in accounting estimate reduced the net loss by $73,000 and $219,000, respectively.

Decreased revenue in the three and nine month periods ended June 30, 1990 is due to attrition of the company's lease base of telecommunications terminals.

Harmon Hardy, chief executive officer, commented, ''Because we anticipate that attrition of our lease base and the resulting decline in revenues will continue, we remain focused on the development and sale of Local Area Network (LAN) systems, a rapidly growing portion of the personal computer market. We are also excited about our joint venture to manufacture and market a pocket size cellular telephone for sale in Europe and North and South America, which we entered into on May 15th.''

Zytec Systems Inc., through its wholly owned subsidiary, Aftech Leasing, owns and operates a lease base of telecommunications equipment. The company also develops and markets a line of Local Area Network products.

MOUNT LAUREL, NJ (JULY 30) BUSINESS WIRE - Mary E. Crawford has been named president of HEC Marketing Communications Inc. by HEC founder and former president Elizabeth F. Harris.

Harris will become chairman of the HEC advisory board and chief executive officer. The announcement was made Monday at the corporate headquarters in Mount Laurel, N.J.

Crawford, a Malvern, Pa. resident, served in the past as vice president of marketing and sales for Mid-City Webb Co. of Chicago and as international vice president of marketing for Learn Inc., Mount Laurel, N.J.

According to Harris, Crawford will have the ultimate responsibility for all daily operations of the $2 million marketing communications company. HEC Marketing Communications operates under the umbrella of the HEC Communications Corp. These executive changes will allow Harris to concentrate solely on the development of the six other communications-related companies planned for this group.

#90211b0917 07/30/1990 ~Business Wire
SMYRNA, TN (JULY 30) BUSINESS WIRE - Nissan Motor Manufacturing Corp. U.S.A. Monday began bumper fascia production as part of an expansion of the company's production capabilities, said Jerry L. Benefield, president and chief executive officer.

The fascias are the first injection-molded components produced at the Symrna facility.

The new fascia operation will mold and paint front and rear plastic bumper fascias for the 1991 Sentra, which will be launched in August. Fascias for the 1990 Sentra are currently supplied by Polyrim Manufacturing Ltd. of Concord, Ontario, Canada, a division of Decoma Plastics, a Magna International company.

''We announced our plans to begin fascia production in April 1988 as part of an expansion of our production capabilities in the areas of engines, axles and bumper fascias,'' said Benefield. ''I'm pleased that we've proceeded according to schedule. Plastics production is a new venture for us, and we're excited about the potential growth of this new

operation.''

The 45,000-square-foot fascia facility represents an investment of approximately $20 million. A total of 44 employees will work on two production shifts in the fascia area.

Benefield said that once full production is reached in October, the company will produce 739 fascias per day.

In March 1989 Nissan began the assembly of rear axles for its light trucks and launched its Sentra engine assembly operations in June of the same year.

The company is also scheduled to begin producing stampings and all closure panels for a new mini-van to be jointly produced by Nissan and Ford in 1992.

Nissan in Smyrna is also in the midst of a $490 million expansion program for the addition of a third vehicle line to be launched in 1992.

Nissan Motor Manufacturing Corp. U.S.A., the American manufacturing subsidiary of Nissan Motor Co., Ltd., began production in June 1983. The company currently has approximately 3,700 employees on two production shifts and produces light trucks and Sentra passenger cars for the U.S. market.

#90211c0054 07/30/1990 ~Comtex
WASHINGTON (JULY 30) COMTEX - The 8-K report filed at the SEC shows on July 25, 1990, Compliance Recycling Industries Inc.(TICKER: CRIK) obtained

an $100,000 bridge loan from a private individual.

The loan, bearing interest of 14%, is to be repaid by Oct. 5, 1990. All of Compliance's fixed assest located at its Levittown, Pennsylvania facility were placed as collateral for the loan.

Compliance granted to the lender a three-year stock option plan for the purchase of 100,000 shares of restricted common stock at $1 per share, which Compliance agreed to register with the SEC.

If the loan was to remain unpaid by August 3, 1990, the purchase price for that restricted stock was to be reduced by $0.10 for each week following August 3, 1990 that the principal and interest remained undpaid.

A Compliance private placement stock offering for the raising of up to $1 million active at the time of this 8-K filing was to be used in part for the repayment of the bridge loan.

#90211c0058 07/30/1990 ~Comtex
WASHINGTON (JULY 30) COMTEX - The 8-K report filed at the SEC shows as reported in a press release dated of July 16, 1990, Capitalcorp Inc. reported that workout discussions were being carried out with senior lenders for Capitalcorp's leveraged buyout of Robert C. Browning Co. Inc. As per those discussions, Capitalcorp achieved the extension of the maturity date of those $7.7 million principal amount, secured loans until July 29, 1990. To achieve that extension, however, Capitalcorp agreed with those senior lenders, among other things, not to make payments on or in connection with its 7.5% Convertible Subordinated Debentures Due 2011 as long as those senior loans remain outstanding.

As a result of that agreement, Capitalcorp could not fulfill two outstanding requests for conversion of a total of $1.4 million in those 2011 debentures to cash. If those conversions were not honored or otherwise worked out by Capitalcorp by July 29, 1990, the accelleration of the full approximate $11 million principal amount of the debentures, plus accrued interest, could result.

These situations came about as a result of Capitalcorp's non-receipt, as of the date of this press release, of financing as per an existing financing commitment.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 20

ANNOUNCEMENT:

Girard Partners LP do not believe that they can formulate an attractive all

cash tender offer, but believe that financing may be available for a recapitalization of Pic'N Save Corp. following the election of the Girard nominees to the board. If no acquisition proposals are received prior to the Aug. 29, 1990 annual meeting and the Girard nominees are elected, Girard Partners LP will seek to consummate a recapitalization probably involving either the repurchase of a substantial number of common shares or an extraordinary dividend. If the nominees are not elected, Girard Partners LP expect to sell their shares as soon as practicable.

PARIS (JULY 30) - French consumer prices rose 0.2 percent in June over the May level, taking the inflation rate for the first six months of the year to 1.6 percent, according to figures published here Monday.

June prices were up three percent on a year on year basis.

-30- 434
#90211d0040 07/30/1990 ~French/German News Agency
BONN (JULY 30) - West German Economy Minister Helmut Haussmann has ruled out providing any extra public funds to finance the restructuring of the East German economy.

The "billions of Deutsche marks needed to adapt the infrastructure" in East Germany would have to come from the private sector, Mr. Haussmann said in an interview published Monday in the West German newspaper Neue Osnabruecker Zeitung.

He again urged a moratorium on East German enterprises' debts until they could turn their financial situation around.

The West German government in May set up a 115 billion Deutsche mark (70 billion dollars) fund to held East Germany soften the shock of the passage to a market economy.

This fund was financed through loans and savings on the federal budget.

The president of the West German trades union federation DGB said in an interview published in the Augsgurge Allgemeine newspaper Monday that West German companies were not investing enough in East Germany.

Heinz-Werner Meyer also said he thought it unlikely that East Germany would raise its standard of living to the level of West Germany within three years.

#90211d0070 07/30/1990 ~French/German News Agency
FLORENCE, Italy (JULY 30) - Florence's city council Monday vetoed construction of a McDonald's fast food outlet near the Dome, a Florentine landmark cathedral, despite approval from the church for a 250-seat restaurant.

The giant fast-food chain wants to open a restaurant 30 metres from the cathedral, in a 13th century building once inhabited by the Medici, which now belongs to the cathedral.

The Archbishop of Florence, Msgr. Silvano Piovanelli, has agreed to lease 600 square metres of the building for a multi-level restaurant, Italian press reports said.

A 1983 law gave the municipality guardianship over historic sites in the

city, and the new city council rejected the McDonald's proposal Monday.

"We have nothing against McDonald's, but you can't let more crowds of pedestrians and vehicles besiege the most sensitive part of the city. The king of fries and a hamburger must locate further away," Florence Mayor Giorgio Morales said.

#90211d0140 07/30/1990 ~French/German News Agency

SOFIA (JULY 30) - The number of people leaving Bulgaria has risen by 40 percent since last month's election victory by the renamed communists, now the Socialist Party, the opposition Demokrazia newspaper reported Monday.

The newspaper quoted Assen Jossiffov, director of the Institute for Sociology, as saying Bulgarians were leaving for political reasons but there was also a ''brain drain'' of skilled workers, particularly engineers and technicians.

The most popular destinations for emigrants were West Germany, France, the United States, Canada and Australia, it was reported.

#90211d0270 07/30/1990 ~French/German News Agency

HOBART, AUSTRALIA (JULY 30) - A radioactive canister was found intact Monday beneath tons of waste at a rubbish tip here, authorities said.

A spokesman for Tasmania's State Emergency Service said searchers were "99 percent sure" it was the one a demolition crew had accidentally removed from a zinc smelter last month.

Authorities ordered the dump to be searched after the canister was reported missing on Friday.

A spokesman for the refinery operator, Pasminco Metals-EZ, admitted that the disappearance of the canister had exposed a fault in safety procedures.

#90211d0330 07/30/1990 ~French/German News Agency

MOSCOW (JULY 30) - Fires kill 9,000 Soviet citizens per year on average, with 3,490 already dead in the first three months of this year, the Communist party newspaper Pravda reported here Monday.

Quoting official statistics, Pravda said 34,600 people had died in fires over the past four year.

About 80 percent of fires occurred at home, but there was a 23 percent increase last year in the number of blazes at depots and shops, some of them probably the work of arsonists trying to conceal the theft of goods, the paper suggested.

Some two million hectares (4.9 million acres) of forests were also damaged by fire last year with losses estimated at 900 million rubles (1.4 billion dollars at the official rate), the paper added.

BEIJING (JULY 30) - China's industrial development should not exceed 10 per cent annually during the 1990's to avoid outstripping agricultural growth and overtaxing power supply and transport systems, according to the Guangming Daily.

The article in the influential newspaper, extracts from which were published Monday in the official China Daily, said China should aim for sustained but moderate economic growth to meet the targets set for the year 2000.

Chinese authorities in the early 1980's set the goal of quadrupling 1980's gross national product (GNP) by the end of the century.

The article said that China's GNP more than doubled between 1980 and 1990, meaning that only 5.5 percent annual economic growth was necessary over the next decade to meet the target of quadrupling the 1980 GNP.

That growth rate could be powered by eight per cent to 8.5 percent annual expansion in industrial production. But the article said industrial development should not exceed 10 percent annually to avoid unbalancing the economy.

Limiting factors are the growth of agricultural output, which is expected to increase in value by 3.5 percent to four percent annually, electricity supply, due to grow by eight percent a year, and cargo transport volume, expected to expand by five to six percent.

The Guangming Daily said that for a balanced economy, industrial output should grow no more than 2.5 times faster than agricultural output, at about the same pace as the power supply, and no more than 1.7 times faster than the expansion of transport volume.

China put the brakes on its economy in September 1988 after rapid growth brought on economic overheating and inflation of nearly 20 percent annually.

The move slowed economic growth to 3.9 percent in 1989 compared with 11.2 percent in 1988, according to Asian Development Bank (ADB) figures. In 1990, the ADB projected 5.5 percent growth.

PARIS (JULY 30) - The Bull group said Monday it made a loss of 1.88 billion francs (348 million dollars) in the first half of this year, against a loss of 537 million (99.4 million dollars) in the same period last year.

Consolidated group turnover came to 15.9 billion francs (2.9 billion dollars) against 14 billion (2.6 billion dollars), but not on a comparable structure basis.

Bull acquired the micro-computer division of Zenith Electronics Corporation at the end of last year.

MADRID (JULY 30) - The Spanish Basque Siderunion consortium, which is allied to the Japanese Mitsui company, has bought 42.5 percent of the shares in the Spanish Acenor steel firm which were owned by the state Banco del Credito Industrial (BCI) company.

The price paid was not divulged. The rest of the shares in Acenor, one of the biggest steel manufacturers in Spain, are held by small private shareholders.

A plan put forward by Siderunion indicated that Acenor required investment of 12 billion pesetas (120 million dollars) to put its finances on a sound footing. The consortium has said it also envisaged investment of 40 billion pesetas in production equipment.

Acenor had sales of 60 billion pesetas, and made a loss of five billion

pesetas, last year.

MANILA (JULY 30) - The government has approved applications from seven foreign firms to enter the Philippines' market for small cars, trade department spokeswomen said here Monday.

The seven firms include local subsidiaries and joint ventures of Mitsubishi, Honda, Nissan and Daihatsu of Japan, Kia of South Korea, Fiat of Italy and Gurgel of Brazil.

All seven applicants to the so-called 'People's Car' program, will meet trade department officials Thursday and Friday to discuss final terms and conditions.

In order to qualify for the program, firms must build automobiles with an engine displacement of 1200 cc or less and a retail price of about 175,000 pesos (7,450 dollars).

A year after registration, five of the applicants will be allowed to enter the country's main car development program, the spokeswomen said.

Under the present program, only local subsidiaries of Mitsubishi, Nissan and Toyota, all of whom assemble more expensive models, were allowed into the market.

Among the original applicants to the People's Car program who pulled out or did not qualify, were China National Car, Aeolus and Harbin of China, Volvo of Sweden and Renault of France.

BEIJING (JULY 30) - China's state-run television told viewers Monday about Mongolia's general elections, without drawing attention to their multi-party format.

In its main evening newscast, China Central Television (CCTV) said the ruling Mongolian People's Revolutionary Party (MPRP) was expected to win the election held Sunday.

It illustrated its report with colorful video footage of Mongolians on horseback, dressed in national costume, romping to polling stations to cast their ballots.

But CCTV failed to mention that five opposition groups were challenging the

MPRP in the first multi-party elections ever held in Asia's oldest communist state, which lies on China's northern frontier.

China's conservative Communist Party leaders are believed to be wary of political reforms in Mongolia, one year after they used military force to silence the Tiananmen Square democracy movement.

Three million ethnic Mongols live in China, mainly in the Inner Mongolia region, where they are vastly outnumbered by ethnic Chinese settlers.

BONN (JULY 30) - West Germany Monday demanded that the United Nations adopt decisions to reduce worldwide emissions of carbon dioxide, blamed for the global warming effect, and to take action to preserve tropical rain forests.

Bonn Environment Minister Klaus Toepfer, speaking to reporters on the eve of preparatory talks in Nairobi Tuesday for the 1992 U.N. Environment and Development Conference in Brazil, said the rise of worldwide Co2 emissions should be arrested by the year 2000.

Toepfer, who is one of the vice-presidents on the preparatory committee for the Brazil conference, called on industrialised nations to cut their Co2 emissions 20 per cent by the year 2005.

The minister expressed concern over the continuing destruction of the world's tropical forests, the Earth's ''green lungs''.

The rate of the destruction of tropical forests rose to 20 million hectares last year from 11 million hectares in 1985. In other parts of the world forests were threatened by air pollution, he said.

''These alarming figures must prompt the North and South to take swift and joint action,'' the minister added.

As a first step the rate of destruction of tropical forests must be reduced to 11 million hectares a year, he said. In temperate latitudes, action must be taken to prevent further damage to forests by the turn of the century.

BEIJING (JULY 30) - Shanghai's proposed unified securities exchange will open in December with spacious quarters and a communications network that will span the city, a local newspaper seen here Monday said.

The exchange, billed as the only fully-fledged stock and bond market in China, is to have 1,400 square meters (15,000 square feet) in a building next to Suzhou Creek, a busy waterway that flows through the city center.

Listings will be transmitted by telephone circuits to 47 trading counters around the city, where buyers and sellers can place their orders, the official Liberation Daily said in its Sunday issue.

Membership in the exchange is subject to prior approval by the People's Bank of China, the nation's central bank, it added.

Several security markets have sprung up in China since the late 1980's, filling a need for more capital among state-run enterprises, but they are small-scale affairs which deal mainly in bond issues.

The Shanghai market is to initially handle national government securities, followed by securities issued by Shanghai enterprises. Foreign participation in the market is envisioned, but not immediately planned.

EAST BERLIN (JULY 30) - U.S. fast food chain McDonald's is planning to open 10 restaurants in former hardline communist East Germany by the end of 1991, a company spokesman said here Monday.

Staff at the first branch in the town of Plauen, close to the border with the West German state of Bavaria, are due to start serving customers by December this year. Further restaurants are planned for East Berlin, Leipzig, Dresden and Chemnitz.

The head of East Germany's parliamentary committee on ecology matters

recently called for a ban on McDonald's being allowed to operate in East Germany.

Environmentalists here have said they fear the throwaway packaging and cutlery used by the company will lead to a large increase in the amount of refuse dumped in towns and cities.

#90211d1290 07/30/1990 ~French/German News Agency

Munich, West Germany (JULY 30) - Dresdner Bank Ag, West Germany's second-largest commercial banking institution, posted first half growth of 1.8 percent for partial operating results of 956.1 million Deutschmarks, topping record figures for the first half of 1989, according to figures announced here Monday.

Total operating results were developing even more favourably, a statement by the bank said.

On a parent stock corporate-wide basis, partial operating results were up 10.2 percent to 603.8 million D-Marks from the first half of 1989. Group results also showed a two-figure growth rate due to trade profits, it was said.

Volume of business for the Dresdner group grew 3.7 percent to 262.7 billion D-Marks, and on the corporate level by 4.9 percent to 152 billion D-Marks. Group interest surplus was 2.217 billion D-Marks, up 4.9 percent from year-ago levels.

#90211d1440 07/30/1990 ~French/German News Agency

MANILA (JULY 30) - The Philippines stands to lose seven to nine billion dollars in new financing if it suspends payment on its 26.1 billion dollar foreign debt, Finance Secretary Jesus Estanislao said here Monday.

He warned a senate committee that foreign creditors would cut off all assistance and investments if congress pushed through with a plan to declare a two-and-a-half year moratorium on foreign debt payments to fund reconstruction following a massive July 16 earthquake.

Such a suspension would "put us in arrears and that means all the money that is open to the country will be completely cut off," Mr. Estanislao said.

"Some governments have already told me that once we go into moratorium, forget even about grants and forget about investments that we're going to get here and forget about easier access to their markets," he said.

The finance secretary named only Australia and Canada.

Various foreign-debt reduction schemes sealed between 1985 and 1989 would also be endangered by a moratorium, he said.

He said any move towards debt reduction should aim at reducing domestic debt service since it was twice as large as the servicing for the foreign debt.

The government "should leave no stone unturned in our serach for domestic sources" to fund reconstruction, Mr. Estanislao said, citing savings, austerity, reprogramming of expenditures, economic reform and privatization.

He also reiterated President Corazon Aquino's instructions to negotiate for a speedy release of funds already committed, a refinancing facility, a debt reduction package and new funds from bilateral sources.

Budget Secretary Guillermo Carague acknowledged that a 10 billion peso (419 million dollar) special budget appropriation to fund initial quake reconstruction would require "external sources."

He said the Central Bank still had 80 billion pesos (3.3 billion dollars) in reserves that was available, but "as much as possible... we don't want to tap that because it will be inflationary," he said.

Finance officials previously said the special appropriation would be financed by government savings and the floating of special "reconstruction bonds," scheduled to be launched by Mrs. Aquino on Tuesday.

#90211d1610 07/30/1990 ~French/German News Agency
NEW DELHI (JULY 30) - India's coalition government appears to be heading towards another crisis, again involving its two top men, only two weeks after surviving a bout of turmoil that almost brought it down.

The latest trouble is over a forged letter purportedly written by Prime Minister Vishwanath Pratap Singh attacking senior cabinet colleague Arun Nehru in November 1987, when both men were in the opposition.

The letter, addressed to President Ramaswamy Venkataraman, accused Mr. Nehru, currently the commerce minister, of being involved in a 1.3 billion dollars arms deal with Sweden's Bofors firm in 1986.

The Bofors' arms deal has been surrounded by allegations that senior officials accepted bribes and commissions to see it through.

Deputy Prime Minister Devi Lal, whose son's shock reinstatement as chief minister of Haryana state provoked a rash of cabinet resignations including that of Mr. Nehru and the prime minister a fortnight ago, sent a copy of the "letter" to Mr. V.P. Singh last week and demanded action against the commerce minister.

The letter, which reached Mr. V.P. Singh just before he left for Moscow, has been dubbed a forgery by both the prime minister's and president's offices, sparking fresh bickering within India's main ruling party.

Newspapers reported Sunday that an angry Mr. Nehru and a handful of other ministers had asked Mr. V.P. Singh the night before to sack his 75-year-old deputy, who was now said to be very apologetic.

Mr. Lal, a wrestler-turned-politician, has indicated that he was unsure about the authenticity of the letter and despatched it to the premier as it "came my way." He did not say how he obtained it.

The Tribune daily said Mr. V.P. Singh, 59, who took office barely eight months ago on a clean government ticket, was under "tremendous pressure" to sack his ambitious deputy from the cabinet.

Other newspapers carried similar reports, with the Patriot saying in a front-page story that Mr. Lal might be sacked before parliament convenes here August 7.

Other reports added that Mr. V.P. Singh had ordered the federal Central Bureau of Investigation (CBI) to probe who forged the letter and his signature.

"Yes, we are heading to one more problem," said a top leader of Mr. V.P. Singh's Janata Dal (People's Party), the dominant partner in the National Front government and to which both the premier and his deputy belong.

#90211d1630 07/30/1990 ~French/German News Agency

LONDON (JULY 30) - British press magnate Robert Maxwell said Monday he could join a mineworkers' union in a bid for state-owned electricity producer PowerGen, due to be privatized early next year.

Maxwell said he had been approached by Roy Link, secretary general of the independent Union of Democratic Mineworkers (UDM), which has said it is interested in taking over PowerGen.

The authorities now had "no alternative but to look for bids, and the independent mineworkers' union are as able to provide a bid as anybody else," Maxwell said.

The UDM has come forward as a would-be bidder since the government revealed last week that it was considering selling PowerGen to a private company instead of the originally-envisaged privatization through a stock market listing, and said it was holding talks with British conglomerate Hanson.

Maxwell said that the government should divide those British electricity companies able to be privatized into six or ten units to ensure true competition which would result in lower prices for the consumer.

#90211d1640 07/30/1990 ~French/German News Agency

MOSCOW (JULY 30) - Soviet President Mikhail Gorbachev has moved to stop Soviet republics, buoyed by recent declarations of sovereignty, from asserting financial autonomy.

Such autonomy, Gorbachev argues, would disrupt the country's economic system at a time when he is involved in the delicate double-act of introducing a market economy and reforming the union treaty.

In a move to prevent the Soviet Government's deregulation of banking activities from turning into a run on banks by republican governments, Gorbachev on Sunday issued a decree calling on local authorities to refrain from unilateral moves to assert financial autonomy.

"The republican and union bodies are making some decisions without taking into account the established economic ties and cooperation of republics within the framework of the USSR as well as the long-term interest of the entire country and its citizens," the president warned in his decree.

"In order to prevent negative trends and concentrate efforts on the solution of urgent tasks and on the formation of an all-union market, it is essential to work out common principles and approaches to the organisation of financial and credit relations in the USSR and to use them in preparing a union treaty."

The warning followed moves by the Russian federation to take control of all the banks on its territory, while other republics, such as the Ukraine, have called for the creation of their own currency.

Moscow is currently seeking to negotiate the terms of a new union treaty with the 15 Soviet republics, although the Baltic states of Lithuania, Latvia, and Estonia have already said they will not participate in such a venture. Soviet officials have said they hope to have a new draft union treaty ready by the end of the year.

The Soviet Government, along with the republics, should start work immediately however on how their financial and credit relations should operate under the terms of a new union treaty, Gorbachev said.

Gosbank, the state bank, and the state banks of union republics should set out a common credit-and-monetary policy and coordinate other activities in the run-up to the conclusion of a union treaty.

"The procedure, established by current legislation, for the issue of loans and the carrying out of settlements by the banks of the USSR shall remain in effect until the conclusion of a new union treaty," the presidential decree said.

"I am drawing the attention of the supreme soviets of the union republics to negative socio-economic consequences that may be brought about by the disruption of the country's single monetary system and by the introduction of republican money with a closed sphere of circulation," Gorbachev said.

"Joint efforts of all union republics and the persuance of an active, coordinated monetary, finance-and-budgetary policy are necessary to normalize the country's finances." Gorbachev fears that the current devolution of power to the republics could spell economic disaster for the union as a whole.

Already, republics such as Russia, the Ukraine and Belorussia have called in their sovereignty declarations for a share-out of the union's gold, foreign currency and diamond resources, while Russian republic president Boris Yeltsin has called for direct foreign economic ties.

As an initial move along these lines, Yeltsin told Latvian radio at the weekend that Russia would sign state political and economic agreements with

the three separatist Baltic republics within four to six weeks. This followed talks with the presidents of Lithuania, Latvia and Estonia at the weekend in Jurmala where he is currently on holiday.

#90211d1670 07/30/1990 ~French/German News Agency

KATHMANDU (JULY 30) - Nepal has abolished capital punishment for murder and subversive activities, and laws strictly curbing freedom of speech, a Law and Justice Ministry spokesman said Monday.

The death penalty now remains in effect only for acts of espionage and acts against the royal family and the crown, the spokesman said.

He said that under the recently approved "Law Repeals Act 1990," the New Civil Code article of 1986 that stipulates capital punishment for murder or involvement in murder or subversive activities has been abolished.

Likewise, the draconian 1980 Press and Publications Act and the Associations Control Act of 1962 have also been repealed, he said.

"In the present changed political context capital punishment for subversive activities is deemed inconsistent after the implimentation of a multiparty, democratic system in Nepal," the spokesman said.

The former partyless Panchayat government, which was disbanded by Nepal's King Birendra in April following nationwide pro-democracy protests, had enacted the laws that were repealed.

Capital punishment for subversive activities was enacted following a series of bomb attacks in Kathmandu in June 1986 by an India-based, anti-monarchist group campaigning for a multiparty government and freedom of speech.

The attacks left eight people dead and 22 injured.

The leader of the group and three others were given death sentences in absentia.

Eight others involved in the attacks were given jail terms ranging from 20 to 33 years. They are still living in India waiting for royal amnesty and to return to Nepal to join political activities.

#90211d1690 07/30/1990 ~French/German News Agency

TEL AVIV (JULY 30) - An Israeli court Monday placed six Palestinians under investigative detention for five days in connection with the

planting of a bomb on a Tel Aviv beach that killed a 17-year-old Canadian girl.

The six were detained after the bomb blast Saturday that left 19 other people injured. The Toronto girl, identified as Marni Kimmelmann, was travelling with a Jewish tour group.

The court said it found inconsistencies in the alibis of the detainees, among them two youths. Eyewitnesses said they saw the men near the scene of the attack shortly before the pipe-bomb blew up. The suspects maintained that they were only taking a stroll.

The attack, the first fatal bombing on a Tel Aviv beach in years, prompted a revenge attacks on Palestinians in the area by irrate Israelis. Four Palestinians were beaten up.

Defence Minister Moshe Arens said Monday he had no information as to who was behind for the attack. No group has claimed responsibility.

#90211d1720 07/30/1990 ~French/German News Agency

LONDON (JULY 30) - Prices of North Sea Brent, Britain's benchmark crude, continued to decline on Monday in the wake of a drop late Friday, as the market absorbed implications of a production reduction agreement reached in Geneva by the Organization of Petroleum Exporting Countries (OPEC).

Brent for September delivery was going in mid-day for 19.25 dollars a barrel, against 19.53 at the Friday close.

It had firmed earlier Friday afternoon to 19.65 dollars a barrel immediately after announcement of the OPEC agreement to cut production to 22.5 million barrels a day until the end of the year and to raise the reference price to 21 dollars a barrel, compared with the previous 18 dollars.

Analyst Nick Antill of County Natwest brokerage commented that the gain could not be maintained since the market quickly realized that the agreement was "nothing new".

He said that "The OPEC production ceiling of 22.5 million barrels per day is what was agreed in Jeddah (Saudi Arabia) on July 10 . . . The reference price is just a target, not a real price . . . Now people take the view that inventories are still high, and that production has not come down by that much".

Mr. Antill predicted that oil prices will lose a bit more ground in the short run, and said that "A great deal will depend on whether OPEC

countries adhere to their agreement -- which I think they will".

He said that it would be necessary to wait until the last quarter of the year to note a price recovery, which will be due to a seasonal rise in demand and a drop in output from the British North Sea sector to to maintenance work to get under way in September and October.

#90211d1770 07/30/1990 ~French/German News Agency

LONDON (JULY 30) - Dry cargo shipping rates firmed over the past week, thanks mostly to the coal-carrying sector, where U.S. east coast loaders were obtaining improved deals.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index (BFI) climbed 28 points in the week to end at 1,157 points.

Coal-carrying rates from the U.S. east coast to Japan improved to 13.1 dollars per ton in index value terms from 12.5 at the end of the previous week, thanks to the fixing of a Japan-bound 130,000 tonr at 14.25 dollars per ton in the U.S. Gulf.

The previous week a similar-sized vessel was paid 12.5 dollars for a voyage to the same destination from a Virginian port.

The grain sector also showed firm, particularly for transatlantic quotations, whose index value was marked up from 9.417 dollars per ton the previous week to 10.125 dollars.

The U.S. Gulf to Japan route was at 18.75 dollars per ton by the end of the week, up from 18.667 previously, while the North Pacific to Japan route climbed from 10.017 dollars per ton to 10.125.

Hopes that Soviet grain charterers would increase activity were raised by news of a deal between the Soviet authorities and De Beers' Central Selling Organization over diamond marketing, which will provide Moscow with much-needed foreign currency.

Traders also saw the grain harvesting difficulties being experienced in the Soviet Union as positive for future import levels there.

In the ore sector the index value on the West Africa to Northern Europe route increased from 5.45 dollars per ton to 5.483 dollars during the course of the week.

But in the fertilizer sector rates paid to vessels in the 12,000 to 20,000 ton range were down to 33.50 dollars per ton from 34 dollars at the beginning of July.

Among timecharter movements, 50,000 to 70,000 tonrs were obtaining 8,100 dollars per day for return trips between Japan and Australia, up from 8,000 dollars per day the previous week.

#90211d1790 07/30/1990 ~French/German News Agency

Bonn (JULY 30) - West Germany, Poland's biggest Western creditor, Monday signed a 3-billion mark (1.86-billion-dollar) agreement to reschedule Poland's debts.

Under the deal Poland's repayment deadline is extended by 14 years. The Poles' obligations to West German firms and commercial banks would have been due March 31, 1991.

It was the fifth time that Bonn has agreed to reschedule Poland's debt since 1981. The agreement followed a multilateral rescheduling accord reached by the Paris Club of Western creditor.

The Bonn foreign ministry said Poland's hard currency foreign debt was estimated to stand at 41 billion dollars, including 28 billion dollars owed to Western creditors.

ZURICH (JULY 30) - A former ambassador of deposed Phillipines President Ferdinand Marcos has returned 16 million dollars from frozen Swiss bank accounts to the government of the Philippines, Manila government lawyer Moritz Leuenberger said here on Monday.

The former ambassador of the late president, Roberto Benedicto, acquired the money illegally and returned it before the Swiss federal court gave a judgement, he said.

The awaited judgement was on legal moves by Marcos representatives against judicial collaboration between Switzerland and the Philippines which is trying to recover money allegedly acquired illegally by people close to Mr. Marcos.

"This is the first sum which was frozen in Switzerland because of judicial co-operation, which has been returned to the Philippines," Mr. Leuenberger said.

A sum of two million dollars was recently paid to Manila from an account in Geneva, but did not form part of the funds frozen under the judicial procedure,

he said.

Mr. Leuenberger said that Mr. Benedicto, aged 70, "preferred to renounce" the money mainly because he wanted to settle problems with his heirs.

Some 450 million dollars in the name of the Marcos family have been frozen in bank accounts in Zurich and about 70 million dollars in the canton of Fribourg.

In these two cantons decisions to allow judicial co-operation were taken by lower courts than the supreme federal tribunal which it was hoped would give judgement on the procedure this autumn, Mr. Leuenberger said.

In Geneva, where legal action has also been set in motion, a decision by the lower court has not yet been given.

KABUL (JULY 30) - President Najibullah's surprise visit to Moscow is linked to this week's superpower talks on the future of Afghanistan, official Afghan sources said here Monday.

"Mr. Najibullah will be at hand for consultations if there is some kind of an agreement between the two foreign ministers on a political solution to the Afghan crisis," a senior Afghan official said.

The Kabul government announced Mr. Najibullah's visit Sunday, hours after he had left for Moscow on what was described by his office as a "short visit for a medical examination."

The 43-year-old president looked confident and quite healthy when he addressed a press conference here eight days ago and had been appearing on television almost daily attending official functions.

He flew to Moscow just three days before the summit between Soviet Foreign Minister Eduard Shevardnadze and his U.S. counterpart James Baker in Soviet Siberia.

A senior Afghan official said Mr. Najibullah had made it clear that any kind of deal between the superpowers should not exclude the Kabul government and eventually Afghans must be left alone to settle their 12-year-old conflict.

"Moscow will not agree to replace Mr. Najibullah unless through an election,
or some kind of a tribal assembly," a Soviet source here said Monday.

He said Mr. Najibullah had been able to consolidate himself both politically and militarily since the completion of the Soviet troop pullout from Afghanistan in February last year.

Mr. Najibullah's sudden visit was also his first foreign tour after he survived an armed coup on March 6 by his then defence miniser Shah Nawaz Tanai,
who has since fled Afghanistan.

Government spokesman Humayun Mukammel said no replacement for the president has been formally named during Mr. Najibullah's absence.

Officials had said earlier that Mr. Najibullah's planned visit to India within a month was going to be his first foreign trip since the failed coup.

WARSAW (JULY 30) - A visitor to the zoo in Wroclaw, Poland, was stripped naked by cheeky chimpanzees, a report said Monday.

The unidentified man was welcomed into the cage by the furry primates, but tired of being the centre of attention when they began pulling off his clothes, according to Poland's Pap news agency.

Zoo personnel said he was stark naked when they freed him. They said it was a fortunate thing for him that the chimps had not been in a more mischievous mood.

PARIS (JULY 30) - French auto parts maker Valeo said here Monday it was setting up a new company in Turkey with Turkish group Transturk to produce alternators and starters.

Initial investment in the new company, Valeo Transturk Elektrik, would total 60 million francs (11 million dollars), with Valeo holding a 51 percent stake.

A new plant is to be built, on a site yet to be chosen.

The venture is Valeo's third in Turkey with Transturk as its partner since 1988.

JOHANNESBURG (JULY 30) - A 17-year-old Colored (mixed-race) girl kidnapped as a toddler 14 years ago and raised as a Zulu has been reunited with her parents here after a dramatic plea on national television.

Teachers had for years refused to believe the tale told by the girl they knew as Lindiwe Sebeko that she had been kidnapped and that her real name was Tasha, as her schoolfriends called her.

But amid more and more frequent beatings from the foster mother, she convinced a social worker she was telling the truth.

Her television appeal Saturday was seen by turner Cedric Harms, 35, and his wife Shireen, 37, at their home in the southern suburb of Riverlea, who lost their toddler daughter in a downtown department store 14 years ago.

Although details of the kidnapping did not tally, Mrs. Harms phoned the social worker and described birthmarks on her daughter Natasha's cheek and foot, and police were satisfied Natasha and Lindiwe were one and the same.

The foster mother, an alcoholic, has now confessed to police how she abducted the girl she raised as an only child, Mrs. Harms told Agence France-Presse Monday after a tearful reunion.

"At first I hated her, I wanted her dead," she said. "But I'm just grateful she didn't make a prostitute out of her or kill her for medicine."

Now Natasha will have to improve her English or learn Afrikaans if she wants to get to know her own parents.

JAKARTA (JULY 30) - Indonesia's export income surged 14.8 percent in the first quarter of this year to 5.81 billion dollars from 5.06 billion a year earlier, the Central Bureau of Statistics (CBS) said Monday.

Oil and gas export earnings, accounting for 41 percent of the total, jumped 17.6 percent to 2.41 billion dollars in January-March from 2.05 billion in the corresponding period of 1989, the CBS said in its monthly report.

Income from non-oil commodities grew 12.6 percent from 3.02 billion dollars to 3.40 billion, helped by stronger performance in the manufacturing sector.

The report showed income from textile and garments jumped 57 percent to 679 million dollars to become the largest export earner outside oil and gas.

Income from plywood, the top non-oil export commodity last year, grew 21 percent to 624 million dollars.

The report said revenues from the metal sector fell four percent with lower revenues from tin, aluminium, nickel and copper. Earnings from natural rubber and crude palm oil also declined, but those of coffee and tea increased.

WIESBADEN, WEST GERMANY (JULY 30) - West German consumer prices were up by 2.4 percent in July by comparison with the same month last year, according to provisional figures released Monday by the Federal Statistics Office here.

The Office said the final figure for July will be announced in early August.

In June, consumer prices were up by 2.3 percent year on year. The June price index was 106.8, the base of 100 being based on 1985 prices.

KIEL, WEST GERMANY (JULY 30) - Former West German chancellor Helmut Schmidt, hospitalized last Wednesday for heart problems, is to remain in Kiel University Hospital for the rest of the week, a spokesman said Monday.

Doctors moved him out of the intensive care unit Friday and now planned to give him further tests, the spokesman said.

Mr. Schmidt, 71, has suffered from a heart condition for the past 10 years and wears a pace-maker. He was taken ill while on holiday with his wife Loki at their lakeside house near this northern town.

The spokesman hinted that the former chancellor, now publisher of the Hamburg-based liberal weekly Die Zeit, was writing his memoirs in hospital.

KUALA LUMPUR (JULY 30) - A Japanese electronic components manufacturer said Monday it will invest 30 million Malaysian dollars (11.1 million U.S.) to put a second manufacturing plant next to its existing one in southern Malaysia.

Alps Electric (Malaysia) Sdn Bhd Managing director Kanehiro Yamashita said the group was negotiating with the Negri Sembilan state government to acquire another 20 acres of land in Nilai for that purpose.

He said Alps Electric of Japan, the world's leading manufacturer of electronic components for use in audio and video appliances, had selected Malaysia as the base for its growth in Asia because of the country's strategic position in the region.

Yamashita said the new plant would manufacture electronic components for industrial applications including tactile switches, keyboard switches and mice for computers, audio-visual and communications equipment, printers for calculators, word processors and computers.

The existing plant costing 31 million dollars (12 million U.S.) was officially opened Monday by Deputy Prime Minister Ghafar Baba. It manufactures electronic components for audio and video products including tuners, modulators, switches, remote control units and cassette mechanisms.

Yamashita said demand for Alps Electric (Malaysia) products had been encouraging, with sales reaching 40 million dollars (18 million U.S.) in the first half of this year and targeted to reach 60 million dollars (22 million U.S.) in the second half.

He said the plant in Malaysia is the 14th manufacturing facility to be established by Alps Electric Co. Ltd.

GENEVA (JULY 30) - Four African nations remain the countries where tourists are most likely to catch cholera, the World Health Organization (WHO) said Monday.

While the scale of epidemics that hit Angola, Mozambique, Zambia and Malawi during the past three years was on the decline, those countries still suffered the highest rates of infection, a WHO expert told Agence France-Presse.

However other countries might also be experiencing cholera epidemics but failing to report them out of fear of hurting tourism, he said.

The Soviet press reported an outbreak of 30 cases in Stavropol, in the south of the Russian Federation, last week, but Soviet authorities so far had failed to act on a request by WHO for further details, the expert added.

Vaccinations usually offer poor protection against the disease. But in regions at risk, the average traveller should be able to avoid cholera by not eating raw or poorly washed fruits and vegetables, the WHO said.

VICTORIA (JULY 30) - A five-metre fishing boat which disappeared near the Seychelles with two Britons aboard four weeks ago has been found empty some 320 kilometres (200 miles) from Mahe island, it was reported here Monday.

A French fishing vessel whose crew spotted it said the boat was filled with water to the gunwales. But there was no sign of Philip Beadle of Durham, who works here as an education consultant, and his friend Norman Roberts, a tourist from Cheltenham.

A message to Robert's wife was found scratched on the vessel's fibreglass side. It read: "Beadle-Roberts July 1990, Mahe Seychelles engine problems...Diana 13 years of faithful love". His wife has returned to England.

A British air force plane, a British navy destroyer HMS York and an American aircraft joined the search for the boat after it went missing July 3.

JERUSALEM (JULY 30) - Almost all 580 employees of the Soltam weapons factory Monday occupied the firm in northern Israel for the second consecutive day to protest the sacking of 180 workers, police sources said.

Several protestors emerged from the factory buildings Monday to place burning tires along the roads leading to Yokne'am, a village in northern Israel some 20 kilometers (12 miles) away from the port of Haifa.

Soltam, which belongs to the powerful Histadrut General Federation Of Labour, makes cannons, mortars and ammunition.

The firm has witnessed a financial set-back over the past several years with losses reaching 50 million dollars in 1989 with fewer orders for weapons coming from abroad and the Israeli army.

NEW YORK (JULY 30) - Police Monday said they were bracing for violence in an Asian-Chinese gang turf war in Chinatown here after a weekend shootout at a Vietnamese funeral.

Vinh Vuy, 21, reputed leader of the Canal Street Boys gang, had been killed in a drive-by shooting in Chinatown Wednesday.

He was being buried in Linden, New Jersey, on Saturday when three of the

"mourners" produced automatic weapons concealed in flower arrangements and riddled the funeral party, wounding seven, police said.

Police here said they expected the gang struggle to spill over to cities and towns accross the Hudson River from New York.

The mourners, mostly belonging to the larger Vietnamese gang, Born to Kill, pulled out weapons and returned fire.

New York police said the Canal Street Boys had recently been drawing fire from powerful Chinese gangs, including two called Ghost Shadows and Flying Dragons, by operating on their traditional turf in lower Manhattan.

The Vietnamese gangs are said by police to specialize in extortion and heroin trafficking. They are also said to operate in Houston, Texas, Boston, Massachussetts and Los Angeles.

#90211d2960 07/30/1990 ~French/German News Agency

LONDON (JULY 30) - Aluminium prices continued on Monday the surge begun late last week on strong buying support, reaching a ten-month high for three-months metal as long-term fundamentals re-asserted themselves.

Three-months metal was quoted at 1,755 dollars per ton in after-hours kerb trading, against 1,749 in afternoon ring deals and against 1,695 on Friday.

Traders said that the prospect of a tight supply-demand situation well into the future, which includes expectations for a 600,000-ton production deficit by 1992, worried the market.

They said that despite the shortlived nature of last week's strike at Alcan's Kitimat smelter in Canada, the prospect of more labour contract difficulties in North America in the second half of 1990 was worrying operators.

Elsewhere, copper weakened on profit-taking as New York operators put pressure on early London gains.

Expectations of a 7,000-ton increase in LME stock figures due for release Tuesday also weighed on sentiment.

Three-months copper was quoted at 1,518 pounds per ton on the kerb against 1,520 on the ring and 1,536 on Friday.

#90211d3010 07/30/1990 ~French/German News Agency

Amman (JULY 30) - The debt-burdened Jordanian government announced Monday that it had set a fee of 6,000 dollars as the price for exemption from mandatory two-year military service for Jordanians working abroad.

Labour Minister Qaseem Obeidat said that Jordanians working abroad who are liable to concription could replace the service with a payment of 6,000 dollars.

''Any Jordanian who can show us a work contract abroad would be eligible for the exemption,'' the minister told reporters. He said the new law applies only to expatriates, who number about one million Jordanians, most of them working in Gulf Arab states.

He said that there are 40,000 Jordanians living abroad who are presently eligible for the two-year service. Those, he said, ''often fear returning home because they would have to serve as conscripts for two years''.

Obeidat explained that the cabinet decided to take the exemption fee measure to facilitate the return of Jordanians who study abroad but do not return to avoid the military service. At the same time, it would bring hard currency to the country.

He said the decision also encourages Jordanians to seek work abroad ''which helps to ease the unemployment problem and bring foreign exchange remittances to the kingdom''.

There are 325,000 Jordanians working in the Gulf states and these transfer nearly 800 million dollars a year to their relatives in Jordan.

RANGOON (JULY 30) - The National League for Democracy (NLD), winner by a landslide in Burma's May elections, on Monday rejected the military government's statement last week that it would retain power until a new constitution is adopted.

"We entirely reject SLORC's statement," Chan Aye, a top NLD, official told a press conference here.

SLORC, or the State Law and Order Restoration Council, is the formal name for the military government which seized power in late 1988 to end months of demonstrations and strikes by a nationwide pro-democracy movement.

"We don't accept the concept that we do not have legislative power," said Mr. Chan Aye, a member of NLD's central executive committee.

He called for talks between the two sides to break the impasse.

The NLD, whose secretary general Aung San Suu Kyi, daughter of Burma's independence hero General Aung San, has been under house arrest for more than a year, swept the May 27 general elections, winning 392 of the parliament's 485 seats.

But on Friday SLORC said in an announcement it was retaining legislative, administrative and judicial powers until a new constitution is adopted.

#90211d3110 07/30/1990 ~French/German News Agency

JOHANNESBURG (JULY 30) - The following shows preliminary figures for South Africa's exports of gold, coal, silver, diamonds, chromite, copper, lead, manganese ore, zinc and uranium ore for May 1990, issued here Monday by the Minerals Bureau of the Department of Mineral and Energy Affairs.

The commodity named is followed, unless otherwise stated, by the export volume for May 1990, then in brackets export volume for April 1990 and May 1989, then export value for May 1990 in rands and dollars.

Figures for such stategically important minerals as platinum, ferro-chrome, cobalt, titanium, zirconium and antimony are classified and therefore not available.

The randdollar conversions use the Reserve Bank's calculation of the five forex dealing banks' average rate for May 1990 of 37.8 U.S. cents to the rand.

Gold: Production (export volume not available) 45,737.26 kg (47,198 kg50,450 kg) 1.346 billion rands (522.2 million dollars).

Coal: 3.982 million tons (2.808 million tons May 1989 not available), 310.49 million rands (120.47 million dollars).

Silver: 19,864 kg (12,397 kg18,470 kg), 7.009 million rands (2.719 million dollars.

Diamonds: Production (export volume and value not available) 675,765 carats (692,406 carats689,182 carats).

Chromite: 77,317 tons (134,93284,023 tons), 14.544 million rands (5.626 million dollars).

Copper: 4,863 tons (9,48911,600 tons), 29.465 million rands (11.43 million dollars).

Lead (metal-in-concentrate): 9,954 tons (6,2589,920 tons), 13.4 million

rands (5.19 million dollars).

Manganese ore: Production (export volume not available) 285,028 tons (292,033259,851 tons), 58.768 million rands (22.80 million dollars).

Zinc (metal-in-concentrate): Production (export volume and value not available) 3,472 tons (3,1927,490 tons).

Uranium Oxide: Production (export volume and value not available) 227,378 kg (263,251413,742 kg).

#90211d3130 07/30/1990 ~French/German News Agency
BRUSSELS (JULY 30) - European Economic Community Agriculture Commissioner Ray MacSharry proposed a 30 percent cut in world farm subsidies in 1986-1996 to EEC trading partners on Monday.

An EEC Commission spokesman said that the proposal does not commit the Commission, the Community's executive arm, since the commissioner made it at an informal meeting at Dromoland Castle, Ireland, of farm ministers of Australia,
Japan, Canada and the United States.

"If there are to be decisions in this field, it is up to the Commission and to the EEC Council of Ministers to make them", the spokesman commented.

He added that "Such informal meetings are held to exchange ideas and try to move things forward", and stressed that the proposed showed the EEC desire to "move forward with negotiations" within the framework of the General Agreement on Tariffs and Trade (GATT).

-30- 1064
#90211d3190 07/30/1990 ~French/German News Agency
MOSCOW (JULY 30) - Armenian militants have clashed with Soviet security forces along the border between the republics of Armenia and Azerbaijan, the Soviet news agency Interfax reported Monday.

It said unidentified persons late Sunday fired shots from Armenia at Azerbaijani villages in the Nakhichevan and Kazach regions. No one was hurt.

Armenians Sunday shot at the Azerbaijani village of Gjunnut. Bullets fired from Armenia Friday hit a police station in Batabat, Nakhichevan.

Soviet President Mikhail Gorbachev last week warned all paramilitary groups in the Soviet Union that security forces would disarm them by force if they

did not hand over their weapons by August 9.

The interior ministry had said Armenian militants possessed more than 6,000 firearms. Estimates of the number of militants vary between 10,000 and 100,000.

-30- 1021

#90211d3200 07/30/1990 ~French/German News Agency

SOFIA (JULY 30) - The Bulgarian Government called in the Yugoslav ambassador Monday and expressed concern over the rights of northern Yugoslavs viewed here as ethnic Bulgarians, it was announced here.

Deputy foreign minister Stefan Staikov made the complaint a day after Yugoslav authorities turned back a high-ranking Bulgarian delegation at the border without explanation.

Mr. Staikov called on Yugoslavia to respect the "right to self-determination and expression of...its national character" of the "Bulgarian population in Yugoslavia".

Bulgarian political parties across the board consider the Macedonians of northern Yugoslavia, whose language is closer to Bulgarian than Serbo-Croatian,
to be ethnic Bulgarians.

For decades, Bulgaria has accused its neighbour of trying to force them to assimilate. It claims they should be allowed to use their own language in local schools and the judicial system.

The delegation turned away Sunday wanted to lay a wreath at the grave of Macedonian hero Gotse Delchev. Prime Minister Andrei Lukanov went on television Sunday night and called the incident "regrettable".

The ousted communist regime of Todor Zhivkov also considered the Macedonians Bulgarian, but viewed their incorporation in Yugoslavia as a fait-accompli in the wake of World War II.

#90211d3210 07/30/1990 ~French/German News Agency

NEW YORK, United Nations (JULY 30) - U.N. Secretary General Javier Perez de Cuellar expressed "horror and consternation" over the reported massacre of some 200 refugee camp residents by Liberian Government troops Monday.

He renewed his appeal for the protection of people in Liberia after diplomatic sources in Abidjan said troops under the government of President Samuel Doe had raided a Lutheran refugee center in Monrovia and killed 200

people.

The reports said "numerous" other men, women and children were wounded in the attack on the Tubman Boulevard church compound where thousands of people were taking shelter.

Mr. Perez de Cuellar expressed "horror and outrage" over the reports.

The diplomatic sources said soldiers were dissuaded from slaughtering Liberians at another refugee center in central Monrovia.

In London, a spokesman for Mr. Doe said government troops played no role in the killing of civilians. He claimed rebel soldiers were wearing government uniforms to confuse the population.

The spokesman, in statements made to the British Broadcasting Corporation, was "adamant" that Liberian soldiers had not killed civilians in Monrovia, according to a text summarizing the spokesman's remarks and released here by the BBC.

Also Monday, Mr. Perez de Cuellar announced the nomination of Michael Heyn, a U.N. Development Program representative, too coordinate assistance by the United Nations for displaced persons in Liberia.

#90211d3240 07/30/1990 ~French/German News Agency

LONDON (JULY 30) - Romanian engineering firm Interprinderea De Avioane ucuresti is to build 50 revamped versions of the One Eleven air British Aerospace licence for Associated Aerospace (AAe), a British aircraft leasing company.

AAe said Monday that the 50 aircraft will be based on the British Aerospace twin-engined BAC 1-11 500 model, designed in the 1950s and built in Britain.

In 1978 British Aerospace sold the manufacturing equipment to the Romanian firm, which has since built the aircraft at the rate of one per year. British Aerospace still holds the licence for One-Elevens.

AAe, which was set up specifically to update and re-launch the One Eleven, said the deal was worth around one billion dollars.

The mediumshort-haul aircraft will have new specifications to meet modern noise control standards, and will be fitted with the new Rolls Royce Tay 650 engines, which were recently chosen for re-engining Boeing 727s.

The 115-passenger craft has a range of 2,000 miles (3,330 kilometres). AAe

said that the durability of the aircraft is superior to that of more modern designs, and that there is a great deal of interest in it.

The first aircraft is due to arrive in Britain before the end of 1991, and Associated Aerospace hope to have taken delivery of all 50 by the mid-1990s.

#90211d3380 07/30/1990 ~French/German News Agency

HOUT BAY, South Africa (JULY 30) - Police refused to allow a march by about 200 squatters led by leading anti-apartheid cleric Desmond Tutu to go ahead here Monday, correspondents said.

The march was in protest against alleged police brutality late on Sunday when police shot two men during a raid on an alleged marijuana dealer in the squatter community about 20 kilometres (12 miles) from Cape Town.

After negotiations between Archbishop Tutu -- who was awarded the Nobel Peace Prize in 1984 -- and police, a small delegation of squatters led by the archbishop marched to the Hout Bay police station where they handed over a petition calling for an independent inquiry into the shootings.

Police spokesman Jan Calitz said police were stoned when they attempted to arrest the marijuana dealer on Sunday and the two men were shot and wounded when a squatter attacked the police with a spade.

Major Calitz said following the shootings, two petrol bombs were hurled at

motorists passing the squatter community -- which is only separated by a tar road from luxury beach front cottages owned by whites in this sleepy fishing village.

The petition demanded an end to police violence and called upon police to serve communities in a "rightful and decent manner".

Tension between the squatter and the white residents of Hout Bay has led to white residents warning that they would take the law into their own hands if the white-minority government did not take steps to evict the squatters but on July 20 the government announced that the squatters would get land in the area.

#90211d3530 07/30/1990 ~French/German News Agency

EAST BERLIN (JULY 30) - East Germany confirmed Monday it is to buy new arms including a Soviet-made helicopter gunship and two missile boats for its forces four months before accession to West Germany.

Defence Minister Rainer Eppelmann told West German television the purchases were stipulated under old contracts, and his government was going ahead with the purchases as a matter of good faith. It had come to office promising to be reliable, he said.

Ministry spokesman Colonel Uwe Hempel said about one billion marks (615 million dollars) would be spent on the last-minute arms purchases.

He said the helicopter would be used for training only and no missiles would be fitted to the missile boats. Instead they would be used as coastal protection ships. one of the 140-million-mark (86-million-dollar) boats would go into service Tuesday.

East Germany is due formally to acceed to West Germany in December, when

its armed forces are expected to come under Bonn's authority. Bonn officials have already said they have no use for the Warsaw Pact military equipment that will come with the soldiers.

Bonn officials Monday described Eppelmann's acceptance of the new purchases as ''sheer madness''. Military sources said the new gear would be no use to them at all ''and on top of that, it's Soviet-made''.

#90211d3550 07/30/1990 ~French/German News Agency

GENEVA (JULY 30) - Red Cross delegates in Liberia "can no longer do their job," the International Committee of the Red Cross (ICRC) said Monday.

The ICRC appealed "to all sides in the conflict to respect the physical and moral integrity of the civilian population in Monrovia".

The ICRC appeal came after a report Monday of a massacre of 200 civilians in a raid on a Lutheran refugee centre amid intensified fighting in the capital between rebels and troops loyal to President Samuel Doe.

Diplomats in Abidjan blamed the massacre on government troops but a spokesman for President Doe said in London Monday that government troops played no role in the killing of civilians.

The ICRC said its five representatives in the West African country -- three delegates, an engineer and a physician -- cannot leave their homes and go into the field.

PARIS (JULY 30) - Prison inmates in several French prisons Sunday rebelled and demanded an amnesty similar to the one granted to pro-Iranian convicted terrorist Anis Naccache.

Convicts in Marseilles, Strasburg, Colmar, Lille, Rouen and Varces refused to enter their cells after a walk in courtyards and some climbed on prison roofs. No one was hurt during the disturbances.

In the Oermingen prison in Alsace, angry inmates Sunday caused sever damage after setting fire to several sections of the prison.

Naccache and four accomplices were pardoned Friday by President Francois Mitterrand. They were flown hours later to Iran.

The Lebanese was sentenced to life imprisonment for trying to assassinate former Iranian premier Shapour Bakhtiar in Paris in 1980. A french

policeman and a woman were killed in the foiled attack.

#90211d3570 07/30/1990 ~French/German News Agency
SAN SALVADOR (JULY 30) - Fighting between Salvadoran rebels and rightist government troops left nine dead and nine wounded in fighting Sunday night and Monday morning, the military said.

The Armed Forces Press Committee said six rebels from the Farabundo Marti National Liberation Front (FMLN) died and two soldiers were wounded in fighting in the northern department of Chalatenango.

Two more rebels died and three were wounded in a clash with government troops in the eastern department of La Union, the military said.

One soldier died and two others were wounded when rebels attacked military positions in San Jose Guayabal, 40 kilometers (25 miles) north of San Salvador.

Two rebels were wounded in other fighting in eastern El Salvador.

The Salvadoran Government of President Alfredo Cristiani and the leftist FMLN signed a human rights accord Thursday as a small but significant step toward ending their decade-long civil war which has claimed more that 70,000 lives.

It was the first concrete agreement the two sides have reached in the conflict.

BRUSSELS (JULY 30) - The European Economic Community (EEC) has decided to impose a permanent anti-dumping tax of 198 ECU (253 dollars) per ton on imports of Chinese silicon, according to a decision published Monday in the EEC Official Journal.

The levy, approved on Friday by EEC ministers, will raise the price of such imports by around 20 percent, experts say.

The Community considers that Chinese silicon is being sold at cut-rate prices in the Community, with an average dumping margin of nearly 39 percent, forcing EEC producers to sell their output at its cost of production or even less, the decision noted.

Silicon is widely used, generally in the form of alloys, in such industries as automobiles and electronics. Commission figures show that 62 percent of

the silicon used by the Community in 1988 was imported, a total of 20,214 tonnes worth around 24 million dollars.

Chinese imports accounted for 9.3 percent of the EEC market that year.

The EEC has imposed a "temporary duty" of 18.7 percent on imports of Chinese silicon since August 1988, pending a more thorough investigation.

WASHINGTON (JULY 30) - The United States Monday condemned the car bomb assassination of British Conservative legislator Ian Gow and vowed to continue cooperation with Britain and other nations in the fight against international terrorism.

"We condemn the senseless murder of British member of parliament Ian Gow this morning when a bomb exploded in his car. We offer condolences to Mr. Goh's family," said State Department spokesman Richard Boucher.

"We hope that the perpetrators of this terrorist attack will be apprehended and brought to justice. The United States will continue to work with the United Kingdom and other nations in the fight against international terrorism," he added.

ROME (JULY 30) - Italian Prime Minister Giulio Andreotti's government Monday survived a second no-confidence vote in 48 hours by an overwhelming majority in parliament.

The no-confidence vote had been called on an amendment to a bill aimed at limiting publicity on Italian television. The bill is to be adopted Tuesday.

The vote was held with 358 deputies in favour of the government, 34 against, and three abstentions.

Communist and independent left-wing parties left the session before the vote. On Saturday, the government defeated a no-confidence motion following a mini cabinet reshuffle with 356 votes in favour and 177 against.

BEIJING (JULY 30) - China is still considering a plan to exchange trade

offices with South Korea, Communist Party general secretary Jiang Zemin said here Monday.

In a meeting with Japan's ex-finance minister, Kiichi Miyzawa, he recalled that South Korea has proposed to China the setting up of commercial missions in each other's capitals.

"This question is under consideration," Mr. Jiang added, according to Japanese reporters who covered the meeting.

Last December, Vice Premier Wu Xueqian told another Japanese visitor that the China Council for the Promotion of International Trade (CCPIT) was negotiating with South Korea on setting up trade offices.

Despite China's historic alliance with communist North Korea, its unofficial trade with South Korea is flourishing. Last year it reached three billion U.S. dollars, according to figures issued in Seoul.

Many South Korean corporations and politicians are looking forward to the Beijing Asian Games, opening September 22, as a springboard to more business and official contacts with China.

WINDHOEK (JULY 30) - Portugal will establish full diplomatic ties with Namibia in "the near future", Portuguese Foreign Minister Jaoa de Deus Pinheiro said here Sunday at the start of a two-day visit.

He told Namibia's Portuguese community at a reception that Lisbon would soon open an embassy in Windhoek.

He also said Portugal had made several attempts to mediate in the Angolan civil war which began when Portuguese colonial occupation ended in 1975.

"Portugal has an important role to play in the political and international arena, even though we are a small and relatively poor country, if compared to other powerful nations in Europe and the world," he said.

His Namibian counterpart Theo-Ben Gurirab thanked him for coming to Namibia at a time when "we are trying to find lasting solutions to the problems in Angola and Mozambique," where the end of the Portuguese colonial era also sparked a civil war.

Mr. Pinheiro arrived in Namibia from a five-day visit to South Africa.

NAIROBI (JULY 30) - U.S. Assistant Secretary of State for African Affairs Herman Cohen will discuss human rights with Kenyan leaders during a visit here later this week, a U.S. embassy spokesman said Monday.

The United States and the European Economic Community have expressed concern about the crackdown on dissent here this month. Six opposition figures were detained without trial, sparking anti-government riots that cost 22 lives.

Some 13 million dollars of U.S. aid to Kenya has been frozen, and U.S. ambassador Smith Hempstone has warned that Washington may cut back aid unless Kenya improves its human rights record.

"The human rights situation in Kenya, given the recent developments in that country, will be a topic of discussion," the State Department said in a statement in Washington.

Three of the six dissidents detained were freed last week after three weeks behind bars.

But the editor of the Nairobi Law Monthly, Gitobu Imanyara, was immediately rearrested and charged with publishing seditious articles calling for multi-party democracy in one-party Kenya. Meanwhile another four dissidents were charged with conspiring to overthrow the government.

The exact dates of Mr. Cohen's visit are still to be announced.

ISLAMABAD (JULY 30) - Chemicals needed to turn opium into heroin have been banned from the poppy-producing areas of northwest Pakistan, officials announced Monday.

Pakistan Narcotics Control Board sources said transporting the chemicals, particularly acetic anhydride, into the prohibited area would carry the same punishment as for trafficking in heroin.

Drug enforcement agencies busted seven heroin laboratories in June in Mohmand area of the vast tribal territory where normal laws of the country do not apply, according to the officials.

In the area around Khyber Pass, the agencies arrested ''a number of tribesmen'' for trafficking in drugs and imprisoned them for terms ranging between seven and twenty years, the officials said.

MOSCOW (JULY 30) EFE - The Soviet Union is to blame for much of Cuba's resistance to follow the pro-democratic reforms which have swept through the East Bloc nations in recent years, the Soviet Communist Party daily, Pravda, reported Monday.

"Many of the ideological and economic recipes which are currently maintained by Cuba were introduced by the Soviet Union," said Pravda.

Pravda said that now that East Bloc countries had given up on the single party state, satisfied the demands of "former" dissidents and made moves towards a market economy, it appeared "we criticize the Cuban leader (Fidel Castro) for not yielding on his principles almost with the same irritation with which we previously criticized revisionism."

Pravda said the present situation stemmed from the fact that for three decades Moscow aided Cuba in exchange for nothing more than unconditional support for the Soviet Union's foreign policy.

It admitted, however, that a difference ought to be recognized between the establishment of socialism in Europe by force of arms and that by a people's revolution, as occurred in Cuba.

In the article, Pravda said it was no secret that "our enemy up to recently" (the United States) viewed continued Soviet economic and military aid to the Caribbean island nation as one of the few remaining obstacles in improving superpower relations.

But the daily said Moscow would uphold its economic aid to Havana, adding that to do otherwise would leave the island searching for survival against the economic embargo which has been imposed by Washington.

The Soviet Union has been Cuba's principal economic and military ally since the 1959 revolution which brought Castro to power.

In the past two years, Castro has slammed the East Bloc's moves towards Western-style democracy as selling out to capitalism.

MADRID (JULY 30) EFE - Hotel bookings dropped by seven per- cent during the first seven months of this year compared with the same period in 1989, the Spanish Hotel Federation reported Monday.

In addition, the federation said a survey of the country's hotels showed there had been a sharp reduction in the average length of time visitors

stayed at hotels.

It said the worst-hit areas were traditionally popular tourist regions in Andalucia, in the south, along the Mediterranean coast and the Balearic Islands, where overall bookings and hotel income had dropped by up to 10 percent.

Officials said they doubted the the situation would improve in the rest of 1990.

The federation groups associations representing some 3,500 hotels in Spain.

RECIFE, BRAZIL (JULY 30) EFE - At least 30 people have died and thousands were left homeless in northeasatern Brazil after torrential rains at the weekend triggered flooding and landslides which swept away houses, cars and people.

The rains were heaviest in the Atlantic port city of Recife, some 1600 km northeast of Brasilia, where the Capibaribe River burst its banks early Sunday.

At least 7,500 people have abandoned their homes to seek shelter in schools and churches, according to initial reports from the region.

Some 14 people were drowned when a dam burst in nearby Camaragibe, sweeping away more than 100 houses, and in the Recife district of Nova Descoberta at least eight members of one familiy, who had gathered for a birthday party, were killed when their house collapsed beneath a landslide firemen said.

In the nearby town of Jaboatao, a young mother stood helpless as her baby son was ripped from her arms and carried away by the force of the current when the Duas Unas River burst its banks, the rescue services said.

In a related development, three people froze to death in Sao Paulo where temperatures overnight plunged to zero degrees Celsius.

Berlin (JULY 30) EFE - Thousands of East Germans turned out Monday for the first sales in East Germany since economic and monetary union with West Germany on 1 July.

But fewer people came than anticipated despite reductions of between 20 and 50 percent in the shops.

Stores were mostly stocked with East German goods although some West German products were also available to cope with demand.

Most popular were children's clothes, games and clothing.

Last January the first sales in ten years were held in East Germany but goods were subsidized by the state to alleviate traders' losses and to help sell stock.

SANTIAGO, (JULY 30) EFE - Spending a winter's day in Chile's capital city has the same effect on your lungs as smoking between seven and 20 cigarettes, doctors say.

A thick, suffocating pall which hangs 5,000 meters above Santiago during the southern hemisphere's winter months from March to September has turned the city into a dirty, dangerous place for its 4.5 million inhabitants.

Only Mexico City and the Brazilian metropolis of Sao Paulo beat Santiago in the league table of the world's most contaminated cities, according to the city's own pollution figures.

Contamination levels have increased dramatically in the last three years and the deaths this year of 18 children from respiratory diseases led Chile's Health Ministry to declare that to live in Santiago was to participate in "collective suicide."

For Santiago pediatrician Dr Juan Carlos Concha, there are only two alternatives: "Either get rid of the smog or send all the children out of the city."

In 1988, 350,000 people suffered from pollution-related illness, including 50,000 instances of lung disease and 300,000 cases of flu complications, according to medical researcher Otto Dorr.

The inhabitants of Santiago, say the experts, are breathing toxic, carcinogenic air packed with carbon monoxide, lead, and other substances unlikely to help prolong a healthy, active life. While 300 mgs of particles per cubic meter of air is considered dangerous to health, the level in Santiago frequently hits 800 mgs.

Toxic car fumes from Santiago's 500,000 motor vehicles account for 70 percent of the city's smog, according to experts. In addition, 80 of the 1,300 industries in and around the capital are classified as sources of high contamination.

The predictable causes, however, are complicated by the city's location, nestling in a steep valley which blocks the free flow of air.
Newly-installed Chilean President Patricio Aylwin is promoting optimistic, long-term environmental plans aimed at turning Santiago into a healthy city within ten years.

A presidential pollution commission set up to tackle the issue estimates that car filters, the renovation of public transport - including the return of electric tram cars - and ventilation installations in industry would cost some $300 million.

In the meantime, when the smog levels peak, the president encourages the use of car pools for workers commuting to the city and the closure of playgrounds to keep the children indoors.

Chile's return to democracy, after 17 years under a military regime which did not encourage its citizens to take an active lobbying role, has helped awaken a dormant ecological conscience in Santiago's residents who are flocking to anti-smog marches and demonstrations aimed at making their

city a less dangerous place to live.

#90211e0032 07/30/1990 ~Latin America New Agency

WASHINGTON (JULY 30) EFE - Infant cot death rates are higher in poorer minority communities in the United States, according to figures released Monday by the Atlanta-based U.S. Center for Disease Control (CDC).

The CDC studies indicated that babies born to American Indian mothers are almost three times more likely to suffer cot deaths, a phenomenon in which the infants die in their sleep from unknown causes, than those born to white mothers.

The average rate of cot deaths in the American Indian community is 344 per 100,000 births compared to 121 per 100,000 births in the white community.

The lowest cot death rates in the United States are found in babies born to Asian mothers with 95 mortalities per 100,000 births while the average rate for black babies is 241.

Puerto Rican infants are more likely to suffer cot deaths than those from other Hispanic groups with 138 deaths per 100,000 births, compared to 53 for babies whose mothers come from Central or South America.

BOGOTA (JULY 30) EFE - A ruling Liberal Party deputy was murdered by unknown gunmen, and a local mayor, his father and the victim's brother were kidnapped in the same incident, Colombian police said Monday.

The victim, 39-year-old Luis Farak, a deputy in the regional assembly of Sucre department, was shot in his car Sunday night near Los Palmitos, 980 km northeast of Bogota, when the gunmen stopped his car and opened fire.

They kidnapped the three men travelling with Luis Farak and then set fire to the car, the police said.

Farak was kidnapped last March but released 24 hours later.

He was the second Sucre politician to be shot in the past three days. Unknown gunmen Friday shot assembly secretary Rafael Mercado Pacheco in Sincelejo, 520 km northwest of Bogota.

Authorities are searching for the kidnapped men and the murderers.

In the past, hitmen working for Colombia's powerful cocaine cartels have

targetted politicians but called a unilateral truce last week in their year-long war against the government.

The traffickers, who have killed more than 400 people since last August, promised in their truce declaration that they would stop murdering policemen, politicians, journalists, judges and civil servants, and would not carry out any new car-bomb attacks.

Colombia is also plagued by right-wing death squads and leftist rebel groups.

BOGOTA (JULY 30) EFE - The Army killed at least six Colombian Indian guerrillas Monday in two related clashes when troops closed in on the rebels to free a kidnapped rancher, an Army spokesman said.

The two battles took place in a rural area near the towns of Caloto and Santander de Quilichao, 400 km southeast of Bogota, between troops of the Third Army Brigade and members of Quintin Lame, an Indian guerrilla group, the Army official said.

According to the spokesman, the rebels shot the abducted rancher, who was not named, when they were surprised by the Army.

No Army casualties were reported.

Quintin Lame was formed in 1982 to protect the rights of Colombia's Indian population.

The group recently began negotiations with the government of former president Virgilio Barco aimed at their disarmament and reincorporation into civil life.

BAGHDAD (JULY 30) EFE - The Iraqi parliament has proposed a new constitution which would allow the election of a new president, the Iraqi news agency INA reported Monday.

The proposed constitution would also allow greater freedom of expression, opening the way for a multi-party system, although heavy restrictions would govern the types of parties allowed.

Aside from guaranteeing the rights of the individual against illegal arrest and invasion of privacy, the new constitution would also permit a free press and end censorship, INA said.

The new political system drawn up in the text envisages a 50-member Council of Advisors, half of them appointed by the president and the other half freely elected.

This body would be elected every five years.

The National Assembly or parliament would have 250 members all freely elected.

Iraq is effectively ruled by a nine-man Revolutionary Command Council headed by President Saddam Hussein.

LUANDA (JULY 30) EFE - High-tension wires providing the Angolan capital with electricity were sabotaged Monday by National Union for the Total Independence of Angola (UNITA) guerrillas, an Angolan Army spokesman said.

Although alternative electricity supplies were available, national radio asked Luanda's inhabitants to conserve electricity.

The sabotage took place between the towns of Cassoalala and Donde, 180 km east of Luanda.

The attack happened only a week after the national electric company finished repairing the ravages of U.S.-backed UNITA's last sabotage on the same wires which resulted in serious energy restrictions in the capital.

Civil war broke out in Angola as soon as it won independence from Portugal in 1975 and all attempts at peace talks have failed.

Monday's sabotage took place when UNITA and the Marxist government were preparing to hold a third round of direct negotiations in Portugal later this week.-EFE

UNITA says it will cease fire when it is recognized as an opposition party while the government says that there will be no change in the constitution until violence stops.

#90211f2243 07/30/1990 ~United Press International
CHICAGO (JULY 30) UPI - Soybeans were higher while corn futures were mixed at the close Monday on the Chicago Board of Trade. Wheat and oats were lower.

As soybean oil went so did soybeans. Traders said the strength shown by soybean oil spilled over to beans as commission houses and professionals covered short positions.

Choppy trading had taken soybeans on a roller coaster ride between positive and negative territory throughout the morning. The improving soybean oil use outlook domestically and worldwide helped boost beans as did concerns about India's weather during the monsoon season.

The lack of fresh export news combined with a weather forecast nearly perfect for growing corn combined with heavy pressure from commercial selling to push corn lower.

Light buying interest and ideas that the market may be oversold helped wheat prices come off contract lows on a round of stop-loss selling.

At the close, soybeans were off 1/2 to up 8, corn was off 1 1/2 to up 1 3/4, wheat was off 2 3/4 to off 4 3/4, oats were off one to two cents.

#90211k0020 07/30/1990 ~Japanese News Agency

TOKYO (JULY 30) KYODO - THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) WILL CREATE AN ORGANIZATION ON TUESDAY TO ENHANCE AND PROMOTE JAPAN'S CULINARY CULTURE, MITI OFFICIALS SAID MONDAY.

OFFICIALS SAID THEY HOPE THE ORGANIZATION, THE THINKING ASSOCIATION FOR LIFE CULTURE (TALK), WILL BE A FORUM FOR EXCHANGING INFORMATION AND IDEAS ABOUT DEVELOPING JAPAN'S CULINARY ARTS AND INDUSTRIES TO COINCIDE WITH EXPANSION OF THE NATION'S LEISURE BUSINESSES.

MITI ORGANIZERS SAID THEY HOPE THE ORGANIZATION WILL BECOME A TRADE GROUP COMPRISED OF SOME 200 LEADING COMPANIES IN A WIDE RANGE OF INDUSTRIES, INCLUDING CONSTRUCTION, HOUSING, FOODWARE, DISTRIBUTION, AND FOOD PRODUCTION.

SO FAR, 112 FIRMS, INCLUDING SHIMIZU CORP., MATSUSHITA ELECTRIC INDUSTRIAL AJINOMOTO, MITSUKOSHI, AND DAI-ICHI KANGYO BANK, HAVE JOINED THE GROUP, OFFICIALS SAID.

IT IS TO CONDUCT AN ANNUAL SURVEY ON FOOD TRENDS AND SPONSOR LECUTRES AND SEMINARS AIMED AT ENRICHING JAPAN'S FOOD VARIETIES AND EATING ENVIRONMENT.

THE FIRST SURVEY WILL BE CONDUCTED IN MARCH, OFFICIALS SAID. THE FIRST LECTURES WILL BE ABOUT TRAINING SALES PEOPLE TO BE SPECIALISTS ON DINING SERVICES AND ENVIRONMENTS.

#90211k0022 07/30/1990 ~Japanese News Agency

TOKYO (JULY 30) KYODO - THE FIVE-DAY WORKWEEK IS EXPANDING AMONG JAPANESE COMPANIES BUT JAPANESE WORKERS STILL TAKE JUST HALF OF THEIR ENTITLEMENT TO PAID HOLIDAYS, ACCORDING TO A LABOR MINISTRY SURVEY RELEASED ON MONDAY.

THE SURVEY FOUND 58.3 PERCENT OF PRIVATE BUSINESSES IN JAPAN OPERATED AT LEAST ONE FIVE-DAY WORKWEEK A MONTH LAST YEAR, COMPARED TO 52.7 PERCENT THE YEAR BEFORE. THE INCREASE WAS THE BIGGEST SINCE THE SURVEY BEGAN IN 1976, THE MINISTRY SAID.

THE SURVEY WAS CONDUCTED IN LATE DECEMBER AMONG 5,161 COMPANIES ACROSS THE NATION, OF WHICH 96.2 PERCENT RESPONDED.

ASKED IF THEY OPERATED A FULL-FLEDGED FIVE-DAY WORKWEEK SYSTEM, 9.6 PERCENT REPLIED IN THE AFFIRMATIVE, UP 2.2 POINTS FROM A YEAR EARLIER. THESE INCLUDED 48.4 PERCENT OF LARGE COMPANIES POLLED, UP FROM 39.2 PERCENT IN 1988.

AS TO PAID HOLIDAYS, COMPANIES ALLOWED AN AVERAGE OF 15.4 DAYS TO THEIR EMPLOYEES, BUT THE EMPLOYEES TOOK ONLY 7.9 DAYS ON AVERAGE, THE SURVEY FOUND.

REGULAR WEEKLY WORKING HOURS WERE BECOMING SHORTER, FALLING FROM 44 HOURS, 12 MINUTES ON AVERAGE IN 1988 TO 43 HOURS AND 58 MINUTES LAST YEAR, THE SURVEY SHOWED.

#90211k0049 07/30/1990 ~Japanese News Agency

YOKOSUKA, KANAGAWA PREF. (JULY 30) KYODO - THE U.S. NAVY CRUISER MOBILE BAY ARRIVED AT YOKOSUKA NAVAL BASE, SOUTH OF TOKYO, MONDAY AMID PROTESTS BY ANTINUCLEAR CIVIC GROUPS.

ABOUT 100 PEOPLE GATHERED IN THE AREA ALONG TOKYO BAY WITH PLACARDS SAYING ''MOBILE BAY GO HOME,'' AND VOICED THEIR ANGER AT THE ARRIVAL OF THE SHIP WHICH IS CAPABLE OF CARRYING NUCLEAR WARHEADS.

SEVEN GREENPEACE-CHARTERED BOATS AND 12 RUBBER DINGHIES STAGED A DEMONSTRATION AT SEA, HOISTING A BANNER ACROSS THE HARBOR ENTRANCE.

THE WASHINGTON OFFICE OF GREENPEACE SAID THAT THE 9,600-TON MOBILE BAY RECEIVED A CERTIFICATE IN MARCH 1989 DECLARING IT SAFE AND SUITABLE FOR CARRYING NUCLEAR WEAPONS.

THE CERTIFICATE DOES NOT MEAN THAT THE WARSHIP IS CARRYING NUCLEAR WEAPONS BUT GREENPEACE OFFICIALS SAID THE MOBILE BAY IS UNDOUBTEDLY CARRYING TOMAHAWK MISSILES EQUIPPED WITH NUCLEAR WARHEADS.

THE MOBILE BAY IS THE THIRD SHIP CAPABLE OF CARRYING TOMAHAWK MISSILES TO ENTER JAPANESE WATERS AND THE SECOND TO BE EQUIPPED WITH THE AEGIS SYSTEM WHICH MAKES IT POSSIBLE FOR THE CREW TO MONITOR AND DISPATCH MULTIPLE MISSILES. IN ADDITION, THE AMERICAN CRUISER HAS A VERTICAL LAUNCH SYSTEM (VLS). THESE FEATURES HAVE SPARKED SPECULATION THAT THE SHIP HAS NUCLEAR ARMAMENTS ON BOARD.

ACCORDING TO JANE'S ALMANAC, IT IS NOT KNOWN WHETHER THE CRUISER IS IN FACT CARRYING SUCH WEAPONS.

#90211k0051 07/30/1990 ~Japanese News Agency
TOKYO (JULY 30) KYODO - SALES OF FOREIGN CIGARETTES HAVE GROWN STEADILY SINCE THE BEGINNING OF THIS YEAR, PUSHING THE FOREIGN SHARE OF THE MARKET ABOVE 15 PERCENT, AN INDUSTRY ASSOCIATION SAID MONDAY.

FOREIGN TOBACCO MAKERS SOLD 23.4 BILLION CIGARETTES IN THE JANUARY-JUNE PERIOD, A 15.7 PERCENT INCREASE OVER THE SAME PERIOD LAST YEAR, ACCORDING TO THE TOBACCO INSTITUTE OF JAPAN, WHICH GROUPS THE FORMER GOVERNMENT-RUN JAPAN TOBACCO INC. AND FOUR FOREIGN TOBACCO MANUFACTURERS.

THE SWIFT GROWTH PUT THE FOREIGN SHARE AT 15.8 PERCENT IN JUNE, FOLLOWING 15.7 PERCENT IN MAY AND 15.5 PERCENT IN APRIL, IT SAID. ANALYSTS HAVE SAID THE SALES OF FOREIGN-MADE CIGARETTES COULD TOP 20 PERCENT IN THE NEAR FUTURE.

SALES OF DOMESTICALLY MADE CIGARETTES, HOWEVER, WERE SLUGGISH, SHOWING A 0.5 PERCENT DECLINE IN THE SIX-MONTH PERIOD, ACCORDING TO THE INSTITUTE.

ANALYZING FACTORS BEHIND THE SALES GROWTH, TAKAHIKO IKEDA, MANAGING DIRECTOR OF THE INSTITUTE, TRACED IT CHIEFLY TO STEPPED-UP EFFORTS BY FOREIGN COMPANIES TO SELL THEIR CIGARETTES IN JAPAN SINCE FISCAL 1985 WHEN JAPAN OPENED ITS TOBACCO MARKET TO IMPORTS.

''THEY'RE MAKING EFFORTS TO PROVIDE PRODUCTS TAILORED TO JAPANESE TASTES AND THOSE DESIGNED FOR JAPANESE SMOKERS,'' HE SAID.

UNDER PRESSURE FROM THE UNITED STATES, JAPAN LIFTED ITS BAN ON TOBACCO IMPORTS IN FISCAL 1985 AND SCRAPPED TARIFFS ON TOBACCO IMPORTS IN FISCAL 1987. THE FOREIGN SHARE HAS SINCE GROWN AT A STEADY TEMPO EVERY YEAR, RISING FROM 2.4 PERCENT IN FISCAL 1985 TO 14.7 PERCENT IN FISCAL 1989.

AT PRESENT, 236 BRANDS OF CIGARETTES ARE AVAILABLE ON THE MARKET, OF WHICH 163 ARE FOREIGN-MADE BRANDS.

#90211k0053 07/30/1990 ~Japanese News Agency
TOKYO (JULY 30) KYODO - EXPORT CONTRACTS SIGNED BY 18 MAJOR JAPANESE TRADING FIRMS IN THE FIRST HALF OF THE YEAR RECORDED THE HIGHEST YEAR-ON-YEAR GROWTH IN 10 YEARS FOR ANY SIX-MONTH PERIOD DUE TO STRONG DEMAND OVERSEAS FOR PLANTS AND SHIPS, ACCORDING TO A REPORT ISSUED MONDAY BY A TRADE INDUSTRY COUNCIL.

THE JAPAN FOREIGN TRADE COUNCIL REPORTED THAT EXPORT CONTRACTS IN THE JANUARY-JUNE PERIOD JUMPED 18.8 PERCENT FROM THE SAME PERIOD LAST YEAR TO

8,161.8 BILLION YEN.

THE MARKED INCREASE IN PLANT EXPORTS, IN PARTICULAR FOR THE CHEMICAL INDUSTRY, STEMMED FROM SURGING DEMAND IN SOUTHEAST ASIAN NATIONS AND MIDDLE EAST COUNTRIES AGAINST THE BACKDROP OF RECOVERING ECONOMIES IN THESE REGIONS, OFFICIALS AT THE COUNCIL SAID.

CONTRACTS FOR SHIP EXPORTS SURGED 36.9 PERCENT DURING THE SIX-MONTH PERIOD. AUTOMOBILE EXPORTS CONTRACTS ROSE RISING 15.3 PERCENT, THE COUNCIL SAID.

IMPORT CONTRACTS CONCLUDED DURING THE PERIOD ALSO INCREASED 12.8 PERCENT TO 9,141 BILLION YEN BECAUSE OF HIGHER PRICES OF CRUDE OIL. IMPORTS OF MACHINERIES AND CHEMICAL PRODUCTS REMAINED SLUGGISH, THE OFFICIALS SAID.

THE 18 TRADING HOUSES ACCOUNT FOR NEARLY HALF OF THE COUNTRY EXPORTS AND ABOUT 30 PERCENT OF IMPORTS.

BY REGION, JAPANESE EXPORT CONTRACTS WITH MIDDLE EAST NATIONS POSTED A GROWTH NEARLY THREE TIMES HIGHER THAN LAST YEAR, WITH THOSE WITH SOUTHEAST ASIAN COUNTRIES RISING 32.5 PERCENT.

EXPORT CONTRACTS CONCLUDED WITH CHINA PLUNGED 37.8 PERCENT IN THE SIX MONTHS, A GREATER DECREASE THAN THE 31.6 PERCENT IN THE SECOND HALF OF LAST YEAR, DUE TO INACTIVE TRADING WITH THE COUNTRY AFTER THE MILITARY SUPPRESSION OF THE PRO-DEMOCRACY MOVEMENT IN BEIJING'S TIANANMEN SQUARE IN JUNE LAST YEAR, THE OFFICIALS SAID.

ON THE IMPORT SIDE, CONTRACTS FOR FUEL SOARED 50.9 PERCENT MAINLY BECAUSE OF A JUMP IN CRUDE OIL PRICES, WHICH SHOWED A 37.4 PERCENT INCREASE ON A CUSTOMS CLEARANCE BASIS, AS WELL AS GROWING DEMAND FOR LIQUEFIED NATURAL GAS (LNG).

IMPORT CONTRACTS IN THE CATEGORIES OF FOOD AND LUMBER ALSO HELD FIRM IN THE SIX MONTHS. BUT MACHINERY-RELATED IMPORT CONTRACTS FELL 7.1 PERCENT IN REACTION TO LARGE CONTRACTS CONCLUDED THE SAME PERIOD OF LAST YEAR.

IMPORT CONTRACTS FOR NONFERROUS METALS SUCH AS GOLD AND SILVER DECLINED 13.2 PERCENT, REFLECTING A PLUNGE IN MARKET PRICES OVERSEAS, THE OFFICIALS SAID.

THE COUNCIL ALSO REPORTED EXPORT CONTRACTS SIGNED BY THE MAJOR TRADING HOUSES EDGED DOWN BY 0.4 PERCENT IN JUNE FROM THE SAME MONTH A YEAR EARLIER TO 1,079.1 BILLION YEN DUE TO DROPS IN OVERSEAS DEMAND FOR MACHINERY.

THE YEAR-ON-YEAR DROP IN EXPORT CONTRACTS IN JUNE WAS THE FIRST IN FIVE MONTHS.

IMPORT CONTRACTS WERE ALSO DOWN 4.1 PERCENT FROM A YEAR EARLIER TO 1,517.3 BILLION YEN, THE COUNCIL SAID.

-30- 2948

#90211k0066 07/30/1990 ~Japanese News Agency

TOKYO (JULY 30) KYODO - JAPAN'S ECONOMY, SUSTAINED BY CONTINUED ROBUST PERSONAL SPENDING AND CORPORATE CAPITAL INVESTMENT, WILL LIKELY GROW AT AN INFLATION-ADJUSTED ANNUAL GROWTH RATE OF 4.8 PERCENT ON AVERAGE IN THE 1990S, A PRIVATE ECONOMIC RESEARCH INSTITUTE PREDICTED MONDAY.

THE RESEARCH INSTITUTE ON THE NATIONAL ECONOMY SAID IN A REPORT THAT THE JAPANESE ECONOMY, WHILE MAINTAINING THE CURRENT HIGH RATE OF EXPANSION, WILL ENJOY WHAT THE THINK TANK DESCRIBED AS A ''GOLDEN DECADE'' OVER THE NEXT 10 YEARS.

JAPAN HAS ALREADY EXTENDED ITS UNINTERRUPTED ECONOMIC EXPANSION TO 44 MONTHS THROUGH JULY, RENEWING THE SECOND LONGEST POST-WAR RECORD OF GROWTH AND WITH NO RECESS COULD OUTPACE THE LONGEST PERIOD OF 57-MONTH GROWTH IN AUGUST NEXT YEAR.

ECONOMISTS AT THE INSTITUTE PREDICT THE ECONOMY IN THE NEXT DECADE WILL EXHIBIT A DESIRABLE PATTERN OF GROWTH, WITH RELATIVELY STABLE ECONOMIC ACTIVITY OVER THE LONG TERM THANKS TO THE YEN'S STRENGTHENING AND LONG-STANDING PRICE STABILITY.

THE ECONOMIC GROWTH IN THE 1990S, THE ECONOMISTS SAY, WILL BE DRIVEN MAINLY FROM ACTIVE BUSINESS IN THE PRIVATE SECTOR AGAINST THE BACKDROP OF A RECENT THAW IN EAST-WEST RELATIONS AS WELL AS THE COUNTRY'S STEPPED-UP DEREGULATION.

GIVEN THE FAST-GROWING DETENTE, THE INSTITUTE PREDICTS CIVILIAN INDUSTRIES WILL ACT AS THE MAIN DRIVING FORCE BEHIND THE WORLDWIDE ECONOMIC PROSPERITY IN THE 1990S INSTEAD OF MILITARY DEMANDS.

WORLD TRADING ACTIVITY IS THEREFORE ESTIMATED TO GROW AT AN ANNUAL RATE OF 10 PERCENT IN REAL TERMS IN THE 1990S, EXPANDING FROM THE PRESENT 8 PERCENT LEVEL GROWTH, ACCORDING TO THE INSTITUTE.

IT ALSO FORECAST MANUFACTURED PRODUCTS WILL ACCOUNT FOR MORE THAN 60 PERCENT OF THE TOTAL IMPORT VALUE IN THE YEAR 2000, UP FROM THE CURRENT 50 PERCENT LEVEL.

-30- 1979

#90211k0079 07/30/1990 ~Japanese News Agency

TOKYO (JULY 30) KYODO - HITACHI LTD. UNVEILED ON MONDAY WHAT IT CLAIMED

TO BE THE WORLD'S LARGEST CAPACITY MAGNETIC DISK UNIT FOR A GENERAL-PURPOSE COMPUTER.

THE NEW MAGNETIC DISK UNIT, MADE UP OF A DISK DRIVE AND NECESSARY CONTROL ELECTRONICS FOR ITS H-6587 SERIES, CAN STORE UP TO 35 GIGABYTES OF DATA -- EQUIVALENT TO MORE THAN 70 YEARS OF A MAJOR JAPANESE-LANGUAGE NEWSPAPER OR 2.3 TIMES THAT OF THE EXISTING UNIT, COMPANY OFFICIALS SAID.

THE NEW PRODUCT, DEVELOPED AS AN EXTERNAL MEMORY DEVICE FOR THE HITAC SERIES, THE WORLD'S FASTEST GIANT GENERAL-PURPOSE COMPUTER SYSTEM, WILL GO ON SALE ON WEDNESDAY. THE SHIPMENT OF THE NEW MAGNETIC DISK SUBSYSTEM IS SET TO BEGIN AT THE END OF SEPTEMBER.

RENTAL FEES WILL RANGE FROM 675,000 YEN TO 1.15 MILLION YEN PER MONTH, THEY SAID.

HITACHI OFFICIALS SAID THE NEW ACHIEVEMENT REPRESENTS THE FINISHING TOUCH ON ITS HITAC HARDWARE AND SOFTWARE SYSTEMS.

IN MARCH, THE COMPANY DEVELOPED AN OPERATING SYSTEM (OS) FOR SUCH COMPUTERS AND IN JUNE COMPLETED THE HITAC M-880 SERIES.

#90211m0001 07/30/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 30) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY. A COMPLETE FAX COPY OF MARKET CONSENSUS IS AVAILABLE FOR $5.95 BY CALLING 1-900-226-7726.

IN THE NEWS:

The Nikkei continued its slide, falling 420.53 on light volume. Since July 19, the average has fallen over 2500 points, or 7.9%. ... The FT 100 is down 11.3. ... UAL is indicated down to 158-162 in London on news that Chemical Bank is pulling out of a consortium to fund the employee takeover. ... U.S.-made machine tools orders rose 27.2% in June from May and 9.1% from June 1989. ... The TEAMSTERS union and UNITED PARCEL SERVICE agree to extend until Aug. 10 a deadline for voting on a new contract, delaying the threat of a nationwide strike.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT issues personal income figures today. ... TREASURY SECRETARY NICHOLAS BRADY, FDIC CHAIRMAN WILLIAM SEIDMAN and OFFICE OF THRIFT SUPERVISION DIRECTOR TIMOTHY RYAN testify before the HOUSE BANKING COMMITTEE this morning on the thrift bailout.

Among the major economic reports due out later this week are single-family home sales tomorrow, leading indicators and construction spending on Wednesday, manufacturers' shipments, inventories and orders on Thursday and unemployment on Friday.

FROM THE BULLS:

"Some stocks ran up in three months what they should have done in over a year," says DONNA CALDER of OPPENHEIMER. She thinks the recent pullback is positive for the market, as does CARMINE GRIGOLI of CS FIRST BOSTON. "Investors were getting complacent," says Grigoli. "This [drop] put some fear back in them." ("BusinessWeek", 8/6)

FROM THE BEARS:

"The psyche of the market is lousy," says STEVEN A. KROLL of SHEARSON LEHMAN HUTTON ASSET MANAGEMENT. He predicts the market will tumble to below 2700 in the next three months. ("BusinessWeek", 8/6)

"If we look at some intrinsic value benchmarks and we go back just to what are average valuation levels ... we're looking at a market that could drop 25%-27% from here," says STEVE LEUTHOLD, head of THE LEUTHOLD GROUP, a Minneapolis research and portfolio management partnership. "I wouldn't be sitting near the exit, I would be standing in it." ("Barron's", 7/30)

Columnist JOHN CRUDELE says last week's stock market action shows that "the change from a trader-driven stock market to a market driven by fundamentals would seem to be irreversible. And if the economy continues to weaken, that means that stock prices are likely to decline a whole lot more in the face of economic reality." ("The Washington Post", 7/29)

STOCK MARKET:

"We've got a mental markdown, partly because it's Monday and because of what happened last Monday," says SHEARSON'S MICHAEL BENSON from London this morning where U.S. stocks are generally indcated lower on light volume. He says the support level in the Dow is 2880. Today, he looks for the Dow to be off 10-15 points at the start. "But I don't think the sellers will follow her down and we'll drift back afterwards." (FNN "World Business Update", 7/30)

"Nobody wants to be a hero and buy stock on a Friday, especially after all the negative earnings surprises we've had," says MARC CHAIKIN, president of BOMAR SECURITIES. "I think we will see the Dow begin to probe the 2850 area. The retracement rally is finished. However, I see strong support in the 2820-2850 zone and think if the market holds there, it could begin to rally in about two weeks and could move to a significant new high over 3000." ("Investor's Daily", 7/30)

The market needs longer to "remediate the bullish consensus" that developed when the Dow was challenging 3000, says EUGENE PERONI of JANNEY MONTGOMERY SCOTT. "We have to dash those ... optimistic hopes. This will take at least several weeks in a very sloppy trading range," says Peroni. He looks for the Dow to retest last Monday's intra-day low around 2850, but expects strong support there. After some base building, Peroni sees another try at 3000 by the end of the third quarter. (FNN "World Business Update", 7/30)

LASZLO BIRINYI says all of last week's 70-point decline on the Dow "came during periods of intense program [trading] activity." But he said that scenario "probably bodes well because it suggests that the real fundamentalists are not selling and that, while it looks like there is a fire, there probably isn't one. It's really just a smokescreen raised by this [program trading] activity." ("Wall Street Week", 7/27)

"We're definitely seeing more bad earnings than good ones," says MELISSA BROWN of PRUDENTIAL-BACHE. "It seems to be across the board." ("USA Today", 7/30)

"For every [earnings] disaster, you can also find a company that surprises you on the upside," says BOB CZEPIEL, portfolio manager of RCS EMERGING GROWTH FUND. (WSJ, 7/30)

Earnings surprises bother J. DAVID MILLS of THE BOSTON CO. "It's like having a land mine inside your portfolio," says Mills. "You worry where the next one will go off." ("BusinessWeek", 8/6)

MARTIN ZWEIG of the "Zweig Forecast" says he is "not nervous enough to be an outright bear because my indicators are not great, but they're not awful. What bothers me is what is not directly in my indicators, namely the economy and the negative reaction to earnings surprises the last couple of months. I've never seen so many stocks crater on earnings news. ... My guess is that the market will be lower in six months." ("Wall Street Week", 7/27 and WSJ, 7/30)

"The narrowness of the market is one of the things that caused me to become more bearish when the market couldn't get above 3000," says BYRON WEIN, managing director of MORGAN STANLEY & CO. "That's what caused me to raise some cash in the last couple of weeks and I do think that this correction will take the market down a little bit further ... but from that point, when the market begins to rally sometime late in the summer, I think you will see a much broader market." ("Wall Street Week", 7/27)

STOCK TIPS:

"It's a good time for investors to take advantage of bargain merchandise

in the telecommunications industry," says ROBERT MORGENTHAU with SHEARSON ASSET MANAGEMENT. He likes GTE where the stock price declined after a recently announced merger with CONTEL. Although NYNEX is having some "near term" regulatory problems, Morgenthau believes the company has more potential than any of the other Baby Bells. (CNN "Business Day", 7/30)

"We'll sell every drug stock except three - JOHNSON & JOHNSON, GLAXO and MONSANTO," says LOU EHRENKRANTZ of EHRENKRANTZ & KING. (CNBC "Money Wheel", 7/30)

CETUS CORP., IMMUNEX CORP., SCHERING CORP. and GENENTECH all have genetically engineered drugs up for review this week by FOOD AND DRUG ADMINISTRATION advisory panels. "To my mind, it means the industry has finally arrived," says STUART WEISBROD, a biotech analyst at PRUDENTIAL-BACHE. "The industry is entering the age of commercialization. It's possible the FDA could approve 20 products in the next two years." ("The Washington Post", 7/29)

JIM McCAMANT, editor of "Medical Technology Stock Letter," likes CALGENE, CALIFORNIA BIOTECHNOLOGY and SYNERGEN. LARRY BOWMAN, manager of the FIDELITY SELECT TECHNOLOGY FUND, likes AMGEN, BIOGEN, IMMUNEX, CHIRON and CETUS. (WSJ, 7/30)

One of the Dow component stocks, 3M managed to finish last week unchanged even though the Dow was down by more than 2%. EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT says the stock has strong support in the 86-88 area and expects a strong move to above 96. Peroni likes the whole energy area and recommends SONAT for those looking to increase their energy exposure. The natural gas company has built a base in the 50-51 area and Peroni says it has upside potential of 60 on a three-to-six month basis. (FNN "World Business Update", 7/30)

"Ironically, I like a few utility stocks," says MARTIN ZWEIG. "I don't love them, but they actually did well this week." He names DETROIT EDISON and TEXAS UTILITIES as particularly good utility performers. "I think the oils are OK too." ("Wall Street Week", 7/27)

LOUIS NAVELLIER of "MPT Review" expects the major market averages to "flop around like a fish out of water" for the next few months and says he is not optimistic for the blue chips because they don't have earnings. He does like BOEING and PROCTOR & GAMBLE, but most of his favorites are smaller stocks like SCITEX, an Israeli maker of commercial color printing equipment, and SNYOPTICS COMMUNICATIONS, a California-based over-the-counter stock. (WSJ, 7/30)

CHILI'S INC. is a favorite stock of JAY TRACEY, manager of the $101 million FOUNDERS GROWTH FUND. "They're a very, very predictable company and I think we're in a market now that wants predictable companies," says

Tracey. "I wouldn't be surprised to see the stock continue rising in an environment that mercilessly punishes any mistakes, What you're buying here is steady, predictable growth." ("Barron's", 7/30)

"To the extent that the Federal Reserve stimulates more, you have tremendous upside potential" in cyclical stocks, says STEFAN ABRAMS, chief investment strategist at KIDDER, PEABODY. (WSJ, 7/30)

-30- 9575

#90211m0002 07/30/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 30) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY. A COMPLETE FAX COPY OF MARKET CONSENSUS IS AVAILABLE FOR $5.95 BY CALLING 1-900-226-7726.

MONEY & CREDIT:

"The overwhelming majority of the [currency] market believes we're in a recession," says ROBERT RYAN, chief foreign exchange dealer with BANK OF NEW YORK. ("Investor's Daily", 7/30)

STAN SALVIGSEN, chairman and CEO of COMSTOCK PARTNERS, favors foreign currencies as he sees the dollar tumbling. "We think the dollar may not be as strong as it was over the past several years given the fact there is so much supply of government paper coming out this Spring." ("Nightly Business Report", 7/27)

EDDIE BROWN says Federal Reserve Chairman Alan Greenspan will be "very slow" to lower interest rates. "I think he is just going to kind of stand pat. However, if it looks like the economy is weakening, I would expect him to step in." ("Wall Street Week", 7/30)

"I do not think there will be any ease in response to the GNP report," says ROBERT CHANDROSS, economist at LLOYD'S BANK PIC in New York. He says the Fed "certainly can ignore" the GNP report Friday even though it "clearly shows weakness in the second quarter." He says that is because the Fed "believes you have to create slack in the economy." ("Investor's Daily", 7/30)

"Interest rates could stay where they are or even pull back a little because of a reduction in private sector credit demands," says BYRON WEIN, managing director of MORGAN STANLEY & CO. ("Wall Street Week", 7/27)

Friday's GNP report should "make the Fed a little more inclined to ease," says MICHAEL PENZER, an economist with BANKAMERICA. "A weak employment report could be the catalyst," says ROBERT BRUSCA, economist at NIKKO SECURITIES CO. INTERNATIONAL. However, MICHAEL ENGLUND, economist at MMS

INTERNATIONAL INC., says, "We think [the Fed] will wait until near the end of the third-quarter or early in the fourth quarter." ("USA Today", 7/30)

"We'll give back some of the rally bonds just enjoyed," says ALAN LEVENSON director of financial services at WEFA GROUP. ("USA Today", 7/30)

STEVEN SLIFER of SHEARSON LEHMAN HUTTON GOVERNMENT SECURITIES says Friday's GNP numbers will give the bond market a boost. "As recently as last Thursday, the market psychology was that the supply would be a problem," says Slifer. "Now, with these new economic numbers in hand, the perception is very different." (NYT, 7/30)

"There's such a narrow spread right now, between Japanese yields and U.S. yields that the Japanese investor does not seem to be as particularly attracted to the U.S market as he once was," says DAVID MARSHALL of MMS INTERNATIONAL. Marshall thinks the Japanese are waiting to invest in Europe, "and if that's the case, we could see a bit of a plunge in the bond market this week." (FNN "World Business Update", 7/30)

THE ECONOMY:

"We have a slow-growth economy," says FEDERAL RESERVE GOVERNOR EDWARD KELLY. "It's soggy." On the other hand, he says, "Things are about where we expected them to be. There's nothing ... that ... causes any new alarm bells to go off." (Reuters, 7/27)

"I'd say we're probably not in a real recession, although we're darn close " says JAMES SOLLOWAY, chief economist at ARGUS RESEARCH. "I think the economy will continue to slog along. My fingers are crossed." ("USA Today", 7/30)

"To the three times I mentioned recession the last time we talked, I will add three more ... Recession, recession, recession," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." He says Friday's GNP numbers make him happy "because they prevent me from thinking that I'm crazy," after he had repeatedly said the economy was weaker than statistics showed. From a business standpoint, however, he says the numbers "are a very disturbing phenomenon." (CNBC "Market Wrap-Up", 7/27)

"The economy is very weak," says ROSANNE CAHN of FIRST BOSTON. "Cyclical indicators ... are declining, but they're not declining as much as they would be in a real recession." However, she says a recession may be coming. "The question is how fast you'll get there." (FNN "Marketwrap", 7/27)

The downward revisions of the 1989 growth rate "changes perceptions about where you had been," says STEVEN SLIFER of SHEARSON LEHMAN HUTTON GOVERNMENT SECURITIES. "It seems we have slowed down in the first six

months of this year, and I have difficulty seeing where we are going to get strength in the second half." (NYT, 7/30)

"The best thing that you can say about inflation is that it has returned to its trend, that even though the numbers show no decline, they show no persistent increases," says SAM KAHAN, chief economist at FUJI SECURITIES INC. in Chicago. ("Investor's Daily", 7/30)

"I think what we are going to see is sluggish economic growth with positive GNP numbers, but fairly small numbers," says EDDIE BROWN. ("Wall Street Week", 7/27)

"I think there is an increasing risk of recession early in 1991," says LAWRENCE KROHN, an economist at SHEARSON LEHMAN HUTTON. "It's really up to the Fed. If they don't ease, then they're going to be held responsible." (NYT, 7/29)

"Almost everybody is poised for a recession, but I don't think we're going to see a recession and more importantly I think we're going to see a pickup in economic strength, maybe even to the 3% level for GNP," says BYRON WEIN, managing director of MORGAN STANLEY & CO. ("Wall Street Week", 7/27)

"Consumption spending was revised down [in Friday's GNP report] as well as personal income," says KEVIN LOGAN, chief economist at SWISS BANK CORP. "And with income low, we saw that the savings rate was low. This had the effect, overall, of bringing down the growth rate." ("Nightly Business Report", 7/27)

"Real oil prices will be stable or trend downward," says ISRAELI economist ELIYAHU KANOVSKY. "Another oil shock is not in the cards. "There is no need for the West to panic." ("USA Today", 7/30)

IN WASHINGTON:

"I think we probably will have [a tax increase] but I think we will have a budget reduction at the same time and I think the effect on the credit markets could be positive and that could offset the negative effects [on the stock market] of a historical tax increase," says BYRON WEIN, managing director of MORGAN STANLEY & CO. ("Wall Street Week", 7/27)

Many critics say the federal government would save money by converting savings and loans to banks, shut down the OFFICE OF THRIFT SUPERVISION and turn the whole S&L industry over to bank regulators. "The Bush administration should never have created it [the OTS] in the first place," says S&L analyst BERT ELY of Alexandria, Va. ("USA Today", 7/30)

"You get much in excess of $500 billion for the total cost" of the S&L

bailout, says FDIC Chairman WILLIAM SEIDMAN. He predicts the government will be forced to takeover an additional 400 failed thrifts, bringing the total to around 1,000. "We're closing those down every day," says Seidman. He explains that costs have continued to rise because of falling real estate values and inaccurate reports filed by the S&Ls. (Reuters, 7/30)

"We've never seen a case where a company was completely debarred from doing business with the government - a major defense firm - and I don't think we're likely to," says PAUL NISBET, referring to a Congressional threat to deny NORTHROP future government contracts. "It's a very remote possibility." "On every contract [NORTHROP] has had they have screwed up criminally, complains REP. GERRY SIKORSKI (D. - MINN). (CNBC "Business View" and "Nightly Business Report, 7/27)

-30- 8021

#90211p0002 07/30/1990 ~PR Newswire

ZURICH, SWITZERLAND (JULY 30) PR NEWSWIRE - Emery Worldwide, a leading air freight carrier, today announced it has signed the East German freight forwarding group, Deutrans Express, to serve as the company's exclusive cargo agent in that country beginning Aug. 1.

Emery Worldwide officials said the joint operating agreement signed June 29 will allow the company to substantially increase its coverage in the East German market, including opening 13 air freight terminals there. Emery previously had provided only in-bound service to East Germany using the foreign flag carriers and local forwarders.

"Our partnership with Deutrans Express will provide us with a strong presence in East Germany," said Jules J. Schnyder, vice president-Europe for Emery Worldwide. Schnyder said Deutrans' previous dealings with Western European countries and firms, as well as its recent move toward privatization, should speed its integration with Emery's operations. "Deutrans is quite attuned to our business expectations (in East Germany) " noted Schnyder.

Emery Worldwide currently has a presence in 22 European countries, operating more than 40 terminals across the continent as well as a major air freight sortation hub in Maastricht, the Netherlands. Another 35 European terminals are operated by Emery agents.

Under the agreement, Deutrans will operate air freight terminals for Emery in Chemnitz (formerly Karl-Marx-Stadt), Cottbus, Dresden, East Berlin, Erfurt, Frankfurt an der Oder, Leipzig, Magdeburg, Neubrandenburg, Rostock Schwerin, Stralsund, and Suhl.

The Deutrans signing is the first of several business partnerships Emery

Worldwide hopes to forge in Eastern Europe in the coming months. The company expects to reach operating agreements with transportation firms in Bulgaria and Czechoslovakia by the third quarter, and is working to close similar deals in the Soviet Union, Poland, Hungary, Romania, and Yugoslavia by the end of the year.

The company began its expansion efforts in Eastern Europe at the start of the year when it appointed Steve R. Soukup division manager - Eastern Europe. Since then, Soukup, a native Czechoslovakian, has been Emery's key manager in negotiations with Eastern European freight companies.

Emery Worldwide, based in Palo Alto, Calif., is a subsidiary of Consolidated Freightways, Inc. (NYSE: CNF), a $4 billion diversified transportation company with businesses in long-haul and regional trucking, air freight, ocean container freight, and intermodal rail service.

CONTACT: Jim Allen of Emery Worldwide, (415) 326-1700; or Will Thoretz of Manning, Selvage & Lee, (212) 213-7175, for Emery Worldwide.

LAPEER, MI (JULY 30) PR NEWSWIRE - Durakon Industries, Inc. (NASDAQ-NMS: DRKN) released today its sales and earnings results for the second quarter and first six months of 1990. "Exclusive of the one-time gain associated with the sale of DFM, the net income for the second quarter is the best quarter in the company's history," said Durakon Industries, Inc. President and Chief Executive Officer David Laro.

Net sales for the three-month period ended June 30, 1990, were $35,819,000 compared to $38,501,000 for the same period in 1989. Net income for the second quarter of 1990 was $3,973,000 ($.64 per share) compared to $1,707,000 ($.28 per share) in 1989. For the six-month periods ended June 30, 1990 and 1989, net sales were $69,331,000 and $71,772,000, respectively. Net income for the first six months of 1990 was $ 4,132,000 ($.67 per share) compared to $641,000 ($.10 per share) for the same period in 1989.

The operating performance of the company for 1990 includes other income of $1,955,000 associated with the June sale of DFM Corp. Operations of DFM, the manufacturer and distributor of bug and gravel deflector shields, have been included through May, 1990.

"We are pleased with the second quarter and six month performance and expect improvements in manufacturing and market penetration, as well as improvements at our Jerr-Dan subsidiary to be the basis for strong operating performance in the future," stated Laro.

Durakon is the world's leading producer and distributor of pick-up truck bed liners and roll-back car carriers. Headquartered in Lapeer, it has manufacturing facilities in Clare, Mich., Brentwood, Tenn., and Greencastle, Pa.

#90211p0005 07/30/1990 ~PR Newswire

MEXICO CITY (JULY 30) PR NEWSWIRE - Corporacion Industrial Sanluis, a leading Mexican diversified company, today announced the establishment of a sponsored American Depositary Receipt (ADR) program. The ADRs are based on the company's "Certificados de Participacion Ordinarios" (CPOs), which represent "A" shares. The program is the first ADR program based on the CPOs, a new instrument created to allow foreigners to purchase the "A" shares of Mexican companies. Previously, only Mexicans could own "A" shares. One ADR will represent ten CPO's.

Commenting on the launch of this new investment vehicle, Sanluis' chairman Antonio Madero said, "Since building closer links with the United States market is our strategic priority, we are proud to be the first Mexican company to have our "A" shares traded in ADR form. The sponsored ADR should enhance our competitiveness in the U.S. since it improves our access to and visibility in the financial markets. Sanluis is a company carefully structured to benefit from the growing trade links between our two countries."

This announcement reflects a continuation of the Mexican government's on-going plan to encourage foreign investment in Mexican securities. In an unprecedented decision, on Oct. 25, 1989, the National Commission for Foreign Investment approved foreign participation in the Mexican Stock Market with minimal restrictions. This is accomplished by having a trust, which holds Sanluis' "A" shares, issue CPO's. The shares are fungible Sanluis shares, listed on the Mexican Stock Exchange. This investment procedure is in accordance with Article 14 of the Law Regulating the Promotion of National and Foreign Investment.

Sanluis' ADR program further facilitates investment in Mexican equities allowing those institutions unable or not disposed to invest directly in the underlying shares of Mexican companies. ADRs are negotiable instruments issued by a U.S. bank acting as depositary, certifying that shares of a non-U.S. issuing company are held by the depositary's custodial bank abroad. The settlement, clearing and custodial procedures relating to ADRs are well established and accepted by U.S. investment audiences. Morgan Guaranty Trust Company is the depositary for the Sanluis program. Lehman Brothers, among others, will be market makers for these ADRs.

Corporacion Industrial Sanluis is a reflection of Mexico's growth industries, through which shareholders can participate in several industries already benefiting from the fundamental changes occurring in the country. The company operates in four industries: mining through its silver and gold interests; manufacturing through the Rassini Group companies in auto parts; tourism through its majority stake in Hoteles Exelaris, the sole operator of Hyatt Hotels in Mexico and retailing through its 51 percent stake in Woolworth Mexicana. In 1989, Sanluis had net sales of US$229.1 million, net assets of US$538.7 million, and a total net worth of US$314.6 million. Sales by division were as follows: manufacturing US$113.6 million; tourism US$41.3 million; mining US$29.7 million and retailing US$44.5 million.

ALBUQUERQUE, NM (JULY 30) PR NEWSWIRE - Diagnostek, Inc. (NASDAQ: DXTK) announced today that its indirect wholly owned subsidiary, Saga Acquisition Corp., purchased 10,845,813 shares of EPIC Health Group, Inc. (NASDAQ: EPIC), common stock, constituting 96 percent of the total number of shares of common stock outstanding, and 200,000 shares of EPIC's Series A convertible preferred stock, constituting 100 percent of the preferred

stock outstanding, as a result of Saga's tender offer for EPIC shares. After giving effect to the conversion of the preferred stock, the common stock and preferred stock purchased by EPIC constitutes 96 percent of the outstanding common stock.

Nunzio DeSantis, chairman and chief executive officer of Diagnostek, stated, "We are pleased with the results of the tender offer. The acquisition of EPIC will enhance Diagnostek's current position as a leading mail service provider of prescription drugs to sponsors of benefit plans."

Diagnostek offers comprehensive prescription drug cost containment and pharmacy management services. Through its wholly owned subsidiary, Health Care Services, Inc., Diagnostek develops plans designed to reduce prescription drug benefit costs to clients, which include corporations, labor unions, retirement systems, health and welfare trusts, insurance companies and health maintenance organizations. Through its HPI Health Care Services, Inc. subsidiary, Diagnostek is the largest provider of pharmacy management services to hospitals, nursing homes and penal institutions in the country.

EPIC Health Group provides contract mail service long-term maintenance prescription programs to over two million people through contracts with over 150 unions and businesses nationwide.

CONTACT: Vincent Villanueva of Diagnostek, 505-345-8080; or Daniel Sullivan or Marisa Heine of D. F. King & Co., 212-269-5550, for Diagnostek.

#90211p0013 07/30/1990 ~PR Newswire

ROCKVILLE, MD. (JULY 30) PR NEWSWIRE - GE Information Services (GEIS), a leading provider of financial information services worldwide, has announced the availability of a MERGE Program Option which provides reconciliation services for its mainframe electronic payment instruction software for financial institutions, the BPS CENTRAL System.

The BPS CENTRAL System, available in the United States since December 1989 provides financial institutions the ability to offer electronic payment instruction services to their corporate clients by performing the translation between ANSI (American National Standards Institute), NACHA (National Automated Clearing House Association) and BAI (Bank Administration Institute) lock box formats.

Some corporations separate the electronic payment instruction, sent over an ACH, from the remittance information, which is sent over a value added network, and then reconcile the "dollars and data" later.

The MERGE Program Option for the BPS CENTRAL System allows banks to provide value-added EDI/EFT (electronic data interchange/electronic funds transfer) reconciliation services to their corporate clients by reconciling and merging together the NACHA electronic payment advices and the ANSI remittance documents after they have been separated.

Additionally, the MERGE Option allows the banks' corporate clients to take advantage of the benefits of advance notification of remittance information, without having to worry about reconciling the "dollars and data" after the payment has taken place.

The license fee for the MERGE Program Option software for the BPS CENTRAL System is $20,000 per copy for the first copy, with an annual software services fee after the first year of $3,000 per copy. The license fee for the first copy of the BPS CENTRAL System software is $50,000 per copy, with an annual software services fee of $7,500 per copy per year after the first year. For further information on the Merge Program Option of the BPS CENTRAL System, please call 301-340-4833.

GE Information Services also offers two electronic payment capabilities for corporations: the EPS*EXPRESS Service Option for the EDI*EXPRESS System; and the COEP (Customer Originated Electronic Payments) System.

A division of General Electric Company, U.S.A. (NYSE: GE), GE Information Services has its headquarters in Rockville.

#90211p0015 07/30/1990 ~PR Newswire

CHARLOTTE, NC (JULY 30) PR NEWSWIRE - NCNB's Trust Group is ranked among the nation's top money managers for the year ending June 30, 1990, by an independent investment performance measurement service.

CDA Investment Technologies placed NCNB's Consolidated Equity Fund in the top fifteen percent of equity money managers nationally. The Consolidated Equity Fund reported annual average returns of 22.4 percent, 13.1 percent and 19.1 percent respectively for the one-, three- and five-year periods ending June 30, 1990.

NCNB's Long Term Bond Fund has produced three- and five-year annualized returns of 9.1 percent and 10.8 percent respectively, putting NCNB in the top fifteen percent of fixed income managers in the CDA survey.

"Our excellent performance and top ranking is directly attributable to our disciplined investment approaches, experienced staff and commitment to the investment needs of our clients," said Charles G. Smith IV, executive vice

president and principal investment officer for NCNB's Trust Group.

"NCNB is extremely proud that our performance record puts us among the nation's leaders," Smith added.

Based in Rockville, Md., CDA Investment Technologies ranks funds managed by more than 1,500 banks, insurance companies, investment advisers and mutual funds across the United States.

Bank trust departments consistently outperform non-bank money managers, Smith said, citing results of a recent American Bankers Association study.

NCNB Trust has $68 billion in client assets. Its clients include individual trust accounts, corporate retirement plans, foundations, endowments and public entities.

NCNB Corporation (NYSE: NCB) is a Charlotte-based holding company with more than $66 billion in assets and full-service banks in seven states.

#90211p0018 07/30/1990 ~PR Newswire

ELKTON, MD (JULY 30) PR NEWSWIRE - The Conowingo Power Co. (COPCO) announced today that effective Aug. 1, customers will see a decrease in their monthly electric bills.

According to Samuel M. Gawthrop Jr., COPCO president, the typical monthly bill for a residential customer using 500 kilowatt-hours (kWh) of electricity will be reduced from $53.66 a month to $49.72, a decrease of $3.94 or 7.3 percent. Gawthrop said, "The new monthly bill for the typical customer is lower now than it was in February 1984."

The change is due to a decrease in the company's Energy Cost Rate (ERC), which reflects changes in the cost of purchased electricity.

The ECR is revised twice a year, Feb. 1 and Aug. 1, to reflect the company's actual cost of purchased energy, based on costs experienced in the last six-month period and a reconciliation of collections in prior periods.

The present ECR will decrease from a charge of 0.079 cents per kWh to a credit of 0.708 cents per kWh.

Gawthrop said, "This reduction in the ECR rate is due to fuel savings resulting from the good performance of Philadelphia Electric Co.'s nuclear

units at Peach Bottom and Limerick. Limerick Unit 2 was placed in commercial operation in January 1990 increasing PE's nuclear output, which is estimated to be about 67 percent for 1990. Electricity generated by nuclear has a fuel cost about one-fifth that of electricity generated by oil."

The purpose of the ECR is to enable the company to pass along to its customers additional savings or charges due to fluctuations in the cost of purchasing electricity.

The process is continually reviewed and audited by the Public Service Commission of Maryland.

#90211p0019 07/30/1990 ~PR Newswire

RICHARDSON, TX (JULY 30) PR NEWSWIRE - CONVEX Computer Corporation announced today the availability of Fast Matrix Solver (FMS) software on C Series supercomputers. FMS library, developed by Multipath Corp., Santa Barbara, Calif., has been ported and optimized for the CONVEX systems. FMS is the industry standard for performing matrix algebra operations on large, dense matrices and groups of vectors.

Packaged as a FORTRAN-callable library, FMS software may be incorporated into new or existing scientific and engineering programs to improve performance and provide large problem-solving capability.

"FMS software has been highly optimized for the CONVEX C Series supercomputers," said Dr. Ronald C. Young, president, Multipath Corp. "All compute intensive subroutines have been hand coded in assembler to achieve peak performance and optimize memory access when multiple processors operate in parallel. Parallel control is implemented using the multi-tasking features of the CONVEX operating system. As a result, near linear performance is achieved as the number of processors is increased from one to four. The resulting benefits include faster job turnaround, increased throughput, large problem-solving capability and reduced system memory requirements," he noted.

CONVEX sponsors an aggressive third-party software program that has attracted leading software vendors in the fields of mechanical engineering aerospace simulations, signal and image processing, computational chemistry and geophysical processing. Currently, there are more than 600 third-party software packages available that take advantage of the C Series' advanced architecture. This number represents an increase of more than 200 applications this year alone. To the user, this not only

provides a large selection of possible codes from which to choose, but also means increased performance in running their third-party applications.

Multipath Corporation is the leading supplier of software for large, dense matrices. The company specializes in the unique requirements of this calculation and has developed vertical expertise ranging from microcode to applications. In addition to the FMS software product, Multipath also offers documentation, training and support services. Since 1983, more than 160 licenses have been sold in 11 different countries.

CONVEX Computer Corporation (NYSE: CNX), a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology. CONVEX has sold more than 700 systems in 33 countries. The installed base now represents nearly a half of a billion dollars of cumulative revenues from more than 400 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network.

SALT LAKE CITY (JULY 30) PR NEWSWIRE - JB's Restaurants Inc. (NASDAQ: JBBB) which operates family-style restaurants in 12 western states, today reported net income for the 16 week quarter ended July 2, 1990 or $1.043 million, or 22 cents per share. This compares with net income of $.992 million, or 20 cents per share for the like quarter the prior year. Net income for the first three quarters of the current year amounted to $1.6 million, or 32 cents per share, as compared with net income of $1.4 million, or 27 cents per share, for the like period the prior year.

Revenues for the quarter of $37.1 million increased 5.2 percent over the like quarter the prior year. The increase in revenues reflects the addition of new restaurants which, at the end of the current year quarter, totaled 123 units as compared with 118 units in operation at the end of the prior year quarter. During the quarter two new units were opened bringing the total opened in fiscal 1990 to six. Comparable store sales were flat with the prior year resulting from soft economic conditions in the Southwest markets offset by strong sales performance in the Northwest markets. For the first three quarters of the fiscal year, company revenues totaled $85.8 million as compared with $82.6 million for the like period the prior year.

In making the announcement, Fred P. Gonzales, the company's president and chief operating officer, stated, "We are pleased to report continued strong earnings improvement and expansion of the company's business." Gonzales noted that year-to-date the company has generated income before income taxes of $2.5 million which is an increase of 21 percent over the like period the prior year.

Clark D. Jones, the company's chairman and chief executive officer added, "During the quarter the company repurchased 269,000 shares of its common stock under a previously announced 500,000 share repurchase program. To date the company has repurchased 456,905 shares which reflects management's confidence in the company as well as the price/value of the shares."

WASHINGTON (JULY 30) PR NEWSWIRE - Nycal Corporation (NASDAQ-NMS: NYCL) announced today that it had entered into an agreement to acquire a controlling interest (50.7 percent) in Shephard Insurance Group Ltd. (Vancouver: SHR) through an exchange of shares.

Under the arrangements, Nycal will issue 2,218,819 shares of its common stock to three people in exchange for 3,480,500 of Shephard's outstanding shares, increasing Nycal's outstanding shares to a total of 7,534,787. For purposes of the exchange Nycal valued its shares at US$4 per share. The shareholders, Graham Ferguson Lacey, Pahlson-Moller & Co. Ltd. and Sidney Lazard, are presently Nycal's largest shareholders; this exchange will increase their combined Nycal shareholdings from 36.6 percent to 55.3 percent.

Graham Ferguson Lacey is the chairman and CEO and a director of both Nycal and Shephard and is president of Shephard. Lazard is a director of both Nycal and Shephard.

Shephard is a Vancouver, British Columbia-based holding company owning insurance brokerage/agency firms in the United Kingdom and Canada with a pending acquisition of a credit life insurance company in the United States.

Nycal was formerly a development stage mineral resource company with properties in northern California, principally involving laterite ores containing cobalt, chrome and nickel. In September 1989, Lacey acquired control of Nycal at management's invitation and undertook a recapitalization and reorganization of it. Nycal expects to make other acquisitions in the insurance and financial services field, as well as in oil and gas and in other industries.

Nycal's chairman stated that it was Nycal's intention to make a takeover

bid for the remaining shares of Shephard on exchange terms equal to or better than this transaction once the necessary registration statement, takeover bid and other filings have been made and cleared with the Securities and Exchange Commission, Vancouver Stock Exchange and British Columbia Superintendent of Brokers.

The Vancouver Stock Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.

CONTACT: Graham Ferguson Lacey, chairman and CEO of Nycal, 202-625-6600.

DARIEN, CT (JULY 30) PR NEWSWIRE - Air Express International Corporation (AMEX: AEX), today reported net income of $3,359,000 or $.66 per share for the second quarter of 1990, which is an increase of 32 percent over the second quarter 1989 net income of $2,483,000 or $.50 per share. For the first six months of 1990 the company reported net income of $4,968,000 or $.99 per share compared to net income of $3,701,000 or $.74 per share for the first six months of 1989.

Gross revenues for the quarter were $137,422,000, an increase of 8 percent over second quarter 1989 revenues. For the first six months of 1990, gross revenues were $269,896,000 compared to $249,512,000 for the first six months of 1989. The increase in revenues was partially due to higher foreign currency values.

In commenting on the results, Dennis Dolan, vice president and chief financial officer, stated, "We are pleased with the continued improvement in our earnings since the disappointing third quarter of 1989. During the first half, our foreign operations posted stronger results. Europe, in particular, has been a major contributor of our higher earnings."

NEW YORK (JULY 30) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) and The Continental Corporation (NYSE: CIC) announced today the signing of an agreement in which MCI will serve as Continental's primary telecommunications carrier.

Continental is one of the nation's oldest and largest property and casualty insurers.

Under the terms of the three-year, $13 million agreement, MCI will provide Continental with a full array of voice and data services, including: MCI's Vnet, or virtual private network service, which will be used to link Continental's headquarters in New York City with over 200 offices nationwide; 800 inbound service; digital data service (DDS-DSO); MCI fax; and the MCI Card for employees.

Commenting on the agreement, Kenneth J. Burk, senior vice president of Continental's Systems Division, said: "The objectives of the new agreement are to improve the efficiency, manageability and flexibility of Continental's voice and data networks, which are so critical to a large insurance company. We are satisfied that MCI will provide us with excellent services at low cost."

Nathan Kantor, president of MCI's Northeast Division, said: "The Continental/MCI agreement represents a major step forward in MCI's partnership with one of the nation's premier insurance providers. The agreement expands MCI's Vnet service to all of Continental's locations, brings a wide array of voice and data applications to Continental's telecommunications environment, and affords us an even greater opportunity to work with them closely as they continue to grow. We are delighted to be a part of this exciting process."

MCI, headquartered in Washington, provides a full range of telecommunications services to businesses, residences and government agencies. The company owns and operates the world's second largest communications network, employing advanced fiber optics, digital microwave satellite and digital switching technologies.

The Continental Corporation, headquartered in New York City, has over $6 billion in annual revenues, $13 billion in assets. Its insurance subsidiaries write property/casualty coverages through independent agents and major brokers with an emphasis on commercial package policies and select specialized insurance products and services.

#90211p0034 07/30/1990 ~PR Newswire

SANFORD, FLA. (JULY 30) PR NEWSWIRE - The new Rex-Meyer facility, in the Port of Sanford, will be bringing over 300 permanent, skilled jobs to the region during the next five years. Jobs that up to this point have been contracted overseas.

The plant will be manufacturing luxury yachts for a variety of boat builders, among them, the legendary Midnight Lace Yachts. These boats were originally produced in Hong Kong and most recently in Brazil.

Among the subjects covered at the press conference will be how the increased productivity of the American workforce lowered the costs of domestic manufacturing and lead to these jobs returning from overseas.

According to Walter Rex, vice president, "When we began to really compare costs, we found that American workers, in the field of yacht construction, were outproducing their overseas competitors. Factoring in quality control and accurate completion scheduling, this further improves our competitive position in the world market."

The new facility will be producing Midnight Laces and other custom fiberglass yachts. It will be one of the few fiberglass manufacturing plants in the world with in-house design, mold building, construction, and interior decorating, with an on the water test facility.

Phase one and two of the new facility will include almost 63,000 square feet of operations, $5,500,000 worth of capital improvements and 150 new jobs, all of which will start almost immediately.

#90211p0035 07/30/1990 ~PR Newswire

BAY SHORE, NY (JULY 30) PR NEWSWIRE - Lumex, Inc. (AMEX: LUM) today announced operating results for the second quarter and six months ended June 30, 1990.

Sales for the quarter were $20,831,000, 2 percent lower than the $21,289,000 recorded for the comparable period in 1989. The company incurred a loss of $849,000, or $0.20 per share, compared with net income of $469,000, or $.11 per share, for the same period in the prior year.

For the six months ended June 30, 1990, sales were $42,203,000 compared with $42,145,000 for the first half of the prior year. The loss for the period was $1,070,000, or $0.25 per share, compared with net income of $810,000, or $0.19 per share, for last year's first six months.

Operating results were affected by less than expected sales levels and increased expenses in specific areas.

Shipments of Cybex products into its traditional medical market were below last year's levels. Sales orders recorded, however, were higher than shipments, resulting in an increase in sales backlog. Sales to Cybex's institutional fitness market were strong as the product line continues to gain market share. International sales also continued to increase at a very favorable rate.

Lumex division sales of patient seating and safety aids were ahead of the prior year, but below expectations. Sales should accelerate in the second half due to increased sales force productivity and the growing demand for products introduced late last year.

Operating expenses rose as a result of increased international marketing activities and the continued training of the General Electric Computer Service Group, which has now taken over all the ongoing field service for Cybex rehabilitation and testing equipment. In addition, the expansion of the sales force and product introductions in the Lumex division contributed to the increase in total operating expenses.

Lumex, Inc. is a leading manufacturer of products for the healthcare industry, specifically serving: fitness, acute and long-term care, home health care, and physical therapy/sports medicine.

DEERFIELD, IL (JULY 30) PR NEWSWIRE - The board of directors of Gaylord Container Corporation (AMEX: GCR) has elected Robert E. Kramer vice president and general manager-container operations.

In this capacity, Kramer is responsible for overall management of the

company's 16 corrugated container plants, five corrugated sheet plants, and its preprint graphics facility.

Prior to joining Gaylord, Kramer served for seven years as vice president-containerboard marketing and logistics for the Nekoosa Packaging division of Great Northern Nekoosa Corporation.

Previously, he spent 21 years in key management positions with Owens-Illinois, the last of which was regional general manager in the forest products group.

Gaylord Container Corporation is a major national manufacturer and distributor of corrugated containers, containerboard, unbleached kraft paper, multiwall bags and, through a joint venture, grocery bags, and sacks.

SAN RAMON, CA (JULY 30) PR NEWSWIRE - Margaretten & Company, Inc., of Perth Amboy, N.J., one of the largest mortgage bankers in the nation, today announced the formation of a wholesale division based in San Ramon.

The wholesale unit will be an additional profit center for Margaretten, said Felix M. Beck, chairman and chief executive. "Wholesale activity will complement our existing national retail branch network," said Beck, "bringing strategic benefits to the company including geographic diversity and servicing portfolio growth."

Margaretten, the mortgage banking subsidiary of Primerica Corporation (NYSE: PA), is the nation's largest originator of FHA- insured mortgage loans for single-family home purchases and of VA- guaranteed mortgages. The 81-year-old firm also is a leading provider of conventional mortgage loans.

The new wholesale division will report to David A. Frank, executive vice president of Margaretten. The unit will work with mortgage brokers and correspondents to purchase loans initiated by other residential lending institutions, Frank said. Margaretten's focus will be on conventional loans.

F. Ann Papanek, a 17-year mortgage banking veteran, was named president of the wholesale division. Papanek formerly was president and chief executive of Home Owners Fed of California, which in 1989 generated more than $1 billion in wholesale fundings.

The wholesale division will initially have the most impact in California, said Papanek. Subsequently, plans are for the unit to be nationwide in scope, subject to certain geographic restrictions.

Margaretten last year originated and closed more than $3 billion in mortgage loans for home buyers. The company's mortgage servicing portfolio at June 30, 1990, amounted to $2.5 billion.

#90211p0039 07/30/1990 ~PR Newswire

PITMAN, NJ (JULY 30) PR NEWSWIRE - K-Tron International Inc. (NASDAQ: KTII), today announced that revenues in the second quarter ended June 30, 1990, were a record $16.3 million compared to $14.9 million for the same period in 1989.

While pretax earnings were up 14 percent, a higher effective tax rate resulted in net earnings of $1.081 million, or $.37 a share, slightly better than last year's $1.073 million, or $.36 a share.

For the first six months of 1990, revenues were a record $30.8 million, up 8 percent from the $28.4 million in 1989. Earnings before taxes increased 15 percent for the period, while an increase in the effective tax rate resulted in net earnings of $1.790 million or $.61 a share compared to $1.768 million or $.60 a share for the first half of 1989. Reduced utilization of tax loss carryforward benefits resulted in a significant increase in income taxes.

Leo C. Beebe, chairman and chief executive officer, commented, "Sales of feeder equipment and security systems were somewhat below last year's levels for the first six months of 1990, but company revenues and earnings continue to show growth due to diversification into the secondary plastics equipment market with increases in sales of the new gravimetric blender equipment, systems support for our customers and from the effects of a favorable exchange rate."

Beebe added, "Even with reduced volumes in certain products, the economies we have effected over the past year are taking hold -- our productivity and efficiency have improved -- margins are up, and debt has been reduced from year-end levels."

Beebe indicated that backlog was up nearly 29 percent over the same period in 1989, adding, "Overall our backlog is encouraging, but there are some soft spots -- including the U.S. market where business has slowed. Additionally, during the second quarter, the relocation of our sales staff

from New Jersey to Singapore temporarily disrupted business in the Far East. With this move however, we are positioning ourselves to better serve our Far Eastern customers and expand our market penetration in this part of the world."

K-Tron International Inc., through its subsidiaries, is a major producer of gravimetric feeders, blenders and security systems with facilities in the United States, Europe and the Far East and customers throughout the world.

SAN FRANCISCO (JULY 30) PR NEWSWIRE - Visa U.S.A. Inc. will launch a new national marketing campaign Aug. 1 to show U.S. merchants how much more profitable their businesses can be if they choose Visa over American Express.

As part of the campaign, Visa has established a toll-free telephone line which merchants can call for a free, specially created, single- purpose calculator to help compute the extra profit they can realize by converting American Express card transactions to Visa transactions. Generally, merchants pay higher fees for American Express transactions than for Visa transactions.

"This new program is designed to drive home to the merchant Visa's value, including more profit opportunity, more potential incremental sales and generally faster payment of their card transaction receipts," said Visa Executive Vice President Bradford W. Morgan.

"We believe hard business facts like these will encourage more and more merchants to prefer Visa and allow us to further extend our growing market share lead," he added.

With five times more cards in circulation and over four million more participating merchants, Visa has a 48.5 percent share of the card market, compared with 18.7 percent for American Express.

Morgan said the new campaign will encourage merchants to favor Visa signage at their establishments to help shift business from American Express.

Visa will also suggest ways for merchants to negotiate a lower fee from American Express. "We intend to give merchants the solid facts that will make American Express' higher fees hard to justify," Morgan said.

Visa is the world's leading consumer payments program, with more than 220 million cards issued and annual transaction volume exceeding $259 billion. Over 22,000 financial institutions participate in the Visa program and nearly eight million merchant outlets, including more than 2.6 million outlets in the United States.

CHICAGO (JULY 30) PR NEWSWIRE - Morton International (NYSE: MII) today reported net income of $134.8 million or $2.80 per share (including 12 cents of unusual income) for the fiscal year ended June 30, 1990. Last year's net income was $97.1 million or $2.03 per share after unusual charges of $25.0 million or $.52 per share for the separation of Morton from Thiokol Corp. as well as provisions for the phaseout of a chemical operation and certain environmental costs. Net sales were $1.6 billion compared to $1.4 billion in the prior fiscal year.

Fourth quarter net income for fiscal year 1990 was $36.3 million or $.75 per share compared to $23.3 million or $.49 per share last year. Net sales for the quarter increased 28 percent to $429.1 million, of which $47.3 million represented the sales of Morton's coatings and adhesives businesses acquired from Whittaker Corp. on March 30, 1990.

Included in this year's fourth quarter and twelve month net income was $5.8 million or $.12 per share of unusual income consisting of a $13.1 million gain from the sale of a 40 percent interest in Toray Thiokol, partially offset by $7.3 million of charges related primarily to previously divested operations and to last year's separation from Thiokol Corp.

Morton International is a Chicago-based manufacturer and marketer of specialty chemicals, salt and automotive inflatable restraint systems.

#90211p0044 07/30/1990 ~PR Newswire

RALEIGH, NC (JULY 30) PR NEWSWIRE - Texfi Industries, Inc. (NYSE: TXF) and Jefferson Mills, Inc. announced today that they have entered into an agreement in principle whereby Texfi will purchase 50 percent of the outstanding stock of Jefferson Mills, Inc. Texfi will have an option to purchase the remaining 50 percent over the next 24 months. This agreement is subject to certain conditions, including acceptance by the shareholders of Jefferson Mills, Inc. Assuming all conditions are met, the transaction will be consummated as early as Aug. 31, 1990.

Jefferson Mills, Inc., a privately held company with 400 employees located in Jefferson, Ga., was founded in 1916 and is in the business of manufacturing and selling cotton and cotton-blend fabrics, primarily corduroy.

L. Terrell Sovey Jr., chairman of Texfi, said, "We believe that Jefferson's production capabilities can be greatly expanded to a wide variety of finished woven fabrics, many of which are needed by Texfi's customer base. Although we are a substantial producer of finished fabrics we do not have the capabilities to meet the needs for finished cotton fabrics required for today's market. George C. Langston, formerly CEO of Forstmann & Company, Inc., has been retained as a consultant to coordinate and develop, with existing management of the company, increased opportunities for profitability in all phases of Jefferson's current and future business direction."

Texfi Industries, Inc. is in the business of manufacturing and marketing various textile and apparel products. Texfi's common stock, preferred stock, and debentures are traded on the New York Stock Exchange.

DALLAS (July 30) PR Newswire - Dorchester Hugoton, Ltd. (NASDAQ-NMS: DHULZ) announced today that net earnings for the second quarter ended June 30, 1990 totalled $616,000 or six cents per unit on revenues of $1,349,000 compared to $782,000 or seven cents per units on revenues of $1,482,000 for the previous year's second quarter.

Production volumes remained approximately the same as last year and last quarter but the weighted average price was slightly lower than last year and seasonally lower than last quarter because of weak market demand.

Earnings for the six months ended June 30, 1990 totalled $1,585,000 or 15 cents per unit on revenues of $3,065,000 compared to $1,624,000 or 15 cents per unit on revenues of $3,026,000 for the same period of 1989.

ST. PETERSBURG, FL (JULY 30) PR NEWSWIRE - Security Tag Systems, Inc. (NASDAQ: STAG) today reported a significant increase in sales growth for the first quarter, ended June 30, of fiscal year 1991. Sales revenues increased 40 percent, to over $3.4 million from $2.4 million for the comparable period last year. The major improvement in net income over last year's loss is primarily attributed to the sale of one- half of the company's interest in Securitag International, Ltd (STIL), and profit on previously deferred sales.

Carter W. Clarke, Jr., president and chief executive officer of Security Tag Systems stated, "Even though the first quarter has traditionally been our weakest in terms of sales, the company continued to experience growth. Our major source of revenues is still in the retail EAS industry here and in Europe, where we have been steadily gaining in market share. The

introduction of the Inktag has proven to be most successful with several large retailers now using the device. This has expanded our customer base considerably.

"From the way things are beginning to take shape, it looks as if Security Tag Systems is going to have a banner year as far as revenues are concerned, and I think we will end the year with profits greater than last year."

Security Tag Systems, Inc. develops, manufactures and markets electronic detection systems for retail, business, industrial and military markets.

SECURITY TAG SYSTEMS, INC.
Selected Operating Results (Unaudited)

#90211p0053 07/30/1990 ~PR Newswire

NEW YORK (JULY 30) PR NEWSWIRE - Alexander & Alexander Services Inc. (A&A) (NYSE: AAL) today reported net income of $17.7 million, or $0.43 per share, for the second quarter ended June 30, 1990.

Comparable results for 1989 were $25.3 million, or $0.62 per share, including $0.22 per share of gains from the sale of real estate and the

settlement of certain pension obligations.

Consolidated operating revenues were $335.7 million, an increase of $16.1 million or 5 percent over the second quarter of 1989. Operating margins also improved slightly, after adjusting for the non-comparable 1989 pension settlement gain, principally due to revenue improvement and certain cost control measures implemented by the company.

In commenting on the second quarter results, T.H. Irvin, chairman and chief executive officer, said, "Strong revenue growth in our London- based reinsurance operations was a principal reason for our success this quarter. Alexander Consulting Group also reported a significant increase in operating income due to the continuing expansion of its global consulting practice.

"Our North American retail brokerage operations continue to be adversely impacted by soft property and casualty premium rates," Irvin added.

Net income for the first six months of 1990 was $22.9 million, or $0.56 per share, compared to $37.3 million, or $0.92 per share, in 1989. However included in the prior year's results were $0.34 per share of non-recurring gains from the sale of real estate and the settlement of certain pension obligations.

For the first six months of 1990, operating revenues were $646.9 million, an increase of $24.8 million or 4 percent compared to the same period last year. Comparable operating margins were unchanged.

A&A Services Inc. is a global insurance brokerage, risk management and human resource management consulting company serving clients from offices in more than 70 countries. The company had 1989 revenues of $1.25 billion.

#90211p0056 07/30/1990 ~PR Newswire

ALBUQUERQUE, NM (JULY 30) PR NEWSWIRE - Public Service Co. of New Mexico (NYSE: PNM) (PNM) today reported a loss applicable to common stock of $3.4 million, or 8 cents per share, for the second quarter 1990 as compared to net earnings applicable to common stock of $11.6 million or 28 cents per share for the comparable quarter last year.

Earnings applicable to common stock from continuing operations for the 12 months ending June 30, 1990, were $22.7 million or 54 cents per share compared to a loss of $28.3 million or 68 cents per share for the like period last year which included one-time charges of $2.88 per share.

Operating revenues for the quarter decreased $14.9 million to $195.7 million from $210.6 million in the comparable quarter last year. The decrease was due primarily to the expiration of a long-term power sales contract with Southwestern Public Service (SPS) in December 1989 which contributed approximately $27.3 million to electric operating revenues during the comparable quarter last year. Retail electric sales increased 2.3 percent from the period a year ago. Retail electric customers for the quarter also increased 2.2 percent from the like quarter last year.

Preferred Stock Dividend Declared

The board of directors Thursday, July 27, 1990, declared regular quarterly dividends per share on the Cumulative Preferred Stock issues as follows: $1.245 on the 4.58 percent series; $2.12 on the 8.48 percent series; $2.1875 on the 8.75 percent series; $2.20 on the 8.80 percent series; and $1.565 on the 12.52 percent series.

All preferred stock dividends are payable Oct. 15, 1990, to holders of record Oct. 1, 1990.

WILLISTON, VT (JULY 30) PR NEWSWIRE - Playtex Apparel, Inc. and JBI, Inc. the company that invented the sports bra and manufacturers of the Jogbra Sports Bra line, announced today their signing of an agreement to sell JBI to Playtex. Both companies are privately held. No financial information was disclosed.

"The creation of the JBI Division of Playtex Apparel fulfills our goal of entering the high-end sports bra market," said Mark Lowenthal, vice president/general manager of Playtex. "We are extremely fortunate to gain not only the expertise and innovative thinking of this entrepreneurial company, but the orginal and highest quality line of sports bras."

Lowenthal said as a division of Playtex, JBI will remain at its present location in Vermont. Hinda Miller and Lisa Lindahl, founders of JBI, Inc., will continue to lead the new division with the help of the present marketing and management team and sales force.

The acquisition also gains for Playtex a solid foothold in sporting goods outlets, where JBI has established its national distribution, Lowenthal said.

"We are impressed with Playtex's commitment to our vision for JBI, Jogbra " said Miller. "We have dedicated the past 13 years to creating products for active women and athletes that are not just fashion, but are serious sports equipment."

"Also key to our success was putting together a team of creative marketers and sales people who got these products to market nationally and made us competitive with corporate giants," Lindahl added. "Playtex brings us the resources of a larger company with a commitment to that entrepreneurial spirit," she said.

"Playtex enters the picture at just the right point in our company's development to give us the resources to keep moving ahead," said Lindahl. JBI, Inc. had its beginnings 13 years ago when the two partners set out to remedy the discomforts of running for women by fashioning a more supportive bra from two jockstraps. The story of their growth has become legend in the sporting goods business. Their first prototype has become part of the historic costume collection of the Metropolitan Museum of Art.

The acquisition by Playtex will also include JBI's M.A.X. division of sports support underwear for men.

Playtex Apparel, Inc. is the country's largest manufacturer of high quality intimate apparel, selling a wide variety of contemporary products

to all classes of the retail trade. Playtex products are also sold in 39 countries around the world.

Playtex Apparel, Inc. is 100 percent owned by its present management.

#90211p0064 07/30/1990 ~PR Newswire

HERNDON, VA (JULY 30) PR NEWSWIRE - EDS announced today that it has signed the Small Multi-user Computer (SMC) contract with the U.S. Army Information Systems Selection and Acquisition Agency to provide multi-user micro-computer systems and services to the Army, the Navy and the Defense Logistics Agency.

The indefinite delivery/indefinite quantity contract runs for eight years in one-year increments. Depending on orders, the value of the contract could reach $700 million or more.

In addition to supplying multi-user computer systems, EDS will provide peripherals, operating systems software, maintenance, systems engineering, training and systems integration in both UNIX and DOS environments. EDS will also install Government Open Systems Interconnection Profile (GOSIP)-compliant local area networks. Estimates are that up to 20,000 multi-user systems will be procured by the three customers.

The three agencies will be able to order hardware and services from the SMC contract during a five-year window after initial acceptance tests at Fort Huachuca, Ariz. Maintenance is available for the entire term of the contract.

The systems available through the SMC contract range from single user personal computers with the DOS and UNIX operating systems to multiple four to 16 user systems connected via GOSIP-based local area networks. The new systems will build on and enhance existing technology investments while meeting all government requirements.

"The SMC program will provide reliable, cost-effective productivity-enhancing support while maximizing past, present and future office automation investments," said Robert McCashin, Group Executive for EDS' Federal Government business. "This contract establishes EDS as the UNIX integrator for our military customers."

"EDS' extensive, worldwide experience enables us to understand government information processing requirements," said George Sibley, EDS Military Systems Division president. "Our confidence in the SMC system we implement is best illustrated by EDS' use of these technologies in many of

our office automation activities."

EDS has operations in 27 countries and is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

#90211p0066 07/30/1990 ~PR Newswire

WESTBOROUGH, MA (JULY 30) PR NEWSWIRE - New England Critical Care, Incorporated (NASDAQ: NECC) today reported record sales of $28,549,000 for the second quarter of 1990, an increase of 59 percent over the $17,990,000 reported for the same period in the prior year. Net income for the quarter was $2,826,000 compared to net income of $1,840,000 for the comparable period in 1989. Income per share was 21 cents for the quarter as compared to 15 cents for the same quarter in 1989.

Sales for the six months ended June 30, 1990, were $54.4 million, an increase of 62 percent over the $33.6 million for the six months ended June 30, 1989. Net income for the six months was $5.2 million as compared to $3.4 million for the same period in 1989. Fully diluted income per share was 38 cents for the six months ended June 30, 1990, as compared to 28 cents for the comparable period in 1989. Share and per share data for 1989 have been retroactively restated to reflect the 2-for-1 split of the company's common stock, paid in the form of a stock dividend on March 31, 1990.

"We continue to be pleased by the company's strong revenue growth and by the demand within the home infusion therapy industry," said Patrick Smith, president and chief executive officer. "We are very excited about the opportunities in the alternate site health care marketplace. We are confident that our well recognized commitment to providing the highest quality service, combined with our national service network and strong financial position, will allow us to play a leadership role in its development."

Founded in 1981, NECC was one of the first companies to provide infusion therapies such as parenteral nutrition, antibiotic therapy, chemotherapy and pain management therapy to patients in their homes. As a leading provider of these services in the alternate site health care marketplace, NECC today offers more than 18 types of home infusion therapies, with specialized services to specific patient populations including AIDS and pediatrics. New England Critical Care's headquarters are located at 50 Washington St., Westborough, Mass. 01581. The shares of the company's common stock are traded over-the-counter on the NASDAQ National Market

System under the symbol NECC.

WALTHAM, MA (JULY 30) PR NEWSWIRE - Cabot Corporation (NYSE: CBT) today reported income applicable to primary common shares of $15.3 million (62 cents per share) for its third quarter ended June 30, 1990, compared with $8.6 million (34 cents per share) for the same quarter a year ago. Net sales and other operating revenues for the third quarter were $421.0 million vs. $470.5 million last year.

For the nine months ended June 30, 1990, Cabot reported income applicable to primary common shares of $58.0 million ($2.36 per share), compared with $58.5 million ($2.23 per share) in the same period a year ago. Net sales were $1,272.7 million compared with $1,491.5 million last year. The decline in third quarter and year-to-date net sales reflects the divestiture in late 1989 of Cabot's West Texas gas pipeline and processing businesses.

Total operating profit for the third quarter advanced 42 percent to $50.5 million from $35.6 million last year. By segment, Cabot's operating profit advanced to $43.1 million from $33.0 million in specialty chemicals and materials while increasing to $7.4 million from $2.6 million in energy.

Cabot Corporation is a Waltham, Mass.-based Fortune 300 company with operations in specialty chemicals and materials, and energy.

#90211p0077 07/30/1990 ~PR Newswire

ATLANTA (JULY 30) PR NEWSWIRE - Moving into a new home is hectic enough without having to worry about getting phone service connected.

With Southern Bell's new Quick(SM) service, getting residential telephone service is as easy as plugging in a phone.

The new service, which is now available to most Southern Bell customers in Georgia, is designed to substantially reduce the time required for new service orders to be connected. In most cases, customers will be able to get their phone service the same day they place their order.

According to Carl Swearingen, Southern Bell's vice president for Georgia, Quick service capitalizes on the state's network of computerized central offices.

"This would not have been possible before December 1989, when we completed our State-of-the-Art Statewide program and our conversion to Stored Program Controlled Switching," Swearingen said. "We knew the computerized switching system offered a great deal of promise. Quick service is just one of the ways it is fulfilling that promise."

When moving into a new house or apartment, a customer previously had to go to another phone to call Southern Bell's Business Office to request service. Quick service changes the procedure by encouraging the customer to call from his new residence.

"With this new service, Southern Bell leaves 'partial dial tone' on the line when the previous resident moves out," said Gene Parker, Southern Bell's director for Corporate and External Affairs. "This provides the new customer moving in with access to the Business Office. All he has to

do is plug in his phone and dial 780-2355 during regular business hours to place an order."

According to Parker, if the customer calls from the new residence before 3 p.m., his service will be connected the same day.

"Quick service will especially help in situations where customers may not know their exact address or only have a postal box or route number," said Parker. "In the past, Southern Bell would often have to dispatch a technician to the house or apartment or spend considerable time searching for the information needed to set up service, delaying a customer's installation by days."

"More importantly, it means that it will be easier for our customers to do business with us and they will get their phone service faster," added Swearingen.

Customers moving into newly built homes or apartments will need to call the Southern Bell Business Office prior to their move and have service connected in the conventional way. Quick service is currently not available in newly built homes, apartments or for businesses. Customers who do not get a dial tone at their new location must call the Business Office and have their service connected in the conventional way. Other restrictions may apply.

DENVER (JULY 30) PR NEWSWIRE - Ahmed D. Kafadar, chairman and chief executive officer of OEA Inc. (AMEX: OEA) the Denver-based, high-technology manufacturer of aerospace and automotive products, reported that the company had reached a court approved agreement in the suit brought last week by the Colorado Department of Health. The agreement avoids an injunction and enables the company to restart production at its Denver facility. Accordingly, OEA has resumed manufacturing of all its products as of Sunday, July 29, 1990. In particular, OEA initiators for the air bag will be produced round-the-clock. It is expected that all customer requirements of initiators will be met or exceeded within two weeks.

OEA is a leader in the field of propellant and explosive-actuated devices used in (1) the personnel escape systems of military aircraft, missiles, and for space application and (2) the automotive air bag. All new aircraft such as the F-4, F-111, F-14, F-15, F-16, F-18, B-1B, B-2, S-3A, and AH-64A, the Space Shuttle, and missiles/launchers, such as the Harpoon,

Trident, ALCM, Peacekeeper, ACM, Ariane, and SICBM, have OEA-developed and manufactured devices. Most domestic automobiles equipped with an air bag use an initiator manufactured by OEA's Automotive Products Division.

MARTINSBURG, WV (JULY 30) PR NEWSWIRE - Mountaineer Bankshares of W.Va. Inc. (NASDAQ-NMS: MTNR) announced that net income for the second quarter of 1990 was $1,112,000 or $0.42 per share compared to $1,080,000 or $0.41 per share for the same period of 1989, for an increase of 3 percent.

Earnings for the six months ended June 30, 1990, were $2,107,000 or $0.80 per share in 1990, compared to $2,245,000 or $0.85 for 1989.

According to Brent Robinson, president, "Our charge-offs have moderated during 1990, and we increased our loan loss allowance 49 percent since this time last year. We also are making progress with our cost reduction program. Overhead expense declined $390,000 during the first half of the year. We are confident that these trends will lead to long-term higher profitability."

Mountaineer Bankshares is the parent holding company of five banks, including Old National Bank, Martinsburg; The Empire National Bank of Clarksburg; City National Bank of Fairmont; The Bank of Wadestown, Fairview; and Mercantile Banking & Trust Co., Moundsville.

#90211p0090 07/30/1990 ~PR Newswire

MARKHAM, Ontario/TROY, MI (JULY 30) PR NEWSWIRE - Siemens Automotive is acquiring MACI Industries Group from Magna International Inc. (TSE: MG.A, MG.B -- NASDAQ: MAGAF), the companies jointly announced today.

Financial terms of the agreement signed today were not disclosed. The transaction is set to close on Aug. 31, 1990.

The London, Ontario-based MACI Industries Group is a unit of Atoma International, a subsidiary of Magna. The divestiture is part of Magna's previously announced debt-reduction program, Magna said.

MACI manufactures and markets fractional horse-power electric motors and related components for the North American automotive industry. MACI has about 1,200 employees, with annual sales of approximately $120 million (Canadian).

The acquisition includes MACI's four London-area plants, a Burlington plant and a distribution facility in Marysville, Mich.

Timothy D. Leuliette, member of the management board of the worldwide Siemens Automotive Group and chairman of Siemens Automotive Limited (Canada), said, "MACI is a well-respected name in the automotive industry. This reinforces our commitment to supply our global customers with the highest quality automotive systems available today."

William B. Waite, president and CEO of Siemens Electric Ltd. in Toronto, said, "This investment affirms our long-term commitment to Canada. MACI will add another four plants to our existing base of nine manufacturing sites across the country and increase the number of Canadian employees to 4,100."

Siemens Automotive is a worldwide leader in the design, manufacture and supply of technologically advanced electrical and electronic systems and

components for the global automotive industry. With headquarters both in Troy and Regensburg, Germany, Siemens Automotive has sales, R&D, or manufacturing operations in 12 countries including facilities in Newport News, Va., and Chatham, Ontario. With the acquisition of MACI, it employs more than 12,000 people globally and has a global sales volume of $1.4 billion (U.S.).

Siemens Automotive L.P. and Siemens Electric Ltd. are operating units of Munich, West Germany-based Siemens AG. Siemens AG has some 360,000 employees worldwide and operates 177 manufacturing facilities in 41 nations. With annual sales exceeding $34 billion, it serves customers in more than 120 countries.

MURRAY HILL, NJ (JULY 30) PR NEWSWIRE - Airco Gases today announced the construction of a new merchant air separation facility to replace its existing 23-year-old plant in Buffalo, N.Y. The new plant, which is expected to come on-stream by July 1992, will produce nitrogen, oxygen and argon for U.S. and Canadian markets.

Royden Vice, president of Airco's Industrial Gases division, commented, "The new facility provides Airco with a modern, cost- efficient plant, and reflects the company's strong commitment to providing its customers with reliable and high-quality service and products."

Vice also noted that the new Buffalo facility will be an integral part of Airco's considerable Northeast and Midwest plant network, which includes air separation facilities in Kittery, Maine; Selkirk, N.Y.; Arroyo, W.Va.; Springville, Ind.; Joliet, Ill.; and Fostoria, Ohio.

Airco Gases is a leading manufacturer and supplier of industrial gases and gas-handling technology in the United States. The company's primary gas products include liquid and gaseous nitrogen, oxygen, argon and carbon dioxide, helium, hydrogen and a variety of medical, rare and special gases.

Airco is a member of the BOC Group, the worldwide gases company operating in more than 50 countries and with sales last year of more than $4 billion.

#90211p0093 07/30/1990 ~PR Newswire
JACKSON, MI (JULY 30) PR NEWSWIRE - Consumers Power Company, facing increasing erosion and damage to vegetation, is asking operators of off-road vehicles to stay off its land and rights-of-way.

"We're having more and more problems from trespassers who ride ORVs on our property and cause damage," said David V. Voigt, vice president, distribution operations for the utility. "In many areas the thin, sandy soil is being washed away because of damage to the vegetation that normally would hold it in place.

"Many ORV riders mistakenly believe that land under Consumer Power's electric lines and over gas transmission routes is public property, open to off-road driving. Not only is such use of the company's land unauthorized, it can sometimes endanger the ORV driver," Voight said.

Consumers Power does not permit public use of its gas and electric transmission routes for safety and environmental reasons, and also because the company often does not own the property, but merely has an easement. Even where the company does own the land, it has usually been leased to the adjacent property owner for farming, access control or for gardening or landscaping.

With more than 1,600 miles of trails managed by the Michigan Department of Natural Resources for ORV use on state forest land, there is no reason for ORV operators to use utility land and rights-of-way.

Consumers Power has a long history of making thousands of acres of its forest and river lands available for public use. However, indiscriminate use of four-wheel-drive vehicles, dirt bikes, dune buggies or motorcycles can threaten the stability of electric transmission towers, cause saltation of waterways and disruption of wildlife and may threaten some unique plant species.

Consumers Power Co., the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90211p0098 07/30/1990 ~PR Newswire
ATLANTA (JULY 30) PR NEWSWIRE - Worldspan Travel Agency Information Services and World ComNet, Inc. announced today that they have signed a contract to link World ComNet's tour and cruise booking system to Worldspan's DATAS II and PARS travel agency computer reservations systems

(CRS). An estimated availability date will be announced shortly.

The new service will enable Worldspan travel agencies to instantly locate and book from thousands of vacation packages, that vacation which most closely meets a client's needs. The travel consultant makes selections based on a client's desired specifications, by entering a variety of search criteria using self-prompting fill-in-the-blank screen formats. The system then responds with a list of customized travel plans and allows the consultant to display virtually any type of information concerning a tour or cruise, ranging from daily itineraries to climate and suggested dress, or exacting rates.

"Travel consultants will literally have the world of tours at their fingertips," said Dick Hankins, president of World ComNet.

According to Sam Galeotos, Worldspan's vice president-sales, the database enhancement will be offered by Worldspan "at no cost to DATAS II and PARS travel agencies. This is another example of Worldspan's commitment to providing a full range of travel services to its subscribers."

Worldspan provides an extensive database of worldwide travel service categories including airline schedules and fares, and hotel and rental car rates and availabilities. Worldspan services are used by 13,411 travel agency subscribers in over 30 countries. It currently offers the broadest selection of reservations, ticketing and office automation products to the travel industry.

World ComNet's system, known as Tourinc, houses the industry's largest tour distribution and booking database. Currently, it mirrors the products of approximately 118 tour companies, with additional companies being added monthly.

Now in its third year of development, the World ComNet system offers the travel industry's first major breakthrough in the electronic distribution of leisure travel products. Headquartered in Irvine, Calif., World ComNet Inc. is involved in the development of a variety of automated products and service for the travel industry. The company is a subsidiary of WCN Investment Corp.

Worldspan, headquartered in Atlanta, is a joint venture of affiliates of Delta Air Lines, Inc., Northwest Airlines (NWA Inc.), Trans World Airlines Inc. and Abacus Distribution Systems Pte Ltd. Worldspan was established in February of this year to develop and market a global computer reservations system for the travel agency marketplace. In June, Worldspan and Abacus, an Asia/Pacific CRS company, purchased a 5 percent ownership share in each other to further strengthen their electronic distribution resources and capabilities. Abacus is headquartered in Singapore and is jointly owned by Cathay Pacific Airways, China Airlines, Malaysian

Airlines, Philippine Airlines, Royal Brunei Airlines and Singapore Airlines.

#90211p0100 07/30/1990 ~PR Newswire

LOS ANGELES (July 30) PR Newswire - Coldwell Banker Commercial Group, Inc. today announced that the company has successfully retired its high-yield $61.7 million eight-year subordinated notes, despite the current soft real estate market and the collapse of the high-yield bond market.

The company acquired new financing through a senior subordinated credit agreement with an effective interest rate currently of approximately 12.5 percent on a floating rate basis. The original high- yield debt was part of the financing used to acquire Coldwell Banker Commercial from Sears, Roebuck & Co.

The new financing, which will save the company several million dollars annually in interest and related costs, was obtained through Sumitomo Finance (Dublin) Limited.

The new debt has a floating rate based on LIBOR. In the current interest rate environment this will provide the company with subordinated debt at an effective rate of approximately 12.5 percent versus the former 16.5 percent and escalating.

Didion criticized negative press reports about the current difficulties in the commercial real estate market.

Through the first six months of 1990, Coldwell Banker Commercial had revenues of $209.9 million, and operating profit was ahead of last year's results at this time.

Didion pointed out that the problems in commercial real estate are principally in the developer and financial services sectors.

Coldwell Banker Commercial, the largest firm in the industry, was acquired from Sears in 1989 by a group of employees, including Didion, and several outside investors for approximately $300 million. Part of the acquisition involved raising approximately $47 million through a unique employee stock offering. Employees of the company now own 44 percent of the company.

Other investors include The Carlyle Group, a private merchant banking firm in Washington, D.C., R.K. Mellon & Sons, Westinghouse Credit Corp.,

Richard C. Blum & Associates, Inc., and several offshore investors.

The company, which had revenues of $458 million in 1989, has offices in almost 100 locations throughout the United States and Canada. Its primary clients are commercial real estate investors, users and developers. Services provided include commercial real estate brokerage and management, financing, advisory services, real estate investment banking, capital management and portfolio disposition services.

#90211p0101 07/30/1990 ~PR Newswire

NEW ORLEANS (JULY 30) PR NEWSWIRE - Newpark Resources, Inc. today reported net income of $236,000, equal to $.09 per share, on revenues of $10,476,000 for the quarter ended June 30, 1990, compared to net income of $241,000, or $.09 per share, on revenues of $8,938,000 in the corresponding period of 1989.

For the first six months, the company's net income was $489,000, equal to $.18 per share, on revenues of $21,326,000. This compares to net income of $893,000, or $.33 per share, on revenues of $19,480,000 in the same period of 1989.

James D. Cole, president and chief executive officer, noted that the revenue increase was the result of improved market penetration in the environmental and oilfield services that the company provides to the oil industry.

Per-share amounts are based on a weighted average of 2,755,812 and 2,719,493 shares outstanding at June 30, 1990 and 1989, respectively, and have been restated to give effect to the 1-for-10 reverse split which became effective July 16, 1990.

LOS ANGELES (JULY 30) PR NEWSWIRE - Richard K. Roeder, 41, formerly a partner in the Los Angeles-based law firm Paul, Hastings, Janofsky & Walker, has joined WSGP Partners L.P. as a managing director. WSGP Partners is the investment firm founded by William E. Simon and Gerald L. Parsky. As reported on July 18, 1990, The Tokio Marine and Fire Insurance Co., Ltd. has made a $100 million equity investment in WSGP Partners.

At Paul, Hastings, Roeder advised corporate clients and investment groups on acquisition and financing matters. In addition, he ran the firm's 150-lawyer business law department. Paul, Hastings is an international firm of approximately 400 lawyers.

"Our working relationship with Richard has always been very strong," said Gerald L. Parsky, co-chairman of WSGP Partners. "We have a real need to have someone with his unique expertise on board full time." WSGP Partners plans to establish an equity fund with a limited number of international institutional investors. At the same time, the firm will make equity investments as a principal.

"I am sorry to be leaving Paul, Hastings after 16 years, but this was a unique opportunity to grow with an investment firm that has a long-term, international investment focus," said Roeder.

A native of Philadelphia, Roeder graduated from Amherst College and received his J.D. degree from the University of California at Berkeley. After law school, he spent a year at Cambridge University in an international law program. Roeder joined Paul, Hastings in 1974 and became a partner in 1981.

NEW YORK (JULY 30) PR NEWSWIRE - The Official Committee of Preferred Stockholders of Eastern Airlines, Inc. recently met with Martin R. Shugrue Jr., trustee of Eastern. Shugrue presented to the committee a report concerning the improved operations at Eastern and the airline's outlook for the balance of 1990 and 1991. The committee was favorably impressed with the actions taken to date by the trustee to improve the operations and viability of the airline. Robert O. Harris, chairman of the committee said, "It is good to see that Mr. Shugrue has taken charge of the airline and we believe he has begun to, and will continue to, regain the

confidence of the traveling public."

TULSA, OK (JULY 30) PR NEWSWIRE - Nineteen representatives from affiliate centers of the Opportunities Industrialization Centers of America Inc. (OIC/A) will be in Oklahoma City Aug. 16-19 participating in an advanced leadership development program sponsored by the Chevron Corp.

The session is the third of six to be conducted over a three-year period with a curriculum designed specifically for affiliate board chairpersons and executive directors of the OIC/A.

It is being funded with a $150,000 grant from Chevron. The participants represent job training centers from 10 states.

Robert E. Adams, board chair of the Oklahoma County OIC, said the principal goals of the leadership development program are to enable affiliate executive directors and board chairpersons to become more proficient in managing resources, developing techniques for marketing the organization's capabilities to address changing needs of the community's labor pool, strategic planning and networking.

According to W.G. (Bill) Rinehart, Chevron's Public Affairs Manager in Tulsa, the company has been involved with OIC/A for most of the organization's 26-year history.

"It (OIC/A) has proven itself to be a comprehensive and effective self-help organization that specializes in providing job training for disadvantaged workers of all persuasions," Rinehart said.

"By helping affiliate management to become more adept at handling their resources," he continued, "we can make a significant contribution in dispelling hopelessness, reducing incidents of crime and breaking the cycle of welfare dependency." We see OIC/A as an essential element in helping to address the growing needs of tomorrow's labor force, Rinehart concluded.

Rinehart said that the OIC/A representatives will be welcomed Aug. 16 with a private reception hosted by Chevron at The Waterford Hotel in Oklahoma City. Two days of intensive training to hone their management skills will follow.

The remaining training sessions will be conducted through 1991. Persons interested in wanting to know more about OIC/A programs can contact Robert E. Adams, 405-521-4214, or Ursula Hendricks, 215-951-2250.

#90211p0106 07/30/1990 ~PR Newswire

MINNEAPOLIS (JULY 30) PR NEWSWIRE - Cray Research (NYSE: CYR) today announced a number of products and technologies to support its network supercomputing strategy. The company introduced new file server technology a new high-capacity disk subsystem, and networking capabilities.

"We've combined Cray Research supercomputer performance and file server technology to create the most powerful and cost-effective network file server on the market," said John Rollwagen, chairman and chief executive officer of Cray Research Inc. "Today we also are introducing a reliable, high-performing disk storage device."

Today's announcement follows the company's recent introduction of the CRAY Y-MP2E system, a CRAY Y-MP supercomputer with configurations priced from $2.2 to $5.8 million, as well as its entrance into the minisupercomputer market.

The UNICOS Storage System is a high-performance network storage management system that provides high-speed access to large numbers of files on a variety of storage media. It is a feature of the current version of Cray Research's UNICOS operating system and can run on all Cray Research supercomputers.

When run on the new CRAY Y-MP2E computer system, the UNICOS Storage System transfers data up to four times faster than traditional file servers at prices competitive with traditional servers.

Additionally, the UNICOS Storage System supports industry standards such as UNIX and TCP/IP, so that users can access equipment from many different vendors. The UNICOS Storage System works with existing Cray Research disk technology, as well as with the new disk technology that Cray Research also announced today.

The DS-41 Disk Subsystem incorporates highly reliable eight-inch disk technology to offer large storage capacity, a small footprint, fast transfer rates, and low power consumption. This storage unit, which will be available in the third quarter of 1990, offers the option of disk "daisy chaining," a technique of connecting multiple disk storage units to

a single channel on a Cray Research system to maximize storage capacity.

Developed for use with CRAY Y-MP, CRAY X-MP, and CRAY-2 systems, the DS-41 offers excellent price/performance and highly reliable disk storage. The DS-41 can store up to 19.2 billion bytes of data per subsystem and can transfer data to and from the disk at a sustained rate of 9.6 million bytes per second.

OKLAHOMA CITY (JULY 30) PR NEWSWIRE - Kerr-McGee Corp. (NYSE: KMG) announced today that several companies have expressed interest in purchasing its offshore contract drilling subsidiaries, the Transworld Drilling companies, including 61.5 percent ownership of Transocean Drilling Co. Ltd.

Kerr-McGee is evaluating the interest and plans to negotiate with potential buyers. A sales price has not been established, but the company anticipates an after-tax gain on the transaction.

Transworld provides contract drilling services to the offshore oil and gas industry. Kerr-McGee controls an offshore fleet of 18 mobile rigs located primarily in the Gulf of Mexico and the North Sea.

The Transworld Drilling companies own and operate six jack-up and seven submersible rigs. Transocean has four jack-up rigs and one harsh-environment, semi-submersible rig.

CHICAGO (JULY 30) PR NEWSWIRE - A year after breaking ground for construction of Phase I of its new Illinois Bankcard Center, FCC National Bank will celebrate the initial opening of the office facility in a ribbon-cutting ceremony on Wednesday, Aug. 8, 1990, at 10 a.m., at the Westfield Business Park in Elgin, Ill., at I-90 and Randall Road. Groundbreaking for Phase II of the construction will also take place.

FCC National Bank is a wholly-owned subsidiary of First Chicago Corporation (NYSE: FNB) engaged in the nationwide issuance of Visa and MasterCard.

In recognition of first-phase completion of the new structure and the

groundbreaking for Phase II construction, Elgin Mayor George Van De Voorde has proclaimed Aug. 8, 1990 as "First Chicago First Card Day."

Mayor Van De Voorde, officers of the Elgin Chamber of Commerce, and other dignitaries will take part in the ribbon-cutting and groundbreaking ceremonies with Leo F. Mullin, chief operating officer of First Chicago's Superregional Bank Business, and Scott Marks, Jr., chairman of FCC National Bank.

"This new facility reaffirms our commitment to a long-term presence in Elgin," said Marks. "During the past 17 years, we've built a strong and successful business, and today we are well positioned for further growth."

The consolidation of operations currently housed in five different facilities is now underway, with the first contingent of more than 1,500 Elgin-based employees moving into 240,000 square feet of space.

When Phase II, III, and IV construction is completed, the new Bankcard Center will total 500,000 square feet, which will allow for the full integration of executive, operations, and computer facilities, and will provide room to expand and grow to meet the challenges of the 1990s.

Chicago architect Richard A. M. Potokar designed the office facility, and CMD Corporation, the nation's oldest developer of industrial and business parks, is administering the construction for all phases of the build-to-suit project.

The state of Illinois is assisting FCC National Bank with the project by providing $165,355 in training funds to help upgrade the skills of 175 current employees and to help train 168 new employees.

First Chicago Corporation is a leading multibank holding company with assets of $50.4 billion. Through FCC National Bank, First Chicago is the nation's third largest bankcard issuer.

HAIFA, Israel (JULY 30) PR NEWSWIRE - Elbit Computers Ltd. (NASDAQ: ELBTF), an Israel-based manufacturer of computer systems and products for military and commercial applications and a subsidiary of Elron Electronic Industries Ltd. (NASDAQ: ELRNF), today announced that it has received a new contract with General Dynamics Corp. (NYSE: GD) for the supply of Stores Management Systems ("SMS") for the F-16 aircraft. The value of this contract is $20 million, spread over a multi-year period. The SMS

determines the sequence of weapons release between the various suspension points of the aircraft, manages the stores, displays data to the pilot on the Multi-Function Display ("MFD") of the aircraft and maintains the aircraft's balance during weapons delivery.

Several months ago Elbit received a separate $13 million contract from General Dynamics for the production of MFDs for the F-16. In addition to the above, Elbit has also developed two generations of mission computers for the F-16. Following the current contract, the overall volume of orders received by Elbit to date for F-16 systems has already reached $150 million, involving F-16s supplied to the Israel Air Force, the U.S. Air Force and other customers.

Emmanuel Gill, Elbit's president and CEO, stated that "this latest order from General Dynamics represents an achievement for Elbit and Israeli industry." Gill added that "Elbit has proven itself capable of maintaining high production standards over an extended period and of meeting the most stringent criteria of the U.S. aircraft industry."

Elbit Computers Ltd. designs, develops, manufactures, markets and services a wide range of advanced, often combat proven electronic products and systems for airborne, shipboard and ground military applications. Through its Elscint Ltd. subsidiary, Elbit is engaged in the design, manufacture, distribution and servicing of computer-based medical diagnostic imaging systems. Through other subsidiaries, it provides a variety of commercial computer products and services, as well as specialized, infrared imaging equipment.

CHARLOTTE, N.C. (JULY 30) PR NEWSWIRE - William A. Coley, senior vice president-customer operations at Duke Power, and Richard B. Priory, the company's senior vice president for generation and information services,

today were elected to Duke Power Co.'s (NYSE: DUK) board of directors at its meeting in Hickory, N.C.

Coley, a native of Portsmouth, Virginia, grew up in Belmont, N.C. He graduated from Georgia Institute of Technology with a bachelor of science degree in electrical engineering.

Coley has served as senior vice president-power delivery since 1988. Since joining the company in 1966 as a junior engineer at Marshall Steam Station, he has held a number of positions throughout the company including vice president of distribution, vice president of the central division and vice president of operating.

Coley is president of the board of directors of United Family Services and past president of International House. He serves on the Donor Development Board of United Way of Central Carolinas fund drive. Coley is a member of the board of directors for Carolina Pad and Paper Co. and a member of the board of directors of the Charlotte Symphony. He is also chairman of the Elective Process Study Committee of Mecklenburg County and serves on the board of advisors for WTVI in Charlotte.

Priory, a native of Lakehurst, New Jersey, graduated from West Virginia Institute of Technology with a bachelor of science degree in civil engineering (magna cum laude) and from Princeton University with a master of science degree in engineering. He is also a graduate of the University of Michigan's public utility executive program.

Before joining Duke Power, Priory was a design engineer and project engineer at Union Carbide from 1969-1972, and an assistant professor of a structural engineering at the University of North Carolina at Charlotte from 1973-1976.

Priory joined Duke Power as a design engineer in 1976 and was promoted to senior engineer in 1977. In 1978 he was promoted to principal engineer and in 1981 was named manager of the project managment division. Priory was elected vice president of design engineering in 1984. He was named senior vice president-generation and information services in 1988.

The newly appointed director is chairman of the U.S. Council on Energy Awareness Technical Programs Advisory Committee and chairman of the Southeastern Electric Exchange's Engineering and Operation Division Executive Committee.

Priory is chairman of the board of directors for Duke Engineering and Services, inc. and Louisiana Energy Services Co. He is a member of the boards of directors of J.A. Jones Applied Research Company; Duke Energy Corporation; and Science Museums of Charlotte, Inc.

He is vice chairman of the 1990 United Way of the Central Carolinas, Inc. fundraising campaign and serves on the Charlotte Mecklenburg Public Broadcasting Authority.

ATHLONE, Ireland (JULY 30) PR NEWSWIRE - Elan Corporation plc (AMEX: ELN) today announced record revenues and profits for the quarter ended June 30, 1990, the first quarter of fiscal 1991. Sales increased from IRP 8,401,000 to IRP 11,817,000 (US$19,025,000), an increase of 41 percent.

Net profits increased from IRP 655,000 to IRP 1,390,000 (US$2,238,000) an increase of 112 percent. Earnings per share increased from IRP 0.04 to IRP 0.09 (US$0.14).

Commenting on the results, Elan's Chairman and Chief Executive Officer, Donald E. Panoz, said:

"The excellent results achieved in the first quarter reflect improved performances from each of Elan's businesses and in particular reflect the licensing of Verelan to Lederle Laboratories and the production of Verelan for the launch on the United States market which took place earlier this month. The continuing sales growth of Cardizem SR resulted in increased production and royalty income."

Panoz said that following the approval of Verelan by the FDA in May, the company will continue to focus its resources on increasing the output and productivity of its manufacturing and marketing operations, expanding its

technological base for the future and focussing the regulatory resources of the company on the pending NDAs including Nicontil (Transdermal Nicotine patch) and Nifelan (once-daily nifedipine) and the company's improved liquid formulations for carbamazepine, erythromycin, acetaminophen and theophylline.

Elan Corporation plc is a leader in the specialized health care field of advanced reformulation and drug delivery, concentrating on improved drug absorption and utilization. Elan operates research and manufacturing facilities in Athlone, Republic of Ireland; Enschede, Netherlands; Manila, Philippines; Gainesville, Ga.; Brea, Calif., and Cambridge, Mass.

SAN FRANCISCO (JULY 30) PR NEWSWIRE - Chevron Corp. today announced completion of the sale of its Freeport, Bahamas, facilities to Petroleos de Venezuela, S.A. (PDVSA), the state-owned oil company of Venezuela.

Included in the sale -- first announced as a preliminary agreement on Feb. 8 -- are storage and marine facilities, plus a refinery that has been inoperative since 1985.

Chevron will receive about $120 million in cash, plus a long-term contractual right to future storage services at Freeport. The agreement has been approved by the Bahamian and Venezuelan governments.

The Freeport facilities have been operated by a Chevron unit, Bahamas Oil Refining Co. (BORCO), and now will be operated by a wholly owned PDVSA subsidiary, which retained all the employees.

The facilities include:
-- a crude oil and petroleum product terminal business, including 20 million barrels of storage;
-- marine facilities for ships up to 500,000 deadweight tons;
-- an inactive 500,000 barrel-per-day refinery;
-- a local refined product business;
-- 624 acres of land, of which about 200 acres are undeveloped.

#90211p0140 07/30/1990 ~PR Newswire

ABBOTT PARK, IL (JULY 30) PR NEWSWIRE - Ross Laboratories, a division of

Abbott Laboratories (NYSE: ABT), today announced a program to collaborate with hospitals to distribute -- at no cost to the uninsured -- a new therapy for the prevention and treatment of respiratory distress syndrome (RDS) in premature newborns.

The donation project, called Lifeline, is designed to assure that patients who have no private insurance or do not receve government assistance will be able to receive the natural surfactant called Survanta (beractant, Surfactant TA).

Survanta is a ready-to-use sterile suspension that is administered intratracheally to prevent or treat RDS. Some 50,000 premature infants each year are born before they have developed the ability to produce surfactant, a liquid coating of the lungs that prevents the lungs from collapsing during breathing. Current therapy for RDS consists of oxygen in combination with a respiratory ventilator machine to assist breathing. RDS is the leading cause of death in premature newborns.

"With the extraordinary costs associated with treating infant RDS," said John Kane, president of Ross Laboratories, "we wanted to be sure that every premature baby who would benefit from Survanta received it, regardless of the family's ability to pay."

Kane estimates that the Lifeline program will donate approximately $10 million dollars' worth of Survanta during the first 12 months following FDA approval.

Under a Treatment Investigational New Drug (IND) protocol that began nine months ago, Survanta is currently available at no cost to qualified hospitals with neonatal itensive care units under the direction of neonatologists. More than 3,000 premature infants have received Survanta during the ongoing clinical trials.

The pulmonary-allergy drugs advisory committee of the U.S. Food and Drug Administration (FDA) has recommended unanimously that FDA approve Survanta for prevention and treatment of RDS in premature newborns.

The committee's action, although an important step, is advisory, not binding, in FDA's review of the New Drug Application. Members of the advisory committee are non-FDA medical experts in the appropriate specialty area.

Abbott Laboratories is a worldwide manufacturer of health care products, employing 42,000 people.

#90211p0141 07/30/1990 ~PR Newswire
CHICAGO (JULY 30) PR NEWSWIRE - Continental Materials Corporation (AMEX: CUO) today reported a net loss of $37,000 or 3 cents per share for its second quarter ended June 29, compared with a loss of $248,000 or 21 cents per share a year ago. Consolidated net sales of $20,229,000 were down 15 percent from $23,799,000 a year ago, but up nearly 19 percent from this year's first quarter.

James G. Gidwitz, chairman, said results improved significantly between the first and second quarters, but continued to reflect sluggish sales.

Net sales for the six months totaled $37,253,000, compared with $42,501,000 in last year's first half. The six months' net loss was $900,000 or 77 cents per share, compared with $959,000 or 83 cents per share a year ago.

Imeco, Inc. of Polo and Dixon, Ill., achieved the strongest performance among the company's operating subsidiaries, with significant sales and income gains over last year's second quarter and first six months. Imeco is a leading maker of thermal transfer equipment.

Williams Furnace Co. of Colton, Calif., and Phoenix Manufacturing Co. of Phoenix, Ariz., both showed substantial improvement in the second quarter, though delayed seasonal orders and mild weather held volumes significantly below their high year-ago levels.

Volume and operating results of the company's two building materials subsidiaries, Transit Mix and Castle of Colorado Springs, Colo., continued to reflect depressed construction activity in that area.

Income from the company's mining interests declined to $14,000 for the first six months, from $188,000 in last year's first half, as a result of lower silver prices and discontinuation of payments on a uranium property. The company also owns a 30 percent partnership interest in Oracle Ridge Mining Partners, a copper property near Tucson, Ariz. This property is currently scheduled to be in production by the end of the third quarter of 1990.

#90211p0142 07/30/1990 ~PR Newswire
BURBANK, CA (JULY 30) PR NEWSWIRE - Trefoil Capital Investors L.P. the $450 million investment fund formed by the executives of Shamrock Holdings

today jointly announced with CNC Holding Corporation that they have reached preliminary agreement on the acquisition by Trefoil of all of CNC Holding's 82 percent equity interest in Child World Inc. (NASDAQ: CWLD) in a non-cash transaction.

Following the completion of this transaction, Trefoil will acquire the remaining 18 percent interest in Child World through the acquisition of all of its 2,021,866 publicly held shares for $14 per share in cash in a second step merger transaction.

Child World, headquartered in Avon, Mass., is the nation's second largest retail toy chain, operating 175 toy supermarkets in 31 states. Sales for its year ended Feb. 3, 1990, were $830 million.

Definitive documentation for the transactions is expected to be completed by Sunday, Aug. 5. The acquisition of CNC Holding's interest in Child World is expected to be completed within 60 days thereafter and is subject to unanimous approval of the transactions by Child World's board of directors, receipt of an opinion from a nationally recognized investment banking firm that the $14 to be paid for each publicly-held share is fair to such holders from a financial point of view, consent of CNC Holding's banks and satisfactory arrangements being made with respect to the working capital facility for Child World.

Stanley P. Gold, president of the General Partner of Trefoil, said that Child World fits several of the criteria that the partnership is looking for in an acquisition.

Jeffrey A. Cole, chief executive officer of Cleveland-based CNC Holding Corporation, said that he was pleased that CNC was able to sell Child World to an organization with the kind of track record that the principals of Trefoil have established.

Trefoil Capital Investors, L.P. was recently formed by the executives of Shamrock Holdings Inc. Shamrock, based in Burbank, Calif., owns and operates two of the nation's largest chains of music and video stores, the 71-store Music Plus chain in Southern California and the 140-store Sound Warehouse chain based in Dallas. It also owns, through Shamrock Broadcasting, 15 radio and three television stations. Shamrock also owns a 15 percent stake in Enterra Corp. (NYSE: EN) and has various real estate holdings.

CNC Holding had previously announced that it had retained investment bankers to seek a buyer for Child World.

HOUSTON (JULY 30) PR NEWSWIRE - Baroid Corporation (NYSE: BRC), a leading worldwide supplier of petroleum services and titanium products, today reported that earnings for the second quarter and first half of 1990 increased 366 percent and 343 percent, respectively, over the comparable 1989 periods.

Net income was $13.2 million, or $.18 per share, compared to $2.8 million, or $.04 per share, for the second quarter of 1989. Net sales for the quarter were $204.0 million compared to $117.9 million in the same quarter a year ago. The 1990 results include the operations of Baroid's wholly owned subsidiary, Titanium Metals Corp oration (TIMET), which was consolidated effective Jan. 1, 1990.

For the six months ended June 30, 1990, the company reported net income of $19.2 million, or $.28 per share, on net sales of $392.4 million, compared to net income of $4.3 million, or $.07 per share, on net sales of $234.4 million in the first six months of 1989. Net income for the second quarter and first six months of 1990 included $1.6 million and $2.2 million, respectively, of extraordinary credits resulting from the utilization of net operating loss carryforwards.

Operating income of the company's petroleum services operating units improved 84 percent on a sales increase of 24 percent in the second quarter of 1990 and improved 59 percent on a sales increase of 17 percent in the first half of 1990 compared to the respective periods in 1989.

Baroid Drilling Fluids' operating income for the second quarter of 1990 increased to $8.8 million on net sales of $88.9 million compared with operating income of $5.0 million on net sales of $73.9 million a year ago. Operating income for the first half of 1990 increased to $13.7 million on net sales of $162.6 million compared with operating income of $8.3 million on net sales of $138.6 million. Improvements were realized in both Baroid's domestic and international operations as drilling activity surpassed 1989's levels.

Sperry-Sun Drilling Services' operating income for the second quarter of 1990 increased to $2.7 million on net sales of $39.5 million compared with operating income of $.3 million on net sales of $29.7 million a year ago. Operating income for the first half of 1990 increased to $4.3 million on net sales of $74.0 million compared with operating income of $.9 million on net sales of $60.4 million a year ago.

SOUTHPORT, CT (JULY 30) PR NEWSWIRE - Hunter Environmental Services, Inc. (NASDAQ-NMS: HESI) has reached an agreement with J. Anthony Forstmann to merge Hunter Industrial Facilities, Inc. ("HIFI") into a wholly owned subsidiary of Hunter. Currently, Hunter owns 63 percent of HIFI and Forstmann owns 31 percent of HIFI.

Hunter will issue one share of its common stock for every 2.75 shares of HIFI common and preferred stock outstanding and similarly will exchange options to purchase Hunter common stock for options to purchase HIFI common stock. In order to effect the merger, Hunter has agreed to issue approximately 3.9 million shares of Hunter common stock in exchange for the HIFI common and preferred stock not previously owned by Hunter. In addition, Hunter has agreed to issue options to purchase approximately 1.8 million shares of Hunter common stock at an average price of $3.06 per share for the exchange or cancellation of the outstanding options to purchase HIFI common stock. On July 25, 1990, Hunter common stock closed at $4.375 per share on NASDAQ.

The transaction is subject to receiving necessary government approvals as well ast the approval of Hunter's shareholders to increase the number of authorized shares of Hunter's common stock in order to consummate the merger.

HIFI has obtained the required draft permits from the Texas Water Commission (TWC) allowing the development of a unique industrial park capable of processing and disposing of hazardous waste in underground salt dome caverns in Texas. The TWC has issued a notice for public hearings, which will start in the near future. HESI had previously announced that it expected the hearings to be delayed for up to 60 days. However, HESI's attorneys are of the opinion that such a delay may not be necessary. HESI expects this issue to be resolved shortly. HESI expects final permits to be issued later this year.

The proposed facility will be a "state of the art" waste treatment and processing installation. All of the processing and treatment of the waste will take place indoors with advanced air treatment systems to reduce air emissions. The waste is to be processed into concrete-like pellets through the addition of portland cement and other additives and will then be pneumatically conveyed into the caverns solution-mined in the salt dome. From the time the waste is accepted by HIFI, it will not be exposed to the environment.

The adjacent industrial park is also unique in its concept and is envisioned as a prototype park for the 1990s. It is becoming more difficult every year to site new industrial facilities largely due to the local, state and federal permitting requirements for all industrial

complexes. HIFI will welcome industry and, with its extremely safe waste disposal system, is very attractive to companies looking for new sites. In addition, the park will be served by the largest concentration of pipelines in the nation. This will allow HIFI to make salt dome cavern storage available for natural gas and a wide range of other petrochemical products.

#90211p0155 07/30/1990 ~PR Newswire

MENLO PARK, CA (JULY 30) PR NEWSWIRE - Bruce L. Davis, chairman and CEO of MEDIAGENIC (NASDAQ: MGNC) will testify today before the House Judiciary Subcommittee on Courts, Intellectual Property, and the Administration of Justice regarding the Computer Software Rental Amendments Act of 1989.

The bill under consideration is H.R. 2740, which would prohibit commercial rental of software without authorization. Davis will testify that the proposed bill benefits only one part of the software industry by excluding a specific software format -- video game cartridges. Video game rentals without the possibility of compensation to the developer is unfair and dampens the innovation that provides a continuing flow of high quality products to consumers.

Davis supports H.R. 5297, introduced by Congressman Joe Barton of Texas, that provides copyright protection for all software media -- floppy-disk and cartridge -- and adds a measure of control over distribution of the product for rental, establishing procedures similar to the rental of movie videos. This would provide software and video game developers with the authority to exercise some control over, and enjoy some profit from, the rental of their products.

"Unrestrained rental of video game cartridges is a problem that no other entertainment medium shares. Like motion picture studios, we invest a great deal of money in product development, yet we do not have the control

over the terms of its distribution that they have. Our inability to influence and benefit from video game rental is unfair and cuts severely into retail sales. We see rental as an important and viable channel of distribution but are frustrated by the lack of adequate safeguards for rights of copyright owners."

MEDIAGENIC is an international publisher of entertainment and video game software, headquartered in Menlo Park, with offices in Japan and Europe. The company publishes Activision, Infocom, Gamestar, and Electric Dreams software, and serves as an exclusive distributor for Absolute Entertainment, Interplay Productions, Dynamix Inc., Sierra On-Line and System 3.

#90211p0156 07/30/1990 ~PR Newswire

WHIPPANY, NJ (JULY 30) PR NEWSWIRE - Isomedix Inc. (NASDAQ: ISMX) today reported second-quarter consolidated sales of $6,323,373, exceeding sales of $5,137,093 for the same period in 1989 by 23 percent. Operating income increased 12 percent to $1,671,269 compared with $1,489,782 for the same period last year.

Consolidated net income in the second quarter increased 25 percent to $1,146,326 compared with $919,303 earned a year ago. Based on 6,670,879 weighted average number of shares outstanding in the second quarter compared with 5,252,277 shares a year ago (a 27 percent increase), earnings per share were 17 cents for the second quarter vs. 18 cents for the same period last year.

Consolidated sales for the six months ended June 30, 1990, were $12,247,236, exceeding sales of $10,011,959 for the same period in 1989 by 22 percent. Operating income increased 19 percent to $3,209,963 compared with $2,693,445 for the same period last year.

Consolidated net income in the six months ended June 30, 1990, increased 29 percent to $2,115,323 compared with $1,633,664 earned a year ago. Based on 6,669,011 weighted average number of shares outstanding in the second quarter compared with 5,209,246 shares a year ago (a 28 percent increase), earnings per share were 32 cents vs. 31 cents for the same period last year.

Commenting on the quarter, John Masefield, chairman, president and chief executive officer, stated, "We are successfully penetrating the EtO market and are already seeing a significant backlog. Beginning in early 1991, we will be installing additional EtO chambers in our facilities. Also, we

have reduced the EtO cycle time which will allow us to process products more quickly, therefore, increasing capacity at each facility. It is anticipated that our second half in gamma revenues will be softer than previously forecasted due to larger than expected imports of already sterilized surgeons gloves and aerosol saline solutions. To counter this effect, the company is placing increased emphasis on contract sterilization of consumer products such as food packaging materials. We are pleased with the advances we have made in diversifying and expanding our business."

The company operates a network of nine sterilization facilities in seven states and Canada. During 1989, the capability to sterilize medical devices with pure ethylene oxide was added at two of these nine facilities and both locations are now operational. Isomedix also provides validation services through its Skyland Scientific Services subsidiary located in Montana.

NEW YORK (JULY 30) PR NEWSWIRE - The American Stock Exchange will open put and call options trading on the exchange-listed stock of Safeway, Inc. (options symbol: SWY) on Wednesday, Aug. 1. Based in Oakland, Calif., Safeway is one of the world's largest food retailers with more than 1,100 stores in the United States and Canada.

The new option has been allocated to the specialist unit of GHM, Inc. with Alvin Fischgrund as lead specialist.

The option will open with strike prices of 12-1/2, 15 and 17-1/2 and position limits of 3,000 contracts. Initial expiration months are August September and December 1990 and March 1991.

The Amex trades a total of 207 stock options, including 47 options on OTC stocks. In addition, options are traded on three broad-market indexes -- the Major Market Index (XMI), the Institutional Index (XII) and the International Index (ADR) -- as well as two narrow-based indexes -- the Oil Index (XOI) and the Computer Technology Index (XCI).

#90211p0163 07/30/1990 ~PR Newswire

BRIDGEPORT, CT (JULY 30) PR NEWSWIRE - The planned sale by Bridgeport Hydraulic Company (BHC) of 85 acres of surplus, off-watershed land in

Weston to the Town will be the first under a law revised in 1990 to reinforce the General Assembly's intent to promote the preservation of surplus water company land as open space.

Jack E. McGregor, president and chief executive officer of BHC and of its parent, The Hydraulic Company (THC), said BHC plans to reinvest all net proceeds from the $596,000 land sale in water system improvements to enhance service to customers. BHC has asked the Connecticut Department of Public Utility Control (DPUC) for an accounting treatment that will allow the company to record 100 percent of the economic gains on its books as an addition to stockholders equity, which, McGregor said, "will strengthen our balance sheet as well as our ability to serve our customers."

A Connecticut law, as clarified in this year's legislative session, directs the DPUC to allocate gains "substantially in favor" of stockholders when at least 25 percent of an off-watershed rate base land parcel is sold for open space or recreational purposes. The ratio of the stockholder/customer allocation is determined by the proportion of land dedicated to those uses, McGregor said.

"On this basis, and with 100 percent of the Weston parcel dedicated in perpetuity for open space, we have asked the DPUC to allocate 100 percent of the economic gains to stockholders," McGregor said. "Our investment of these proceeds in water system improvements will improve service to customers," he added.

The BHC chief executive said the company estimates that more than half of its 2,200 surplus, off-watered acres could be favorably affected by the open space promotion law. He acknowledged that "the DPUC's treatment of the Weston sale will influence our planning for the gradual sale of this land to help fund major water system improvements to benefit our customers and the extent to which it might be sold for open space and recreation."

The sale, agreed to by BHC and the Town last month, is subject to a number of conditions, including a favorable ruling by the DPUC and approval by BHC's board of directors.

THC is a diversified water management company with a core business of public water supply. Its BHC subsidiary, which serves a population of approximately 500,000 in 18 Connecticut communities, is among the 10 largest investor-owned water utilities in the U.S.

#90211p0166 07/30/1990 ~PR Newswire

LOS ANGELES (JULY 30) PR NEWSWIRE - Unocal Corp. (NYSE: UCL) today reported second quarter 1990 net earnings of $165 million, up 38 percent from $120 million for the same period a year ago. Earnings per share for the quarter were 70 cents, up from 51 cents in 1989.

For the first six months, Unocal's net earnings were $242 million, or $1.03 per share. This compares with six-month 1989 earnings of $207 million, or 88 cents per share.

Richard J. Stegemeier, Unocal chairman, president and chief executive officer, said the 1990 second quarter and six-month results reflected a $132 million aftertax gain from the sale of the company's wholly owned oil and gas subsidiary in Norway, higher domestic natural gas prices and production, and lower deferred income taxes and net interest expense. Partially offsetting these positive factors were lower domestic crude oil production, higher domestic oil and gas production expense and lower chemicals earnings. The company recorded lower crude oil prices for the second quarter, but still experienced higher prices overall through the first six months of the year.

The 1989 second quarter results included gains from the sale of surplus properties in Southern California and from the settlement of certain pension obligations. Six-month 1989 results included gains from various natural gas contract settlements.

The company's consolidated cash flows from operating activities and asset sales, including working capital changes, were $669 million for the six months, compared with $556 million a year ago. The 1990 cash flows include approximately $325 million from the second quarter sale of Unocal's Norway properties.

Second quarter revenues were $2.72 billion, down from $3.07 billion in 1989. Six-month revenues were $5.36 billion, compared with $5.70 billion last year. The lower revenues primarily reflect the absence of petroleum product sales attributable to Unocal's Midwest Marketing Division, which is now part of The UNO-VEN Company, a fifty-fifty joint venture formed in December of 1989.

Capital expenditures for the quarter totaled $256 million, down from $262 million in the same quarter a year ago. Year-to-date capital expenditures were $498 million, up from $464 million in 1989. Exploration expense for the quarter was $45 million, compared with $36 million for last year's second quarter. In the first six months of 1990, exploration expense was $82 million, up from $77 million in the same period of 1989.

For the second quarter of 1990, petroleum exploration and production earnings totaled $205 million, compared with $101 million a year ago.

For the six months, those earnings were $335 million, up 36 percent from $246 million in 1989.

The second-quarter and six-month results reflect the gain on the sale of Unocal's Norway properties and higher domestic natural gas prices and production. Partially offsetting these positive factors were lower domestic crude oil production and higher domestic oil and gas production expense. The 1990 results included deferred income tax benefits related to cost depletion of $12 million for the quarter and $24 million for the first six months.

Average domestic crude oil prices had opposing effects on earnings for the quarter and six-month period. Compared with the prior year, the quarter was negatively affected by lower prices, while average prices remained higher for the year-to-date period.

Six-month 1989 results included a $46 million aftertax gain from various natural gas contract settlements.

RALEIGH, NC (JULY 30) PR NEWSWIRE - Microwave Laboratories, Inc. (NASDAQ-NMS: MWAV) (MLI) announced today that its T1073 Traveling Wave Tube has completed all required government environmental qualification testing. However, final approval of the environmental tube is still dependant upon the review and approval by the government of a First Article Test Report. An additional tube is currently undergoing the required 2000 Life Test, which at the earliest, could be completed in October, 1990. Successful completion of qualification is still dependent upon the approval of a First Article Test Report and the acceptance by the government of the T1073 Life Test Tube. The company has contracts totalling approximately $9.3 million to manufacture the T1073 Traveling Wave Tube.

On July 3, 1990 the Company announced that its T-1062 Traveling Wave Tube has completed all governmental required Life and Environmental Qualification Testing. The successful completion of qualification is still dependent, however, upon the approval by the U.S. Government of the First Article Test Report. The government has up to 90 days to approve the First Article Test Report at which time the Company would be awarded Qualified Vendor Status for the T-1062 tube and would be entitled to begin production and shipment of the tubes at that time. The Company currently has a contract for approximately $4.4 million to manufacture the T-1062 Traveling Wave Tubes for sale to the Navy for its AN/ALQ-99 program. Although no assurances can be given, management believes the government

will award them Qualified Vendor Status for the T-1062 tube.

CHARLOTTE, NC (JULY 30) PR NEWSWIRE - Duke Power Co.'s (NYSE: DUK) board of directors today named William L. Foust vice president of the company's Central Division, effective Aug. 1

Foust has served as field liaison for Duke's Customer Service Center since early this year. He joined the company in 1961 as an engineering clerk in the Winston-Salem, N.C., office and served in the merchandising, residential and commercial marketing departments in Winston-Salem and in the commercial marketing department in the general offices in Charlotte before being named marketing supervisor in Spartanburg, S.C., in 1975. Foust was named marketing manager for Duke's Western Division in 1976, assistant manager of the Anderson district in 1984, and manager of the Anderson district in 1988.

While in Anderson, Foust was a member of the executive committee and board of the Anderson Chamber of Commerce, a board member of the Anderson Rotary and a member of the executive committee and board of the Western Foothills United Way. He was the 1989 campaign chairman for the Western Foothills United Way, and has been a member of the executive committee and board of the United Way of South Carolina. He also was appointed to the board of the Childrens Trust Fund of S.C. and was president of the Anderson Family YMCA in 1987-88. Foust was selected as one of the top five leaders in business and industry in Anderson County in 1989-90.

MINNEAPOLIS (JULY 30) PR NEWSWIRE - Peter M. Thompson has been named chief executive officer of Grand Metropolitan Food Sector's Sector Brands Division, with responsibility for Pillsbury International, Haagen-Dazs and Grand Met Foodservice USA. He has also been named an executive vice president of GrandMet's $8 billion Food Sector. The announcement was made by the Food Sector's chairman and chief executive officer, Ian A. Martin.

Thompson, formerly president and chief executive officer of Grand Met's Paddington Corporation, a New Jersey-based importer and marketer of distilled spirits, joined Grand Met in 1983. Before joining the company, he was president of Pepsico Produtos Ltda. (Brasil). Earlier in his career he was with J. Walter Thompson Company and General Foods Corporation.

In making the announcement, Martin said, "Peter's established track record at Paddington, where he brought the company from a two-brand importer to one of the most competitive US companies in the wines and spirits industry makes him an exceptional candidate to drive our Food Sector brands

forward."

"Peter's 20 years experience in the consumer foods industry, with a focus on international markets, also fits well with our plans to make Haagen-Dazs, Pillsbury and Green Giant major players in the international marketplace," Martin added.

A graduate of Oxford University and Columbia University Graduate School of Business, Thompson is a member of the board of directors of the First World Cheese Corporation and the Greater New York Council of The Boy Scouts of America.

Grand Metropolitan PLC, one of the largest international companies in the United Kingdom and a world leader in drinks, retailing and food, has sales in excess of $15 billion. US subsidiaries include ALPO Petfoods, Burger King, Carillon Importers, Haagen-Dazs, Heublein, The Paddington Corporation, Pearle, Inc., Pillsbury Brands, and Grand Met Foodservice USA.

CHARLOTTE, NC (JULY 30) PR NEWSWIRE - Duke Power Co.'s (NYSE: DUK) board of directors today named David H. Maner vice president -Greensboro Division, effective Aug. 1. Maner succeeds J.H. "Jack" Welch, who will retire Aug. 31, after 42 years of service to the company.

Maner has served as district manager in Chapel Hill, N.C., since 1984. He joined the company in 1976 as a retail office assistant in the Charlotte Division. Since then he has held a number of positions, including assistant supervisor of credit and supervisor of customer services in Charlotte, assistant to the district manager in Anderson, S.C., and branch manager in Eden, N.C.

A native of Charlottesville, Va., Maner graduated from Wake Forest University with a bachelor of arts degree in psychology and a juris doctorate degree in law.

Maner is a member of University United Methodist Church, where he serves as vice chairman of the administrative board. He is past president of the Chapel Hill/Carrboro Chamber of Commerce, and a member of the board of directors for both the YMCA and the Economic Development Commission. He is president of the United Way of Greater Orange County and vice president of Public Private Partnerships. Maner is treasurer for the East Chapel Hill Rotary Club and a member of the Central Carolina Bank Advisory Board.

Maner and his wife, the former Janice Booth of Charlotte, have two daughters.

CHARLOTTE, NC (JULY 30) PR NEWSWIRE - Duke Power Co.'s (NYSE: DUK) board of directors today named William F. Reinke vice president of system planning, effective Aug. 1.

Reinke has served as manager of electric utility marketing since December 1989. He joined the company in 1964 as an assistant engineer in the system planning department in Charlotte. He held a number of positions

before being named manager of production and transmission planning in the system planning department in 1977. He was named manager of the system planning department in 1984.

A native of Marinette, Wis., Reinke graduated from the University of Wisconsin with a bachelor's degree and master's degree in electrical engineering. He also received a master of management degree from the University of North Carolina of Charlotte.

Reinke is a member of the Institute of Electrical and Electronics Engineers, and is a U.S. advisor to Study Committee 37, "Power System Planning and Development," of the International Conference on Large High Voltage Electric Systems. He is also a member of the Cornelius-Lake Norman Lions Club and the Community in Christ Lutheran Church in Huntersville, N.C. Reinke is former chairman of the Southeastern Electric Reliability Council's engineering committee; a former member of the planning board for the town of Cornelius and is serving as a commissioner for the town. He is a registered professional engineer in North Carolina and South Carolina.

Reinke and his wife, the former Elizabeth Morgan of Mason City, Iowa, have a daughter and two sons.

HOUSTON (JULY 30) PR NEWSWIRE - Eastern Airlines today announced it will introduce two new daily roundtrips from Houston's Hobby Airport to New York's LaGuardia Airport, and one daily roundtrip to Washington's National Airport and Boston on Sept. 6.

On Aug. 1, Eastern will add one additional daily Houston-Atlanta roundtrip to its current three.

The airline said it is providing the only nonstop service from close-in Hobby Airport to both LaGuardia and Washington. This is in addition to the service Eastern currently provides from Hobby to Atlanta. "The immediate success of our new service to Atlanta from Hobby convinced us that nonstop service to the nation's business and government centers was a natural place for Eastern's expansion plans," said George Brennan, senior vice president-marketing.

Eastern is offering a $99 one-way introductory fare on nonstop flights from Hobby to New York and Washington and on direct trips to Boston via Washington and Atlanta. Tickets must be purchased by Aug. 23 for travel Sept. 6 through 20. Additionally, members of Eastern's "OnePass" frequent traveler program will earn double mileage for these flights through Oct. 6.

The airline also is offering its satisfaction guaranteed "Y-Not" first class fare for business travelers at $333 to Washington, $404 to New York, and $431 to Boston -- each way. This compares to other airlines' unrestricted coach fares which are approximately 15 percent higher.

Service from Hobby to New York, Washington and Boston will be operated with 149-passenger 727s. The new flights operate at the following local times:

FLIGHT	DEPARTURE	ARRIVAL
Daily Hobby to LaGuardia:		
42	11:10 a.m.	3:24 p.m.
46	6:30 p.m.	10:45 p.m.
Daily LaGuardia to Hobby:		
41	7:30 a.m.	10:10 a.m.
47	6:30 p.m.	9:10 p.m.
Daily Hobby to Washington/Boston:		
64	3:00 p.m.	6:45 p.m./8:47 p.m.
Daily Boston/Washington to Hobby:		
63	10:00 a.m./12:00	1:56 p.m.

Additional Houston to Atlanta:

504	12:33 p.m.	3:30 p.m.

Additional Atlanta to Houston:

505	10:45 a.m.	11:41 a.m.

#90211p0187 07/30/1990 ~PR Newswire

SAN JOSE, CALIF. (JULY 30) PR NEWSWIRE - Wyse Technology extended the high end of its UNIX-based multiuser systems family with the launch of the most powerful Intel 486-based multiprocessing system available today. The Series 9000i Model 940 has the capability of supporting up to eight 486 microprocessors, offering more than 100 MIPS (Million Instructions Per Second) performance.

Wyse has engineered sophisticated true symmetric multiprocessing (TSMP), first used in minicomputers, into its Series 9000i to bring Pyramid or Sequent-class performance within the financial reach of small to medium-sized businesses. In January 1990, Wyse was first to introduce this technology at entry price points of less than $50,000. The Series 9000i Model 940 is positioned as a database engine and server for distributed processing.

According to AIM Technology, a leading UNIX systems performance measurement company, the Wyse Series 9000i Model 940 outperforms all systems currently listed in the AIM Suite III Aim Performance Report Program (APR). The Wyse Series 9000i Model 940 with eight central processing units (CPUs) achieved a performance rating of 6,030 percent and a user load rating of 902, the highest performance and user rating of any system tested. Sequent's Symmetry S81, with 20 CPUs, ranks second in user load with a rating of 760. Pyramid's MIServer 12/8, with eight CPUs ranks second in performance with a rating of 4,540 percent.

"Wyse took the lead in pioneering TSMP technology for mid-range UNIX systems, making powerful computing accessible for the first time to a whole new tier of users," said Joseph O'Malley, vice president of sales. "We have a strong network of experienced distributors and value added resellers, who are enthusiastically selling our products to end users who need high-end UNIX performance at mid-range prices."

Wyse also announced that 1776 Inc., Symicron Computer Communications and Uniplex Integration Systems have joined the Wyse Unity Software Program for its UNIX-based multiuser systems. The program is designed to ensure that Wyse systems and the software of Independent Software Vendors (ISVs) are compatible, with the ISVs supporting their products on Wyse systems.

Series 9000i Model 940

Wyse Technology is a leading independent supplier of microprocessor-based products, which include terminals, IBM PC-compatible ocmputers, monitors and multiuser systems. The company sells its products through customers that add value, such as distributors, value added resellers and original equipment manufacturers. Headquartered in San Jose, Wyse operates sales offices across the United States and in Canada, Australia, Hong Kong and Western Europe.

#90211p0190 07/30/1990 ~PR Newswire

IRVINE, Calif. (JULY 30) PR NEWSWIRE - On the heels of its announcement of volume shipments for its 1600 Series VGA workstations, Netcom Research has introduced two new monochrome only 1200 series LAN workstations.

Commenting on the new introductions, Netcom President, C. Norman Campbell said, "These new 286-based, 12.5MHz workstations provide network nodes at the lowest possible cost without sacrificing performance. They fill the need for low cost, monochrome only workstations which we identified last year during our initial product research."

The 1200 series comes in Ethernet or ARCnet models with or without floppy disk drives. It offers up to 2MB of DRAM and has an 8K packet buffer. Both units have a built-in network boot PROM and provide a high load utility that puts network software in upper memory leaving more work space for utility programs to operate.

Like its big brother, this new 1200 series is small, fast, quiet and easy to install. It is designed with a single, fully integrated motherboard incorporating the CPU, monochrome video controller, I/O controller and the LAN interface. It is so light weight it can even be attached to the side of a desk with velcro fasteners.

The fully integrated design provides a truly "plug and play" workstation. The design requires no additional add-in cards and there are no jumpers or switches to set. Users need only to plug in their power supply cord, hook up the cables and the machines are ready to use. Ethernet and ARCnet models are designed to operate in all network operating systems meeting their respective industry standards. On-screen menus provide easy setup for specific user networks.

Volume shipments of the 1200 series will begin in early August. Prices are

$525 and $600 each in quantities of 100 for the 1212A and 1212E respectively. Delivery is stock to four weeks.

Netcom's product line is sold internationally through value added resellers (VAR), distributors (VAD), manufacturers, (VAM) and direct to original equipment manufacturers (OEM).

#90211p0191 07/30/1990 ~PR Newswire

FAIRFAX, VA (JULY 30) PR NEWSWIRE - ERC announced today that former ERC International Chairman and Chief Executive Officer Jack E. Aalseth, 57, has retired from the company.

Aalseth leaves the company following its joining New York-based Ogden Corporation (NYSE: OG) earlier this year.

Over the past 14 years, Aalseth took an aggressive and ambitious course in developing ERC to its current size of about $150 million in annual revenues and 2,000 employees. It began with his acquiring a $1 million contract with the Navy for integrated logistics support planning for Navy undersea surveillance projects and evolved to major placeholds in the defense and advanced technologies, environmental sciences and engineering, power engineering and production, information engineering, and biomedical services industries. He accomplished entry into many of ERC's added markets through acquiring smaller companies in the $10 million to $40 million revenue range. Aalseth believed that diversification was an integral and powerful component of corporate strategy for service-based companies. He furthered ERC's resources and position by taking it public in 1982, listing on the American Stock Exchange in 1983 and on the New York Stock Exchange in 1986.

Aalseth's career started with engineering for General Dynamics and for Lockheed's Missile and Space Division, and as manager of engineering and consulting services for United Testing Laboratories. He founded a technology services firm that was acquired by Planning Research Corporation, for which he served as president of PRC Technical Applications, and in other executive capacities. Following his first retirement, which occurred after working with PRC, he also developed a marina and boat brokerage business, prior to starting ERC.

Aalseth also involved himself in other activities demonstrating his beliefs in the future of the service and technology industries. He is a current director, was past president and an active supporter in the founding of the Professional Services Council, a non-profit organization

dedicated to the economic and legislative recognition and support of the U.S. service industry. He is also a director of ESI Industries, Washington Technology and Madison Bank of Virginia. In the past he served as director of the Washington U.S.O.; the International Policy Board of the Privatization Council; and numerous community boards and advisory groups. His international activities on behalf of U.S. industry have included cooperation with the U.K. in defining strategies for development of the professional service industry, including speeches to various Parliamentary committees. He is degreed in physics from the University of California and served in the U.S. Marine Corps from 1950 through 1954.

Aalseth is well-liked, charismatic, and is regarded highly as a leader by many of his former employees and business associates, who know him to be perceptive, personable, and enthusiastic toward life.

CHICAGO (JULY 30) PR NEWSWIRE - Navistar International Transportation Corp., the principal operating subsidiary of Navistar International Corp. (NYSE: NAV), today announced a major agreement with Perkins Group Limited of Peterborough, England.

Under terms of a long-term collaboration, Perkins will market and sell Navistar's highly acclaimed 466 (7.6 liter) family of mid-range diesel engines to its customers worldwide.

"This agreement benefits both companies by combining Navistar's diesel engine technology and Perkins' strong global marketing presence," said James C. Cotting, chairman and chief executive officer of Navistar.

Cotting said that the agreement anticipates aggressive marketing efforts by Perkins' worldwide sales force and 4,000 distributors in 160 countries,

which will increase Navistar's annual engines sales volume substantially.

Under the terms of the agreement, Navistar's network of 900 independent dealers and distribution points will continue to provide International 466 diesel engines, parts and service to the North American medium and heavy truck market. The agreement also does not preclude Navistar from selling engines directly to another truck manufacturer through a truck joint venture agreement.

The Perkins agreement will not require extensive capital investment or facility modifications at Navistar's Melrose Park, Ill., engine manufacturing plant where the 466 engine family is produced, according to John R. Horne, group vice president and general manager of Navistar's engine and foundry division. He explained that the plant's manufacturing processes and capacity are being continuously enhanced by an ongoing capital investment program. The plant will produce a basic 466 engine with a managed variety of external variations as required to meet customer requirements.

The agreement with Perkins does not affect Navistar's long-standing contract to supply its 7.3 liter family of mid-range diesel engines to a major North American automotive manufacturer. The 7.3 liter engine is produced at Navistar's Indianapolis, Ind., engine plant.

Navistar, headquartered in Chicago, is the largest mid-range truck diesel engine manufacturer in North America and already produces almost 35,000 7.6 liter diesel engines each year for both on and off highway use.

Perkins, also a world leader in diesel engines, produces 400,000 engines annually in the 5 to 1500 horsepower range, at three plants located in the United Kingdom and in 16 plants located throughout the world. The 466 family of engines helps further enhance Perkins' comprehensive line-up of engines.

PITTSBURGH (JULY 30) PR NEWSWIRE - Mellon Bank offices in southwestern Pennsylvania will make available a tax-deferred annuity product called SAFEKEY II beginning Aug. 6, it was announced today.

Representatives from Talbot Agency Inc., an Albuquerque-based independent licensed insurance agency with offices in Pittsburgh, will sell the annuity product to customers who are introduced to Talbot by Mellon branch office employees.

"We talked with 14 different insurance and marketing companies to make certain that our customers would receive the highest product quality and company quality," said Allan Dennison, market manager of Mellon Bank N.A. "By making the annuity product available, we are helping to strengthen customers' relationships and fulfilling customer requests for such a product."

Made available primarily through financial institutions, SAFEKEY II is a product of the SAFECO Life Insurance Co., which ranks in the top 100 of all life insurance companies in the United States and Canada and is rated A-Plus Superior by the A.M. Best Co. The annuity product offers those who are planning for their retirement the opportunity to minimize their tax liability and enhance their retirement income.

"SAFEKEY II is a savings alternative to the certificate of deposit and generally offers a higher yield than most CDs," said Charles Pearson, manager of the Talbot Agency in Pittsburgh. "SAFEKEY II can be opened for as little as $50 per month with no fees attached."

Talbot's main office is in Room 2880 at One Mellon Bank Center and can be reached by phone at 412-234-3328.

Talbot Agency Inc. is a wholly owned subsidiary of American Business Insurance Inc., of San Francisco. Talbot Agency Inc. offers insurance products to financial institutions nationwide.

SAFECO Life Insurance Co. is part of SAFECO Corp. (NASDAQ: SAFC), by revenues one of the largest diversified financial services corporations in America, with assets approaching $10 billion.

With assets of $31.7 billion at June 30, 1990, Mellon Bank Corp. (NYSE: MEL) is one of the nation's largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, cash management and financial data processing.

BURBANK, CALIF. (JULY 30) PR NEWSWIRE - Morgan Creek Productions and Warner Bros. announced today that Christian Slater has been set for a key role in their upcoming "Prince of Thieves" starring Kevin Costner. Slater, who is currently starring in Morgan Creek's upcoming release "Young Guns II," will play Will Scarlett in the large-scale adventure which is being directed by Kevin Reynolds.

Stated David Nicksay, president of Morgan Creek Productions: "We're delighted that Christian Slater is one of the first to join what will be an exciting ensemble cast in 'Prince of Thieves.' Christian is one of the most versatile and talented young actors on the scene today. I know he'll bring a fresh attitude to the character of Will Scarlett, a young, brash, disenfranchised member of Robin Hood's band."

In just a few years' time, Slater has amassed an impressive list of film performances. He received critical acclaim for his starring role in "Heathers." In addition to "Young Guns II," Slater stars in another film set for August release, "Pump Up the Volume." His other credits include co-starring roles in "The Name of the Rose," and "Tucker: The Man and His Dream."

"Prince of Thieves," a Morgan Creek Production slated to begin principal photography September 3rd at Shepperton Studios in London, is being produced by John Watson, Pen Densham and Richard Lewis. The script was written by Pen Densham and Watson.

Scheduled for release in the spring of 1991, "Prince of Thieves" will be distributed domestically (in the U.S. and Canada) by Warner Bros. and internationally by Morgan Creek International.

#90211p0207 07/30/1990 ~PR Newswire

LANCASTER, Pa. (JULY 30) PR NEWSWIRE - Second-quarter financial results announced by Armstrong World Industries, Inc., (NASDAQ: ACK) here today showed that the company reached record levels in sales and in earnings from continuing businesses.

The company also announced that during the second quarter, it had made

provisions for after-tax losses of $5.8 million on the planned disposition of certain industrial specialties businesses and additional provisions for losses on the businesses sold in 1989. As a result of these provisions and the losses of $.6 million from operating the businesses planned for disposition, total net earnings in the second quarter of 1990 fell below those of the 1989 levels.

For the first half of 1990, the sales and earnings from continuing businesses, as well as total net earnings, were the highest for any comparable January-through-June period in Armstrong's 130-year history.

The sales and earnings from continuing businesses for 1989 in the following comparisons have been restated to exclude the results for those businesses sold in 1989 and for those businesses whose disposition is anticipated during 1990.

Armstrong issued these summaries of its second-quarter 1990 results and appropriate 1989 comparisons:

-- 1990 net sales for the quarter reached $652.1 million, an increase of 1.5 percent over the restated 1989 figure of $642.3 million.

-- 1990 earnings from continuing businesses were $51.2 million, an increase of 15 percent from the restated 1989 level of $44.7 million.

-- Earnings per share of common stock from continuing businesses were $1.17 on a primary basis and $1.06 on a fully diluted basis, compared with restated 1989 levels of 95 cents on a primary basis and 94 cents on a fully diluted basis.

-- Total net earnings were $44.8 million compared with $47.9 million for the same period in 1989 -- a 6 percent decrease.

-- Net earnings per share of common stock were $1.01 on a primary basis and 92 cents on a fully diluted basis, compared with 1989 net earnings per share of $1.02 on a primary basis and $1.01 on a fully diluted basis.

The return on average common shareholders' equity was 17.2 percent for the second quarter of 1990 compared with 17.4 percent for the similar period of last year.

During the second quarter Armstrong purchased 3.9 million shares of company common stock on the open market or in negotiated transactions. Total cost of these shares was $140.6 million. As a result, common shares outstanding were reduced to 37.2 million shares at June 30, 1990, compared with 46.2 million at the end of June, 1989.

MARIETTA, GA (JULY 30) PR NEWSWIRE - The board of directors of Realty South Investors Inc. (AMEX: RSI) today declared a quarterly dividend of $.09 per share of common stock payable on Aug. 27 to shareholders of record Aug. 13.

Second quarter cash flow increased to $.133 per share compared with $.123 for the first quarter this year, said Timothy J. O'Neill, chairman and chief executive officer, although revenues and earnings compared to a year ago were affected by lower rentals and occupancy rates due to the continuing real estate downcycle.

"We have been able to reduce the expenses of company oeprations and interest during the quarter and the first half in our concerted efforts to meet the challenges of this economic environment," O'Neill said.

Revenues for the quarter were $740,000 compared with $970,000 last year and net income for financial reporting purposes was $168,000 or $.08 per share compared with $306,000 or $.146 per share a year ago. First-half revenues were $1,489,000 with net income for financial reporting purposes of $299,000 or $.143 per share compared with revenues of $1,893,000 and net income for financial reporting purposes of $607,000 or $.289 per share last year.

Realty South Investors Inc. invests primarily in real estate projects in the Southeast with a $31.4 million portfolio.

#90211p0216 07/30/1990 ~PR Newswire
LAKE MARY, FLA. (JULY 30) PR NEWSWIRE - Stromberg-Carlson announced today that Pacific Bell will be installing E-911 Tandem features in a DCO (A) (Digital Central Office) system in Fortuna, Calif. as part of a technology trial set to begin in October 1990. The E-911 Tandem feature will be installed into a 6,000-line Stromberg-Carlson DCO and office already in place in Fortuna.

The E-911 Tandem service allows the DCO to selectively route a 911 call originated in the 911 service area to the correct Public Service Answering Point, in addition to providing sophisticated alternate routing and call transfer capabilities for emergency calls.

Stromberg-Carlson offers E-911 Tandem service as an option on all DCO and

offices equipped with Software Release 17 or on stand-alone systems. Previously installed DCO systems can offer the service once they are upgraded to this release and have purchased the optional software feature.
The DCO switch can also provide E-911 capabilities to other offices in the network that are connected to the DCO end office.

"Previously, E-911 Tandem service was only offered in large switches designed for major urban centers or in stand-alone systems," said Ronald Kandell, vice president of product management and customer marketing. "The addition of this feature on the DCO provides a cost-effective means of providing smaller communities with essential public safety services while at the same time offering a revenue opportunity to the local telephone company."

Stromberg-Carlson, the North American presence of GPT, is recognized as the third leading supplier of digital central office lines in the United States with an installed base of over three million lines.

(A) -- DCO (Digital Central Office) is a registered trademark of Stromberg-Carlson Corp.

#90211p0217 07/30/1990 ~PR Newswire
RESTON, Va. (JULY 30) PR NEWSWIRE - Systems Center, Inc. (NYSE: SMX) today reported revenues of $22,873,644 for the second quarter ended June 30, 1990, up 25 percent from $18,300,317 for the same period in 1989.

A net loss of $4,802,090 (48 cents per share) was reported for the second quarter ended June 30, 1990, compared with net income of $2,589,431 (26 cents per share) for the same quarter last year.

Net loss for second quarter ended June 30, 1990, included a one-time pre-tax charge of $3,041,000 (23 cents per share) for costs associated with the purchase of NET/MASTER products.

For the six months ended June 30, 1990, revenue increased to $40,037,384, up 17 percent from $34,123,713 for the first six months of 1989. Net loss for the six months ended June 30, 1990, was $3,631,747 (36 cents per share), compared to net income of $4,614,513 (46 cents per share) for the same period last year. Net income through June 30, 1989, included a one-time adjustment of $639,586 (6 cents per share) for a change in the method of accounting for income taxes recorded during the first quarter of 1989.

As Robert E. Cook, Systems Center chairman and chief executive officer,

stated in an earlier, preliminary release: "The second quarter loss is the result of distractions tied to two major acquisitions for NET/MASTER products. Delays in closing, assimilation of NET/MASTER employees, organization adjustments, and expensing of transaction costs all contributed to earnings that did not meet expectations."

During the second quarter, a "share exchange" with Australian NET/MASTER owner and developer Software Developments International Pty. Limited was consummated, incurring substantial costs reflected in the company's results of operations. Results of operations for current and prior periods have been restated to reflect the accounting for this transaction as a pooling of interests. The "share exchange" followed Systems Center's March 31, 1990, purchase of substantially all of the assets of Cincom Systems, Inc.'s NET/MASTER business. The transaction had a predicted dilutive impact on the company's earnings during the integration of the acquired operations.

"On the up side, we are regaining momentum, see growing product demand in the remaining two quarters of this year, and look to the future with leading products that address multi-vendor environments and control of rapidly expanding networks," added Cook.

Systems Center, Inc., founded in 1981, currently develops, markets and supports systems, network, and relational database software. The company offers over 50 products, including NET/MASTER for network and systems management; Network DataMover for data transfer among multiple operating environments; VMCENTER II for IBM's VM operating system; and relational database products for IBM's SQL/DS and DB2.

SAN DIEGO (JULY 30) PR NEWSWIRE - AMETEK Inc. (NYSE: AME) and Ketema Inc. (AMEX: KTM) announced today the settlement of the U.S. government's investigation of alleged Truth in Negotiations Act violations in connection with certain marine products contracts entered into with AMETEK's former Straza Division prior to September 1987.

In an effort to resolve the matter without resorting to costly and lengthy litigation, AMETEK pleaded to two counts in respect to a single contract and agreed to pay a total criminal fine of $110,000. The charges involved the former Straza Division's failure to disclose certain cost or pricing data when negotiating this marine products contract. No AMETEK or Ketema employees or other individuals were charged in the matter.

Straza, no longer a part of AMETEK, is now the A&E Division of Ketema, a

separate corporation which AMETEK spun off to its stockholders in 1988. Ketema subsequently sold its marine products operations, including those involved in the investigation.

In addition to the fine of $110,000, AMETEK agreed to pay $5.1 million, which reflects a reduction in contract prices in response to the government's concerns, and the government released all potential civil claims that could be made by the government and others relating to the matters investigated. Under an agreement between AMETEK and Ketema entered into at the time of the spin-off, Ketema will reimburse AMETEK for substantially all of that amount. The payment will be reflected in Ketema's financial statements for the second quarter ending Aug. 31, and likely will result in Ketema reporting a loss in the second quarter.

AMETEK and Ketema are working with the Department of Defense to address the effect of the settlement on the companies' continuing relationships with the government, including the possibility of suspension or debarment from government contract work for a period of time, and have been advised that this matter may not be concluded for several months.

Dr. John H. Lux, chairman of AMETEK, said, "We are pleased to have this matter finally concluded and a settlement reached on the government charges which will have no significant effect on AMETEK's earnings."

BOISE, ID (JULY 30) PR NEWSWIRE - William J. Agee, chairman and chief executive officer of Morrison Knudsen Corp. (MK) (NYSE: MRN) today announced that MK and a joint-venture partner have received a notice to proceed on an approximately $144-million (U.S. funds) tunnel and

powerhouse project in remote northern British Columbia.

The notice was received by PCL Constructors Western Inc., of Edmonton, Alberta (sponsor), and Northern Construction, MK's Canadian subsidiary, from Alcan Smelters and Chemicals Ltd. of Vancouver, British Columbia. MK is a 40-percent participant in the joint venture.

The major aspect of the project will be opening of a 2,000-foot-long penstock incline tunnel that will connect with an underground hydroelectric powerhouse. The tunnel will be 18 feet in diameter and be drilled on a 50-degree incline. Also part of the joint venture's work will be expansion of the existing underground powerhouse to accommodate additional generating units and construction of related penstock tunnels connecting to the powerhouse. Work will begin immediately and take about three years to complete.

Construction of the tunnels and powerhouse addition are part of the Kemano Completion Project that will add 540 megawatts of capacity to the existing Kemano hydropower development that supplies electricity to an Alcan aluminum smelter located in Kitimat, B.C., 50 miles away.

MK constructed the original facilities in the 1950s, a project that was the biggest hydroelectric project ever built by private enterprise at the time and included the world's largest underground powerhouse, plus 317-foot high Kenney Dam, a 10-mile-long power tunnel, twin penstock tunnels and a 50-mile-long transmission line from the powerhouse to Kitimat.

DECATUR, Ga. (JULY 30) PR NEWSWIRE - Darrell D. Pittard, president and chief executive officer of DeKalb Federal Savings Bank and its holding company Prime Bancshares Inc. (NASDAQ: PMBS), announced today that the charter of DeKalb Federal will be amended to change its name to Prime Bank Federal Savings Bank.

When making the announcement, Pittard mentioned several reasons for undertaking the name change. According to Pittard: "Prime Bank better represents who we are -- a strong financial institution offering first-rate products and services at 21 locations throughout metropolitan Atlanta. We now have more locations outside DeKalb County than within. Additionally, the name links the bank more closely with our publicly traded holding company -- Prime Bancshares Inc."

A marketing campaign to promote the name change will begin in September

and will be completed on Oct. 1, when the name change will be effective.

Prime Bancshares, with consolidated total assets of $585 million at June 30 is the holding company for the fourth largest savings bank based in metropolitan Atlanta. The common stock of Prime Bancshares is traded over-the-counter and quoted on the National Association of Securities Dealers Automated Quotation (NASDAQ) System under the symbol "PMBS."

WASHINGTON (JULY 30) PR NEWSWIRE - Datacomp Corporation, the only union-made, American-made computer on the market, announced today that it has signed a nationwide service agreement with General Electric Computer Service (GECS) to provide customers a network of 800 service technicians in 250 locations in the United States.

"We are proud to be associated with a firm which offers 30-years of experience in data communication and computer technology and a proven track record of dependability," declared Datacomp President Clay Kime.

Kime pointed out that GECS was selected by McGraw Hill's Data Communication Magazine in a recent survey as number one in such criteria as customer preference, best technology, pricing and service organization.

Through the GECS service agreement, Datacomp computer owners will enjoy a service network coordinated out of six regional locations in strategic major metropolitan areas, including:

-- New York (South Plainfield, N.J.) -- Cincinnati -- Chicago (Bensenville Ill.) -- Atlanta (Norcross, Ga.) -- Dallas (Irving, Texas) -- Los Angeles (Compton, Calif.) GECS currently services more than 300,000 personal computers, including those owned by some of the world's largest corporations and government institutions.

"Datacomp computers are manufactured by skilled union craftsmen and carry the highest ratio of U.S. components (more than 90 percent) of any computer on the market today. This service agreement backs up our promise of reliability and solid performance and assures our customers that after

purchase maintenance and support are just a phone call away," Kime said.

DALLAS (JULY 30) PR NEWSWIRE - The Hallwood Group Incorporated (NYSE: HWG) announced today that on July 27, 1990, the United States District Court for the Northern District of California denied a motion for a temporary restraining order brought by Robert M. Greathouse et al., in a purported class action lawsuit regarding Hallwood's proposed consolidation of 11 real estate limited partnerships sponsored by Equitec Financial Group, Inc.

In denying the motion for a restraining order, the court set a date for a hearing on the motion for a preliminary injunction for Aug. 23, 1990, and the parties stipulated that, notwithstanding anything to the contrary contained in the proxy statement/prospectus relating to the proposed transaction, the consolidation of any of the partnerships would not be implemented prior to this date.

A spokesman for Hallwood said, "We believe this litigation is spurious and without merit, and we intend to defend against it vigorously."

The lawsuit names Hallwood, Hallwood Realty Partners, L.P., Hallwood Realty Corporation, Equitec, Equitec Properties Company and certain other parties involved in the proposed transaction as defendants, and alleges violation of Sections 10(b) and 14(a) and Rule 10b-5 of the Securities Exchange Act of 1934, common law fraud, breach of fiduciary duty, negligent misrepresentation and intentional interference with business relationship.

On July 5, 1990, Hallwood commenced an exchange offer for the limited partner interests in the 11 partnerships. The exchange is scheduled to expire at 5 p.m., Central Daylight Time, on Friday, Aug. 24, 1990, unless extended.

SAN JOSE, Calif. (JULY 30) PR NEWSWIRE - VMX Inc. (NASDAQ: VMXI) today announced that revenues for its fiscal year ended June 30, 1990, were $57,023,000, an increase of 27 percent over fiscal 1989's revenues of $44,910,000. The company reported net income of $2,734,000 for the year, or 11 cents per share, compared to a net loss of $1,551,000 (7 cents per share) in fiscal 1989.

For the fourth fiscal quarter of 1990, net income was $1,107,000, or 4 cents per share, on revenues of $15,495,000, compared to net income of $128,000 (1 cent per share) on revenues of $12,662,000 in the fourth fiscal quarter of 1989. This represents a 765 percent increase in quarterly net income and a 22 percent increase in quarterly revenues from fiscal 1989 to fiscal 1990.

VMX Chief Executive Officer Pat Howard said, "We are pleased to have achieved our objective of annual profitability in only the second year since the merger of VMX and OPCOM in July 1988. More importantly, these results were accomplished while we continued our significant investments in sales, support and new product development activities.

"VMX's performance in fiscal 1990 indicates the confidence customers have in the product and service capabilities of VMX and reinforces the controlled growth strategy we have been following. We intend to continue to invest for the long-term success of the company. One example of our commitment to investment in product development and distribution is the recently introduced "VMXworks(TM)," a sophisticated set of hardware and software tools that adds voice response and other capabilities to VMX call and message processing platforms. Initial market response to "VMXworks"

is extremely encouraging and emphasizes the need for continued investment in value-added distribution and systems integration capabilities." VMX Inc.

VMX Inc. is a leading supplier of call and message processing systems throughout the world. The company is focused on providing strategic communications solutions and has sold and installed nearly 5000 systems.

#90211p0250 07/30/1990 ~PR Newswire

TORONTO (JULY 30) PR NEWSWIRE - Varity Corporation (NYSE: VAT) will consider proposing a cash inducement to encourage holders of its Class I Series A convertible preferred shares to convert their holdings to common shares. The company also announced plans to retire more than U.S. $200 million in debt securities, starting within the next six months.

Victor Rice, chairman and chief executive officer, told shareholders at the company's annual meeting that Varity hopes to eliminate all 11.8 million Class I preferred shares by the end of current fiscal year next January 31.

Rice also announced that the company intends to seek shareholder permission to reincorporate in the U.S. and, concurrently, to conduct a reverse split of its common shares, probably on the basis of one for ten. He said the company hopes to "set the process in motion" before the end of fiscal 1990.

Shareholders overwhelmingly approved the company's special resolution expressly enabling the board of directors to propose inducements in cash or stock to preferred shareholders who convert to common shares, and Rice said he would ask the board to consider a cash inducement in the near future.

The inducement was described as a key element in the company's program to encourage value for shareholders. Rice said the program addresses two top priorities - rapid reduction of long-term debt and elimination of Class I preferred shares. He said other measures, such as dividends on common shares and a share buyback program, "will receive careful consideration in due course."

Rice said the Class I shares are widely hedged by investors who hold a long position in preferred shares and short Varity's common shares to limit their downside risk. Noting that Varity's common shares are among the most heavily shorted stocks by volume on the New York Stock Exchange, he said this situation "reflects negatively on perceptions of our common stock."

At the fixed conversion ratio of one preferred share for 6.8493 common

shares, full conversion of the 11.8 million Class I shares would increase the number of common shares outstanding by approximately 81 million. At the same time, it would end the company's obligation to pay approximately $15.4 million in annual dividends.

Depending on response to a cash inducement, which would probably be available for a limited period of time, the company would consider taking other measures, which might include an underwritten call or another inducement, to dispose of any remaining Class I shares, Rice declared.

Varity also intends to restore its debt-equity ratio to the level it achieved prior to the acquisition of K-H Corporation and its Kelsey- Hayes automotive products unit late last year, he said. He estimated that this could be accomplished within two years.

LONDON (JULY 30) PR NEWSWIRE - London International Group plc (London Stock Exchange, U.S. OTC), which recently announced its 11th consecutive year of increased sales and profits, announced today that it had filed form 20-F with the U.S. SEC as a prelude to seeking a quote for its American Depositary Receipts on NASDAQ's National Market System. The company, which currently trades in the "pink sheets," expects to start trading on NASDAQ by the end of the year. There is no intention to offer new shares in conjunction with this quotation at this time.

Alan Woltz, chairman and chief executive, commented, "Our group has long had a solid presence in the U.S. with such leading branded products as Ramses, Sheik and Fourex condoms and Cook Bates health and beauty aids. More recently, we launched in the U.S. our Biogel starch-free surgeons' glove which has grown rapidly to attain the leading market share in the U.K. hospital operating theater market."

Noting that the company already has a number of shareholders in the U.S., Woltz said, "A full U.S. quotation is in line with our goal of building our international shareholder base."

London International Group recently reported that fiscal 1990 pre- tax profit increased 20.5 percent to $60.2 million (rate is $1.65 equals one pound sterling). Sales for the year ended March 31, 1990, were $579.6 million (rate is $1.65 equals one pound sterling) -- an increase of 14.1 percent. The company has approximately 133 million shares outstanding and the share-to-ADR ratio is 5:1.

London International is a world leader in its core businesses of health

and personal products and photoprocessing services. It is the global leader in branded condoms, and holds leading positions in latex gloves for surgical, dental, household and industrial use. It is the largest independent photoprocessor in Europe.

#90211p0261 07/30/1990 ~PR Newswire

CINCINNATI (JULY 30) PR NEWSWIRE - Multi-Color Corporation (NASDAQ: LABL) today announced results for its first quarter ended July 1, 1990.

Net sales for the first quarter of fiscal 1991 totaled $14,020,000 down 10 percent from $15,563,000 in the year-earlier period. Net loss for the period amounted to $707,010 or $.32 per share on 2,235,000 average shares, compared with net income of $459,000 or $.21 per share on 2,209,000 average shares a year ago.

John C. Court, president of Multi-Color Corporation, commented "The loss resulted from start-up of two operations and a decline in orders at Multi-Color's existing facilities. The losses involved in our start- up operations were largely expected. At this point, production has started successfully at both locations and we expect them to be making a contribution to profits this year."

The decline in orders at Multi-Color's existing facilities was much larger than expected. However, it reprsented substantial delays in order placement by a number of customers rather than the loss of business.

Multi-Color Corporation is one of the largest manufacturers of printed labels for branded consumer products in the United States. The company's shares are traded over-the-counter under the National Market Systems symbol LABL.

#90211p0266 07/30/1990 ~PR Newswire

OLYMPIA, WA (JULY 30) PR NEWSWIRE - The Washington State Department of Ecology has fined the Vancouver Extrusion Co. Inc. (VANEXCO), Vancouver, $43,000 for violating regulations regarding the handling and management of hazardous wastes, the department said today.

The company, a subsidiary of the Aluminum Co. of America, was penalized following inspections on Sept. 6 and 7, 1989, Oct. 18, 1989, and March 29, 1990. Ecology inspectors documented numerous violations including:

-- failing to designate hazardous waste;
-- failing to comply with hazardous waste "generator" requirements;
-- improperly managing hazardous waste containers; and
-- failing to prepare a personnel training plan and conduct employee training.

VANEXCO, which makes aluminum trim items such as window and door frames, was penalized $42,000 in 1987 for similar violations.

"Our inspections revealed that VANEXCO has not significantly improved its hazardous waste management practices during the past three years," said Dick Burkhalter, Ecology Industrial Section supervisor. "However, recent company changes indicate there will be better oversight of the facility's operation."

Burkhalter said Ecology also issued an administrative order requiring the company to comply with all appropriate hazardous waste management regulations and to stop spraying waste oil as a dust suppressant. The enforcement action requires the company to recycle, reclaim or properly dispose of waste oil.

The penalty and orders were issued July 17. The company may appeal them to Ecology and/or the state Pollution Control Hearings Board.

RALEIGH, NC (July 30) PR Newswire - First Federal Savings and Loan Association of Raleigh (First Federal) reported today that the Office of Thrift Supervision (OTS) has requested additional information in support of First Federal's plan for restructuring and recapitalization. The OTS

will delay -- probably until September -- its decision on the Association's plan to sell the bulk of its nonperforming assets pending receipt of the information requested.

"While we had hoped for OTS approval of our capital plan this month, we see this development as a positive sign," said Willard Ross, president of First Federal.

Mr. Ross said, "OTS has asked us to revise certain assumptions and provide additional information regarding the estimated purchase price of the Association's nonperforming assets, principally real estate owned. Once we furnish that data, the OTS has given tentative approval for us to engage an accounting firm to undertake an independent review of those projections."

"The entire process is anticipated to take 45 to 60 days. The OTS decision on First Federal's proposed capital plan likely would occur soon thereafter," Ross said.

First Federal's proposed plan involves selling its nonperfoming assets -- primarily real estate -- to an unaffiliated company. That company's sole purpose would be to manage and sell the nonperforming assets. If the plan receives OTS approval, First Federal will engage PaineWebber on a best efforts basis to assist in the placement of debt and/or equity securities to be issued to finance the new liquidating company.

First Federal of Raleigh is a subsidiary of Firstcorp, Inc. (AMEX: FCR). First Federal operates fourteen offices in the Triangle area and owns First Security of Pinehurst. Firstcorp is also the parent of First Federal of Durham. Firstcorp's Class A Common Stock is traded on the American Stock Exchange under the symbol FCR.

KANSAS CITY, Mo. (JULY 30) PR NEWSWIRE -- Kansas City Power & Light Company (NYSE: KLT) announced today that the Missouri Public Service Commission has ordered that public notice be made of Kansas City Power & Light's July 23, 1990, application to the commission for approval of its proposed merger with Kansas Gas and Electric Company (NYSE: KGE), and that an early prehearing conference be held.

The Missouri commission, in its July 27, 1990, order, responded to Kansas City Power and Light's motion for expedited treatment by setting an early prehearing conference to commence at 10 a.m. on Aug. 17, 1990, at the

commission's offices in Jefferson City, Mo. The commission's order also provided that any entity wishing to intervene in this matter should file its application to intervene on or before Aug. 13, 1990.

In addition, on July 27, 1990, the Federal Energy Regulatory Commission set Aug. 17, 1990, as the date for any person desiring to be heard or to protest Kansas City Power & Light's application for approval of the merger and its motion for expedited consideration of its application, to make their filing, if any.

On July 23, 1990, Kansas City Power & Light commenced an all-cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric. The offer price for the common stock, approximately $857 million in the aggregate, represents a 37 percent premium over the market price of Kansas Gas and Electric on July 20, 1990, the last trading day prior to the commencement of Kansas City Power & Light's offer.

Kansas Gas and Electric, headquartered in Wichita, Kan., is an electric utility which generates, transmits, distributes and sells electricity in the southeastern quarter of Kansas, including the Wichita metropolitan area. In 1989, Kansas Gas and Electric's revenues totaled $533.5 million, with net profits of $47.5 million. As of December 1989, Kansas Gas and Electric has 1,330 employees and last year provided service to more than 254,000 customers.

Kansas City Power & Light, headquartered in Kansas City, Mo., is a medium-sized public utility engaged in the generation, transmission, distribution and sale of electricity. In 1989, the company's revenues exceeded $730 million, and its net income was $108.6 million. Kansas City Power & Light employs over 2,800 people and currently serves over 409,000 customers ranging across a 4,700-square-mile area of western Missouri and eastern Kansas.

CHICAGO (JULY 30) PR NEWSWIRE - Santa Fe Pacific Corporation (SFP) (NYSE: SFX) has announced plans to refinance its outstanding 16 percent senior subordinated debentures due 2003.

Robert D. Krebs, chairman, president and chief executive officer, said that the refinancing plan was being undertaken to reduce interest expense, to replace a portion of debt with equity, and to provide the flexibility necessary to split the company into three separate entities. In April, the company's board of directors approved development of a plan for such a split. The outstanding debentures have a total principal amount of $780 million.

As a first step in the refinancing, debenture holders are being mailed a circular offering them an opportunity to exchange their debentures for shares of SFP common stock. Under the offer, debentures with a face value of $1,000 could be exchanged for stock valued $1,060.

The exchange offer is limited to $200 million principal amount of the outstanding debentures, and if more than that are tendered the exchange will be pro-rated. In order to participate, holders must tender their debentures by Aug. 27, 1990.

In the mailing, SFP advises that its present intention is to redeem the balance of the debentures effective Oct. 31, 1990, at a price of $1,030 for each $1,000 principal amount.

Those participating in the exchange would also receive the regular interest payment due Sept. 1, 1990, of $80 per $1,000 debentures, if they were holders of record on Aug. 15, 1990, the record date for that payment.

They would also receive $26.67 per $1,000 debenture, the amount of interest that would accrue if the debentures were held from Sept. 1 until the anticipated redemption date of Oct. 31, 1990.

A subsidiary of the company recently filed a registration statement with the Securities and Exchange Commission relating to an offering of $210 million of variable rate exchange debentures due 2010. Those debentures would be exchangeable under certain circumstances for outstanding common units of Santa Fe Pipeline Partners, L.P. SFP intends to use the net proceeds from this offering to reduce an additional portion of the indebtedness represented by the 16 percent senior subordinated debentures.

The company said it plans to redeem the remaining approximately $400 million in outstanding debentures through the issuance of long-term debt at the parent company. It is anticipated that the interest rate on this

debt will be significantly below the 16 percent being on the debentures.

"It now appears that our refinancing will be completed around Oct. 1," Krebs stated. "We will then be in a position for our board to consider to consider the spinoff to our stockholders of our ownership in Catellus, our real estate subsidiary, and Santa Fe Energy Resources, our oil and gas subsidiary. The spinoffs also are contingent upon receiving a ruling from the International Revenue Service that they will be a tax- free distribution to stockholders. We have asked for that approval, and we expect a decision that will allow us to proceed within the planned time frame," he concluded.

SARASOTA, FL (JULY 30) PR NEWSWIRE - Tech:Time (Pink Sheets) is pleased to announce its results for the year ended May 31.

Sales for fiscal 1990 totaled $3,275,249, representing an increase of approximately 60 percent over the same period last year. Net income for fiscal 1990 was $504,485 or $.08 per share.

Management is confident about the development of the company and expects sales and earnings to continue growing as a result of previous decisions to sell products directly to end-users.

A comparative summary of selected fiscal 1990 and 1989 operating results is shown below:

Year ended May 31	1990	1989
Net sales	$ 3,275,249	$ 2,043,016
Net income (loss)	$ 504,485	$(1,806,278)
Net income (loss) per share	$ 0.08	$ (0.29)

ST. LOUIS (JULY 30) PR NEWSWIRE - Southwestern Bell Telephone Co. (SWBT)

announced today it will upgrade its dedicated high-capacity digital data services with a fiber-based, dual-pathing "broadband" (large-transmission capacity) architecture.

The service is called SecureNet(SM). The enhanced design will give customers better reliability. The deployment will take place first in Dallas and Houston. Upgrades in the company's other largest metropolitan areas is under review. City-by-city deployment will depend on customer demand.

SWBT will begin offering customers SecureNet by last 1990, where facilities are available. SecureNet is a self-healing, high-speed digital service. The service must first be approved by state and federal regulatory commissions. Pricing has not been determined.

SecureNet delivers service automatically even when a single facility failure (e.g., a cable cut) or when a single central office or equipment fails. SWBT will install additional equipment in its central offices to sense failures within the network and to accept duplicate signals transported simultaneously on an alternate communications path.

SWBT's upgraded network architecture will utilize leading-edge technologies and will begin moving towards the high-speed Synchronous Optical Network (SONET) technology in 1991.

"This network architecture is important to SWBT and our customers not just because it's a new way for designing the telephone facilities, but also because it's a way to provide better customer service," said David Ho, SWBT's marketing district manager. "Customers now have more ways to manage their service to best meet their needs."

The architecture also will support a multitude of new "broadband" (large-transmission capacity) services such as Switched Multi-Megabit Data Service (SMDS) and Broadband Integrated Services Digital Network (BISDN).

SMDS is a high-performance, public-switched data service which can be used by customers to connect computers and local area networks over wide geographical areas. SWBT plans to make a commercial introduction of SMDS in 1991.

Southwestern Bell Telephone Company is a wholly owned subsidiary of Southwestern Bell Corporation and provides network exchange service to nearly 9 million customers in Kansas, Oklahoma, Arkansas, Texas and Missouri.

PHOENIX (JULY 30) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TCM) of Tulsa, Okla., announced today that it has signed an agreement to acquire the "Arizona Pennysaver," a shopper newspaper based in Mesa, Ariz., from Cox Enterprises of Atlanta.

The transaction, which is subject to the signing of a definitive agreement and approval by the board of directors of T/SF Communications and Cox Enterprises, is expected to be completed later this year. Terms of the transaction were not disclosed.

The "Arizona Pennysaver" is distributed free to more than 500,000 homes in the Phoenix metropolitan area. It publishes 22 separate community zoned editions.

T/SF Communications has been active in recent years in acquiring advertising publications in major markets. In addition to shopper newspapers with weekly circulation of approximately 1,250,000, it owns one daily newspaper, "The Tulsa Tribune," several trade publications and an information service company.

Cox Enterprises announced earlier this year that it would sell the "Arizona Pennysaver" to help reduce the debt incurred by the 1985 merger of Cox Communications with Cox Enterprises Inc.

DALLAS (JULY 30) PR NEWSWIRE - Sterling Software Inc. (NYSE: SSW) said earnings per share before an extraordinary gain increased to 24 cents for the third quarter of fiscal 1990, up from 20 cents last year. Revenue for the quarter ended June 30, 1990 rose to $49.7 million from $44.7 million a year ago. Including extraordinary gains, earnings per share amounted to 25 cents in 1990 compared to 22 cents in 1989.

For the first nine months of fiscal 1990 earnings per share from continuing operations increased by 21 percent to 63 cents per share on revenue of $142.3 million, up from 52 cents and $130.4 million in 1989.

Sterling said third quarter revenue and earnings gains were primarily in its systems software and EDI businesses, continuing an upward trend the company has reported all year. The company said its growing EDI business was further strengthened by the inclusion of Metro-Mark Systems for the full quarter. Metro-Mark, a leading supplier of EDI software in the United States and Canada, was acquired in March 1990. Also during the quarter Sterling signed a $210 million software support contract with the NASA/Ames Research Center. The contract had earlier been contested but was resolved in Sterling's favor.

Sterling also reported that in July it completed the acquisition of ASYST CASE Technologies Inc., a Montreal-based systems software company. ASYST, a leader in the CASE market, adds "strong products and people to Sterling's portfolio of application development tools," the company said. ASYST has become the ASYST Technologies Division in Sterling's Systems Software Group.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products, and in professional services for the U.S. federal government.

ST. CATHARINES, ONTARIO (JULY 30) PR NEWSWIRE - Quebec and Ontario Paper Company (Q&O) announced today that its Baie Comeau, Quebec, newsprint mill went through an orderly shut down last Saturday at 5 p.m. following declaration of a strike by the two locals of the Canadian Paperworkers Union (CPU) representing 1,200 production and maintenance workers.

Labor contracts between the CPU and the eastern Canadian newsprint producers expired on April 30, but operations continued as the traditional pattern bargaining meetings were conducted. On July 5, a first agreement was reached between CPU locals representing employees of another newsprint producer in Quebec. Subsequent efforts by the CPU to reach accord with other eastern Canada producers have been unsuccessful.

No negotiation meetings are now scheduled between the Baie Comeau management and the CPU. Rated newsprint capacity of Baie Comeau is 450,000 metric tons. Q&O's other mill at Thorold, Ontario, continues to operate. Its rated capacity is 315,000 tons. Q&O is a wholly owned subsidiary of Tribune Co. (NYSE: TRB).

SEATTLE (JULY 30) PR NEWSWIRE - Van Waters & Rogers Inc., the nation's largest chemical distributor, today announced that its Jacksonville, Ark., branch office has been recognized for environmental excellence by the U.S. Environmental Protection Agency (EPA). Van Waters & Rogers Inc. is the U.S. subsidiary of Univar Corp. (NYSE, PSE: UVX).

The award, bestowed annually by the EPA, is designed to recognize operations that exemplify environmentally safe hazardous waste management.

"Van Waters & Rogers has long recognized the importance of safe hazardous waste management," said William B. Singley, branch manager for VW&R/Jacksonville. "By offering our customers services such as ChemCare(TM), we make it easier for many Arkansas businesses to comply with state and federal hazardous waste laws."

Introduced by Van Waters & Rogers in 1988, ChemCare, the company's innovative hazardous waste management service, provides a comprehensive service to assist waste generators in the proper handling and disposal of their waste in a legal, environmentally responsible and safe manner.

Univar Corp., headquarted in Seattle, is a leading North American distributor of chemicals to industry. It operates through two

subsidiaries, Van Waters & Rogers Inc. in the United States, and Van Waters & Rogers Ltd. in Canada.

#90211p0320 07/30/1990 ~PR Newswire

MINNEAPOLIS (JULY 30) PR NEWSWIRE - Diversified Energies Inc. (NYSE: DEI) said today that for the first six months ended June 30, it had net income of $15.7 million, or 98 cents per share, on revenues of $404.4 million.

For the second quarter ended June 30, DEI had a loss of $2.9 million, or 18 cents per share, on revenues of $127.8 million. That compares to a loss of $400,000, or 3 cents per share, on revenues of $136.4 million for the same quarter last year. Reduced results for the quarter reflect an earnings decrease in its radio communications unit.

The $15.7 million of net income for the six months compares to $39.5 million, or $2.48 per share, on revenues of $471.8 million for the same period last year. Net income for last year's period included 19.6 million of after-tax income received from settlements of take-or-pay lawsuits and an $800,000 reduction that stemmed from adoption in the first quarter of the SFAS 96 method of accounting for income taxes.

Exclusive of those none-recurring items, income for the first six months of 1989 totaled $20.7 million, or $1.30 per share. When compared to the $20.7 million, the $5 million decline in net income this year was due principally to decreased volumes of natural gas sold by the company's natural gas distribution unit -- due to weather that was 15 percent warmer than last year's period -- and reduced earnings by its radio communications unit.

Company officials said that reduced results by the radio communications unit for the first six months -- an operating loss of $500,000 compared to operating income of $6.2 million for the period last year - reflect a decline in sales of equipment GTE Airfone for its air-to-ground telephone service, reduced margins on radio products and response to intensified competition, and higher operating expenses due to increased staffing in the direct sales and engineering/technology areas. Sales in all of the unit's product segments except Airfone were up period-over-period. The unit had orders on backlog on June 30 of $108 million, an increase of 117 percent over the same time last year. About $27.8 million of the backlog is scheduled for shipment in the third and fourth quarters.

The company's natural gas distribution unit ended the first six months with operating income of $38.3 million, down 10 percent from the period

last year -- reflecting lower volumes of gas sold during the first quarter which had weather that was 20 percent warmer than last year. Volumes of natural gas delivered (sales plus transportation) totaled 81.2 billion cubic feet (Bcf), compared to 89.1 Bcf for the period last year.

Exclusive of take-or-pay pre-tax income of $30.7 million in 1989, DEI's exploration and production unit recorded a $5 million improvement in operating income period-over-period -- $2.1 million for the first six months of this year compared to a loss of $2.9 million for the period last year. The improvement reflects a pre-tax gain of $1.9 million from the sale of oil and gas properties in the second quarter, continued improvement in the subseas diving segment and reduced dryhole and acreage abandonment costs.

Diversified Energies Inc., is a Minneapolis-based energy services products and communications corporation that is traded on the New York Stock Exchange under the symbol: DEI.

MINNEAPOLIS (JULY 30) PR NEWSWIRE - Arkla Inc. (NYSE: ALG), and Diversified Energies Inc. (NYSE: DEI), the parent company of Minneapolis-based natural gas distributor Minnegasco Inc., jointly announced today that they have reached a definitive agreement providing for the merger of DEI into Arkla.

Under the agreement, shareholders of DEI will receive between 1.575 and 1.752 shares of Arkla common stock for each share of DEI common stock that they own. The exact number of shares will be determined based on the trading price of Arkla immediately prior to the time the transaction is completed. Based on recent closing prices for Arkla, DEI's shareholders would receive Arkla stock worth approximately $39 per share of DEI stock and the total value of the transaction would be approximately $630 million.

In addition, under the merger agreement, in certain limited circumstances, DEI will pay to Arkla a fee of $3 million and reimbursement of expenses of up to an additional $3 million in the event that the transaction is not completed.

Thompson F. "Mack" McLarty III, chairman, president and chief executive officer of Arkla, and Albert D. Etchelecu, chairman, president and chief executive officer of DEI, said that the boards of both companies have approved the merger which must now also be approved by a majority of each company's shareholders. The merger is also subject to certain regulatory

approvals and other conditions. It is expected that the transaction will be completed by the end of the year and will be tax free to DEI shareholders.

McLarty and Etchelecu said that, after the merger, Minnegasco, and other DEI subsidiaries, E.F. Johnson Inc., EnScan Inc., and Minneapolis Energy Center Inc., will retain their respective identities and will continue to maintain their headquarters in Minneapolis.

McLarty will continue as chairman, president and chief executive officer of Arkla following the merger. Etchelecu will serve as vice chairman of the board of Arkla and continue as chairman and chief executive officer of Minnegasco, with general management responsibility for the radio communications businesses as well. The Arkla board will be expanded to include representation from DEI.

Arkla, which is based in Little Rock, Ark., and Shreveport, La., is one of the nation's largest natural gas companies with assets and customers of nearly $4 billion and $2 million, respectively. Currently, Arkla provides service in an eight-state area which includes St. Louis, Houston and Wichita, as well as Little Rock and Shreveport.

In addition to its Minnegasco and Dyco subsidiaries, DEI also has substantial interests in the radio communications industry. Through E.F. Johnson, it manufactures and markets a broad range of mobile radio products in the U.S. and foreign countries. EnScan ranks number one in the emerging remote meter reading industry.

Currently, there are approximately 16 million shares of DEI common stock and 87 million shares of Arkla common stock outstanding. Both are traded on the New York Stock Exchange under the symbols DEI and ALG, respectively. After completion of the merger, the former DEI shareholders will hold approximately 24 percent of Arkla's outstanding common shares.

#90211p0325 07/30/1990 ~PR Newswire

GARDENA, CA (JULY 30) PR NEWSWIRE - The Acura Division of American Honda Motor Co. Inc. again pioneers a new automotive segment with the introduction of the mid-engine, all-aluminum NSX sports car. The two-seat NSX offers the performance and styling of an exotic, but with the Acura reputation for reliability and quality.

"The NSX is a milestone automobile that offers uncompromised performance and redefines the pure sports car driving experience," said Ed Taylor,

vice president, Acura Division.

The NSX is the world's first aluminum production car. Every major component is constructed of aluminum for light weight, which provides an outstanding power-to-weight ratio and excellent handling. Use of aluminum for the entire body construction provides a 40 percent weight savings over an equivalent steel body.

Like the chassis, the suspension is made entirely of aluminum. It features double-wishbone suspension, front and rear.

Powering the NSX is a 3.0-liter, DOHC, 24-valve, V-6 engine that produces 270 horsepower. The engine features a unique Variable Valve Timing and Lift Electronic Control System (VTEC) - a first for a production automobile in the U.S. This system varies the lift and duration of each cylinder's four valves to optimize both low end torque and high RPM performance.

Another first for the NSX is the use of forged titanium connecting rods in the engine to reduce reciprocating weight and enhance high RPM performance. The NSX can achieve a track-tested top speed in excess of 165 mph, accelerate from 0 to 60 mph in under 6.0 seconds and run the 1/4 mile in under 14.0 seconds.

A 5-speed manual transmission is standard on the NSX. A 4-speed automatic with electric power steering is optional.

The NSX is a showcase for Honda technology. Among its many systems is Traction Control, which automatically reduces engine power to eliminate wheel spin on low-traction surfaces. Yet unlike some other traction control systems, this Honda R&D development was created as a high performance system that functions over a wide range of speeds and cornering situations rather than simply a low-speed traction enhancing device.

A new 4-channel Anti-Lock Braking system is standard on the NSX and controls each wheel independently for optimum performance on wet or slippery surfaces. Other engineering features include a torque control differential and twin disc clutch.

Inspiration for the NSX exterior design came from the F16 jet aircraft. The influence can be seen in the canopy-forward design which offers more visibility than any other exotic sports car.

The aerodynamic NSX achieves a coefficient of drag rating of 0.32. It also has a low coefficient of lift of 0.05 and a low coefficient of yaw moment. Emphasis was on total aerodynamics, achieving a balance of lift, drag and yaw forces. The long tail design and the integrated rear

spoiler help achieve the car's stability.

Interior appointments include leather-trimmed power seats, automatic climate control, Acura/BOSE(R) music system, theft deterrent system and a driver's side air bag (SRS).

The NSX is built in a new dedicated plant in Tochigi, Japan, adjacent to Honda's R&D facility.

Manufacturer's suggested retail price is $60,000 for the 5-speed and $64,000 for the automatic.

#90211p0329 07/30/1990 ~PR Newswire

SUNRISE, Fla. (JULY 30) PR NEWSWIRE - Jan Bell Marketing Inc. (AMEX: JBM) today reported slightly increased sales and reduced earnings for the second quarter, in line with expectations.

Net sales were $29.5 million as compared to $25.6 million in the 1989 second period. Net income amounted to $1.0 million, or $.05 per share, versus $2.3 million, or $.11 a share, in the year-before quarter.

For the six months of 1990, net sales totaled $54.6 million, up from $50.7 million a year ago. Net income was $3.0 million, or $.13 per share, versus $4.3 million, or $.23 a share, in the 1989 opening half. The 1990 earnings per share reflect increases in weighted shares outstanding of 14 percent for the second quarter and 18 percent for the first half as a result of a public stock offering in October 1989. The 1989 per-share profits have been adjusted for a 50 percent stock dividend issued last July.

Rosemary B. Trudeau, vice president-finance, said the reduced second-quarter earnings reflect an increase in SG&A expenses as a percentage of sales to about 9.9 percent from 5.1 percent a year ago, due to higher costs associated with new retail programs being launched, increased legal and related fees, and greater depreciation and amortization charges connected with the company's new headquarters and operations center.

The modest growth in quarterly sales was achieved even though Jan Bell did not do any business in the second period with Price Club, which had been a major customer. "We do not anticipate doing any business with Price in the future," said Trudeau. Business with another customer, Costco, was up slightly in April and May from a year ago, but down significantly in June,

"and we don't anticipate any business in the future with Costco," she stated. Jan Bell is also phasing out its test program with Toys 'R' Us. However, it will be implementing its "14 K Kids" jewelry program, which is a Jan Bell trademark, with new blister-packaging for greater mass merchandising through other key customers.

"Overall, our business is strong with core customers, particularly Sam's Wholesale Club (a division of Wal-Mart), Pace Membership Club (a division of K-Mart) and Sears Roebuck & Co.," Trudeau said.

The company also announced it has entered into an agreement with Wal-Mart to test a Jan Bell Fine Jewelry display and catalog center, featuring a select number of SKUs (stockkeeping units) in approximately 300 Wal-Mart stores. This program is scheduled to be implemented by October 1990 and to be tested through January 1992.

During the 1990 second quarter, Jan Bell's turnkey jewelry program was implemented in 20 more Sears Outlet stores, bringing the total to 62 and another 20 are slated to be added by early this fourth quarter.

At the start of the second period, Jan Bell began to test its "store-within-a-store" power-format in supermarket and drug combo superstores. During the quarter, it launched tests with several Smith's Food & Drug centers in the inter-mountain region and two Bruno's in Alabama. This month, it began tests with four Schnucks' Markets in Missouri and Illinois and two Cubs stores in Minnesota. In August, it will start up with four Ralph's Supermarkets in California and, in September, with four Stop N Shop stores in Massachusetts and Rhode Island.

TORONTO (JULY 30) PR NEWSWIRE - Dickenson Mines Limited (Toronto: DML) net earnings for the six months ended June 30, 1990 were Cdn. $2,300,000 or $0.13 per share on revenues of $32,653,000. Comparable 1989 net income was $6,576,000 or $0.40 per share on revenues of $26,609,000. The 1989 net income includes an extraordinary gain of $3,675,000 relating to the company's sale of its investment in Kam-Kotia Mines Limited.

Gold production at the Red Lake Mine for the first six months totalled 42,000 ounces compared to 37,600 ounces a year earlier.

Satisfactory results were attained at the Wharf Mine, Havelock Lime Works, and the Saskatchewan Minerals Division.

OREM, UT (JULY 30) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today that EVA Airways, located in Taipei, Taiwan, has purchased Wicat computer-based training systems valued in excess of $125,000.

This is the first CBT installation for the newly organized commercial aviation division, EVA Airways, a subsidiary of the world's largest shipping company, Evergreen Marine Corp. The systems will consist of Wicat's 2255 fileserver and WITS 4000 student workstations which will deliver the Wicat-developed Boeing 767 flight training courseware.

"We are pleased to welcome EVA into our growing list of prestigious aviation customers," commented Robert W. Mendenhall, president and CEO. "We have experienced great acceptance of our products from Pacific Rim companies in recent months. The selection of Wicat by EVA brings the total number of Wicat aviation clients located in the Pacific Rim to seven."

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

#90211p9926 07/30/1990 ~PR Newswire

MONTVALE, N.J. (JULY 30) PR NEWSWIRE - Mercedes-Benz of North America announced today that it is realigning its operations -- by decentralizing its organization and geographically redefining its marketing areas -- to better respond to dealer and customer needs as well as regional market differences.

The new organizational structure, planned to be in effect by the end of the year, will realign the territories of the company's field organization and decentralize key operational functions currently performed in the company's headquarters. The change will shift manpower and resources to the field from the headquarters -- which will remain here in Montvale, N.J., and focus on strategic and policy issues. The realignment will not result in a reduction in headcount. MBNA currently has approximately 1,700 employees nationwide.

Behind the new organization lies a fundamental goal: to be more market-responsive. To accomplish this, MBNA has structured its regions based on the grouping of its "natural market areas," which include consumer groups with similar demographics, lifestyles, attitudes and buying patterns. In addition, MBNA will be increasing its number of field employees by approximately 35 percent to more than 330. Field personnel, which call on MBNA's dealers on a daily basis, will also have more authority to make on-the-spot decisions to assist their dealers or customers.

"We recognize the importance of being as close to our dealers and customers as possible so we can respond more quickly to changes in the marketplace," said Erich Krampe, MBNA president and CEO. "Our field organization has always been very strong and is one of the reasons we have enjoyed the success we have over the years. Yet, we must prepare now for the challenges that will face us during the next decade -- and centralization of authority is certainly not a viable alternative."

Four operational regions, functioning as independent decision-making entities, will be established: Northeast, with offices in the Washington, D.C., area; North Central, based in Chicago; Southern, headquartered in Jacksonville, Fla.; and Western, in Los Angeles. These new regional locations were determined after comprehensive analyses of key luxury car markets throughout the United States. The Northeast Region includes Northeast and Mid-Atlantic states from northern Virginia to Maine. The entire heartland and Midwest, from Idaho to central Pennsylvania, make up the North Central Region. The Southern Region stretches from North Carolina to Florida to Arizona; and the states of California, Oregon, Washington, Nevada, Alaska and Hawaii comprise the Western Region.

#90211p9930 07/30/1990 ~PR Newswire

EL SEGUNDO, CA (JULY 30) PR NEWSWIRE - Infonet today announced multiple topologies designed to provide custom Virtual Private Data Networks, which deliver instant connectivity for rapidly expanding multinational companies. These topologies -- Vmesh, Vstar, and Vstream -- serve as the foundation for Infonet's new virtual private data network (VPDN) product family. VPDN is an expanded version of Infonet's recently released VPN+ offering.

"Our custom VPDNs are professionally managed, fixed cost solutions for multinational companies with heavy data communications traffic," said Michael D. Radice, Infonet's vice president of product marketing. "The majority of firms who come to us for a custom VPDN want the high

performance, fixed cost benefits of a private network. But they don't want to make a major capital investment in hardware or hire and train a large in-house telecom staff to run their own network."

VPDN has modular topologies, available in several line speeds, which can be implemented worldwide one at a time. These topologies also make it easy for such firm's to quickly change their VPDN's configuration as they become increasingly more centralized or decentralized.

Vmesh is Infonet's "mesh" network topology for decentralized data processing environments where communication flows from multiple locations to multiple locations. Vmesh is ideal for companies with five or more geographically dispersed mainframes, minicomputers or LANS.

Vstream is an Infonet-managed leased line connecting two locations, offering protocol independence and high throughput. Vstream is commonly used as a transoceanic link between two major sites.

For centralized data processing environments where communication flows from multiple locations to a single hub location, Infonet offers Vstar. Vstar is well-suited to firms who have a central "host" computer that communicates with several geographically dispersed user sites.

Vstream is an Infonet-managed leased line connecting two locations, offering protocol independence and high throughput. Vstream is commonly used as a transoceanic link between two major host sites.

"Infonet's VPDN is a very impressive offering that delivers whatever solution the customer needs, circuit or packet," said Joaquin Gonzalez, vice president and director of global network strategies for the Connecticut-based market research firm, The Meta Group. "This virtual network service mitigates the risk users face in the rapidly changing regulatory environment, and is exactly the kind of product and service my clients need," he added.

Using its Instant Connect Capabilities, Infonet can promptly activate any or all of the modular topologies a company selects to provide a fully operational VPDN in a matter of days.

Infonet's international team of experts handle all of the certification and installation, as well as end-to-end testing, verification and ongoing support. Dedicated network connections are provided at VPDN host and LAN sites. Dial-up users may access a firm's VPDN as well.

Each VPDN contract includes the use of Infonet's existing globally distributed communications facilities and hardware, professional network management team, monitoring and control equipment, international troubleshooters, worldwide maintenance and support staff, fully redundant

network architecture, and customer satisfaction management tools.

#90211p9931 07/30/1990 ~PR Newswire

PORTLAND, OR (JULY 30) PR NEWSWIRE - As anticipated in the previous announcement Ridel Environmental Technologies Inc. (RET) (AMEX: RIE), reported a loss for the second quarter and the six months ended June 30 of $0.16 and $0.28 per share, respectively. Revenues, however, were at record levels for the same periods.

Revenues for the second quarter increased approximately $4.9 million or 26 percent from the same prior year period. For the six month period revenues increased $9.3 million or 27 percent from the same prior year period.

RET President, J.H. Dastur stated that despite recent lower margins in RES the company continues to be very enthusiastic about the future. "Riedel OMNI Rubber Products has had an exceptional first half in 1990 and we look for this performance to continue throughout the year. Also, construction of Ridel Waste Disposal Systems' composting facility in Portland is progressing very well and we're anticipating completion by early 1991," according to Dastur.

The company recently announced the signing of a contract with Chinese Petroleum Corp. for the design of a groundwater decontamination system at CPC's refinery at Kaohsiung, Taiwan. According to Dastur, this is a joint venture effort between Riedel Environmental Engineering and Riedel International, an affiliated marine and heavy civil construction company. "Our joint venture with Riedel International is off to a great start now with the Taiwan contract, as well as other domestic projects where the RET-RII synergy is really paying off."

Dastur said "The loss occurred primarily as a result of lower profit margins in our Ridel Environmental Services subsidiary." The company's environmental services revenue included an unusually large percentage of subcontracted services at lower profit margins. Gross profit, as a percentage of revenue, for both the second quarter and the six month periods decreased from approximately 32 percent to 25 percent. Several major oil spills and a landfill operation contributed to 1989's higher gross profits. Dastur added "we have increased our overhead base both technologically and geographically to accommodate this growth in revenue. The EPA's delay in the issuance of several large delivery orders under the company's EPA contracts, however, has deferred full realization of the benefits from these investments." Increased interest expense has reduced

results for both periods.

The company also announced that under its EPA Dioxin contract, a large delivery order has been issued in July 1990 to clean up contaminated soil at a site near St. Louis, Mo. The delivery order will contribute revenues of approximately $4 million through December 1990.

#90211p9933 07/30/1990 ~PR Newswire

MONROEVILLE, PA (JULY 30) PR NEWSWIRE - At the board of directors meeting of Community Bancorp Inc. (NASDAQ: CBPA) held Wednesday, July 25, the company voted to opt out of the major anti-takeover provisions of Act 36 which amended the Pennsylvania Business Corporation Law.

Under Act 36, all Pennsylvania corporations must act to accept or opt out of the three major provisions of the new law affecting control share voting restrictions, disgorgement provisions, and directors' responsibilities.

The control share voting restriction limits voting powers when a shareholder acquires voting powers which amount to at least 20 percent of the total shares entitled to be voted. By Community opting out of this provision, shareholders will continue to have voting rights as outlined in the company's bylaws.

The disgorgement provision of the act is an effort to discourage "greenmail" and permits a Pennsylvania corporation to recover profits realized as a result of a sale where a person or group of people attempt to acquire at least 20 percent of the company's votable shares. Community also opted out of this provision.

Commenting on these two anti-takeover provisions, Community President and Chief Executive Officer Ken Tyson said that Community believes in the free

enterprise system. He went on to say that this decision signifies Community's pro-shareholder ethic.

These portions of the act have been attacked by several groups, including the Securities and Exchange Commission, the Federal Trade Commission and the dean of the Harvard Law School.

The directors' responsibilities provision of Act 36 is the only section which the Community board endorsed. "We believe this provision simply restates the current law," said Tyson. This new provision allows directors to make decisions pertaining to the company based on evaluations of the effects upon not only the shareholders, but also employees, customers, suppliers, creditors and communities in which the company has offices. "Enhancing shareholder value will always be the main objective of Community's board, however we felt that the board should also be able to view the long-term effects of its actions," said Tyson. "This provision gives the board a legal right to think long-term," Tyson continued.

Community Bancorp Inc. is the parent holding company of Community Savings Association which maintains 12 full-service offices in the Greater Pittsburgh metropolitan area.

EL SEGUNDO, CALIF. (JULY 30) PR NEWSWIRE - Infonet today announced that Storage Technology Corp. (NYSE: STK) and Legent International (NASDAQ: LGNT) have signed contracts for custom Virtual Private Data Networks (VPDNs), using Vstar and Vstream network topologies.

Infonet's VPDN product family provides professionally managed, fixed cost network solutions for multinational firms with heavy data communications traffic.

StorageTek's fixed price Infonet VPDN contract covers two years and is valued at more than $1 million.

Frank Catalfamo, StorageTek's manager of corporate telecommunications, estimates his firm has saved $20,000 a month since switching from a public data network to an Infonet VPDN.

"Our data communications traffic can also grow 20 to 30 percent with no increase in cost or decrease in network performance," said Catalfamo.

StorageTek manufactures, markets and services worldwide information

storage and retrieval subsystems for high performance computers.

Another Infonet VPDN customer, the international division of Legent Corp., previously had a variable cost hybrid network managed by another vendor. Legent international expects to save $30,000 to $35,000 a month once its VPDN is fully operational.

Legent provides management, operational and systems support software for the IBM mainframe marketplace.

Established in 1970, Infonet is the leading standards-based, international value-added network services company. It provides communication and computer services and directly supports those services worldwide.

CALHOUN, GA. (JULY 30) PR NEWSWIRE - Carriage Industries Inc. (NYSE: CGE) a leading manufacturer of carpet for specialized markets, today reported that its wholly owned subsidiary, Medart Inc., a metal locker manufacturer located in Greenwood, Miss., filed for protection under Chapter 11 of the U.S. Bankruptcy Code.

Carriage Industries and Medart also simultaneously filed a joint plan of reorganization.

"The debt structure which Medart assumed in December 1988, when we purchased the company out of a bankruptcy proceeding, anticipated significant growth of the company," said Clarence E. Harris, chairman and chief executive officer of Carriage. "Instead, two marginal divisions were ultimately closed and the revitalization of the core locker business has taken longer and cost us more than we originally anticipated.

"Faced with a large, unused building and an even larger debt and related debt service, Medart recently sought a voluntary restructuring of its obligations.

Although some creditors responded favorably, those who did not made a voluntary plan unworkable. Accordingly, Medart is seeking protection of the bankruptcy court today for the purpose of obtaining a debt restructuring," Harris said.

The reorganization plan, if confirmed, would result in the disposition of approximately $1 million of underutilized assets and an accompanying reduction of approximately $3 million in liabilities. In addition,

Carriage would be committed to contribute $500,000 of cash to Medart's equity, to convert an additional $500,000 of existing loans into Medart equity, and to supply up to an additional $750,000 of new loans to Medart.

Carriage is a vertically integrated manufacturer of carpet supplying specialized markets. The company is a leader in the manufactured housing recreational vehicle, marine and exposition/trade show markets. Carriage also produces carpet for the contract/residential, hospitality/ commercial and home center/needlebond markets and operates a metal fabricating company.

Corporate offices are in Calhoun, Ga. Sales offices and distribution centers are strategically located across the United States. The company's transportation subsidiary, Carriage Transport Inc., operates one of the largest trucking fleets in the carpet industry.

SAN JOSE, CA (JULY 30) PR NEWSWIRE - Samsung Information Systems America today announced price reductions of up to 23 percent on its family of local-area network (LAN) workstations and file server products. The price reductions are effective immediately.

"This aggressive pricing sets a new competitive entry point for our LAN hardware products in order to make them affordable for first-time LAN buyers," said Phil Vertin, senior vice president of sales and marketing. "Each year, small-to-medium businesses continue to require industry standard LAN solutions. These business owners want reasonably priced, feature rich products specifically designed to meet their current needs. They also want systems that will be able to grow as their business grows."

Samsung sells its LAN products through key distributors including Robec, Microware, TechData, Vitek and Canara of Canada. The price reductions and specific products involved are as follows:

Model/Description	Original Suggested Retail Price	New Price	Savings Percentage
PCterminal/286 12MHz diskless workstation	$1,299	$999	23 percent
PCterminal/386SX 16MHz diskless workstation	$2,195	$1,999	9 percent
386AE File Server 16MHz, 4MB RAM	$3,999	$3,699	8 percent

386A3 File Server 33MHz, 4MB RAM	$6,499	$5,999	8 percent

Samsung Information Systems America, headquartered in San Jose, markets local-area network (LAN) hardware systems, Ethernet interface cards, personal computers, portable computers, and monochrome and color monitors. Samsung markets its products through reseller and distributor channels in North America. The company has regional offices in Chicago; New York; Washington; Atlanta; Toronto; Costa Mesa, Calif.; and Saddlebrook, N.J. The Samsung customer support number is 800-446-0262. Product literature is available by calling 800-624-8999, ext. 851.

Samsung Electronics Company (SEC) Ltd., the Seoul, Korea parent company of Samsung Information Systems America, develops and manufactures electronic products ranging from telecommunications devices to computer systems and peripherals. Since 1981, SEC has sold 9 million computer products, including 8 million monitors. Both Samsung Information Systems America and SEC are part of Samsung Group, based in Seoul; a $39 billion international company focusing on the electronics, chemical, food processing, textiles, information, service and trade industries.

PITTSBURGH (JULY 30) PR NEWSWIRE - Security Bureau Inc. (SBI), a wholly owned subsidiary of Chambers Development Company Inc. (AMEX: CDVB) of Pittsburgh, announced today that it has acquired Dynamic Protection Services Inc., a security services firm in Orange, Calif.

The acquisition is expected to generate annual revenues of $4.1 million for SBI.

"This acquisition is excellent for SBI because Dynamic Protection services has established an outstanding record of quality service to its customers in Orange County," said Gordon M. Ellis, SBI's president and chief operating officer.

"In the rapidly expanding security business, SBI is making well-planned acquisitions which complement the company. We are proceeding within the strategy and business plan developed by Chambers toward an optimum mix of the security and solid waste businesses.

"Also, the new contracts will continue to enhance our position as a leader in security programs across the country and help differentiate SBI

services to meet the ever-increasing client demands for high quality security programs," Ellis said.

Additionally, SBI has California offices in Oakland, Anaheim, San Diego, Indio, Pleasanton, Sacramento and San Rafael.

SBI, also headquartered in Pittsburgh, is the 14th largest security services firm in the United States. The company provides uniformed guard services, crisis management, security surveys, loss prevention and investigative services.

Chambers Development Company Inc. is a leading environmental firm, offering services in collection, hauling, disposal, recycling and landfill development.

COSTA MESA, CA (JULY 30) PR NEWSWIRE - ICN Pharmaceuticals Inc. (NYSE: ICN) said today two more countries have authorized the antiviral drug Virazole (ribavirin) for infant lung disease caused by respiratory syncytial virus (RSV).

ICN said health authorities in Hungary and New Zealand authorized aerosolized Virazole (ribavirin) for the treatment of infants and young children hospitalized with lower respiratory tract infection caused by RSV.

The company said that with these authorizations, aerosolized Virazole is now authorized for RSV in 18 countries, including the United States and eight European countries.

Virazole is also authorized in different forms outside the United States for a variety of viral infections, including influenza, measles, herpes simplex virus, herpes zoster and human immunodeficiency virus.

ICN Pharmaceuticals, which is listed on the New York Stock Exchange, makes markets and distributes a broad range of prescription pharmaceuticals and biomedical products throughout the world.

#90211p9953 07/30/1990 ~PR Newswire

LOWELL, MA (JULY 30) PR NEWSWIRE - Wang Laboratories, Inc. (AMEX: WAN) today reported that it had achieved its fourth-quarter goal of bringing

its operating revenues and operating expenses into balance. It reported a loss of $5.6 million from continuing operations excluding restructuring and other special charges and year-end adjustments charged to the fourth quarter. This compares to a loss of $61.1 million in the prior year. The company expects to achieve profitability for the fiscal year that began July 1.

Richard W. Miller, chairman and chief executive officer of Wang, said, "This quarter's operating results demonstrate that the turnaround programs we have initiated are working. We achieved our fourth-quarter goal of bringing our operating revenues and operating expenses into balance, resulting in a near operational breakeven. Moreover, as a result of the progress we have made in the past year, Wang is positioned to achieve profitability for the 1991 fiscal year that began July 1."

As expected, the company incurred a net loss for the quarter which included restructuring and other special charges of $417.4 million, and year-end adjustments, representing changes in estimates to annual expense and income items, of $24.2 million.

The net loss for the quarter was $496.7 million, or $3.01 per share, compared with a net loss of $374.7 million, or $2.29 per share, for last year's fourth quarter. Net loss for the current quarter includes losses from discontinued operations of $24.9 million, or 15 cents per share.

Revenues from continuing operations totaled $652.2 million in the fourth quarter, compared with a restated $750.9 million in last year's fourth quarter. Revenues for the year totaled $2,497.2 million compared to a restated $2,909.9 million in fiscal 1989. Net loss for the year was $715.9 million, or $4.35 per share, and included restructuring and other special charges of $388.3 million (net of $116.0 million gain on sale of interest in a subsidiary) compared to a net loss of $424.3 million, or $2.59 per share, which included restructuring charges of $142.0 million, in fiscal 1989. Net loss for the current year includes losses from discontinued operations of $87.3 million, or 53 cents per share.

PHOENIX, AZ (JULY 30) PR NEWSWIRE - Del Webb Corp. (NYSE: WBB) announced today net income for the fiscal year ended June 30, 1990 of $14,742,000, or $1.45 per share, compared to a net loss of $12,651,000, or $1.51 per share during the fiscal year ended June 30, 1989. Consolidated revenues for the year totalled $241.8 million, vs. $118.2 million during the same period a year ago.

The company recently moved from a December 31 to a June 30 fiscal year-end to conform to a more natural business cycle.

For the quarter ending June 30, the company reported net earnings of $1,237,000, or 13 cents per share, on revenues of $48.7 million, compared to income of $185,000, or a loss of three cents per share after payment of preferred dividends, on revenues of $35.3 million during the same period a year ago.

Results from Webb's joint venture land development projects were disappointing and detracted from the company's annual earnings. The Towne Meadows project recorded a loss of $2 million resulting from asset writedowns during the year, $1 million of which was recorded in the fourth quarter. At this point, the company has virtually no exposure to future losses at Towne Meadows.

Home closings for the year increased by more than 100 percent as 1,791 deliveries were made, compared to 876 during the previous year. Substantially all of that increase came from closings at Sun City Las Vegas which began delivering homes in March of 1989. Sales at Webb's Sun Cities also increased to 1,698 compared to 1,589 during the same period a year ago.

For the quarter ending June 30, home closings increased 39 percent to 347, vs. 250 over the same period a year ago, while sales increased 26 percent to 498 vs. 396 over the same period.

"Our core business, the development of active adult communities, is healthy. Our Las Vegas community continues to show remarkably strong sales figures while our communities in Phoenix and Tucson continue to perform at above-market levels," Dion said.

FULLERTON, CALIF. (JULY 30) PR NEWSWIRE - Covington Development Group Inc. (NASDAQ/NMS: COVT), one of California's leading real estate development companies, reported operating revenues of $19.3 million and net income of $457,000, or 3 cents per share, for the three months ended June 30, 1990.

For the comparable quarter of last year, ended June 30, 1989, the company reported operating revenues of $21.4 million and net income of $1.8 million, or 12 cents per share.

Operating revenues and earnings for the first six months of 1990 were $35.1 million and $811,000 respectively. This compares with $48.2 million and $3.4 million respectively for the first six months of 1989.

The prior year's higher revenues and earnings were principally due to a high volume of land sales during the comparable periods last year.

In today's announcement, the company also pointed out that, as of June 30, 1990, it had 198 opened escrows for the sale of 375 units with a revenue value of $41.2 million, up significantly from Dec. 31, 1989, when it had 145 opened escrows for the sale of 307 units with a revenue value of $30.2 million.

For more than 32 years, Covington has developed quality-built, award-winning homes and communities throughout California and Nevada. Covington is the country's 173rd largest builder, according to Professional Builder magazine and is ranked 16th in the Los Angeles Times 100 list of "the best performing companies in California."

The company's primary areas of operation are Orange, Riverside, San Bernardino and Los Angeles counties; California's Central Valley; selected Northern California counties; Las Vegas and Oregon.

#90211p9964 07/30/1990 ~PR Newswire

WASHINGTON (JULY 30) PR NEWSWIRE - The American Hospital Association (AHA) and MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced that it has entered into a sales agency marketing agreement to jointly market the firm's long distance services. The announcement was made at the association's Annual Convention and Trade Exhibition held at the Washington, D.C. Convention Center.

Under the terms of a two-year agreement and option for a four-year renewal AHA and MCI will jointly market MCI's patient phone services, payphone services, MCI Vision and a variety of other voice services to AHA's institutional members consisting of over 5,500 hospitals, HMOs and long-term care facilities nationwide.

In return for its marketing support, the AHA will receive a commission payment from MCI for each member that selects MCI as its long distance provider.

MCI's services will also be marketed to AHA's 400,000 associate members' offices and societies, in addition to individual hospital employees.

AHA joins other major national organizations, such as the American Bar Association, American Express, American Airlines and Northwest Airlines, that have partner marketing programs with MCI. MCI instituted the partner marketing program in 1983.

Introduced last month, MCI Vision is a service designed to provide small and mid-size businesses with features and capabilities, such as new billing and management aids and broad volume discounts, that have traditionally been available only to large national firms.

The AHA, a not-for-profit organization that serves as a national advocate for hospitals and the patients they serve, provides education and information for its members and informs the public about hospitals and health care issues.

MCI, with 1989 revenues of $6.5 billion, is the world's second- largest long distance company. Headquartered in Washington, it provides a full range of global telecommunications services, including voice, data, telex and electronic messaging services to businesses, consumers and government agencies.

#90211p9965 07/30/1990 ~PR Newswire

BALTIMORE (JULY 30) PR NEWSWIRE - Vein Clinics of America (VCA), the nation's largest medical group specializing exclusively in the non-surgical treatment of vein disease, today announced the opening of its Baltimore area clinic, in the McDonogh Crossroads Medical Building- B, 21 Crossroads Drive, Owings Mills, Md.

This new facility joins its Chevy Chase center, located at 5454 Wisconsin

Ave., Washington. VCA physicians, who specialize in phlebology -- the treatment of vein disease -- offer patients a safer, more effective and less expensive alternative to the surgical treatment of vein disorders, which range from varicose veins and spider veins to leg ulcers.

"Our procedure is an immense technological improvement over other non-surgical, injection treatments currently available for vein diseases. We at VCA use refined compression therapy -- the treatment that requires extensive physician training in injecting the right solution and applying special compression bandaging. And we usually have a near 100 percent success rate," explained Robert Gaudet, M.D., Ph.D., one of the physicians at the Baltimore clinic.

Refined com0d!Msion therapy is a unique technique practiced exclusively by physicians at VCA across the country. VCA physicians are trained to first identify the failed vein system, and then inject it with a FDA-approved solution called sodium tetradecyl sulfate just under the skin near the failed valve. Compression bandages are then applied to maintain pressure on the affected areas and speed healing. Treatment is accelerated by a prescribed amount of daily walking.

Vein Clinics was founded by Dr. Brian McDonagh, an Irish-born physician who first refined and introduced this technique in 1981. VCA currently maintains four offices in the Chicago area, and four offices in Southern California, with others in Washington, Atlanta and Detroit.

SHELTON, CT (JULY 30) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) second quarter revenues were the highest for any quarter in the company's history, Robert G. Gilbertson, president and chief executive officer, announced today.

For the three months ended June 30, 1990, revenues were $30,583,000, compared to $28,657,000 a year ago, and net income of $1,132,000, or 10 cents per share, increased more than five-fold from the net profit of $175,000, or 2 cents per share, reported for the same period a year ago.

Through the six months of 1990, Data Switch revenues were $57,607,000, with net income of $3,561,000, or 31 cents per share, compared with 1989's first-half revenues of $51,795,000, and a net loss of $2,354,000, or 21 cents per share. Year-to-date net income included an extraordinary gain of $2,213,000 in the first quarter, resulting from the company's exchange offer for its convertible subordinated debentures.

Commenting on the company's performance, Gilbertson said that improvement in the second quarter "stemmed from strong sales of the Model 2400 and 1800 data processing switches, sharply higher international revenues, expense reductions instituted over a year ago, and the benefits of our ongoing quality-improvement process.

"Furthermore," Gilbertson stated, "we expect to exceed 1989's second-half results through the end of the year. Sales activity accelerated during the spring, producing a backlog that was more than double that of any prior quarter."

The Data Switch CEO also noted that the remainder of the year would see the introduction of several new products, including what he termed "significant developments in both local-area and wide-area networking."

Data Switch Corporation is a leading manufacturer of management and control systems for data processing and data communications applications.

JACKSON, MI (JULY 30) PR NEWSWIRE - For the third time this year, Consumers Power Company has announced it has reduced its electric rates effective for the remainder of the year.

The 1.5-percent decrease amounts to a reduction of 50 cents on the average residential customer's monthly electric bill. In May, the company reduced

its electric rates 1.6 percent and in March rates were reduced 5 percent. The reduction, through the company's power supply cost recovery mechanism, is the result of the company's efforts to lower fuel and purchased and net interchange power costs.

"This electric rate reduction comes at the perfect time for Michigan's air conditioning weather," said Michael G. Morris, executive vice president of Consumers Power.

Morris attributed the reduction to "a continuation of our success in negotiating a lower coal transportation contract for our power plants and renegotiating lower prices on our existing coal purchase contracts. The price cut also reflects a continuation of expected lower net purchased power costs due to higher-than-anticipated electricity sales to other utilities," Morris added.

Consumers Power's residential electric rates have consistently ranked in the lowest one-fifth in national surveys. The company's electric rates are about the same as they were five years ago -- a real (inflation-adjusted) decrease of 17 percent.

Consumers Power serves electricity to more than 3.3 million people in a 27,800-square-mile service area encompassing 61 counties in Michigan.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90211p9975 07/30/1990 ~PR Newswire

WASHINGTON (JULY 30) PR NEWSWIRE - JOBS, the Washington area's innovative new weekly employment opportunities newspaper, will begin publishing this fall. The first edition of JOBS will roll off the presses and hit the streets on Wednesday, Sept. 12.

"Starting this publication in today's cost-conscious economic climate will enhance JOBS' chances of becoming the definitive source of employment information for the job seeker," declared Jonathan Adler, president and publisher of JOBS. "After over two years of research we believe that we have developed a user-friendly, timely product that will act as a forum for bringing together job seekers and human resource professionals."

JOBS' Sales Manager Paula Miller-Lester feels that "JOBS' unique approach will produce excellent results and provide a cost-efficient alternative to more expensive and largely inefficient traditional newspaper recruitment advertising."

JOBS will be distributed, free of charge, at all Metro stations, selected retail outlets such as Safeway and Peoples Drug, colleges and universities hotels/motels, and outplacement centers. Free subscriptions are available to consumers either by calling a 1-900 number or by mailing in subscription cards currently being distributed throughout the area.

JOBS is designed to reach over 300,000 quality job seekers in Washington, Maryland and Virginia every week. Each issue will contain timely, employment-related features and articles, along with a calendar of events and a "Jobs Filled" section chronicling recent hirings and promotions.

Miller-Lester is confident that targeted distribution and informative editorial -- combined with an annual multi-media promotional campaign -- will make JOBS "the area's number one newspaper."

JOBS is the latest project of the Adler Group, a 30-year-old company located in Silver Spring, Md. The Adler Group publishes apartment, new home, and commercial real estate guides, trade magazines, directories, and newsletters. The Adler Group is also a parent company of Neighborhood Newsstand Incorporated, a full-service distribution operation.

TALLAHASSEE, FL (JULY 30) PR NEWSWIRE - The wait is over and the pilot study will begin Monday, July 30, 1990, as Florida Power & Light installs the new low pressure sodium vapor lights along A1A.

The agreement of a pilot study conducted by Florida Power & Light and the City of Delray Beach was obtained through the efforts of Public Service Commissioner Frank S. Messersmith. The pilot study is the first conducted in the state to prove the theories revealed in research conducted at the Florida Institute of Food and Agricultural Sciences (IFAS). That study concluded that the Loggerhead Turtle and its hatchlings were not distracted by the yellow glow emitted by the low pressure sodium vapor lights.

Messersmith, the first official from the South Florida area to serve on the Public Service Commission in more than 17 years, became aware of the Delray Beach dilemma soon after his appointment to the PSC four weeks ago. United State Fish and Wildlife representatives notified city officials earlier this year of the potential fines that would results if turtle hatchlings died due to the distraction caused by the street lights along A1A. The City of Delray Beach was facing fines of $25,000-$50,000 per dead turtle hatchling found along the State Road until the findings of the pilot study were implemented.

Messersmith said, "I am pleased with Florida Power & Light's quick response in working with the City of Delray Beach to obtain the new lights in such a short time frame. Hopefully, the pilot study will prove IFAS research correct and the lives of the turtle hatchlings will be saved."

Messersmith brought together officials from the Public Service Commission, the Florida Department of Natural Resources, the Florida Department of Transportation, Florida Power & Light Company, the City of Delray Beach, and the United States Fish and Wildlife Service to explore resolutions to a problem found along Florida's coastline. Sixteen of the 32 low pressure sodium vapor lights will be installed on Monday, and the remainder will be installed the following week to allow citizens time to adjust to the new hue. Currently, the lights are off along A1A due to the recent deaths of 53 Loggerhead hatchlings.

#90211p9978 07/30/1990 ~PR Newswire

DOWNERS GROVE, IL (JULY 30) PR NEWSWIRE - James C. Smith, president and chief executive officer of HealthCare COMPARE Corp. (NASDAQ-NMS: HCCC) announced today that revenues for the second quarter ended June 30, 1990 increased 27 percent to $9,868,000 from $7,771,000 during the comparable fiscal quarter a year ago. Earnings for the second quarter increased 102 percent to $1,188,000, or $.20 per share, compared with $588,000 or $.10 per share during the comparable fiscal quarter last year.

Revenues for the first six months ended June 30, 1990 increased 18 percent to $18,988,000, compared with $16,055,000 for the same period last year. Net income for the six months ended June 30, 1990 increased 60 percent to $2,069,000 or $.35 per share, compared to net income of $1,291,000 or $.22 per share for the same period of fiscal 1989.

Smith commented that the continued strong revenue and earnings growth was primarily fueled by the expansion of the PPO networks established by the company's subsidiary AFFORDABLE Health Care Concepts. Currently AFFORDABLE

has PPO networks in place in 19 states and the number of networks is expected to increase to 32 within the next year. Smith noted that as a result of the expansion of the company's PPO networks, the company is the only independent provider of PPO services on a nationwide basis. The company expects AFFORDABLE's national presence to further enhance the company's appeal to national payors of workers' compensation and group health care benefits, including self- insured corporations, insurance carriers, administrators and unions.

Smith also noted that over the last several months the following existing clients have added additional utilization review services or expanded into additional PPO networks:

The Mail Handlers Benefit Plan	The RETA Trust
Teamsters Miscellaneous Health & Welfare Fund	United Airlines
The American Postal Workers Union	Montgomery Ward
Wisconsin Physician Services	Travelers/CONSERVCO

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis, extensive utilization management and provider negotiation services (PPO development and management). Its services are provided to indemnity health care payers as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

ROWAYTON, CT (JULY 30) PR NEWSWIRE - Baldwin Technology Company, Inc. (AMEX: BLD), announced today that it completed the purchase of all of the outstanding capital stock of Misomex of North America, Inc., and Misomex AB (Sweden) from the Dyson-Kissner-Moran Corporation for a cash purchase price of $44 million. The company has obtained bank loans of $45 million to finance the purchase. The Misomex group of companies had over $41 million in net sales and over $4 million in net income for their most recent fiscal year. The acquisition includes Misomex subsidiaries in England, Sweden, Germany and the United States.

Misomex manufactures image imposition, step and repeat, automatic mask cutting and other pre-press equipment for the printing industry. The acquisition expands Baldwin's current product lines and provides an entry for the company into the pre-press equipment market. Wendell M. Smith, chairman of Baldwin, indicated that "Misomex's position is strong and no change in name, management or marketing services is contemplated." The company noted that the acquisition of the Misomex businesses will provide each of the entities with new opportunities for future growth.

Gerald A. Nathe, president of Baldwin Americas Corporation, will serve as the chairman of Misomex International. Howard LeVine will remain as president of Misomex N.A., and Gustav Talts and Gordon Kirsopp will continue as managing directors of Misomex AB and Misomex UK, respectively.

Baldwin Technology Company, Inc., is the leading multi-national manufacturer of materials handling, accessory and control equipment for the printing industry. For the nine months ended March 31, 1990, Baldwin had net sales of $127.8 million and net income of $7.9 million.

CAMBRIDGE, MA (JULY 30) PR NEWSWIRE - Index Technology Corporation (NASDAQ: INDX) and Deloitte & Touche today announced a strategic alliance under which the companies will jointly develop and Index Technology will market computer-aided software engineering (CASE) products featuring integrated methodology and project management support.

The first of these products, 4FRONT, was developed by Deloitte & Touche. It incorporates Index Technology's CASE products and Deloitte & Touche's 4FRONT methodology, which is based on Information Engineering -- one of the most widely used methodologies for new business systems development. Available immediately, 4FRONT is the only CASE product to integrate online

an Information Engineering methodology and project management capabilities across the systems development life cycle.

Under the terms of the alliance, the two organizations will jointly develop future CASE methodology products that support other development approaches.

Index Technology has licensed worldwide marketing rights to the 4FRONT product, which will be provided to Deloitte & Touche's 3,000 information technology consultants for use in the firm's information technology practice.

The new product includes Index Technology's PC Prism strategic planning product and Excelerator systems analysis and design software, both customized for Deloitte & Touche's 4FRONT methodology, an approach to systems development that has evolved over a period of more than ten years. The 4FRONT product is unique in that it provides integrated online support that helps users adhere to the methodology and leverage its benefits. With most other products, the methodology is supplied only through accompanying documentation and textbooks.

4FRONT is based on two leading Index Technology products -- Excelerator and PC Prism. Excelerator, with an installed base of more than 24,000, automates much of the systems analysis and design process, helping systems development professionals create and revise systems diagrams and charts, validate and cross-reference design data, prototype screens and reports, and create user- and system-related documentation before coding.

---- NOTE: Excelerator and PC Prism are registered trademarks of Index Technology Corporation.

PLUMSTEADVILLE, PA (JULY 30) PR NEWSWIRE - Global Environmental Corp. (NASDAQ: GLEN), a full-service environmental and bulk solids material handling company, announced today that it has signed a letter of intent with Global Capital Securities, Inc. to do a secondary offering of its securities and raise $3 million.

The company intends to use the proceeds for general corporate purposes including acquisitions of environmental control companies, expand its current operations and reduce some of its outstanding debt. This is

another step to further enhance the company's goal and objective to become a major company in environmental control.

Global Environmental Corp., headquartered in Plumsteadville, provides engineering, manufacturing, installation and testing of environmental systems, including bulk solids air conveying systems for industrial plants. The company has three wholly owned subsidiaries: Danzer Metal Works, Hagerstown, Md.; Texcon, Inc., an engineering firm located in Greenville, S.C.; and Rage, Inc., a pneumatic conveying company located in Plumsteadville.

#90211p9989 07/30/1990 ~PR Newswire

PHILADELPHIA (JULY 30) PR NEWSWIRE - Republic Bank, with offices here at 1515 Market St., today announced profits of $57,120 for the second quarter ending June 30, 1990.

This compares to a loss of $59,663 for the same period in 1989. For the six months ended June 30, 1990, the bank earned a profit of $75,549 vs., a loss of $154,861 for the same six-month period in 1989.

In addition, total assets increased in the second quarter to $45,134,000 up from $40,678,000 at March 31, 1990, and $30,746,000 at June 30, 1989.

Also, loans increased to $30,787,000 from $28,488,000 as of March 31, 1990 and $15,068,000 at June 30, 1989.

"Despite the uncertainties in the general economic outlook and concern for a soft real estate market, we will continue to move ahead in a cautious but positive manner," stated Rolf A. Stensrud, president and chief executive officer of Republic Bank.

Republic Bank specializes in commercial and consumer banking services for small businessmen and individual depositors. In addition to checking and savings accounts, Republic offers consumer and commercial lending services. State chartered under the laws of the commonwealth of Pennsylvania, a member of the Federal Reserve, it is also a member of the MAC network.

Additional details are available by calling 215-563-3600.

#90211p9991 07/30/1990 ~PR Newswire

MARIETTA, GA (JULY 30) PR NEWSWIRE - Healthdyne Inc. (NASDAQ: HDYN), today announced its financial results for the quarter ended June 30.

For the second quarter of 1990, the company earned $2.9 million, or $0.18 per share. This represents a substantial improvement over earnings of $163,000, or $0.01 per share, in the second quarter of 1989. Revenues for the second quarter of 1990 of $33.8 million were 40 percent higher than revenues of $24.2 million for the second quarter of 1989.

Net earnings for the six months ended June 30 were $5.2 million, or $0.32 per share, on revenues of $65.4 million, which was substantially higher than net earnings of $302,000, or $0.01 per share, on revenues of $46 million for the six month period in 1989.

Home Nutritional Services ("HNS"), the 66 percent owned home infusion therapy subsidiary of the company, had net earnings for the quarter of $2.3 million, which was an increase of 43 percent over the same period of 1989. Healthdyne Technologies, the home care products manufacturing division of the company, increased its second quarter operating earnings to $1.3 million, which was an increase of 161 percent over the second quarter of 1989, with a 61 percent increase in revenues to $8 million. Healthdyne Perinatal Services, which is engaged in providing home obstetrical care, continued its revenue growth to $6.5 million, a 76 percent increase over the second quarter of 1989 and a 28 percent increase over the first quarter of 1990. The Perinatal Services Division's quarterly operating loss increased from $465,000 to $631,000. However, this division has been aggressively adding infrastructure, and during the second quarter of 1990 it added two more perinatal centers to bring its total to 28 with over 90 sites of service nationally.

According to Parker H. Petit, chairman and chief executive officer of Healthdyne: "We continue to have a very healthy growth rate in all three of our operating units. Also, the aging in our accounts receivable has decreased on a consolidated basis with HNS and Technologies reporting significant progress during the quarter. This quarter, our Perinatal Services Division was the fastest growing operation, and they continue to increase their market share rapidly. This division has built up a significant infrastructure and reputation within the medical community, and we expect them to continue to gain market share from their competitors."

Healthdyne is a national provider of high technology home care medical services, including infusion therapy through its partially owned subsidiary, HNS, and home obstetrical care through its Perinatal Services Division, and a manufacturer of high tech home care products through its Healthdyne Technologies Division.

#90211p9993 07/30/1990 ~PR Newswire

CINCINNATI (JULY 30) PR NEWSWIRE - Jacor Communications, Inc. (NASDAQ: JCOR) reported its financial results for the three months and six months ended June 30, 1990.

For the three months ended June 30, 1990, the company had broadcast revenue of $24,081,000, up 6.9 percent over the $22,517,000 from the second quarter of 1989. Broadcast cash flow (profit from broadcast operations before depreciation, amortization, corporate expenses, interest expense and income taxes) for the second quarter of 1990 totaled $6,004,000, up 26 percent over $4,783,000 for the second quarter of 1989.

The company had a loss before extraordinary item for the second quarter of 1990 of $2,347,000 or $.27 per common share, as compared to a loss before extraordinary item of $2,151,000 or $.32 per common share for the same period in 1989.

For the six-month period ended June 30, 1990, the company had broadcast revenue of $43,211,000, up 5.7 percent over the $40,867,000 for the six-month period of 1989. Broadcast cash flow for the first six months of 1990 totaled $7,969,000, an increase of 19 percent over the $6,679,000 for the same six-month period of 1989. Larger non-cash charges resulting from the amortization of a non-compete agreement and an increase in interest expense caused by the larger amount of outstanding long-term debt led to a larger loss before extraordinary item for 1990 than for 1989. The loss per common share before extraordinary item was $.81 per share compared to a loss of $.85 per share for the 1989 period.

Terry S. Jacobs, chairman, president and chief executive officer of Jacor explained, "The increase from 1989 to 1990 in broadcast cash flow, broadcast operating income and operating income is a result of cost controls put in place in late 1989 throughout the company to counter the overall softness of radio advertising and, to a lesser extent, growth in revenue.

"The 5.7 percent growth in the company's revenue for the six-month period compares favorably to the 2.9 percent growth in radio advertising revenue for the first half of 1990 country-wide, according to a report by the broadcast accounting firm of Miller, Kaplan, Arase & Co.," said Jacobs.

Jacor Communications, Inc., headquartered in Cincinnati, currently owns 13 radio stations, a cable television system, the Georgia Network, Eastman Radio, Inc., and Critical Mass Media, Inc. The company's stations are located in Cincinnati, Atlanta, Cleveland, Denver, Nashville, Knoxville, Jacksonville and Tampa.

WEST PALM BEACH, FL (JULY 30) PR NEWSWIRE - CV REIT, Inc. (NYSE: CVI), a real estate investment trust, today reported results for the second quarter and six months ended June 30, 1990.

Also, the board of directors has declared a cash dividend of 25 cents per share, payable Oct. 2, 1990, to shareholders of record on Sept. 4, 1990. This is a resumption of the company's cash dividend suspended for the prior quarter when a 5 percent stock dividend was declared.

Second quarter net income was $1,779,000 or 25 cents per share on revenues of $6,064,000, compared with net income of $2,424,000 or 35 cents per share on revenues of $6,037,000 in the like quarter last year.

Six-month net income was $3,681,000 or 53 cents per share on revenues of $11,991,000 compared with net income of $5,234,000 or 76 cents per share on revenues of $12,494,000 in the fiscal 1989 period.

Per-share results reflect an increase in the number of shares outstanding, resulting from the 5 percent stock dividend declared May 8, 1990.

Alvin Wilensky, president and chief executive officer, noted that CV REIT reduced its non-performing loans, net of allowance for losses, to $31.6 million as of the end of the second quarter from the prior quarter's $33.8 million.

#90211p9995 07/30/1990 ~PR Newswire

LEICESTER, NY (JULY 30) PR NEWSWIRE - CPAC, Inc. (NASDAQ: CPAK), a manufacturer of chemicals and pollution control equipment for the imaging industry, today reported an increase in sales and earnings for the first quarter of fiscal 1991.

CPAC sales for the three months ended June 30, 1990, were $7.1 million,

compared with $6.8 million in the previous year. Net income for the period was $380,910, up from $366,500 for the same three months last year. Earnings per share also rose to $0.17 from $0.16 per share last year.

Thomas N. Hendrickson, CPAC president and chief executive officer, stated that first quarter results were in line with company expectations. "We anticipated that start-up costs for the new CPAC Europe joint venture and final reorganization of CPAC's Equipment Group would both impact profits," he said. "Our investment in CPAC Europe follows our strategic plan, and prepares for the company's future in the international chemical market. To offset start-up losses, domestic sales efforts have been reinforced." Hendrickson added that some erosion of profits had also been experienced in the CPAC Chemical Group, due to severe competitive pricing. He stated that management was taking aggressive steps to increase future sales and profitability.

#90211p9997 07/30/1990 ~PR Newswire

COLUMBUS, GA (JULY 30) PR NEWSWIRE - American Family Corp. (NYSE: AFL) today reported second quarter results.

Operating earnings, excluding realized investment gains, were $27.8 million, or $.34 per share, compared to $2.3 million or $.03 a year ago. The substantial increase in earnings was due to the negative impact of the non-recurring and/or unusual items that occurred in the second quarter of 1989. Excluding the 1989 business restructuring write-down, operating earnings per share rose 17.2 percent. Total revenues for the quarter were $621.2 million, a 4.3 percent increase over a year ago.

For the six months, operating earnings were $53.9 million, or $.66 per share, compared to $28.7 million or $.35 per share last year. Total revenues rose 3.5 percent to $1.2 billion.

The board of directors also declared a third quarter cash dividend of $.08 per share to be paid on Sept. 4 to stockholders of record on Aug. 17. This is the company's 67th consecutive quarterly cash dividend.

Deputy Chief Executive Officer Daniel P. Amos stated: "We are pleased that our primary businesses continue to meet our expectations. Despite the impact of the weaker yen on dollar reported results, we expect operating earnings per share for the full year to significantly exceed those of 1989. In the long term, we believe that the strategies we have in place will allow us to grow at a rate that is in line with our financial objectives."

#90211u0100 07/30/1990 ~United Press International

SEATTLE (JULY 30) UPI - Goodwill Games officials and police were searching for a Soviet amateur dancer who missed his flight home and dropped out of sight, sparking both speculation of his possible defection and fears for his safety.

Aleksandr Kolupaev, 25, of Kirov did not board his scheduled Aeroflot flight home Saturday afternoon and has not contacted his host family for more than 24 hours, said Clint Staaf of Seattle, Kolupaev's host.

''He did phone us about 11:30 (Saturday morning) and asked us to please get his bags to the airport about 1 o'clock,'' Staaf said. ''I guessed he was downtown shopping. We checked his bags in and they went to the Soviet Union. But we haven't heard from him since.''

Kolupaev is a member of the Soviet Trade Union delegation and has been in Seattle as part of the Goodwill Games Exchange Program, Soviet Consul General Boris Vasev said.

''We have notified the police and the Seattle Organizing Committee and security and they are searching for him,'' Vasev said. ''Nobody knows what happened to him. We're waiting. Maybe something has happened to him.''

Vasev said there was no indication Kolupaev wanted to remain in the United States.

Goodwill Games spokesman Dan Sheeran said the SOC had no information and had not been contacted by Kolupaev. He added he had been directing inquiries to the Immigration and Naturalization Service.

Kolupaev, a tile mason, is a member of an amateur Soviet folk dance troop and had performed in the games opening ceremonies and at Seattle Center, Staaf said. Kolupaev began his stay with Staaf's family on Thursday. Earlier in the week he had been a guest of another family through the Rotary Club of Seattle.

The Rotary Club had sponsored a Soviet home stay program that enabled area families to host Soviet visitors to the Goodwill Games.

Staaf said Kolupaev accompanied him and his family country and western dancing Thursday night and attended a party in downtown Seattle by himself Friday night. Staaf said he thought Kolupaev was overconfident in his ability to navigate the Seattle bus system.

Staaf said Kolupaev did not mention wanting to defect.

#90211u0113 07/30/1990 ~United Press International

(JULY 30) UPI - Rescue workers in the Philippines made an UNexpected discovery Monday when they UNcovered a survivor of the July 16th earthquake. Doctors describe 27-year-old Pedrito Dy's survival as ''a miracle.'' Dy... a physical fitness instructor and part-time cook... endured 14 days beneath the wreckage by drinking his own bodily fluids.

Coast Guard officials in Galveston, Texas, estimate 50-thousand gallons of oil have leaked into Galveston Bay following a collision Saturday between two barges and a tanker. On Sunday, officials debated how to refloat the pair of leaking barges. Officials say the slick does NOT appear to pose a major threat to the shore.

Federal officials have asked Miami-area consumers NOT to drink a Colombian soda until the Food and Drug Administration completes tests on samples of the drink. The request comes after a Miami man drank a bottle of Pony Malta de Bavaria that had been tainted with cocaine. The 26-year-old man was listed in critical condition Sunday.

#90211u0145 07/30/1990 ~United Press International

TAMPA, FL (JULY 30) UPI - The lawyer for Manuel Noriega's personal banker who was convicted with five other businessmen of laundering drug money, will appeal because of a phone call made by a juror to purported Colombian drug dealers.

The men were convicted Sunday of laundering drug money in a scheme federal authorities said involved $32 million and also were found guilty of conspiracy following a seven month trial and seven days of deliberations.

The deliberations were interrupted last week when one of the jurors made a phone call to purported drug dealers in Colombia, using a number from an address book that had been submitted as evidence.

He told the judge he acted out of ''simple curiosity.'' U.S. District Judge Terrell Hodges dismissed that juror, and the 11 others continued deliberating. The defendants were a Colombian aircraft broker and five former officers for the Bank of Credit and Commerce International, with headquarters in Luxembourg.

Amjad Awan, who worked for BCCI in Miami, once served as personal banker for Manuel Noriega. He was convicted of conspiracy and 14 counts of money

laundering.

Awan's lawyer, John Hume, said he expected to file an appeal based partly on the juror incident. Other lawyers would not comment.

As the verdicts were read, many of the defendants' relatives began to cry. After the hearing ended, one woman collapsed briefly in the spectators' gallery and another said, ''Lies, dirty evil lies.'' One man walked out of the courtroom muttering, ''America is evil. This is evil.''

Assistant U.S. Attorney Mark Jackowski said the case proved that even those ''in ivory towers'' who don't touch drugs will be convicted if they help smugglers skirt the law.

''The United States of America takes the drug trafficking problem very seriously,'' Jackowski said.

Through its London office, the bank released a statement Sunday saying, ''BCCI is sympathetic to the families if its former employees. It is important to note that the evidence presented in the trial by the U.S. government established conclusively that the offenses charged were contrary to the expressed written policies of BCCI.

''Further, the government introduced evidence that the transactions were not known to BCCI's senior management or to its board of directors.''

Two BCCI subsidiaries pleaded guilty to money laundering charges in January and forfeited $15 million to the government, the largest penalty ever assessed against a bank.

Sibte Hassan was convicted on three counts of money laundering and was found innocent on three other counts. He was the only defendant to be aquitted on any of the charges.

Ian Howard was convicted of four counts of money laundering. He and Hassan worked in BCCI's Paris branch.

Akbar Bilgrami, who had worked in BCCI's Miami branch, was convicted on 20 counts of money laundering. Syed Aftab Hussain, who worked in Panama for BCCI, was found guilty on 20 counts of money laundering.

Rudolph Armbrecht, a Colombian aircraft broker, was convicted of eight counts of money laundering.

The conspiracy charge carries a maximum penalty of five years in prison, and each money laundering count carries a maximum penalty of 20 years in prison.

All six defendants were taken to the Hillsborough County Jail to await sentencing. No date was set.

Jackowski said it was likely each defendant would spend at least 10 years in prison.

The bankers were arrested Oct. 6, 1988, at a bogus bachelor party staged by the U.S. Customs Service to lure the bankers to Tampa. They were accused in a $32 million money laundering scheme staged by customs agents during a two-year sting operation.

(JULY 30) UPI - The drug and perjury trial of Washington, D-C, Mayor Marion Barry resumes Monday morning in the nation's capital. Government prosecutors are expected to call at least one rebuttal witness, following the three they called Friday after Barry's attorneys rested their case. U-S District Judge Thomas Penfield Jackson says closing arguments could begin Wednesday if the case is wrapped up Monday.

Australian officials say a man due to be tried for the slaying of two dozen people in the Ukraine during the second world war was shot and critically wounded Monday. Authorities have NO suspects in the case, which occurred in a suburb of Adelaide. The 74-year-old man was to have faced a committee hearing Monday on charges he killed 24 people and was knowingly involved in the deaths of about 850 people during World War Two.

Doctors at the Baguio General Hospital say a man pulled alive from rubble 14 days after a massive earthquake in the Philippines suffers from dehydration and bruises. 27-year-old Pedrito Dy was pulled from the wreckage of the hotel where he worked as a part-time cook. Doctors say Dy gauged the length of time he was buried by the alarm of a nearby victim's wrist watch.

Burma's National League for Democracy issued a plea Sunday that the Asian nation's military clear the way for parliament to convene before October. The N-L-D scored an overwhelming victory in elections two months ago, but the military has refused to respect the results of the May balloting. Nearly all of the 396 N-L-D party members elected to the lawmaking body attended the rally.

#90211u0173 07/30/1990 ~United Press International

MOSCOW (JULY 30) UPI - The Soviet economy deteriorated further in the first half of 1990 with increased output of consumer goods failing to keep up with demand, leading to inflation, the Soviet media reported.

People continued to pour money into savings accounts in the absence of anything to buy, the government said Sunday, noting that deposits had increased by $25.6 billion since January. The total sum in savings banks stands at $566.2 billion, it said.

Newspapers said the nation's gross national product fell 1 percent in comparison with the same period last year and that national income - which does not include services - decreased by 2 percent. They also said labor productivity was down by 1.5 percent, and industrial output dipped by 0.7 percent.

''The negative tendencies in the economy have been brought about by the deterioration of management at all levels,'' the report of the State Statistics Committee said.

The report also blamed the drop in production on ''the low level of discipline by labor and producers.''

In other economic news, the report said printing of money had increased by 9 percent and strikes and truancy from work had led to 10 million lost work days, or 75,000 people off the job daily. The lost work days resulted in a loss of $1.5 billion in production, it said.

The report, printed in the Pravda Communist Party newspaper and other papers, said the foreign trade deficit worsened by 2.5 percent compared with the same period last year. Until 1989, Soviet foreign trade was in the black for more than a decade.

In its somber report, the statistics committee said consumer goods production had increased, but wages and the money in circulation rose faster.

It said the average wage of urban workers rose to $411 a month from $377. State farm workers now make $299, up from $265.

It said the state has not increased prices for food, but prices for consumer goods and services had risen by 5 percent across the board.

The report went out of its way to stress the economy was in transition, noting big increases in the number of workers engaged in cooperative businesses.

It also maintained the biggest increases in the production of consumer goods came in defense plants that have been converted to civilian production.

#90211u0208 07/30/1990 ~United Press International
SEATTLE (JULY 30) UPI - Toni Kukoc proved the man with the golden touch Sunday night.

Kukoc hit a 3-point shot with 2:27 left to thwart a U.S. comeback and Yugoslavia went on to beat the United States 85-79 for the Goodwill Games gold medal in men's basketball.

The U.S. team, down 78-67 with 4:39 left, had scored 7 straight, the last 3 on a 3-pointer by Billy Owens, to cut Yugoslavia's lead to 78-74 with 2:55 remaining.

But the left-handed Kukoc, who finished with 17 points, buried his long shot from the right side and threw a fist downward to punctuate the importance of his basket.

''It was a big-time shot,'' U.S. Coach Mike Krzyzewski said.

After the U.S. team rallied again to within 81-78, Kukoc found Zoran Savic alone inside for a basket with 30 seconds left to wrap up the victory. The pass was the last of Kukoc's 10 assists.

Jurij Zdovc scored 21 points to lead Yugoslavia, which finished 4-1 in the Goodwill competition.

The Yugoslavs - hampered by an early injury to Zarko Paspalj, who went out after eight minutes with a sprained ankle and foul trouble with key players - proved resilient in turning back repeated United States charges in the second half.

''They just wore us down,'' said Krzyzewski. ''They executed well where we had a number of kids not getting it done. That's why it was a team loss.''

Yugoslavia, up 34-31 at halftime, trailed only twice early in the second half, both times by 1. It took the lead for good at 38-37 with 18:17 to play.

Owens scored 23 points to lead the United States, which finished 3-2 during the week. Alonzo Mourning added 18 points, Kenny Anderson 12 and Doug Smith 10.

Two factors were critical.

One, the U.S. shooting was poor, especially from outside. The team shot only 38 percent and made but 1-of-11 3-point tries. Backcourt starters Anderson and Todd Day were a combined 4-of-22 and substitutes Lee Mayberry and Chris Smith made only 1-of-9. The offense often lacked the execution it had displayed in previous routs of Italy and Brazil.

''When we weren't starting to hit, each kid took it upon himself to try and make something happen,'' Krzyzewski said. ''It wasn't that each player

wasn't stepping forward, we didn't step forward as a unit. We weren't functioning as a five-man unit.''

Second, Yugoslavia's bench came through with Paspalj injured and center Dino Radja and others in foul trouble. Radisav Curcic scored 10 points, Savic had 7 and Zoran Cutura added 6, and they outscored American reserves 23-13.

The U.S. team now will compete in the World Championships, which begin Aug. 8 in Argentina.

Yugoslavia is adding NBA players Drazen Petrovic and Vlade Divac, so there's no question which team will be a heavy favorite.

''We have to use this as stepping stone and come back in the World Championships,'' said Mourning.

In the championship, Yugoslavia led 34-31 at halftime after the United States failed to take advantage of free throws and Yugoslavia's injury and foul problems. The U.S. team made only 7-of-14 free throws in the first half and 4of the misses were the front end of 1-and-1s.

Yugoslavia led 19-12 when Paspalj went out with the injury. The U.S. team went on a 13-2 run and took a 25-23 lead with 6:55 left. From that point, however, the U.S. team scored only three baskets and missed the front end of three 1-and-1.

In earlier games on Sunday's final day of men's basketball, the Soviet Union beat Brazil 109-103 for third place and the bronze medal, Australia pounded Puerto Rico 116-92 for fifth, and Italy defeated Spain 105-96 in overtime to take seventh.

#90211u0286 07/30/1990 ~United Press International

(JULY 30) UPI - Dave Bergman must have felt a little lonely Sunday - no one stopped long enough to even say hello.

The Deroit Tigers' first baseman watched seven different Red Sox players cruise past him into second base as Boston broke a 56-year-old American League record with 12 doubles in its 13-3 rout of Detroit.

Wade Boggs led the way with three two-baggers; Jody Reed, Tim Naehring and Ellis Burks had two apiece; and Randy Kutcher, Mike Greenwell and Carlos Quintana chipped in with one each to highlight an 18-hit attack.

The previous record was set by Detroit against the New York Yankees on July 14, 1934. The Red Sox fell one short of the major league mark set by

the St. Louis Cardinals on July 12, 1931.

''It looked like we were going to explode yesterday, but we didn't,'' Naehring said. ''We're starting to swing the bats better. We're getting our pitches to hit and hitting is contagious.''

Quintana's ninth-inning double off Mike Henneman, the fourth Detroit pitcher, broke the record.

''I'm happy to be part of a record,'' Quintana said. ''I think maybe I would have stopped at second, even if I had hit a triple.''

Jeff Robinson, 8-8, had allowed only two hits in each of his last two starts but was hammered for seven hits, including five of the doubles, and six runs.

''I felt fine, so give them credit,'' he said. ''They kept hitting the ball after I left. It seemed like everything they hit was either down the line or in the gaps.''

Boston manager Joe Morgan was relieved to be just one game behind Toronto in the AL East after a 4-8 road trip.

''Four and eight equals 12, that's all I know for sure,'' Morgan said. ''We're still in the chase. We could be six games out but we're not.

''We're capable of that kind of hitting and we'll have to do it if we're going to stay in it,'' Morgan added.

Greg Harris, 8-4, pitched a four-hitter through eight innings for the win.

Harris survived a shaky first inning in which Detroit took a 2-0 lead on Alan Trammell's two-run single. The Tigers had three of their five walks in the inning and another runner reached base on second baseman Reed's error.

''I just didn't have the right combination in the first inning,'' said Harris, who dropped a 1-0 decision at Tiger Stadium on July 19. ''I was feeling strong and then I have a tendency to rush. That's bad here because the mound has a big dropoff and you have to be deliberate. My pitches were all over the place.

''Once I got in the groove the big lead put me over the hump,'' Harris continued. ''I could just challenge the hitters and say, 'Here it is, guys.'

''It's strange the way this game goes,'' he added. ''I hope this is a sign our offense is going to get started. Somebody can run away in the division

and maybe it will be us.''

Elsewhere in the American League, New York clubbed Cleveland 8-5 in the first game of a double-header and 4-3 in the nightcap, Toronto topped Texas 10-8, Minnesota edged Oakland 6-5 in 10 innings, Milwaukee trimmed Chicago 9-8 in 11 innings, Baltimore bounced Kansas City 4-1 and Seattle sank California 6-2.

In the NL, it was: Pittsburgh 2, Philadelphia 1; Chicago 2, Montreal 1; San Francisco 4, Cincinnati 0; Los Angeles 4, Atlanta 3; San Diego 4, Houston 3 and New York 6, St. Louis 0.

-- AROUND THE AL --

Yankees 8, Indians 5, 1st game
Yankees 4, Indians 3, 2nd game

At Cleveland, Roberto Kelly belted two homers and knocked in five runs and Greg Cadaret recorded his first two saves of the season, pacing the Yankees to their second double-header sweep of Cleveland in three days. Alvaro Espinoza added three RBI in the first game to help Tim Leary, 5-13, pick up the win. Eric Plunk, 4-2, pitched three innings of relief for the win in the nightcap.

Blue Jays 10, Rangers 8

At Toronto, Fred McGriff and Manny Lee each knocked in three runs to power the Blue Jays. Jim Acker, the third of four Toronto pitchers, went 2 2-3 innings of shutout relief to even his record at 2-2. John Candelaria pitched 3 1-3 innings to earn his fifth save. Reliever Craig McMurtry fell to 0-1.

Twins 6, Athletics 5, 10 innings

At Minneapolis, Brian Harper, who extended his hitting streak to an American League-leading 19 games, singled home Al Newman from third base with none out in the 10th inning. Rick Honeycutt, 1-2, took the loss. Rick Aguilera, 3-3, worked 2 1-3, allowing one run and a hit.

Brewers 9, White Sox 8, 11 innings

At Chicago, Greg Brock capped a three-run 11th with a two-run single. Scott Radinsky, 6-1, took the loss. Paul Mirabella, 3-2, earned the win by pitching the 10th inning. Tom Edens garnered his first save.

Orioles 4, Royals 1

At Kansas City, Mo., John Mitchell threw a four-hitter through 7 1-3

innings and Sam Horn and Cal Ripken Jr. had consecutive run-scoring hits in the first inning. Mitchell improved to 3-3 and Gregg Olson finished for his 23rd save. Tom Gordon fell to 6-7.

Angels 6, Mariners 2

At Seattle, Bill Schroeder hit two home runs and Jim Abbott pitched seven strong innings to end Seattle's three-game winning streak. Abbott, 7-9, gave up seven hits in seven innings. BrianHarvey pitched the final two innings to record his 12th save. Matt Young fell to 5-11.

#90211u0342 07/30/1990 ~United Press International

(JULY 30) UPI - With the Candlestick crowd chanting ''Sweep, Sweep,'' Scott Garrelts wielded the broom and put the finishing touches on Cincinnati's horrible week.

In the past week, the Reds were outscored 37-13 in losing seven of eight games; were swept by the Padres and the Giants, two of their NL West Division rivals; and almost became victims of the the year's eighth no-hitter.

Garrelts came within one out of tossing it Sunday but had to settle for a one-hitter, leading the San Francisco to a 4-0 victory over the Reds.

The Giants, winners of five straight, moved to within 5 1-2 games of the first-place Reds. Cincinnati, 59-40, has dropped seven straight.

''One bad week of baseball, especially against the teams that are chasing you, you lose a lot of ground,'' Reds manager Lou Pinella said. ''That 60th win has been hard to get. We've got to regroup down in LA. After this road trip we're home for the month of August and we've got to do something.''

Against Garrelts, they couldn't do anything.

Garrelts, 9-7, was in command throughout, mixing fastballs with off-speed pitches as he handcuffed the Reds before 58,365 - the largest home crowd of the season. It was his second shutout and third complete game of the season.

''I didn't strike out a lot of hitters like most guys who throw no-hitters do,'' Garrelts said, ''the defense played great.''

The right-hander lost his no-hit bid when Paul O'Neill lined a two-out single in the ninth.

Garrelts though, was not disappointed. ''Not really. I just looked around and saw Eric Davis on deck and started to think about how I would pitch to him.'' Garrelts said. ''It would have been nice, but I just wanted to win the ball game.''

After walking pinch-hitter Todd Benzinger to open the ninth, Garrelts retired Chris Sabo and Barry Larkin before O'Neill ripped the first pitch cleanly to center.

Garrelts was trying to become the first Giant to toss a no-hitter since 1976 when John Montefusco blanked the Braves.

Garrelts then got Davis on a short fly to left to end the game.

Prior to O'Neill's single, the nearest the Reds had come to a hit was Ron Oester's third-inning bunt down the third base line. Third baseman Matt Williams snatched the ball and threw out O'Neill on a close play at first.

Terry Kennedy, who hit a two-run homer in the eighth inning to put the Giants ahead 4-0, seemed more upset than his battery-mate at losing the no-hitter.

''Scotty was glad to have those extra two runs,'' Kennedy said. ''But I'd have traded it for a no-hitter any time. (Garrelts) was great. He started with fastballs and in the middle innings went to sliders and late in the game went back to the fastball with an occasional slider.''

Now the Reds are doing the sliding.

Elsewhere in the National League: Chicago clipped Montreal 2-1, Pittsburgh edged Philadelphia 2-1, Los Angeles scapled Atlanta 4-3, San Diego shaded Houston 4-3 and New York blanked St. Louis 6-0.

In the American League it was: New York 8, Cleveland 4, first game; New York 4, Cleveland 3, second game; Boston 13, Detroit 3; Baltimore 4, Kansas City 1; Toronto 10, Texas 8; Minnesota 6, Oakland 5, 10 innings; Milwaukee 9, Chicago 8, 11 innings and Seattle 6, California 2.

-- AROUND THE NL --

Cubs 2, Expos 1

At Montreal, Mike Harkey and Mitch Williams combined on a four-hitter to help Chicago win its third straight game against Montreal. Harkey, 9-5, worked 7 1-3 innings, allowing the only run and all four hits. Williams, notched his 12th save. Kevin Gross, 8-8, allowed both runs and took the loss.

Pirates 2, Phillies 1

At Pittsburgh, Doug Drabek allowed only two hits to help Pittsburgh snap a four-game losing streak. Drabek, 13-4, won his fifth straight game and pitched his third complete game. Pat Combs fell to 6-8 despite allowing just three hits in six innings.

Dodgers 4, Braves 3

At Los Angeles, Ramon Martinez allowed five hits over eight innings and Stan Javier singled in two runs in the fifth inning, allowing Los Angeles to complete a four-game sweep over the Braves. Martinez, 13-4, struck out nine to raise his major-league leading total to 159. Charlie Leibrandt fell to 4-4.

Padres 4, Astros 3

At San Diego, Jack Clark belted a two-out two-run homer in the eighth inning off Dave Smith, 2-3, to rally San Diego. Greg Harris, 5-5, who had allowed the Astros to take the lead in the eighth, picked up the win. Craig Lefferts pitched the ninth for his 14th save.

Mets 6, Cardinals 0

At New York, Mackey Sasser lined a fifth-inning grand slam home run to help Dwight Gooden, 11-5, gain his eighth straight victory. Jose DeLeon fell to 6-11.

#90211u0359 07/30/1990 ~United Press International

LINCOLN, NE (JULY 30) UPI - A man armed with a knife who held seven people hostage in a northeast Lincoln grocery store surrendered to police shortly after four remaining hostages were released or escaped.

Russell Wright, 22, of Lincoln, was taken into custody about 11:40 p.m. Sunday following a more than four-hour standoff at the Jack & Jill grocery store, said Lancaster County Attorney Mike Heavican.

Wright entered the store about 7:30 p.m., brandished a knife with a 4- to 5-inch blade and demanded money, said police Lt. David Beggs.

Authorities were uncertain how many people were in the store, but some managed to escape. Seven people were held hostage at first, but three were soon released, including a 12-year-old girl.

''He told them to leave,'' Beggs said.

Busy streets surrounding the shopping center were barricaded off as police and SWAT team members were kept at bay. Police were in constant contact with Wright by telephone, Heavican said.

A large number of spectators gathered to watch the incident and cheered and applauded after Wright was arrested.

Heavican declined to comment on Wright's motive. Before the situation ended, however, Beggs said Wright was upset because he had received several of parking tickets and felt the police were picking on him.

About 8:30 p.m., Wright, who apparently saw television cameras outside the store, threatened to kill a hostage if the cameras were not moved. Police ordered cameras to move farther away from the scene.

Television reports indicated Wright threatened to stab a hostage to death if police attempted to arrest him.

Shortly after 11 p.m., a car dropped off a white bag containing a can of beer in front of the store. One of the remaining hostages retrieved the bag and was released. Heavican said Wright asked for the beer in exchange for the hostage.

Five minutes later, the remaining three escaped.

''After that the other three hostages bolted out the door,'' Heavican said.

Police continued negotiating with Wright but did not enter the store. At 11:40, he walked out with his hands in the air and police handcuffed him.

Heavican declined to comment on Wright's mental state or to confirm television reports that he had been drinking heavily Sunday.

#90211u0383 07/30/1990 ~United Press International

CHICAGO (JULY 30) UPI - The Chicago White Sox have traded first baseman and designated hitter Ron Kittle to the Baltimore Orioles for outfielder Phil Bradley, team officials announced Sunday.

Bradley, 31, will join Chicago in Boston where the team begins a series Monday, said Larry Himes, the White Sox' senior vice president and general manager.

''I have always liked the way Phil Bradley plays,'' Himes said. ''He has good fundamentals, is very aggressive and a fine addition to our club.''

''We had an opportunity to bring on another player who adds speed. Bradley

has a high on-base percentage, he's going to score some runs for us and his best months have always been August and September,'' Himes added. ''He's a hustling, winning-type player.''

Through Saturday, Bradley was batting .270 with 78 hits in 289 at-bats this season. He had 4 home runs, 26 RBI and 10 stolen bases.

An 8-year veteran, Bradley is a .289 lifetime hitter. He began his major league career with Seattle in 1983 and played with the Mariners through the 1987 season.

Bradley was with Philadelphia in 1988, and was obtained by Baltimore prior to the 1989 season.

Kittle, 32, was named American League Rookie of the Year in 1983, when he broke in with the White Sox. He concludes his second tour with the team with 68 hits in 277 at-bats for a .245 batting average this season.

He was leading the White Sox in home runs with 16, and had 43 RBI.

Kittle is fourth on the all-time White Sox home run list with 138, and has 172 career homers.

#90211u0424 07/30/1990 ~United Press International

SHELTER COVE, CA (JULY 30) UPI - National Guard troops and armed federal agents searching for marijuana gardens sealed-off the King's Range National Recreation Area in a two-week campaign to uproot and destroy the illicit plants.

''There's strong evidence we've found several marijuana gardens in the area,'' National Guard Lt. Stan Zezotarski said Sunday, describing the federal effort as part of the President's Drug Control Strategy.

''We want to make it safe for the public again,'' he said.

Civilian air traffic was barred from flying below 5,000 feet over 1,200 square miles of the area during the operation, he said.

The search-and-uproot campaign upset the Humboldt County sheriff, who said similar operations in the past were ineffective.

The area will be closed to the public for two weeks while the troops and agents, the latter estimated at as many as 300 from the U.S. Bureau of Land Management, conduct the operation. There was no indication how many National Guard troops were involved.

Humboldt County Sheriff Dave Renner said the targeted area in past years has yielded only 1,000 to 2,000 plants, far fewer than deputies themselves destroy on county land. He called the past efforts unsatisfactory.

''Basically, they come in and kick butt, take names, and leave,'' Renner said. ''I'm left to clean up the mess. I'm not going for that.''

He said he would file a protest with federal authorities.

A California Justice Department spokeswoman, Kati Corsaut, said the federal effort was unrelated to the state's own Campaign Against Marijuana Planting, also expected to get under way this week. She added, however, that eight CAMP staffers were on loan to the federal effort.

Residents of the area said four military helicopters and 22 military vehicles including camouflaged jeeps and troop transports and a dozen U.S. Air Force vehicles rolled through the town of Redway Sunday morning, then bivouaced in the recreation area.

Neither the National Guard spokesman nor the Bureau of Land Management would disclose how many troops, agents and others were taking part in the operation.

#90211u0458 07/30/1990 ~United Press International

(JULY 30) UPI - Scattered thunderstorms hit Texas and Kansas, bringing heavy rains and high winds Monday, and flash floods closed roads in Wyoming where 2 inches of rain sent Beaver Creek over its banks.

A severe thunderstorm with heavy rains was reported northwest of Waco, Texas, and rain continued through the morning in the Concho Valley in central Texas, the National Weather Service said.

Thunderstorms with heavy rains also were reported east of Brownwood, about 60 miles southeast of Abilene and in the region surrounding Waco.

In eastern Wyoming, 2 inches of rain fell during severe storms Sunday, causing flash floods that closed Route 135. Authorities said portions of the road were washed out by the flooded Beaver Creek and left impassable.

There were other reports of flooding in the region and drivers were warned roads might be flooded or washed out. The rain that caused the flooding moved out of the area by early Monday.

Showers and thunderstorms moved across southwest Kansas at about 10 mph with the strongest storm located 25 miles southeast of Garden City.

Much of the South stayed hot and relatively dry and repeats of Sunday's temperatures in the high 90s predicted for Monday.

Tropical Storm Bertha churned up the Atlantic, causing heavy surf and rough seas along the East Coast. A heavy surf advisory was in effect along the North Carolina coast.

In the West, low clouds and fog covered the California coast during night and morning hours and fair weather was predicted for inland areas. Little change was expected over the next several days.

To the north, temperatures in western Oregon should cool a bit over the next several days and hot weather remained entrenched in eastern sections of the state. A slight increase in afternoon thunderstorms was possible over all sections from the Cascades eastward.

-30- 2052

#90211u0460 07/30/1990 ~United Press International

ULAN BATOR, MONGOLIA (JULY 30) UPI - The democratic opposition claimed only small victories Monday in Mongolia's first free elections, but analysts said key wins by progressives in the ruling Communist Party would likely still produce a more reform-minded government.

The voting Sunday appeared to have given better-than-expected results to the Mongolian People's Revolutionary Party, the Communists who entered the balloting assured of a solid majority, but also forced them to share power for the first time in seven decades.

There were no official returns after a full night of ballot counting. National Elections Commission spokesmen said results would not be announced before Tuesday, and possibly not until Wednesday.

The commission, which pegged eligible voters at slightly more than 1 million, more than half the country's 2 million people, said it appeared more than 92 percent of the electorate had cast their paper ballots at 1,620 polling stations across the country.

Along with regional and local representatives, voters chose a new national Parliament, the 430-seat Great People's Hural, in their first free elections since the warrior Genghis Khan founded the Mongol Empire nearly eight centuries ago.

Spokesmen for three opposition parties legalized two months ago claimed small victories against the Communists, who have held power since 1921 but have moved toward reform since a tiny democracy movement emerged in December.

Citing their own unofficial returns, the main opposition Mongolian Democratic Party claimed 16 seats in Parliament, the Party for National Progress seven and the Social Democratic Party six.

''It's less than we expected,'' said an MDP spokesman.

But opposition spokesmen still expected to do considerably better in a party preference poll also appearing on Sunday's ballot that will choose a new standing body, the ''Small People's Hural,'' which is supposed to make most major legislative decisions.

Analysts also cited a number of apparent victories by Communist progressives and MPRP members running as opposition candidates, noting the likelihood they would join with the opposition in Parliament against the Communist Party's old guard.

In two of the many races where both candidates were Communist Party members, a local party organization leader in a northern province was defeated by a progressive, and a deputy foreign minister lost to a liberal young economist in Ulan Bator, the analysts said.

The Communists and the opposition waged the campaign promising continued political and economic reforms, but with the opposition pledging swifter and wider changes on issues such as private enterprise. Conservatives in the ruling party have pushed it to proceed at a more measured pace.

''The Communist progressives are the ones to watch,'' said a foreign diplomat in Ulan Bator. ''If the opposition can ally itself with the radical wing of the MPRP, they can push a lot of reform programs through.''

The ruling party, hidebound for decades in one of the world's most isolated nations, was pushed into change by reforms in Eastern Europe and the Soviet Union, which had long controlled Mongolia as a military and economic satellite.

The country remains among the world's poorest and most backward, and has only in the past year begun to tinker with a market-oriented economy and to open itself.

Despite scattered problems in a vast country where many voters and ballot box-carriers arrived at polling stations on horseback, international observers monitoring the voting said they saw no evidence of fraud, intimidation or rigging.

William K. Condrell, an American attorney heading a three-member observer team from the Washington-based International Human Rights Law Group, noted the voting process favored the ruling party, that some elections officials were also candidates and many voters and officials were confused, but he

attributed this to inexperience.

''We've come across irregularities here and there,'' said Clifford Hart, a U.S. diplomat heading the State Department's observer team. ''But they appear to be local and the opposition appears happy with the process.''

Opposition leaders acknowledged their early returns fell short of their predictions, but also pointed to apparent victories by S. Zorig, a college lecturer and MDP activist who founded last year's democracy movement, and MDP leader Erdeniin Batuul.

#90211u0461 07/30/1990 ~United Press International

BEIJING (JULY 30) UPI - China's Communist Party chief made a rare trip to Tibet, where he drove home Beijing's hard-line pledge to crush any separatist or anti-Chinese moves in the ostensibly autonomous mountain region, it was reported Monday.

The official Xinhua news agency said party General Secretary Jiang Zemin traveled to the restive Chinese-ruled region July 20 but did not explain the 10-day delay in reporting it. The visit also was reported on central television and in the official press.

The last visit by a Communist Party general secretary was the May 1980 tour made by reform-minded chief Hu Yaobang, who irked party hard-liners by recommending government concessions allowing Tibet to reject any central policies ''not suited to Tibetan conditions.''

Jiang brought no such message of conciliation, instead ordering local Communist officials and government soldiers to step up their vigilance against anti-Chinese movements in what is officially called the Tibet Autonomous Region.

''(Jiang) stressed that it is imperative to take resolute measures to crack down on the activities of splittists at home and abroad creating disturbances and violating social order,'' Xinhua said.

''Splittists'' is the Chinese government term for separatists.

Separatists ''abroad'' presumably include Tibetan Buddhism's exiled god-king, the dalai lama, who has led an anti-Chinese movement of Tibetans from the Indian Himalayas since a failed uprising in 1959.

Anti-Chinese sentiment has simmered in Tibet since Chinese troops seized the Himalayan realm in 1950. Two years of mounting riots prompted Beijing to impose martial law in Tibet in March 1989. Although the decree was lifted May 1, the government has issued tough new restrictions on

political expression.

Jiang also restated Beijing's hard-line ideological stance, which pays lip service to the religious beliefs of Tibetan Buddhists and other ethnic minorities in China while demanding their unwavering allegiance to socialism from childhood through ''moral'' education.

''It is necessary to strengthen education in patriotism and socialism,'' Xinhua quoted Jiang as saying, ''so as to enable students to know from childhood that Tibet is a sacred and inseparable part of the (Chinese) motherland and that without the Communist Party of China there will be no socialist New Tibet.''

Chinese leaders routinely refer to the large minority populations in Tibet Xinjiang and many other provinces as well-intentioned but unenlightened people whose antipathy toward the central government stems from a lack of understanding of the benefits of socialism.

Jiang's message to Tibet carried a similarly condescending undercurrent with his demand that party and government officials in Tibet stress education ''so as to raise the scientific and cultural quality of the people of various nationalities in Tibet.''

A Western diplomat said Jiang's statements were in keeping with the central government's fears of the kind of ethnic or nationalist backlash that has erupted in many Soviet republics in one of the most serious challenges to face the Kremlin.

''The message is similar to what (the government) has been saying with respect to other ethnic minority groups,'' the diplomat said.

''Jiang is saying: 'We are all part of the great Han kingdom. We like your religion and respect it, but don't dare try using it against the motherland,'' he said.

Han Chinese are the largest ethnic group in China and comprise the vast majority of government and party officials. Growing numbers of pro-Beijing ethnic Tibetans have been given positions in Tibet's government and Communist Party but all important decisions clearly are controlled by Beijing.

NEW YORK (JULY 30) UPI - A speeding car jumped a median strip during a drag race at a popular Brooklyn racing spot and plowed into a crowd of specatators, killing two men and injuring a third, police said Monday.

A large crowd was gathered on a median strip about 6:30 p.m. Sunday watching the racing drivers, said Sgt. Nick Vreeland, a police spokesman.

A white 1981 Toyota Starlet was speeding westbound in an illegal match race with another car on the relatively deserted avenue that Vreeland said is a popular drag strip.

The Toyota skipped onto the median strip and crashed into the victims. The car then smashed into two parked cars on the other side of the strip. When the car finally stopped the driver jumped out, pulled the license plates off the vehicle and fled on foot, leaving the car behind, Vreeland said.

The man was not identified.

Brandon Rossi, 19, and William Correa, 20, both of Brooklyn, died at Brookdale Hospital, Vreeland said.

The driver of the second car sped away, Vreeland said.

#90211u0470 07/30/1990 ~United Press International

PORT VILA, VANUATU (JULY 30) UPI - Australian Prime Minister Bob Hawke said Monday there was legitimate concern over U.S. plans to incinerate surplus chemical weapons on a remote Pacific island, but supported Washington's proposal to dispose of the deadly material.

The issue of disposal of U.S. nerve gas and other chemical weapons on Johnston Island, 700 miles southwest of Honolulu, was a major issue facing the 13 nations of the South Pacific Forum meeting in Vanuatu, a multi-island nation 1,000 miles northeast of Australia.

Following an informal meeting with forum leaders Sunday, Hawke said he would circulate an Australian government study into the U.S. proposal in an attempt to defuse fears expressed by some of the nations.

''I think they should obviously have a concern about it,'' he said.

Under the U.S. proposal, an undisclosed percentage of U.S. chemical weapon stocks now in West Germany and rendered obsolete by the easing of East-West tensions would be shipped to a $300 million disposal facility on Johnston Island.

Leaders of South Pacific nations ranging from Australia and New Zealand to tiny Niui, population 3,500, gathered in Port Vila over the weekend for the official opening of the forum Tuesday.

U.S. briefing teams have visited South Pacific countries in recent weeks

outlining proposals to dispose of tens of thousands of tons of chemical weapons on U.S.-controlled Johnston Island, which measures less than 1 square mile and has few inhabitants.

Hawke's expressed support for the U.S. plan came only two days after he protested continued French nuclear weapons testing in the South Pacific.

The environmental group Greenpeace has strongly condemned the Johnston Island plan, saying Hawke had been ''hoodwinked'' by the United States.

Hawke said he would make available to forum leaders the results of a scientific study on the Johnston Island proposal by Australian Defense and Technology and the Department of the Environment.

He rejected the suggestion Australia would in effect be acting as a go-between for the United States with Pacific island nations.

''The role of Australia is to provide our colleagues with the information we have got,'' Hawke said.

The United States has long stored chemical weapons on Johnston Island and also plans to send nerve gas and mustard gas now stored in Europe to the Pacific island for disposal.

#90211u0563 07/30/1990 ~United Press International

(JULY 30) UPI - Trinidad's minister of works says negotiations are continuing for the resignation of Prime Minister Arthur Robinson. Moslem rebels who staged a coup attempt on Friday are still holding Robinson and other government officials hostage in the Parliament building. The rebels say the prime minister has agreed to step down immediately to make way for a new interim government that would take over for 90 days until general elections are held.

The situation in the West African nation of Liberia remains tense with rebel leader Prince Johnson claiming he's ready to capture President Samuel Doe. Johnson is fighting rival guerrilla chief Charles Taylor who claims he is Liberia's new president. Doe remains barricaded in his hilltop executive mansion, surrounded by an elite guard of his remaining troops.

Coast Guard officials say the Houston Ship Channel will remain closed until the middle of the week. Crews are busy this morning unloading oil from two barges that collided with a Liberian tanker Saturday afternoon. 50-thousand gallons of oil were spilled and now stretches in a 20-mile slick. The Liberian tanker was damaged but its double hull saved the Texas coast from what could have been a disastrous explosion and spill.

The commandant of the Coast Guard says he expects Exxon to return to Alaska for a third year of clean-up operations. Admiral J. William Kime says significant progress has been made. But he adds additional work is needed to clean up oil that continues to sully the once-pristine Alaskan shores. Kime says a study is being conducted at 23 American ports to determine how to improve tanker safety.

Baseball Commissioner Fay Vincent is expected to rule today whether New York Yankees owner George Steinbrenner will be suspended, fined or banned from baseball. Published reports say those on Steinbrenner's side believe the beleaguered owner will be suspended and heavily fined. Steinbrenner allegedly paid gambler Howard Spira 40-thousand dollars for information about player Dave Winfield.

Five French tourists tried to beat the heat yesterday by going for a swim. The problem is they chose the rapids near the brink of the Niagara Falls as their swimming hole. Police say the young men, ages 16 to 20, were coaxed out of the water by authorities and apparently were NOT aware of the potential danger. They were about 40 yards from the edge of the famous falls. The young men did NOT speak English, but police learned they were soccer players visiting the U-S for a tournament.

#90211u0600 07/30/1990 ~United Press International

BAGUIO, Philippines (JULY 30) UPI - A third survivor was dug from the rubble of a collapsed hotel Monday, two weeks after an earthquake devastated the northern Philippines and killed more than 1,600 people.

The man, a physical fitness instructor, said he had survived by drinking rainwater and his own urine, but twice during his 14-day ordeal had tried to kill himself by banging his head on a wall.

''I lost hope several times. I just waited for death to come, but then a vision of Virgin Mary would appear, as if she wanted to say something,'' a weeping Pedrito Dy, 27, said hours after he was retrieved from the crumbled Hyatt Terraces Hotel in Baguio.

''I have a mission in life and that's probably the reason why I survived '' he said. He did not elaborate.

Miners burrowing through the ruins of the hotel - which was crushed like an accordion by a July 16 temblor that measured 7.7 on the open-ended Richter scale - found the muscular Dy in the basement gymnasium before dawn Monday.

They yelled, asking if anyone was alive, and Dy signaled them by raising his hand, officials said. He was rushed to the Baguio General Hospital in the mountain resort and later flown to the Makati Medical Center in Manila 120 miles to the south.

Doctors said Dy was in fine shape despite a full two weeks under the rubble. They said he was suffering only from dehydration and minor bruises.

The recovery of the gym instructor and part-time cook followed the rescue Friday night of Arnel Calabia, 27, and Luisa Mallorca, 20, after 11 days under the Hyatt Terraces, where they had worked for a state-run casino.

President Corazon Aquino visited Calabia and Mallorca earlier Monday at the Manila Doctors Hospital and later told reporters, ''They are OK.'' The two were flown to Manila Sunday.

The military Office of Civil Defense said the quake's confirmed death toll as of Monday was 1,641. Another 969 were listed as missing and presumed dead and 3,441 were injured.

Some 1.1 million Filipinos lost their jobs or their homes in wake of the temblor, the worst disaster in the island nation since a quake and tidal wave killed more than 3,000 people in the southern Philippines in August 1976.

Like Calabia and Mallorca, Dy said he survived by drinking his urine, scooping it with his hand. He said he also drank rainwater he found dripping through the debris.

A devout Roman Catholic, Dy said he prayed to the Virgin Mary, but at times lost hope, banging his head twice on the wall in an attempt to

commit suicide.

''I tried to stop breathing, but it proved useless,'' he said.

Government spokesman Horacio Paredes said that Dy had thought he was underneath the collapsed hotel for 12 days. He told rescuers he counted the days by the alarm ringing every 12 hours on the wristwatch of a dead man beside him, Paredes said.

Dy said there had been 11 people in the basement when the temblor rumbled across Luzon island, toppling scores of buildings, 28 in Baguio. All the others died. Four bodies were pulled out with Dy, including that of the hotel's Colombian food and beverage manager, Antonio Eslava.

''I was caught by the quake just as I was at the door. When I regained consciousness, there was a mattress on top of me and some barbells. The mattress probably saved me,'' Dy said. He said he was trapped in a hole about 2 to 3 feet deep.

The latest recovery gave rescue teams hope of finding more survivors. More miners joined the rescuers Monday under the intermittent tropical rains that drench Baguio during the monsoon season.

More than 30 other victims were still believed to be buried in the hotel, authorities said.

Authorities recorded the 730th aftershock to the July 16 temblor, but said the latest tremor was only magnitude 2. Police said 11 inmates bolted from the Baguio city jail Sunday morning by wrenching bars weakened by an aftershock.

#90211u0696 07/30/1990 ~United Press International
(JULY 30) UPI - Philippine doctors say a physical fitness instructor who was trapped for 14 days beneath earthquake rubble is in good condition. 27-year-old Pedrito Dy was rescued early today from under the collapsed Hotel Terraces Hotel in Baguio. He says he drank rainwater and his bodily fluids to stay alive.

Police in Tacoma, Washington, are trying to determine what drove a man to fatally shoot his wife, two young sons, and himself. A third son was spared, although it's NOT clear why. Yesterday's shooting occurred just minutes after the wife called 911 to say her husband was holding a gun to the head of their six-month-old son.

National Guard troops have teamed up with federal agents to clear marijuana plants from an area of the King's Range National Recreation Area in Shelter Cove, California. The two-week effort is part of the President's Drug Control Strategy. The area will be closed to the public for the duration of the project.

50's pop star Bobby Day has died of cancer in Los Angeles at the age of 60. Day first gained fame in 1958 with the number-two smash ''Rockin' Robin.'' Day, who was born in Texas, also wrote and recorded ''Little Pretty One'' in honor of his wife, Jackie. He passed away Friday.

Scattered thunderstorms drenched Texas and Kansas early this morning, bringing heavy rains and high winds. Flash floods in Wyoming made roads impassable and sent Beaver Creek over its banks. Tropical Storm Bertha caused heavy surf and rough seas along the East Coast, prompting an advisory for North Carolina shores.

-30- 1733
#90211u0712 07/30/1990 ~United Press International
SINGAPORE (JULY 30) UPI - An ailing Secretary of State James Baker assured the developing Asian nations Monday they will not be overlooked in the zeal to invest in the rapidly opening markets of Eastern Europe.

Baker also urged leaders of the 12 countries forming the Asia-Pacific Economic Cooperation forum, known as APEC, to develop ways of overcoming barriers to the more efficient flow of capital, trade and technology.

''I know that many of you are concerned about the amount of attention that Central and Eastern Europe and the Soviet Union have received in the last year,'' Baker, who fell ill during the day, said in a speech read by Secretary of Commerce Robert Mosbacher.

''Our diplomatic focus has been heavily concentrated on that region but the pace and scope of events have demanded that,'' Baker said.

Baker had a fever and spent most of Monday ''reading and resting'' in his hotel room, a senior State Department official said.

Baker, on the second leg of a 12-day trip, was seen by a physician following a bilateral meeting with Taro Nakayama, Japan's minister for foreign affairs. No other details of his illness were released.

''It's not something to be concerned about,'' the State Department official said. He said Baker would resume his schedule Tuesday with no changes.

The 12 member nations of the forum, in a statement sought by Baker, expressed concern Monday over the stalled Uruguay Round of trade talks and urged urgent attempts to make progress as the negotiations move into the final six months.

In a joint communique, the APEC foreign and economic ministers agreed that a successful conclusion to the Uruguay Round of the General Agreement on Tariffs and Trade ''is the single most important issue on the international agenda.''

''The trade rules emerging from the Uruguay Round must enhance open and fair competition,'' they said, stressing that significant progress in agriculture, textiles and clothing ''is crucial to a successful outcome.''

Attending the second gathering of the fledgling group are delegates from the six-member Association of Southeast Asian Nations plus the United States, Japan, Canada, Australia, New Zealand and South Korea.

The ASEAN countries - Singapore, Indonesia, the Philippines, Malaysia, Thailand and Brunei - issued a separate statement on GATT, sharply critical of the outcome of last week's meeting in Geneva.

''We are concerned that deals will be struck among the principals in the fall and the developing countries will be left out in the cold,'' the six said.

Expressing great disappointment over the lack of progress, they said, ''The possibility that the round will end as a failure does not now seem unthinkable.''

The ASEAN officials warned against protectionist policies that would have grave consequences for them.

Delegates to APEC said it was necessary to find a way for China, Taiwan

and Hong Kong to join the forum.

''We share the recognition that each of these three economies will play an important role for the prosperity of the region,'' said Nakayama said, ''The real potential value of APEC cannot be realized'' without their participation, he said.

Officials said there may be difficulties, with China and Taiwan technically in a formal state of war since the Chinese communists drove the nationalist government from the mainland in 1949. The British Colony of Hong Kong reverts to Chinese rule in 1997.

Following the crackdown on pro-democracy demonstrators last year, large numbers of Hong Kong residents have emigrated out of fear.

The United States remains ''firmly committed to the Asia-Pacific region,'' Baker said. ''Cooperation will grow as we strengthen our bilateral ties and multilateral institutions.''

The developing non-communist countries of Southest Asia are worried the proliferation of blocs, increasing trends toward protectionism and the evolution of a single European market in 1992 will diminish interest in their region.

Baker hailed APEC, formed only a year ago, as ''an important new multilateral forum for all of us to work together in ways that promote economic growth and political stability.''

''While the Central and Eastern European countries are engaged in a difficult transition to democratic, market-oriented systems, their reconstruction should be beneficial over the medium term for the global economy as well as for themselves,'' Baker said.

Over the long term, Baker said Soviet economic reform should also positively affect the world economy, ''but it is unclear what impact Soviet reform will have in the short run.''

Baker said the worst of inflation was over in the industrialized nations, with rates starting to fall in the United States, Japan and Canada. He said growth in the industrial countries as a group will be lower than in 1988 and 1989, reaching 3 percent for 1990 and 1991.

The APEC meeting was the second stop on Baker's hectic 12-day trip following the annual meeting of the Association of Southeast Asian Nations foreign ministers in Jakarta. He leaves Tuesday for Irkutsk in central Siberia for talks with Soviet Foreign Minister Eduard Shevardnadze aimed at a new attempt to make progress in solving the 12-year-old Afghanistan conflict.

#90211u0756 07/30/1990 ~United Press International
(JULY 30) UPI - Government soldiers in Liberia reportedly stormed into a church in the capital of Monrovia today and massacred at least 200 people, most of them women and children. Witnesses say some of the victims were blown to pieces by bullets. Most of the refugees were members of tribes that have formed the main support for rebel armies that are fighting to oust President Samuel Doe, who is holed up in his heavily fortified mansion.

Scotland Yard says a bomb exploded this morning in southern England, destroying the car of a Conservative Party legislator as the car was being driven out of the driveway. Party officials say prominent legislator Ian Gow was killed in the blast. The 53-year-old Gow chaired a committee responsible for Northern Ireland, and was a fierce opponent of the Irish Republican Army.

A Catholic archbishop in Trinidad says he thinks the government is playing for time in negotiations with rebels who are holding the prime minister and other legislators hostage. Gunfire was heard in the capital of Port-of-Spain this morning, despite a reported deal with the rebels. The Moslem rebels said yesterday that Prime Minister Arthur Robinson had agreed to resign in favor of a temporary government.

Mongolia's first free elections in nearly 800 years are over, and it appears they might result in a reform government. The democratic opposition claimed only small victories in yesterday's voting. But analysts cite a number of apparent victories by Communist progressives, and say they might join the opposition in Parliament against the Communist Party's old guard. Official results are NOT expected before tomorrow.

-30- 1822
#90211u0758 07/30/1990 ~United Press International
(JULY 30) UPI - Gripped by interest rate worries, stock prices on the Tokyo Stock Exchange slid Monday for the eighth consecutive trading day, as its leading indicator fell 1.4 percent in thin trading.

The key Nikkei Stock Average of 225 issues, which tumbled 506.27 points Friday, dropped another 420.53 points to 30,442.95.

The broader-based Tokyo Stock Exchange Price Index, a measure of all shares listed on the exchange's main section, fell 23.97 points to 2,225.29 following a 31.94 point drop last Friday.

Volume was extremely as an estimated 250 million shares changed hands,

down from 437 million shares traded Friday.

Declines hammered advances 790 to 168, while 151 issues escaped the onslaught of selling and were unchanged.

Elsewhere in Asia, stock prices fell sharply in the lightest turnover in several weeks on the Hong Kong Stock Exchange on a wave of profit-taking following poor performances in overseas markets.

The closely-watched Hang Seng Index, which added 2.21 points Friday, fell 40.39 points or 1.2 percent to 3445.41.

Among the narrower insdexes, industrials fell 33.41 points, financials dropped 19.57, utilities declined 44.09 and the interest rate sensitive properties plunged 98.83 points.

Volume was very light at 1.65 billion shares, compared with 1.89 billion shares last Friday.

In Singapore, stock prices closed lower in light trading on the Singapore Stock Exchange as major investors remained on the sidelines following the sharpslide in Tokyo.

The key Straits Times Industrial Index, which gained 7.41 points Friday, fell 8.39 points to 1,557.10. The narrower All Singapore Index fell 3.02 points to 441.63.

An estimated 60.5 million shares changed hands, compared with 62.6 million shares Friday.

In Australia, stocks prices retreated on the Sydney Sharemarket in line with continued losses on Wall Street and Tokyo.

The closely-watched All Ordinaries Index, which fell 12.0 points Friday, lost another 13.0 points to 1565.0.

An estimated 76.6 million shares changed hands, compared with 96.5 million shares Friday.

ADELAIDE, Australia (JULY 30) UPI - A man who had been scheduled to stand trial Monday for the slayings of 24 people in the Ukraine during World War II was in serious condition after being shot in the chest by an unknown assailant.

A boy on roller skates found war crimes suspect Ivan Timofeyevich

Polyukhovich, 74, wounded and laying on a sidewalk in the Adelaide suburb of West Lakes Sunday night, police said.

A .22-caliber Beretta, believed to be the weapon used in the shooting, was found in the grass nearby, as well as three spent shells, authorities said.

Polyukhovich was in intensive care Monday after undergoing surgery Sunday. Doctors took Polyukhovich off the critical list and said he was in a serious but stable condition.

Police were treating the case as attempted murder and placed Polyukhovich under 24-hour police guard.

Polyukhovich was the first man to be charged under Australian War Crimes legislation. He was to face a hearing Monday in Adelaide's Magistrate's Court on charges of killing 24 people and with having knowledge of the deaths of 850 others in the Ukraine during World War II.

Because of his age and health, Polyukhovich refused to allow South Australian officials to take him to the Ukraine to seek evidence against him so prosecutors arranged for more than 40 witnesses to be brought to Australia.

No new date for the trial was set.

Polyukhovich's lawyers had lodged a Federal Court application Friday in an 11th-hour bid to stop the committal hearing. They asked for a stay on grounds the magistrate has no jurisdiction in the case and the charges were invalid and did not include enough evidence. The application was turned down.

Polyukhovich also lodged a High Court challenge to the War Crimes legislation under which he was charged. The matter was set aside for hearing in September.

#90211u0854 07/30/1990 ~United Press International

GENEVA (JULY 30) UPI - Canada has taken some steps to improve access to its market, but also has increased tariffs and import quotas on a wide range of products, the General Agreement on Tariffs and Trade said Monday.

Steep new duties have especially affected textiles, clothing, footwear, chemicals, transport equipment, toys, tobacco, furniture and several agricultural items, GATT said.

Canada was the subject of one of the GATT Secretariat's periodic Trade Policy Review studies of how member countries apply free trade principles.

''Overall, the Canadian tariff regime, including preferential and concessional arrangements, appears complex and lacking in transparency,'' it said.

There are also Canadian farm price supports and transport and insurance subsidies which, along with import limits, translate into high prices for consumers, the study indicated.

Canadian consumers, for instance, pay 100 percent more than the world market price for milk, the group said.

However, GATT welcomed several liberalization measures already implemented or planned by Canadian authorities, especially in reducing agricultural supports and textile tariffs.

These measures plus the future Free Trade Agreement with the United States should boost annual Canadian growth by three-quarters of one percent, the

study said.

Projected cuts in non-tariff barriers and elimination of tariffs in bilateral trade with the United States, however, mean U.S. suppliers would reap the most benefits from the growing Canadian market.

FORT LAUDERDALE, Fla. (JULY 30) UPI - A grocery store manager was charged with threatening three little girls with a loaded .357 revolver because they were 2 cents short paying for some bubble gum, police said Monday.

The children ran home from Sami Food Mart and told their mother, who called police.

The store manager, identified by police as Abdullah Shaheen, was arrested Sunday and charged with three counts of aggravated assault and one count of extortion.

According to police and the children, the girls picked up the bubble gum and put 3 cents on the counter. They said Shaheen told them, ''Put 5 cents up there.''

The girls told him they always paid 3 cents for the gum. The manager pulled out the gun and pointed it in 7-year-old Donetta Curry's face, the police report said.

''I didn't say nothing,'' a frightened Donetta said. ''He took out the gun and pointed it at me. So I put 5 cents up there. I ran and told my mama. I was scared he as going to shoot me.''

The other children were Donetta's 4-year-old sister Melissa Tisdale and their neighbor, Aviance Reed, 11. They backed up Curry's story.

''He told her if you don't pay the 2 cents, something is going to happen to you,'' Reed said.

Sheryl Tisdale, Donetta's and Melissa's mother, said the children came home trembling and terrified. She questioned the clerk, who denied the children's story.

Police questioned each girl separately and their stories were the same, a police report said.

''They all gave me a perfect description of the gun, even the 4-year-old '' said Officer Keith Abrahamsen.

Shaheen at first denied pulling the gun on them. But police took the girls into the store and asked Shaheen, ''Are you saying they are lying?''

''I can't say that,'' Shaheen responded, and he was placed under arrest.

Abrahamson said Shaheen burst into tears when he was arrested.

''I don't hink his intent was to kill them; I think he was trying to show off,'' the officer said.

Though the gum is displayed in a bowl marked 5 cents, the store owner, Sami Abuznaid, said he frequently sells it to the children for 3 cents, or however much money they have.

Tisdale said the store owner offered her money not to press charges.

''He said, 'I'll give you $40 if you drop the charges,''' Tisdale said. ''Forty dollars for my child's life? We laughed. What's $40 for your child's life? The gun could have went off and killed the girls.''

(JULY 30) UPI - Liberian government soldiers stormed a church in Monrovia today and massacred at least 200 people, most of them women and children. One witness who visited the Lutheran Church after the slaughter said he saw some women with their heads smashed open or blown to pieces by bullets. Many still had babies strapped to their backs. Most of the victims were members of tribes that support the Liberian rebels.

U-S officials say the stalemate continues in Trinidad, where Moslem rebels are holding the Carribean nation's prime minister and other officials hostage. American officials say they have been in regular contact with the government that yesterday reported on its state-run radio that a deal had been worked out with the rebels. However, gunfire was heard today in Trinidad's capital.

A conservative British legislator who was an outspoken opponent of the Irish Republican Army was killed this morning when a powerful bomb destroyed his car 50 miles outside of London. NO one has claimed responsibility for the attack that killed Ian Gow. But Scotland Yard investigators are pointing a finger at the I-R-A, which has staged eight other bombings this year in England in its drive to end British rule in Northern Ireland.

(JULY 30) UPI - The Commerce Department says personal income inched up four-tenths of one percent in June on the strength of higher wages. However, personal spending rose even more, increasing one percent from May and depressing the savings rate. Personal income rose 16-point-six-BILLION dollars in June, to a seasonally adjusted annual rate of four-point-six-TRILLION dollars.

More miners have joined search efforts among the rubble of a collapsed hotel in the northern Philippines. A third survivor was pulled from the easrthquake rubble today, saying he lived through the 14-day ordeal by drinking rainwater and his own urine. The physical fitness instructor was flown to a hospital, where doctors say he is suffering only from dehydration and minor bruises.

At least 20-thousand electric power customers in Chicago are still without electricity after a weekend fire at a Commonwealth Edison generating station. The Saturday night blaze originally blacked out a good portion of the city's West Side and triggered some looting, but police say the situation has calmed down. It's NOT certain when total power will be restored. An Edison spokesman concedes progress is ''slow going.''

TOKYO (JULY 30) UPI - Fujitsu Ltd. said Monday it has agreed to pay $1.26 billion for 80 percent of International Computers Ltd., a wholly owned subsidiary of information systems manufacturer STC PLC.

The agreement was signed in London Monday between Fujitsu and STC PLC, the Japanese computer giant said.

Under the agreement, Fujitsu would purchase 430 million shares of ICL's stock. The acquisition will be completed by Nov. 30 if approved by STC's shareholders, Fujitsu said.

Fujitsu indicated ICL would seek to list its shares on the London Stock Exchange within five years, provided the share price is not less than 225 pounds.

''Fujitsu's financial and technological support for ICL is good news for customers and employes,'' said STC Chairman Arthur Walsh.

Under the agreement, ICL would pay approximately $77.3 million for its purchase of U.S. subsidiary ICL Inc.

The proceeds of the transaction will be used by STC for repayment of the group's borrowings and for investment to strengthen and develop its presence in the communications systems market in Europe, the company said.

Fujitsu's purchase of ICL follows nine years of collaboration between the two companies.

''We have come to respect ICL in the course of our technological collaboration in the last nine years and this agreement builds on that relationship,'' said Fujitsu chairman Takuma Yamamoto.

Fujitsu said ICL will continue to be managed under Chairman Peter Bonfield.

''The acquisition is part of our policy of globalizing our operations, and Fujitsu has no intention of turning ICL into its production or marketing base in Europe,'' Fujitsu Managing Director Michio Naruto said.

''ICL is a company with high profit growth and its joining in the Fujitsu family will also benefit our global operations on the consolidated basis '' Naruto added. ''Our huge investment will bring synergy effects to our global operations and be rewarded in the long run.''

ICL, originally formed in 1968 and acquired by STC in 1984, had sales of about $2.9 billion in 1989, accounting for 62.0 percent of the STC group's sales. ICL sales in Britain account for about 60 percent of the unit's global sales.

Fujitsu has 152 subsidiaries in Japan and overseas. Its annual sales amount to about $13.3 billion.

(JULY 30) UPI - British Prime Minister Thatcher calls it ''a grievious

loss.'' A car-bomb exploded today, killing a prominent Conservative Party member of Parliament outside his home 50 miles south of London. Ian Gow was a strident critic of the Irish Republican Army, which has staged 12 bombings across England this year. NO one has claimed responsibility for today's bombing.

A physical fitness instructor was pulled alive from the rubble of a collapsed hotel in the northern Philippines today, two weeks after an earthquake devastated the region. Today's rescue comes one week after British rescuers with sonar and sensing devices abandoned hope of finding anyone alive in the rubble.

French police are looking for those responsible for the desecration of another cemetery. The Nazi flag and other anti-religious inscriptions were spray-painted on about 30 tombstones in a Catholic graveyard near Toulouse. Authorities say vandals wrote that ''Nazism will return.'' The incident follows a wave of similar cemetery vandalism last spring.

Australian authorities say a man who was to stand trial today in Adelaide for alleged war crimes was shot and seriously wounded this morning by an unknown assailant. A boy on roller skates found Ivan Timofeyevich lying wounded on a sidewalk. He is facing charges of killing 24 people in the Ukraine during World War Two.

White House budget director Richard Darmen is recovering today after falling on wet steps at a McDonald's fast food restaurant in McLean, Virginia, Saturday morning. Darmen suffered serious cuts on his face, but managed to drive himself to a nearby emergency room, where he received 100 stitches.

#90211u1108 07/30/1990 ~United Press International

NEW YORK (JULY 30) UPI - Baseball Commissioner Fay Vincent was expected to rule Monday on whether beleaguered Yankee owner George Steinbrenner will be suspended from the game, published reports said.

Vincent, who has had little to say about the Steinbrenner case, could suspend him from the game for the second time, fine or ban the controversial owner from baseball for allegedly paying gambler Howard

Spira $40,000 for information about slugger Dave Winfield.

The New York Times and the Daily News reported Monday a decision was imminent on Steinbrenner's Jan. 8 payment to Spira, who is under federal indictment on charges he tried to extort money from Steinbrenner and threatened to harm the owner and Winfield.

The commissioner would not discuss any aspect of the ruling but the prevailing feeling among people on Steinbrenner's side and others involved in baseball was the Yankees' principal owner will be suspended, the Times said. A heavy fine also was a strong possibility.

Steinbrenner, in a Newsweek cover story this week that called him ''the most hated man in baseball, predicted he would be cleared.

''I'll win,'' he said. ''I always do.''

Steinbrenner in early July told Vincent he made the pay-off out of fear for his own and his family's safety.

The baseball sources said a March 2 tape of Steinbrenner discussing the incident reveals he was mainly concerned about Spira's threats to publicize the relationship, unless Steinbrenner paid him an additional $110,000, the newspapers said.

Earlier, in March, Steinbrenner offered another version of events. He said he gave Spira the money to help him establish a new life away from New York and gambling.

Steinbrenner, who made a fortune in shipbuilding, paid high salaries to lure stars to the Yankees in the 1970s and made them into one of baseball's best teams before they fell apart in recent seasons. Their 37-61 record this season is the worst in the majors.

Steinbrenner's blustery maganagement style has been characterized by managerial upheaval. He has made 19 managerial changes in his 17 years running the team and players complained of the constant upheaval and Steinbrenner's meddling.

On Nov. 27, 1974, Steinbrenner was suspended from the game after he pleaded guilty to violating campaign finance laws with his contributions to President Nixon's re-election fund. Kuhn ended that suspension on March 1, 1976, and Ronald Reagan pardoned Steinbrenner of the crime in the final days of his presidency.

The Times said although Steinbrenner accepted the Kuhn decision peacefully this time the club owner has a formidable legal team and was likely to fight a suspension.

#90211u1110 07/30/1990 ~United Press International

HOUSTON (JULY 30) UPI - Domestic drilling declined last week, while offshore activity dropped to the lowest level of the year in the Gulf of Mexico and dipped slightly in European waters, industry monitors reported.

U.S. drilling sank to a total of 996 rotary rigs last week, from 1,022 the prior week, Baker Hughes Inc. said Sunday. The number compared with 870 working rigs the same week a year ago.

Drilling activity in the Gulf of Mexico continued to decline, as four more rigs were idled last week, Offshore Data Services said. Utilization stands at a ''disappointing'' 62.9 percent, with 134 of 213 offshore gulf rigs working, ODS said.

One less offshore rig was working in European waters and the Mediterranean Sea compared with a week ago. The area's utilization rate was 94.1 percent with 128 of 136 European mobile offshore drilling units working.

Worldwide utilization fell below 80 percent as a result of the combined drop of five active rigs in the Gulf of Mexico and Europe. ODS said 534 of the world's 669 mobile offshore drilling rigs were working, for a worldwide utilization rate of 79.8 percent.

Other relevant rig counts included Louisiana, 140 last week, 150 the week before and 144 the same week a year ago; New Mexico, 48, 49 and 34; Oklahoma, 134, 143 and 112; Texas, 322, 322 and 246; and Canada, 122, 103 and 132.

#90211u1141 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Personal income inched up 0.4 percent in June on the strength of higher wages, but personal consumption expenditures rose even more and depressed the savings rate, the Commerce Department said Monday.

Personal income rose $16.6 billion in June, to a seasonally adjusted annual rate of $4.6 trillion, up 0.4 percent from May, without adjusting for inflation, the department's Bureau of Economic Analysis said. Personal income had posted increases of 0.3 percent in both May and April.

Disposable personal income - personal income after taxes and some non-tax payments - advanced $18 billion, or 0.5 percent, in June to $3.9 trillion. The category rose 0.3 percent in May after remaining stable in April.

Personal consumption expenditure increased $34.8 billion in June to $3.8 trillion - a 1 percent advance from May - after remaining stable in May and advancing 0.2 percent in April, the department said.

As a result, personal saving dropped to $193.6 billion in June from $210.2 billion in May. The June monthly savings rate fell to 4.9 percent from 5.4 percent in May and 5.1 percent in April, the bureau's figures showed.

Adjusting for inflation, disposable personal income was unchanged in June as well as in May after slipping 0.2 percent in April.

Inflation adjusted personal consumption expenditures rose 0.5 percent in June after falling 0.3 percent in May and expanding 0.1 percent in April. So far this year, real personal consumption rose only in March and June.

The bureau said wages and salaries increased $14 billion in June, compared with an advance of $10.1 billion in May.

Farmers' income, however, plunged $5.5 billion in June after falling $3 billion in May. Federal subsidy payments to farm owners slipped $4.2 billion in June after plunging $4.9 billion in May.

The bureau noted that it has reviewed its calculation of personal income and expenditure for previous years. Personal income was recalculated down for 1987, up for 1988, and down for 1989.

Personal income was revised down $11.2 billion, or 0.3 percent, for 1987. For 1988, the category was revised up $6.3 billion, or 0.2 percent. For 1989, personal income was revised down $43 billion - or 1 percent - reflecting downward recalculations in wages of $57.9 billion, personal interest income of $14.2 billion and other labor income of $6.4 billion. The figures were partly offset by upward revisions in proprietors' income of $27.2 billion and transfer payments of $4.6 billion.

Personal outlays were revised down $1.9 billion in 1987, up $0.5 billion in 1988 and down $20.7 billion in 1989.

The personal savings rate was revised down 0.3 percentage point to 2.9 percent in 1987, was unrevised at 4.2 percent in 1988, and was revised down 0.8 percentage point to 4.6 percent in 1989, the bureau said.

Secretary of State Baker is urging Asian nations to develop new ways of overcoming trade barriers. In a speech to 12 countries forming the Asia-Pacific Economic Co-operation forum, Baker today issued assurances that Asia will NOT be overlooked in the zeal to invest in Eastern Europe.

The speech was read by Secretary of Commerce Robert Mosbacher, with an ailing Baker spending the day resting in his hotel room in Singapore. A senior State Department official says Baker has a fever, but describes it as ''nothing to be concerned about.'' Baker is expected to resume his regular schedule tomorrow.

Police in Cambridge, Massachusetts, are still sorting through what they call a ''mind-boggling'' array of weapons seized Saturday night from a

private home. Police found more than 500 weapons, including an A-K-47 assault rifle and a rocket launcher. Most of the weapons were legal because the owner had an arms license, but some charges are expected to be filed today.

Fire swept through a rowhouse in Lancaster, Pennsylvania, this morning... killing five people, including three children. Authorities say the bodies pulled from the destroyed building were so badly burned that it was difficult to distinguish the sexes of the victims. A woman and baby survived by jumping from a second-story window.

Police in Fort Lauderdale, Florida, say a grocery store manager is charged with aggravated assault and extortion for allegedly threatening three little girls with a loaded gun. Police and the children say the manager pulled out a loaded revolver and pointed it at one child who was two cents short in paying for bubble gum.

#90211u1204 07/30/1990 ~United Press International

SEOUL, SOUTH KOREA (JULY 30) UPI - South Korea officials told North Korea Monday the two sides should get together early next week to realize free cross-border trips between the South and the North marking the 45th anniversay of Korea's liberation from Japanese colonial rule.

The government sent a telephone message to North Korean Prime Minister Yon Hyong-muk expressing disappointment a proposed Monday meeting failed to materialize to implement President Roh Tae-woo's offer for ''grand inter-Korean exchanges of people'' in August.

''Exchanges of visits between the South and the North are the best means to convert a relationship of separation and confrontation into one of reconciliation and cooperation ...,'' said the message sent in the name of Prime Minister Kang Young-hoon.

Roh announced July 20 that South Korea would open the truce village of Panmunjom 35 miles north of Seoul for five days beginning Aug. 13 and allow free cross-border travel to mark National Liberation Day Aug. 15.

''I want to stress that your side must make a sincere reply by Tuesday next week by when the minimum preparatory measures must be arranged to enable the grand exchanges to start,'' Kang's message Monday said.

North Korea has already rejected Roh's offer, calling it an attempt to obstruct a ''pan-national rally'' it has been pushing with dissidents in the South. The rally is planned for Aug. 13-17 at the truce village.

The National Democratic Alliance, a Seoul-based dissident group, held a

preparatory meeting for the planned rally last Friday. Five North Koreans accompanied by a 10-member press corps tried to attend the meeting but a procedural dispute blocked them from coming.

The North Koreans insisted they would follow the guidance of their host during the visit. The Seoul government rejected the demand, saying it is the responsibility of the government, not the dissident group, to protect their safety.

Official North Korean radio Monday agreed to a proposal by the Alliance that another preparatory meeting for the planned rally be held in the North Korean capital of Pyongyang next Monday, according to government officials.

North Korea, however, opposed a Seoul government proposal that all who wish to take part in the rally be allowed to do so, the officials said.

The officials said North Korea wants only southern dissidents to take part in the meeting in Pyongyang. The government will not allow dissidents to travel to the North unless Pyongyang agrees to open the meeting and the rally to all participants, they said.

Meanwhile, the Defense Ministry said it will allow civilian visits to anti-tank barriers built along the border with the North during a one-month period starting on Aug. 10.

The ministry decided to do so to counter North Korea allegations the South built a concrete wall along the border to block free travel.

The Seoul government proposed on-the-spot checks on both sides of the border to see if there really exists such a border wall. North Korea has turned down the proposal.

#90211u1216 07/30/1990 ~United Press International

(JULY 30) UPI - Politicians from across Britain's political spectrum are condemning today's killing of Ian Gow, a prominent Conservative Party member of Parliament. The leader of Britain's main opposition Labor Party says Gow- quoting Neil Kinnock here- ''held his views with sincerity and great courage.'' Gow died in a car-bomb explosion as he started his car at his home 50 miles south of London this morning.

A Syrian accused of holding more than 100 people hostage for 11 hours at a posh nightclub was arraigned on five charges in London today. The import-export agent took over the fashionable nightclub early yesterday, threatening to blow up explosives he claimed to have strapped to his body. Negotiators eventually persuaded him to surrender, and later said he did

NOT have any explosives... but was heavily armed with guns and knives.

There was still life today among the rubble from the earthquake that hit the northern Philippines two weeks ago. A third survivor was dug from the ruins of the collapsed Hyatt hotel where two other people were rescued Friday. The physical fitness instructor... who doctors say is in good shape... says he tried to kill himself during his 14-day ordeal by banging his head against a wall.

The Thai military says Washington is NOT looking at the big picture in shifting its policy on Cambodia. A spokesman for the Thai Supreme Command says the U-S withdrawal of support for the Khmer Rouge will drive the brutal rebel faction into a corner and accelerate the fighting inside the nation. The spokesman says the Bush administration sees only its ''own benefits.''

-30- 1786

#90211u1221 07/30/1990 ~United Press International

BANGKOK, THAILAND (JULY 30) UPI - The U.S. shift in policy toward Cambodia will drive the brutal Khmer Rouge rebel faction into a corner and accelerate the fighting inside Cambodia, the Thai military said Monday.

''The United States see only their own benefits. It's not a proper action '' said Lt. Gen. Naruedol Dejpradiyuth, spokesman for the Thai Supreme Command.

Naruedol said the recent U.S. announcement that it favored withdrawing U.N. recognition of the tripartite Cambodian resistance will step up the fighting between the Vietnamese-installed government of Prime Minister Hun Sen and the guerrillas, who are based in Thailand.

In Paris, a non-Khmer Rouge rebel leader, Son Sann, blamed the Phnom Penh government for the failure to hold a scheduled meeting among all Cambodian political factions.

Son Sann said that Hun Sen was responsible for the last-minute postponement. He also conceded he had not received a formal response from the communist Khmer Rouge to his invitation.

In Pyongyang, Prince Norodom Sihanouk - leader of the third rebel faction - said Monday he now wants to convene in Beijing a meeting of the leaders of the resistance government to discuss countering the new U.S. position, China's official news agency Xinhua reported from the North Korean capital.

No date was announced. Beijing has been a major supporter of the resistance alliance.

The U.S. change on Cambodia is seen as an effort to bar the Khmer Rouge from reclaiming a share of power in a nation it ruled from 1975 to 1978. The Khmer Rouge, which was ousted from power by a Vietnamese invasion, has been blamed for the deaths of more than 1 million civilians during its bloody reign of terror.

The Thai military, which faced a battle-hardened Vietnamese army of over 1 million men on Thailand's border with Cambodia in 1979, allowed the Khmer Rouge to organize a guerrilla force as a buffer between Thai and Vietnamese forces. Thailand's principal objective in the past decade has been to keep the Indochinese warfare from spilling over into its territory and to limit the refugee problem to border camps.

The Thai military spokesman said Washington's decision will drive the Khmer Rouge to the ''dark corner''.

''They (the Khmer Rouge) will certainly carry on fighting, because they are pushed to the wall,'' he said.

''The Khmer Rouge is Khmer. If we don't want them, where can we keep them? Will the United States take them?'' Naruedol said.

He said the three resistance armies have escalated military attacks against the government troops in various areas in northwestern Cambodia.

#90211u1223 07/30/1990 ~United Press International

(JULY 30) UPI - The National Governors Association today called for the creation of a federal commission to thoroughly investigate the savings and loan disaster so another one might be prevented. Michigan Governor James Blanchard says the association's call is more of a symbolic gesture to remind Washington that Americans- in his words- ''feel like they're getting the shaft.''

Witnesses describe a scene of blood and horror at a Liberian church where they say government troops this morning massacred at least 200 people, many of them women and children. One witness says he saw women with their heads smashed in or blown to bits by bullets. He also said he saw bodies hanging from the window frames of the church building, apparently killed while trying to escape. The victims were members of a tribe that supports the Liberian rebels.

Gunfire echoed in the streets of Port-of-Spain this morning, despite reports of a deal between Trinidad negotiators and Moslem rebels who continue to hold Prime Minister Arthur Robinson and most of his Cabinet hostage. A Catholic archbishop says he thinks the government is negotiating in a bid to buy time. The rebels want Robinson to resign

immediately to pave the way for an interim government.

Polish Solidarity leader Lech Walesa vows he will NOT let up on pressuring the government until a fully democratic Parliament is elected. The union leader told a Solidarity Citizens Committee yesterday that Poland's present compromise political structure is outdated. That structure pits a communist president against a reformist prime minister. Walesa said it's his ''moral right'' to fight for greater reform.

LONDON (JULY 30) UPI - A Syrian accused of holding more than 100 people hostage for 11 hours in a fashionable nightclub that he threatened to blow up was arraigned Monday on five charges.

Hani el Rayes, 30, appeared with an Arabic translator at his side during his brief appearance at Bow Street magistrates court and did not request bail.

He was remanded to custody until Aug. 6, when he is scheduled to face charges of possessing firearms, threatening to kill, creating a bomb hoax and two counts of forcible imprisonment.

El Rayes, a London resident who works as an import-export agent, early Sunday took over Tokyo Joe, an exclusive nightclub in London's West End frequented by wealthy Arabs, royalty and media personalities.

The gun-wielding Syrian threatened to detonate explosives he claimed were strapped to his body, and behaved erratically throughout the 11-hour siege at some moments inviting his hostages to ''have a party.''

Witnesses said the gunman - who was continuously drinking and reportedly ingesting cocaine - declared plans to avenge relatives held hostage in Lebanon and segregated the Arab hostages, saying he did not want to harm Europeans.

At one stage, the Syrian feared a police assault and forced four women to form a human shield around him.

Negotiators backed by about 200 police, many of them armed, eventually persuaded El Rayes to surrender. He suffered the only injury by falling on a whiskey bottle and cutting his leg, and authorities later said he did not possess any explosives.

#90211u1246 07/30/1990 ~United Press International

CAMBRIDGE, MA (JULY 30) UPI - Authorities searching an apartment uncovered an arsenal of military-style weapons more powerful than that of the local police department, and a hunt was underway Monday for the owner of the arms.

Police said they found more than 600 weapons in the apartment Saturday and Sunday, including rocket launchers, a mortar, a machine gun, rifles, handguns, and thousands of rounds of ammunition.

''It's absolutely mind-boggling,'' said Cambridge Police Chief Anthony Paolillo. ''You could start a war with this material.''

He said the cache of weapons was greater than the combined firepower of the Cambridge Police Department.

On Sunday, officers discovered gunpowder on a stove out of sight behind some boxes. They said the stove's pilot light had warmed the powder.

''It was warm and it was to the point of ignition,'' said Fire Capt. William Ridgley. He said it would have ''totalled the block'' if it had exploded.

Gas and electricity to the duplex was shut off and five residents of the building were told they could not stay in the building until it was deemed safe, fire officials said Monday.

During the two days, officers confiscated 330 rifles and shotguns, as many as 295 handguns, four machine guns, several thousand rounds of ammunition, two or three rocket launchers, mortar launcher and hand grenades.

Most of the weapons were legal because the owner of the home where they were found, Adolph Stram, 50, has a license to carry firearms, police said.

There is no limit to the number of firearms legally allowed on one permit in Massachusetts.

Officials, however, said they would file charges against Stram Monday for weapons violations, including possession of the mortar launcher and unlicensed machine gun and fireworks.

#90211u1270 07/30/1990 ~United Press International
JERUSALEM (JULY 30) UPI - Israel's Foreign Ministry Monday denied a report it ran a covert program in which journalists were given government guidance on stories provided to radio stations around the world.

''There are no journalists on the Foreign Ministry payroll nor are any journalists connected in any obligatory fasion, contractural or otherwise, to the Foreign Ministry or any of its bodies,'' the ministry spokesman said in a statement.

The New York Times reported Monday that Israel's Foreign Ministry and a Jerusalem radio studio had run for the past four years a covert program. Citing program participants and unidentified government officials, the newspaper said radio reporters were hired by Avi Yaffe Studios and given government guidance on their reports to radio stations worldwide.

The sources told the Times that Israel's diplomats abroad helped the reporters recruit radio clients.

The ministry acknowledged a radio project in which it used Avi Yaffe Studios in Jerusalem for several years to put together programs on such topics as Israel's Independence Day, Jewish holidays and Israeli music.

The studio also had produced interviews and other programs for the ministry. The ministry said the programs were ''distributed by us and in our name,'' and the work was done by studio employees.

''No attempt has been made to conceal our radio project. Detailed descriptions of the project appear in the Israel Government Yearbook, a well-circulated publication,'' the statement said.

While several of the studio's employees were journalists working for other radio stations, ''the Foreign Ministry does not lay down rules or

guidelines for what these journalists should say or how they should say it '' the statement said.

At an unspecified point, before inquiries by The New York Times, the ministry became concerned with the possibility that ''some aspects of the current arrangements might be misconstrued involving a conflict of interest,'' the statement said.

On July 18, the ministry informed Avi Yaffe Studios it was temporarily suspending its inement with the company. The ministry received The New York Times questions concerning the studio on July 27.

#90211u1275 07/30/1990 ~United Press International
CHICAGO (JULY 30) UPI - Officials canceled all proceedings Monday at the Criminal Courts Building as the worst power outage in a decade gripped the city's West Side and police said arrests were approaching four dozen following looting.

Commonwealth Edison crews worked to restore electricity to the 17,000 customers still without power following a fire at a 12,000-volt, coal-burning transformer, which broke out Saturday night. At the peak, 40,000 customers were without power on the West Side and in some western suburbs.

Cook County Jail was without electricity but officials said there was no danger of inmates getting loose because the doors automatically lock when there is a power failure.

The blackout triggered scattered looting throughout the area, which is dotted with some of the poorest neighborhoods in the city.

''There's nothing left in some of these stores but they're going in anyway '' police Sgt. Dennis Eichler said.

Police said 13 people had been charged with various violations and another 30 were awaiting processing. Police recoverd eight guns and several

storeowners were arrested for carrying unregistered weapons.

A spokesman for Chief Criminal Judge Thomas Fitzgerald said all cases scheduled for Monday at the Criminal Courts Building were moved to Wednesday because of the outage. Power was not expected to be restored to the facility until late Monday.

Classes also were called off at a number of schools.

''We have 700 people out working,'' ComEd spokesman Mike Kelly said. ''People are working round-the-clock on extended shifts.

''We're expecting to have about half of those customers still without power restored sometime this afternoon.''

Kelly described the outage as the worst in 10 or 12 years and said it could be another two days before all customers are back on line.

''It's just a matter of determining what are the best ways of bringing power in,'' he said. ''In some areas it was just a matter of bringing power through other substations. In some of the other areas we're actually having to go in and cut cable to reach lines not conveniently located. We actually have to rewire, to make new connections. It's time-consuming work.''

Kelly said there were no plans to bring in work crews from other utilities to help.

Power was restored briefly at Cook County Jail but then failed again.

''We have crews at Cook County Jail,'' Kelly said. ''We're trying to determine whether the problem is inside or outside.

The Chicago Transit Authority was forced to slow trains along the Douglas line to conserve power. CTA spokesman Don Yabush said the slowdown added about five minutes to the usual train ride.

The fire at the substation burned about 6 1/2 hours and caused millions of dollars in damage.

The outage also was blamed for the fire deaths of three people who were using candles to light their home during the blackout late Saturday. Police said they apparently forgot to extinguish the candles before going to sleep.

''They were using the candles for light because the electricity was out,'' Bomb and Arson Sgt. Edward O'Donnell said. ''They went to bed and left the candles burning.''

Police Superintendent LeRoy Martin said 200 police officers patrolled the area Sunday night with 35 traffic officers deployed at intersections where street lights were not functioning.

#90211u1284 07/30/1990 ~United Press International

PORTLAND, OR (JULY 30) UPI - Federal investigators say an Oregon cargo jet crashed and killed its two crew members last year in Texas partly because the plane's manufacturer and government regulators failed for 20 years to correct a dangerous design error, a newspaper reported Monday.

The National Transportation Safety Board report also criticized Evergreen International Airlines of McMinnville, Ore., and the Federal Aviation Administration for approving what it called a questionable stop-gap procedure to try to work around the problem, according to The Oregonian, which obtained a copy of the NTSB report last week.

The board identified the problem as a cargo door warning-light circuit that could mislead pilots into thinking the door was shut and locked when it wasn't.

The NTSB said Evergreen had planned to correct the problem but had not done so. It said the company relied on flight crews to visually inspect the cargo door before takeoff.

McDonnell Douglas Corp., Evergreen and the FAA are criticized in the board's 82-page investigation report into the March 18, 1989 crash of an Evergreen DC-9 near Fort Worth, Texas.

An Evergreen spokesman said the company was not fully aware of the potential problem with the door-warning system. He faulted McDonnell Douglas and the FAA for not publishing emergency procedures for flying with the door open. A McDonnell Douglas spokeswoman said the company had no immediate comment.

Evergreen's twin-engine jetliner dived into the ground five minutes after its cargo door swung open during takeoff from Carswell Air Force Base. The plane was carrying military cargo on contract with the Air Force.

The crash killed Gerald Jack McCall, 41, a veteran airline pilot from Del City, Okla., and co pilot Thomas Bill Johnston, 39, of Reno, Nev.

The safety board said a cockpit voice-recorder tape showed the door-warning system assured the crew it was closed and locked. But the board said the system, which McDonnell Douglas installed when it built the plane in 1968, could give a ''safe'' signal for other reasons, such as a

broken sensor switch.

The wreckage of the Evergreen plane yielded evidence that such a malfunction might have fooled the crew, the report said.

''One of two door-open warning light switches was malfunctioning, and because of their wiring, this malfunction made the entire door-warning system ineffective,'' it said.

The report blasted McDonnell Douglas and the FAA for not mandating a correction. Instead, they let operators decide whether to follow ''service bulletins'' issued by the manufacturer in 1976, the report noted.

The safety board also criticized McDonnell Douglas and the FAA for not amending the DC-9's flight emergency instructions to tell pilots how to handle the plane if a cargo door came open.

''This was true in spite of the fact that cargo doors on DC-9s and DC-8s had come open in flight many times prior to this fatal accident,'' the report said.

The NTSB said it counted 23 such incidents since 1968, including one that occurred on a passenger-converted Texas International Airlines DC-9 carrying 65 people. The planes, however, landed safely in the other incidents.

Penn Stohr, Evergreen's senior vice president for flight operations and an experienced pilot, said he also was ''very disappointed'' McDonnell Douglas and the FAA hadn't published emergency instructions for handling the aircraft with an open cargo door.

He also said Evergreen hadn't been made fully aware of the door circuit's potential for sending a false ''safe'' signal.'' But Stohr said he remained convinced the crew locked the door and that the accident opening resulted from stray hydraulic pressure, a conclusion the safety board rejected.

''It's like a car door,'' Stohr said. ''You know from the way it sounds, this double-click, whether you've closed it completely or not.''

#90211u1289 07/30/1990 ~United Press International

SRINAGAR, INDIA (JULY 30) UPI - Moslem militants Monday set off a bomb that wounded 10 people in a heavily guarded major state office building as thousands of workers were leaving work, government sources said.

The bomb exploded about 4 p.m. in the six-story Civil Secretariat Building

which houses virtually all offices of the Jammu and Kashmir state government, said the sources, who asked not to be identified.

They said Moslem militants had planted the bomb in a toilet at the state-run Jammu and Kashmir Bank on the ground floor of the office building. The bomb exploded as thousands of workers were going home from the Civil Secretariat at the end of the work day.

The blast caused minor damage to the building and wounded 10 people. Hundreds of paramilitary police guarding the building sealed all the exits in an attempt to capture the bombers.

Moslem militants also killed four people in separate attacks Monday in Srinagar and elsewhere in the lush Kashmir Valley, authorities said. They said three of the dead apparently were killed because they were suspected of being police informants.

Moslem militants in Kashmir have been waging a campaign for independence from India since 1988. Residents of the predominantly Moslem region claim they need a separate state because of years of discrimination by the Hindu-dominated central government in New Delhi. The independence movement is backed by almost all of the 4 million Moslems of the region.

#90211u1301 07/30/1990 ~United Press International

BEIRUT, LEBANON (JULY 30) UPI - The pro-Syrian leadership of President Elias Hrawi Monday began blocking food, fuel and other supplies from reaching Gen. Michel Aoun as part of a new strategy to force the defiant Christian strongman to step aside, officials said.

Troops loyal to Lebanese army commander Gen. Emile Lahoud, manning roadblocks around Aoun's region, were blocking shipments of fuel or flour into the Christian area, the officials said.

''The government has also decided to stop the flow of money into the general's region,'' one source said.

The source said foreign ambassadors and military attaches were being instructed Monday to halt contacts with Aoun immediately and comply with a resolution approved last week by the Lebanese government aimed at forcing Aoun from power.

Aoun was appointed head of a transitional government by former President Amin Gemayel when his six-year mandate ended in September 1988. Gemayel sought to avoid a leadership vacuum after the parliament failed to choose a successor.

Aoun, however, later rejected a national reconciliation agreement worked out last October by the parliament in Taif, Saudi Arabia, in part because it did not call for the immediate withdrawal of Syrian troops deployed in Lebanon.

Aoun has refused to recognize Hrawi, who was chosen president under the accord, and used his 15,000 troops stationed in the city's Christian region to fight the Christian Lebanese Forces militia of Samir Geagea.

Hundreds of people were killed in the fighting between the rival Christian groups earlier this year.

Geagea's 10,000-man militia, which backs Hrawi, controls Beirut's port and maintains a frontline facing Aoun's troops in east Beirut. Aoun's army controls a small harbor north of Beirut.

A committee representing Hrawi's government planned to meet with representatives of Geagea's militia to discuss its possible cooperation with the government's latest effort against Aoun.

Christian sources close to Aoun criticized the action as adding to civilian hardships in Aoun's region.

Aoun told the east Beirut-based daily newspaper Al-Anwar the steps ''constituted a prelude'' to launching a new war against the Christian enclave.

''These measures will eventually trigger military operations,'' Aoun said. ''But we will never surrender.''

Rival Shiite Amal and Hezbollah militiamen, meanwhile, battled a 15th consecutive day Monday in southern Lebanon, killing two people and wounding 15, security officials said. That brought the toll in the latest round of fighting to 170 people killed and 350 wounded.

The fighting centered around the village of Kfar Milki in the mountainous district of Iklim Al Tuffah, east of the port city of Sidon, 24 miles south of Beirut. Amal and Hezbollah, competing for the control of Lebanon's estimated 1 million Shiites, traded rocket and machine-gun fire around Kfar Milki and the nearby village of Jarjou.

The pro-Syrian Amal group launched a fierce attack against the Iranian-backed fundamentalists in Kfar Milki Saturday, gaining some territory. Amal occupied hills near Kfar Milki while Hezbollah held the village.

Hundreds of farm houses have been destroyed or burned in Al Tuffah, once a tranquil resort region.

The International Committee of the Red Cross failed over the weekend to evacuate casualties from the region.

#90211u1319 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - The United States is being shut out of the Iraqi grain market in reaction to its decision to deny Iraq access to export credit guarantees, an attache's report said Monday.

The House and Senate voted last week to cut off export credits to Iraq. The Senate also voted to end military sales and sales of ''dual technology'' equipment that could have military uses. The Bush administration has warned trade sanctions would hurt U.S. farmers.

The attache's report was written several days before congressional action. It was based on the Agriculture Department's decision to withhold credit guarantees to Iraq while it investigated allegations of irregularities in past sales.

''Official government of Iraq reaction to U.S. Department of Agriculture's halt in additional GSM-102 credit guarantees in (fiscal) 1990 has been to exclude agricultural commodity purchases from the United States,'' the report said. ''This policy is expected to continue in the absence of a (fiscal) 1991 GSM-102 program.''

Iraq has been a major customer for U.S. agricultural exports, buying nearly 2.5 million metric tons of wheat, corn, barley and rice in the year ending June 30. It also has purchased cattle, eggs, chicken, lumber and tobacco.

The attache's report forecast a complete loss of sales for U.S. wheat, corn and barley in the 1990-1991 marketing year. Rice sales would drop by

about 50 percent.

In the marketing year that just ended, Iraq bought 1.3 million tons of wheat, 267,000 tons of barley, 650,000 tons of corn and 250,000 tons of rice.

During congressional debate, proponents of trade sanctions said Iraq's record of human rights violations was so offensive Iraq did not deserve favorable U.S. treatment. Rep. Dan. Glickman, D-Kan., said Iraq still would be free to buy U.S. farm products but would have to pay cash for them.

The House approved language that would re-allocate credits initially assigned to Iraq - a step Glickman said would mean no net loss in sales - and said the cut-off could be waived if it would mean a loss in sales.

Both chambers appended the Iraqi sanctions to the farm policy bill, which is several weeks away from final passage. Because the language is part of both versions of the bill, it is virtually certain Iraqi sanctions will appear in the final bill.

The GSM-102 program provides short-term export credit guarantees for agricultural exports. Iraq received $1 billion in credit guarantees in fiscal 1989. It was approved for $500 million in credits early this fiscal year but officials announced last April 13 that no additional credits would be available until their investigation was completed.

An unofficial review showed Iraq paid ''much higher'' than normal prices for corn, rice and sugar during 1985-1987 and some Iraqi state-owned enterprises pressed exporters to supply free ''after sales services,'' such as trucks, spare parts, cash rebates or additional agricultural products.

#90211u1346 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Personal consumption increased 0.4 percent in June while real disposable personal income remained stagnant and contributed to a lower rate of savings, the Commerce Department said Monday.

There was a sizeable spending increase in June after many months of weakness across the board, according to Allen Sinai, chief economist with The Boston Co. in New York.

''The question is whether it is a flash in the pan or whether consumers will keep on spending,'' said Sinai.

He contended consumers are trying to maintain spending ''but their income will not sustain it.'' Since consumer spending accounts for two-thirds of the economy, the nation could slip into a recession, he added.

Adjusting for inflation, disposable personal income - personal income after taxes and some non-tax payments - was unchanged in June as well as in May after slipping 0.2 percent in April, the department's Bureau of Economic Analysis said.

''Almost nothing can help'' to keep up personal income since there is downward pressure on wages in the labor market, Sinai said.

Consumer spending could grow at a 0.1-percent to 0.3-percent rate in the months ahead, a figure ''consistent with a mild recession'' if the government cuts back its spending and the private sector invests less, he warned.

Without adjusting for inflation, personal income rose $16.6 billion in June on the strength of higher wages, to a seasonally adjusted annual rate of $4.6 trillion, up 0.4 percent from May, the BEA said. In both May and April, personal income advanced 0.3 percent.

Disposable personal income increased $18 billion, or 0.5 percent in June, to a seasonally adjusted annual rate of $3.9 trillion, also without considering the effects of inflation. The category inched up 0.3 percent in May afterremaining stable in April.

Personal consumption expenditure, not accounting for inflation, increased $34.8 billion in June to a seasonally adjusted annual rate of $3.8 trillion, a 1 percent advance from May. In May, the category remained stable after advancing 0.2 percent in April.

Most of the expenditure jump was in automobiles, Sinai noted.

Adjusted for inflation, personal consumption rose 0.5 percent in June after falling 0.3 percent in May and expanding 0.1 percent in April. So far this year, real personal consumption increased only in April and June.

Higher expenditure and lower income depressed personal savings to $193.6 billion in June from $210.2 billion in May. The June monthly savings rate fell to 4.9 percent from 5.4 percent in May and 5.1 percent in April, the BEA figures showed.

''We have to worry about the savings rate,'' said David Wyss, economist with DRI/McGraw Hill in Lexington, Mass. ''It is awful.''

According to Wyss, low saving, coupled with high national borrowing to overcome the imbalance between saving and investment, means that over the

medium and long term there will be upward pressure on interest rates in order to attract foreign investors.

Still, the income and expenditure numbers will have no immediate effect on the market, he predicted.

The BEA said that wages and salaries increased $14 billion in June, compared with an advance of $10.1 billion in May. Farmers' income plunged $5.5 billion in June after falling $3 billion in May. Federal subsidy payments to farmers slipped $4.2 billion in June after retreating $4.9 billion in May.

The bureau reviewed its calculation of personal income and expenditure for previous years.

Personal income was revised down $11.2 billion, or 0.3 percent, for 1987. It was reveised up $6.3 billion, or 0.2 percent, in 1988. For 1989, personal income was revised down $43 billion, or 1 percent, reflecting downwards recalculations in wages of $57.9 billion, personal interest income of $14.2 billion and other labor income of $6.4 billion that were partly offset by upward revisions in proprietors' income of $27.2 billion and transfer payments of $4.6 billion.

Personal outlays were revised down $1.9 billion for 1987; up $0.5 billion for 1988, and down $20.7 billion for 1989.

The personal savings rate was revised down 0.3 percentage point to 2.9 percent in 1987, was unrevised at 4.2 percent in 1988, and was revised down 0.8 percentage point to 4.6 percent in 1989, the BEA said.

(JULY 30) UPI - A liberal interest group is calling on the Senate to question David Souter about a document he filed while he was New Hampshire's attorney general. People for the American Way says the legal papers filed by the Supreme Court nominee refer to abortion as the-quote- ''killing of unborn children.'' The group says the quotation ''suggests a clear sympathy for an anti-abortion viewpoint.'' Many people

on both sides of the issue believe Souter's addition to the high court could spell the end of the 1973 ruling that legalized abortion.

Chicago officials were forced to cancel all proceedings today at the Criminal Courts Building as the city's worst power outage in a decade continues. Commonwealth Edison crews are working to restore electricity to some 17-thousand West Side customers who have been without electricity since a Saturday night fire destroyed a generator. Police say they've arrested nearly four dozen people for looting in the blacked-out neighborhood.

The most restrictive state abortion laws in the nation are facing their first test in federal court. Several clinics and family counseling agencies have filed suit against the state of Pennsylvania, arguing the laws are unconstitutional. Pennsylvania moved to restrict abortions after a U-S Supreme Court ruling last year that opened the door to broader regulations by states.

Testimony ended today in the drug and perjury trial of Washington, D-C, Mayor Marion Barry, with both sides changing their minds and declining to call any rebuttal witnesses. The judge set closing arguments in the nine-week-old case for Wednesday. The jury then is scheduled to begin deliberations on the 14 cocaine and perjury charges against Barry. The court will recess tomorrow.

LANCASTER, PA (JULY 30) UPI - An arson fire with flames that jumped 15-feet high and spread to other homes raged through a city row house early Monday, killing five people, including three children.

The fire broke out at 3:11 a.m. in a 2 1/2-stoy row house and was declared under control 30 minutes later.

''The flames were really coming out of that front window, almost like a blow-torch effect,'' Lancaster Fire Company Capt. Clarence Long said.

One adult and a baby survived by jumping or falling through second-story windows. The house had no smoke detectors.

Firefighters pulled the badly burned bodies of two adults and three children, including a 3-month-old from second-floor bedrooms.

''One police officer described it as looking like a bomb went off when he arrived, with the bodies lying in the street,'' said fire company Lt. Ed Knight.

Knight said the fire began in the front porch of the house on the first floor. Flames shot 15-20 feet and spread to three adjacent row homes.

State police Trooper David Fisher said the fire was arson, but could give no details as to what led authorities to that conclusion because the case was under investigation.

''The only possibility is that it was intentionally set,'' Fisher said.

Fisher said police were following up on allegations by neighbors that there was some kind of domestic dispute.

Knight said the fire was so intense that the heat set off a smoke detector in the house of a neighbor, who notified authorities.

Carmen Cintron, 36, who rented the house, jumped from a second-floor window into the back yard. She was being treated at Community Hospital of Lancaster for severe cuts and smoke inhalation.

Killed were her three children, Jaime Nazario, 8, his sister, Madeline, 7, and Yolanda Valentin, 17, and Valentin's 3-month-old daughter, Dlisa Solel.

Also killed was Cintron's boyfriend, Margaro Rodriguez, 36.

One of Valentin's children survived, Angelica Vazques, 1 or 2, She was flown to the burn unit of St. Christopher's Hospital for Children in Philadelphia.

#90211u1378 07/30/1990 ~United Press International

NEW YORK (JULY 30) UPI - Consumer confidence was virtually unchanged in July after suffering a significant loss in June, the Conference Board said Tuesday. The Board's Consumer Confidence Index, which was set at 100 in 1985, stood at 101.8 in July, a loss of about half a point for the month, the independent economic research organization said.

The index has been dramatically declining over the past months, and the current reading of 101.8 is in sharp contrast with a reading of 120.4 in July of 1989. But it reflects only a small decline from a reading of 102.4 in June, when the index lost nearly 5 points compared with May's 107.3. The index has not been above a reading of 110 since December.

"Consumers are slightly more positive about present conditions than in June but somewhat less positive in their expectations for the month ahead," the Board, which surveyed 5,000 households nationwide said. "Buying plans are mixed."

A majority of respondents, 56.3 percent, said the current business conditions were normal, compared with 57.3 in June. Only 23.2 percent said the business situation was good, and 20.5 percent said it was bad.

A large majority of respondents - 70.9 percent - said the business outlook for the next six months remained unchanged, down from 72.1 percent in June while 17.4 percent expected an improvement and 11.7 percent a deterioration.

A majority of respondents - 52.5 percent - felt that jobs were "not so plentiful" in July, and 67.9 percent expected the situation to remain the "same" over the next six months. In June, 52.9 percent of the respondents had said jobs were not plentiful, and 68 percent expected the situation to remain unchanged.

Buying plans were mixed, with eight percent of the respondents intending to buy a car during the next six months, virtually unchanged from June, and 4.3 percent planning on buying a home, up from 3.6 percent in June.

Only 26.8 percent of the respondents said they would buy major appliances in the next six months, down from 28.8 percent in June, and 30.5 percent in July last year.

"Consumer confidence has been losing ground since the beginning of the year, but the experience has been markedly different in various regions of the country," said Fabian Linden, executive director of the Board's Consumer Research Center. Confidence is substantially down in New England, and also, but to a lesser degree, in the Middle Atlantic states, the survey said.

NEW YORK (JULY 30) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 138.80 c-lb.

Lead, common, U.S. primary producers 50.00-52.00 c-lb.; U.S. non-primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $260.00-$265.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.05-$4.50 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $116.00-$117.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $476.00-$478.00; dealer-approx., $474.00-$485.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $102.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 289.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-87.75 c-lb.

RANGOON, BURMA (JULY 30) UPI - A leader of the opposition party that won Burmese elections said Monday the party will not accept a declaration by the military government refusing the party permission to form a government.

U Chan Aye, a Central Committee member of the National League for Democracy, told reporters the military government ''has no right to dictate to Parliament on what it should do.''

The party official's statement came in response to a declaration Saturday by the ruling State Law and Order Restoration Council that told recently elected NLD members they could write a constitution that would take effect some time in the future, but would not be allowed to form a government or to write a constitution for present use.

U Chan Aye said an NLD meeting Monday called on military rulers to convene a new Parliament by September, insisting it is full-fledged legislative assembly and not strictly a constution-writing body.

He said the NLD invited a dialogue with the government ''in a spirit of national reconciliation ... (as) the best means of bridging the opposite stands.''

''We cannot accept'' the declaration by the military government, U Chan Aye said.

He said the military government should transfer power to a new government formed by the parliament on the basis of an interim constitution the NLD has already drawn up in consultation with other political organizations.

The military government has issued a statement threatening to take legal action to block the NLD's effort to form a government.

Daw Myint Myint Khin, another NLD official and a lawyer, told reporters the release of the NLD General-Secretary Aung San Suu Kyi from house arrest is as important as summoning of parliament. The party has taken political and legal steps to try to secure her release.

She said a letter signed by 379 representatives who attended the NLD meeting was sent to Gen. Saw Maung, the chairman of the military government, demanding Aung San Suu Kyi's early release.

No announcement has been made on whether the house-arrest has been extended beyond the statutory one-year maximum period.

''We can only assume that an extension has been ordered, and if so, Daw Aung San Suu Kyi has the right to appeal to the high court according to law,'' Daw Myint Myint Khin said.

Gen. Saw Maung seized power in a military coup in September 1988, during which troops killed more than 1,000 democracy demonstrators. He pledged at the time he would hand over power to a new government according to law.

The government has recently changed Burma's name to Myanmar.

#90211u1408 07/30/1990 ~United Press International

MIAMI (JULY 30) UPI - A Texas pilot who flew 12 covert missions to supply Contra rebels in Central America testified Monday the supply planes were easy targets that lacked the equipment they needed safely deliver arms to jungle locations.

Pilot Elmo Baker, 58, of Weatherford, Texas, said he flew 12 supply missions in 1986 in C-123 and C-130 propellor-driven planes, which were inappropriate for such a mission over war-torn Nicaragua.

Speaking of the C-123, he said, ''You can knock it down with a brick.''

Baker testified on behalf of Eugene Hasenfus, who was shot down over Nicaragua in 1986 during a Contra supply flight in a C-130 plane.

Hasenfus has filed a civil suit against Southern Air Transport, the Miami cargo airline with CIA connections that supplied the plane for the mission and retired Air Force Maj. Gen. Richard Secord, who pleaded guilty to a felony charge of lying to Congress about the Iran-Contra affair.

Hasenfus contends Secord was in charge of the missions he flew.

The suit said Southern Air and Secord failed to provide necesary equipment for the Contra missions and that they reneged on promises to pay all legal expenses involved with the missions.

Baker, a fighter bomber pilot and former POW in Vietnam, said Contra supply planes lacked precision navigational equipment that might have helped them find there way in the jungle. As a result, the weapons and supplies they delivered often fell short of their targets.

''Air dropping in the jungle is like dropping into the ocean. Everything looks the same. None of the equipment was accurate enough to drop into the jungle. If you make your drops 4 miles away, you can't call that a success. It has to be dropped within a quarter mile,'' Baker said.

Baker said he was recruited for the flights by Bill Cooper, a manager for Corporate Air, a company that Hasenfus contends was a shell company for Southern Air.

Baker said his understanding was that the mission was run by civilians but sanctioned by the U.S. government. He said the pilots signed contracts with Corporate Air, and were also promised verbally that they and their families would be taken care of if anything went wrong.

''The other benefits were verbal and clearly understood. There'd be a search and rescue mission and pay and allowances would go to our families '' Baker said.

''I'm disgusted with the whole situation,'' he added.

Hasenfus, a former marine, parachuted to safety when his C-130 plane was shot down by a heat-seeking missile over Nicaragua Oct. 5. 1986. He was captured and convicted of crimes against the Nicaraguan government.

Hasenfus was sentenced to 30 years in jail but was pardoned in December 1986 and returned to Wisconsin.

''I understand he was even billed for his air trip back from Nicaragua,'' Baker said.

Judge C. Clyde Atkins called that remark ''hearsay,'' and told the jury to ignore it.

Four other men who flew with Hasenfus died when their plane crashed. Kasanee Sawyer and Nockrope Sawyer, the wife and child of crew member Wallace Sawyer, joind Hasenfus in the suit, seeking compensation for Sawyer's death.

The jury also heard a deposition Monday from retired Air Force Col. Robert C. Dutton, who was in charge of coordinating the supply flights. Dutton said it was his understanding that Secord and Oliver North were in charge of the operation.

#90211u1422 07/30/1990 ~United Press International

BEIJING (JULY 30) UPI - Wild snakes and frogs in China soon will be free to creep and crawl at will thanks to newly proposed edicts preventing the animals ''wanton killing'' and sale.

Authorities in two south China provinces have called for ''strict measures'' to combat a plague of illegal traffickig in frogs and snakes by local peasants with an eye for gourmet tastes, the state-run Legal Daily newspaper reported Monday.

More than 3 tons of wild frogs and toads and 1.5 tons of snakes were confiscated by Shanghai authorities in the month of May alone, according to the newspaper.

Frog and snake meat are considered delicacies in China, but demand has apparently outstripped supply, resulting in ''wanton killing and trafficking'' by industrious hunters, the newspaper said.

One trafficker, a Shanghai factory worker identified only as Mr. Ye, made a profit by buying wild frogs from peasants in neighboring Zhejiang province for 4 yuan per kilogram (42 cents per lb) and reselling them in Shanghai at a 150 percent markup.

Surplus frogs and snakes have reportedly found their way not only into the marketplace, but onto local railway lines as well.

''For nearly one month, railway departments have seen various species of frogs and snakes filling train aisles, crawling on luggage racks and even in restrooms,'' the report said.

''In mid-May, the Gelong examination station ferreted out more than 30 bags of live snakes weighing (1,650 pounds). The snakes were illegally smuggled on a freight car,'' it said.

Intrepid frog and snake smugglers have persisted in their trade despite repeated local bans, some of which had not been approved by central authorities.

The Legal Daily report pointed out that inconsistent provincial regulations forbidding the ''catching, killing, and selling of frogs (including toads) and snake species'' are further complicated by a legal loophole in Chinas national wildlife protection law, which does not include wild frogs or snakes on its endangered species list.

New legislation is on the way following calls by provincial departments for state-wide laws stipulating the terms and punishment for a ''spreading tendency to hunt, catch and kill wild frogs and snakes.''

#90211u1425 07/30/1990 ~United Press International

SUMTER, SC (JULY 30) UPI - A Union soldier who died in one of the last conflicts of the Civil War more than 100 years ago is finally going home to Massachusetts to be buried there as a military hero.

The remains of the unknown soldier were unearthed by construction workers in Clarendon County, S.C., in 1974 and kept in the care of a Sumter funeral home since then.

Authorities said the soldier wore a frayed blue uniform and buttons with Massachusetts written on it when his remains were found. No other identification was found.

Civil War experts said the soldier, a private, may have been part of a 2,800-man Union contingent that included four Massaschusetts regiments dispatched from Georgetown County in April 1865 to fight the Battle of Dingle's Mill near Sumter.

The soldier never made it to the grist mill. ''He was likely sniped on his way to battle, about a day's march from Dingle's Mill,'' said Larry Fudger member of a Confederate Army re-enactment unit in Sumter.

The soldier may have been left forever at the Sumter funeral home had it not been for Fudger.

He was taking part a year ago in the renenactment of the Battle of Crater in Petersburg, Va., when Robert Berkeley, a member of the Union Army, walked through the Confederate camp.

''This Confederate soldier heard my (New England) accent and stopped me to talk,'' Berkeley said. ''He told me 'We've got one of your boys, and we'd like you to take him back and bury him.''

Fudger and Berkeley, who would have been on opposite sides in the Civil War, worked out the details for more than a year to return the unknown soldier to Massachusetts.

The funeral with full military honors will be held in a federal cemetery at Cap Cod.

''We're not looking for any modern-day twists. We are seeking a Civil War ceremony and we want a poignant one,'' said Berkeley.

A carved wood coffin like those made during Civil War times will be provided for the soldier by Sumter Technical College.

A horse-drawn caisson will carry the flag-draped coffin, escorted by Union calvary and infantry units.

There will be a 21-gun salute, and Berkeley will deliver a short eulogy.

Fudger said the hero's burial is the right thing do. He called it a ''ending sort of thing'' between descendants of those who fought for two different armies.

''This is a very touching gesture from the state of South Carolina to the state of Massachusetts,'' said Berkeley.

#90211u1431 07/30/1990 ~United Press International

RINCON, GA (JULY 30) UPI - A drug-sniffing dog answering nature's call helped Effingham County police make their biggest crack cocaine bust ever.

The dog, a golden retriever named E.C. was let out of the police station to relieve herself, but instead headed straight for a car belonging to a drunk driving suspect, police said.

Police searched the vehicle and found 66 1/2 grams of crack in the tail-light assembly, worth about $13,500 on the street.

Police charged Larry Donald Marshall, 30, and Tony Maurice Morris, 22, of Pompano Beach, Fla., with cocaine trafficking. Marshall also faces drunken driving and speeding charges.

A police officer stopped the two men in Rincon early Friday. Rincon Police

Chief Wade McGaha says the suspects apparently came through the town to avoid Interstate 95.

#90211u1448 07/30/1990 ~United Press International

BEIRUT, LEBANON (JULY 30) UPI - Families of two Iranian diplomats, an Iranian photograher and a driver who disappeared in Christian east Beirut eight years ago called Monday on world humanitarian organizations to help secure their release and lamented a one-sided focus on Westerners held hostage.

''Eight years have passed since the kidnapping of these four young men without any reason,'' said a one-page statement delivered Monday to the offices of the leading An Nahar newspaper in Moslem west Beirut. The statment, typed in Arabic, was signed ''the families of the Iranian hostages in Lebanon.''

The four vanished at a checkpoint manned by the Christian Lebanese Forces militia in Barbara, 25 miles north of Beirut, in July 1982.

The missing are former Charge d'Affaires Mohsen Musavi, Revolutionary Guard official Ahmed Motavasselian, Iranian News Agency photographer Kazem Akhavan and their Lebanese driver, Taki Rastakar Mokaddam, who held an Iranian passport.

Iran asked Washington to investigate the circumstances of the four after the release of U.S. hostages Robert Polhill and Frank Reed late last April.

On May 3rd, President Bush said: ''It is the best information we have that these people are not alive.''

Diplomatic sources in Washington said two of the Iranians were severely wounded in the ambush and later died, while the other two were executed by their captors.

Bush's remarks coincided with a statement by the leader of the Lebanese Forces militia, Samir Geagea, denying his group was holding the four Iranians and blaming former militia commander Elie Hobeika for their abduction.

Geagea said that when he ousted Hobeika Jan. 15, 1985, there was no trace of Iranian prisoners in militia cells.

''Eight years have passed and our hearts and the hearts of our children are looking forward for any news regarding the release of hostages hoping that our beloved are among them,'' the statement from the families said.

''When will the world stop viewing the hostage issue from a single side,'' the statement asked, referring to the world outcry of the fate of Western hostages held in Lebanon.

''Will states of the world and humanitarian organizations move to rescue all innocent kidnapped without exception?'' the statement asked.

''Our joy whenever a hostage or a prisoner is freed will not be completed unless our sons are released and back home,'' it said.

Among the Western hostages held by pro-Iranian Moslem radical groups in Lebanon are six U.S. nationals, four Britons, two West Germans, two Swiss, one Irishman and one Italian.

#90211u1462 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Latvian Prime Minister Ivars Godmanis urged President Bush to encourage American technical assistance and investment Monday to help Latvia move toward political and economic independence from the Soviet Union.

After a brief meeting at the White House, Godmanis told reporters Bush had promised to ''very seriously'' consider recommendations on how to give greater support to the cause of Latvian independence.

''I think we got the good support of President Bush,'' he said.

Since Lithuania became the first of three Baltic republics to declared independence from Moscow in March, Bush has tried to express support for their self-determination without antagonizing Soviet President Mikhail Gorbachev.

Bush declined to answer when a reporter asked if the session with Godmanis was a sign of U.S. backing for Latvia. He told Godmanis he was ''very anxious'' to hear his impression on the status of developments in the Baltics.

Out of concern for U.S.-Soviet relations, Bush declined earlier this year to invoke sanctions against Moscow for its economic coercion of Lithuania and similarly has withheld formal recognition of the Baltic republics as sovereign states.

As a matter of longstanding policy, the United States has never recognized the forcible incorporation of the three republicans into the Soviet Union some 50 years ago.

Though Latvian Foreign Minister Janis Jurkans, who also attended the

meeting with Bush, urged that the United States take ''concrete steps'' to give Baltic indepedence more official recognition, Godmanis acknowledged this would have to be done as part of ''a process'' and ''not one step.''

Godmanis said he asked Bush to support the establishment of an informational center in the Latvian capital of Riga ''to get the full information from the horse's mouth (on) how things are going on in the Baltic states.''

Also discussed, he said, was the prospect of private investment and American technical expertise to help Latvia make the transition ''gradually and very peacefully'' to an independent market economy and political sovereignty.

Deputy White House press secretary Stephen Hart later said Bush welcomed the opportunity ''to reaffirm the U.S. commitment to national self-determination for the Baltic states,'' but had not made ''any commitments'' in the session with Godmanis.

-30- 2605

#90211u1490 07/30/1990 ~United Press International

MONTREAL (JULY 30) UPI - A Mohawk representative said the Indians were ''treading water'' Monday amid negotiations with the Canadian and Quebec government on proposals to settle two lengthy armed standoffs over tribal land claims.

A policeman was killed July 11 in an abortive SWAT-style police raid on a roadblock erected four months ago by Kanesatake Mohawks on a golf course expansion site on land they claim is theirs.

A Mohawk spokesman said Mohawk leaders are refusing public comment on developments until they negotiate a concrete proposal with the Canadian and Quebec governments.

''On the surface it's calm (but) underneath we're treading water like hell '' said Peter Diome, a Mohawk Nation representative at the Kahnawake reserve.

There are reports of deep divisions between hard-line and more flexible members of the Mohawk negotiating team in terms of rejecting or accepting the government proposals.

The provincial government offered Friday afternoon to withdraw Quebec police who are surrounding the Kanesatake and Kahnawake Indian reserves and invited Mohawks to participate in a coroner's inquest into the death of police Cpl. Marcel Lemay, said Quebec Indian Affairs Minister John Ciaccia.

In return, the Mohawks must take down the barricades and give up their arsenal of weapons that include automatic rifles, Ciaccia said.

Earlier Friday the federal Indian Affairs Department announced it would pay white landowner Maurice Rousseau $1.19 million for land in Oka on which a golf course expansion and homes were planned on lands the Mohawks claim is theirs.

Federal Indian Affairs Minister Tom Siddon announced Friday the federal government was prepared to work with the Kanesatake Mohawks to find a way to resolve their land claims in concert with Ciaccia's initiatives.

Siddon said the Kanesatake situation is unique and cannot be resolved by normal Indian land claims procedures because it is not formally a reserve but blocks of federally-owned land settled by Indians after the arrival of Europeans.

Kanesatake Mohawk leaders claim much of Oka's terrritory as theirs and want an inquiry into Rousseau's land ownership because they do not believe he owned the disputed land, said Marie David, who works at the Mohawk radio station.

''I think what they'd really like to see (is) if Mr. Rousseau had the right to the land in the first place and if it really belongs to him,'' said David.

On Sunday, 2,000 Indian and non-Indian well-wishers rallied outside the Kanesatake Indian reserve in support of the Mohawks.

Sunday's rally, which featured food for the Mohawks and speeches by politicians and activists, was held hundreds of yards away from a group of 150 angry Oka residents who oppose the Mohawk's show of force.

Friday, a spokesman for Quebec Public Security Minister Sam Elkas said ballistics tests showed police Cpl. Marcel Lemay was not killed by a police bullet during the July 11 assault.

The spokesman said the bullet was a different caliber than that used by police, but that the weapon that fired must be examined before the investigation could continue.

Many of the Mohawk Warriors guarding the barricade at Kanesatake - and at the secondary standoff site nearby - are members of the Warriors Society from the troubled St. Regis Indian reserve that straddles the U.S.-Canadian border near Massena, N.Y.

The St. Regis Mohawk Warriors sided with pro-gambling forces and against

traditional chiefs when pro- and anti-gambling factions clashed in May, leaving two dead.

#90211u1492 07/30/1990 ~United Press International

LONDON (JULY 30) UPI - Stock prices closed lower Monday in sluggish trading on the London International stock exchange as weak performances on overseas markets dragged prices lower.

The blue-chip Financial Times 100-stock index, which fell 14.0 points Friday, eased another 13.6 points to 2,316.5. The narrower top 30 industrial average slipped 4.0 points to 1,838.1.

Volume amounted to around 341 million shares compared with 345 million shares changing hands on Friday.

Analysts said early weakness in New York coupled with the 420.53-point decline in Tokyo, sent prices lower.

Additionally, analysts said the market was cautious ahead of Tuesday's Confederation of British Industry survey of industrial trends, and said the London market had been unable to shake off last week's depressing trend brought on by sharp falls in New York and profit warnings by major British companies.

Among the most widely traded stocks, Standard Telephones and Cables PLC, an electronics company, fell 38 cents to $4.80 after announcing a 32 percent decline in pretax profits for the first half of the year. The company also issued a profits warning for the second half.

STC simultaneously announced that it had agreed to sell ICL, Britain's only remaining computer company, to Japanese computer giant Fujitsu Ltd.

The banking sector was dull throughout the day on worries of disappointing figures for the major clearing banks expected later in the week.

National Westminster Bank lost 11 cents to $5.85 and Midland Bank slipped 9 cents to $5.20.

Insurances companies also lost ground amid worries they will report losses next month. Commercial Union slipped 16 cents to $8.92.

One of the few gainers on the day was Grand Metropolitan who added 9 cents to $11.46 on hopes that the company will soon sell the Express Dairy.

Elsewhere in Europe, stock prices drifted slightly lower in one of the slowest trading sessions of the year on the Frankfurt Stock Exchange.

The closely watched German Stock Index, eased 8.12 points to 1,911.69.

Traders said the market continued to be stuck in a consolidation phase following its broad advance in the first quarter.

Additionally, analayts said many large institutional investors remanined on summer holiday, reducing the pool of available buyers.

#90211u1498 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Different species of tiny plants crucial to life in Antarctica apparently respond differently to increases in ultraviolet light caused by the depletion of the ozone layer, scientists reported Monday.

Laboratory studies at the National Science Foundation's U.S. Palmer Station in Antarctica found significant differences in how various species of plants called phytoplankton respond to ultraviolet light.

''Some phytoplankton are very sensitive and some aren't,'' said Deneb Karentz, a research associate at the University of California, San Francisco, who conducted the new research with colleague David Mitchell.

The findings could have implications for scientists trying to assess the impact of a depleted ozone layer on life in Antartica, the researchers said.

Phytoplankton are one-celled plants at the bottom of the antarctic marine food chain that manufacture organic material that sustains virtually all other organisms in the ecosystem.

Scientists are concerned that air pollution is thinning the ozone layer of Earth's atmosphere, allowing more ultraviolet radiation from the sun to reach Earth, increasing the risk of skin cancer and possibly suppressing the immune system in humans and damaging other forms of life.

Researchers are especially concerned about the potential effects of a thinning ozone layer in Antarctica, where ozone depletion is greatest.

The researchers exposed nine species of phytoplankton to intense ultraviolet light and examined the samples for genetic damage.

A species known as Coscinodiscus oculus-iridis experienced nearly 100 times the amount of damage detected in another species known as Nitzschia kerguelensis, the researchers said.

''Consistent with the diverse molecular response to (ultraviolet) light, we also found that the ability of phytoplankton to survive the effects of (ultraviolet) light was extremely variable,'' the pair wrote in a report to be published in the Antarctic Journal.

''The results show it's important to look at individual species, because there is the potential for shifts in overall species composition in the ecosystem,'' Karentz said.

Researchers also found some species of phytoplankton were better than others at repairing genetic damage caused by ultraviolet light and producing substances that block ultraviolet light.

#90211u1548 07/30/1990 ~United Press International

SUWANEE, GA (JULY 30) UPI - The Atlanta Falcons advised the New York Yankees Monday that they will sue if Deion Sanders violates his pro football contract to extend his pro baseball contract.

Falcons attorney Marion H. Allen III facsimiled a three-page letter to Yankees vice president George Bradley announcing plans to seek ''injunctive as well as compensatory and punitive relief against the Yankees for tortious interference with the Falcons' contractual relationship with Sanders.''

Allen wrote that the Falcons would take that action in addition to numerous monetary actions against Sanders ''to preserve and protect their contractual rights with Deion Sanders ans to reflect his reduced value to them if he should fail to participate as a full-time football player as he is contractually obligated to do.''

Sanders' present contract with the Yankees expires midnight Tuesday. The million-dollar extension proposed by the Yankees would lock him into playing the remainder of this baseball season and all of the 1991 baseball season, forcing him to miss at least the first three games of both the 1990 and 1991 NFL seasons.

Allen said if that happena the Falcons will seek a court order for the ''immediate'' return of the $1.5 million remaining on his football signing bonus. He said the Falcons have already fined Sanders $10,000 for missing a ''mandatory'' mini-training camp and are fining him $1,500 for each day he is late reporting to the present pre-season camp.

In addition, Allen said, the Falcons will reduce Sanders yearly compensation by $150,000 per year ''as forfeiture of that part of his salary which represents the inducement paid to him to be a full-time football player,' and also reduce his salary for each football game missed

''due to his playing baseball with the Yankees in violation of the express terms of his contract with the Falcons.''

Sanders was quoted an an Atlanta newspaper as saying that while the Falcons are entitled to recover part of his football earnings if he extends his Yankees contract, taking $1.5 million of his signing bonus ''is way too much.''

''I gave them a million-and-a-half-dollars worth of excitement last year '' Sanders said. ''They're entitled to something, money for the games I missed, fines for the training camp days I missed and mini camp days. But that's all.

''They have a right to be upset,'' Sanders said. They don't have a right to be $1.5 million worth of upset. I guess I should've signed a pre-nuptial agreement.''

#90211u1562 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Testimony ended Monday in the drug and perjury trial of Mayor Marion Barry, and a federal judge set closing arguments for Wednesday in the 9-week-old case.

Prosecutors had said they expected to call at least one more witness during rebuttal of the defense case Monday but chose not to do so.

U.S. District Judge Thomas Penfield Jackson excused the jury at about 11:20 a.m., but told attorneys to return to the courtroom later Monday for a review of preliminary jury instructions. He said the court would be in recess Tuesday before closing arguments Wednesday, which will be followed by deliberations on the 14 cocaine and perjury charges facing Barry.

''We're very glad the trial is over. It's been a long, hard eight weeks,'' said defense attorney R. Kenneth Mundy, speaking outside court on the first day of the trial's ninth week.

''The government had all of the guns. They had all of the investigative personnel. They had legions and legions of attorneys,'' Mundy said. ''We had four faithful persons.''

Mundy's defense team included attorney Robert Mance, Barry adviser Anita Bonds and a law clerk.

Mundy predicted Barry could be acquitted on all 14 counts, and said he expected closing arguments to last about 2 1/2 hours for each side.

The defense rested its case Friday after Mundy called 17 witnesses over a

week, trying to counter five weeks of often damaging testimony from government witnesses, 10 of whom said they used cocaine with Barry or supplied drugs to him dating back to 1983.

As expected, Barry never took the stand in his own defense.

Government testimony, which followed two weeks of jury selection, was highlighted by an FBI videotape of Barry smoking crack cocaine at a downtown hotel room in the Jan. 18 sting operation at which he was arrested.

Mundy never directly challenged the assertion that Barry was a cocaine user, but instead sought to cast doubt on specific dates and allegations from several misdemeanor possession charges.

He also tried to discredit the testimony of the government's primary witnesses and question the motives of federal investigators in targeting the three-term Democratic mayor.

Mundy alleged at a bench conference last week that the FBI agents who participated in the sting at the Vista International Hotel were part of an ''assault force'' targeting black elected officials nationwide.

The FBI and prosecutors categorically denied the allegation, which was made without the jury's knowledge.

Barry, 54, faces three felony counts of perjury and 11 misdemeanor counts of cocaine possession and conspiracy. He could be sentenced to 26 years in prison and fined $1.85 million if convicted on all counts.

The actual 12-member jury from a panel of 18 people - 15 women and three men sequestered since June 18 - will not be known to jurors or the public until deliberations begin.

Barry's third term ends Jan. 2, and he has announced he would not seek a fourth term. Under federal guidelines, he almost certainly would be sentenced to some prison time if convicted of a felony. If jailed on a felony before Jan. 2, he have to surrender his office, according to the D.C. Charter.

If he is acquitted or a hung jury is declared, Barry technically could still run as an independent, a scenario he has not ruled out.

#90211u1563 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - The International Monetary Fund Monday said it has approved a $41 million loan in support of Honduras' economic program.

The plan aims at stemming the slowdown of the economy and setting the stage for output growth of about four percent a year from 1991 to 1995. It also seeks a reduction of the annual rate of inflation to about seven percent from eight percent as well as a substantial strengthening of the country's external position.

The program includes a modification of the exchange system, measures to reduce the deficit of the public sector and to increase interest rate flexibility, and a tariff reform geared to reducing the anti-export bias of existing import protection.

In June and July, Honduras cleared its arrears with the IMF, the World Bank and the Inter-American Development Bank, becoming again eligible to receive loans from the multilateral organizations.

The Central American country experienced sluggish economic growth and increasing financial imbalances since the early 1980s as a result of a deterioration in its terms of trade, regional armed conflicts, and failure to adjust domestic policies.

#90211u1569 07/30/1990 ~United Press International

BOSTON (JULY 30) UPI - Massachusetts faces up to a decade of economic uncertainty because of a two-year budget stalemate and the looming prospect of a tax-and-fee rollback on the November ballot, a major Wall Street debt-rating agency said Monday.

In a report - written before the Legislature acted this past weekend to approve a budget and a debt payment plan - Standard & Poor's Corp. declared it would retain its month-old designation that placed the state with the lowest bond rating of any in the nation on Creditwatch with negative implications.

That means the BBB rating - which puts Massachusetts' credit below even that of oil-glut-ravaged Louisiana - could potentially be lowered further, to "junk bond" level, or below investment grade.

"Legislative inaction over the last two years will leave a legacy of debt for perhaps the next two administrations," the report declared. "Coupled with the potential restraints (on state financing) to be voted on in November, the impact may be felt for a decade."

State voters will be voting Election Day on a ballot initiative sponsored by an anti-tax group, Citizens for Limited Taxation. The referendum calls for state taxes and fees to be rolled back to their July, 1988 levels, which would knock out two subsequent income tax hikes and about $250

million in increased state fees. It would also require legislative oversight of spending by independent agencies.

The report was written before the Legislature on Saturday finalized the $13.4 billion fiscal 1991 budget and approved a plan to repay $1.4 billion in fiscal 1990 debt.

"The fact that something has happened is encouraging news," said S&P Managing Director for Municipal Finance Cathy L. Daicoff, one of the authors of the report. But she added that "whether the plan is achievable and cures the structural deficit must be analyzed in greater detail. It's premature for me to guess."

The report, written by Daicoff and by Robert Swerdling, S&P's assistant vice president for municipal finance, paints a picture of a state unable and unwilling to deal with fiscal problems when they were manageable, making the state even more susceptible to the economic downturn generally gripping the Northeast.

"The economic factors could support a higher rating, but the financial problems are overwhelming," the report declared. The analysts said the state failed to react quickly and effectively at the first signs of a slowdown in the boom that Gov. Michael S. Dukakis once proudly labeled the "Massachusetts Miracle."

Noting Massachusetts has run up $1.8 billion in operating deficits over the last two years, the report declared they resulted "from a chronic mismatch of revenues and expenditures, exacerbated by the lack of consensus about the solution to the growing fiscal crisis."

The report singled out the state's failure to rein in Medicaid spending - either through changes in eligibility or service levels - despite an 11.7 percent growth in costs, "a significant portion ... attributable to the cost of long-term care for the elderly."

While the report credited the state for making "some progress" in reducing employee levels by 5,000 people, or 7.1 percent, since June 1988, it pointedly noted "much is left to be done."

The analysts noted Massachusetts will not receive much immediate help from an economy expected to remain soft. That will translate into continued job losses and the departure of would-be workers to other states through the rest of 1990.

"The state does not now have a larger population base to soften the adjustment to lower per capita and reduced construction-related expenditures," the report declared.

"The current correction will therefore be faster, but perhaps more painful than might occur with an augmented population base and gradual outmigration."

#90211u1578 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - The government's thrift bailout effort will need as much as $100 billion more in the next fiscal year to continue cleaning up the nation's savings and loan crisis, thrift regulators said Monday.

L. William Seidman, chairman of the Resolution Trust Corp., the government agency overseeing the thrift bailout, told the House Banking Committee that the agency needs an additional $30 billion to $40 billion for loss funds and between $40 billion and $60 billion in working capital in fiscal 1991.

The announcement raised the ire of several members of the committee who said taxpayers are frustrated with throwing billions of dollars at the government's slow-moving rescue effort.

"Unless I'm totally wrong in analyzing Congress, I don't think you're going to get it," said Rep. Toby Roth, R-Wis. "I don't think the Congress will give you more money because the people in this country won't stand for it."

Rescuing the nation's thrifts from collapse will cost taxpayers an estimated $132 billion to $500 billion, making it the most costly financial debacle since the Great Depression. "Too much time and too much money have already been flushed down the drain of the S&L bailout," said Rep. Bruce Vento, D-Minn.

Without additional funding, Seidman said, the RTC will be forced to slow its efforts. The agency expects to resolve 77 thrifts during the current quarter ending September 30.

Robert Glauber, the Treasury Department's under secretary for finance, said it "appears unlikely" that the RTC will have any substantial amount of money to use after this December.

"Near the end of December 1990, case resolutions would cease unless Congress provided additional authority," he said. "We cannot afford to let the RTC run out of money and we must not let the process grind to a halt."

Seidman, who also serves as chairman of the Federal Deposit Insurance Corp., bristled at criticism that the RTC has been slow to tackle the bailout.

"I just think it is wrong to say this is a slow start," he said. "That's not to say things couldn't have been done faster, but a lot has been done in less than a year."

Since the signing of the Financial Reform, Recovery and Enforcement Act last August 9, the RTC has resolved 211 failed thrifts with more than $60 billion in assets.

The Bush administration's nearly year-old bailout bill provided the RTC with $50 billion to sell the assets of failed institutions. Seidman attributed the high cost of the bailout effort to the accelerated pace of resolutions, or sales, of failed institutions.

Seidman and Glauber said they do not know how much the thrift bailout effort will cost eventually. Much of the final cost depends on the financial condition of the real estate market. Real estate makes up the vast majority of assets the government now holds from failed thrifts. "The only way to have a definitive number is to have a definitive idea of what real estate will do," Seidman said. "It's a moving target."

#90211u1579 07/30/1990 ~United Press International

ANKARA, TURKEY (JULY 30) UPI - Seven Turkish troops including a garrison commander were killed in an ambush while hunting Kurdish separatist rebels in the mountainous region of southeastern Turkey, officials said Monday.

The latest deaths brought to at least 47 the number of people, including Kurdish guerrillas, killed in the operation.

Officials said the garrison commander of Pervari along with a junior officer and five other soldiers were killed when their vehicle drove into an ambush at Dogankoy, a village about 525 miles southeast of Ankara.

The rebels escaped under cover of darkness, authorities said.

Turkish press reports during the weekend said at least 40 leftist Kurdish guerrillas were killed in four days last week when a special force assisted by airborne commandoes hunted separatist rebels near Siirt and Sirnak, about 560 miles southeast of Ankara.

The Istanbul newspaper Milliyet said Black Hawk helicopter gunships were pressed into service to assist the special mountain units hunting rebels who reportedly had assembled in the area.

Hayri Kozakcioglu, governor general of seven provinces where the guerrillas are most active, said 500 search and destroy teams were formed and launched the operation at 40 points simultaneously.

Nearly 60 percent of recent guerrilla attacks in southeastern Turkey have occurred in a triangle between Sirnak, Pervari and Uludere, and the manhunt was being concentrated in this area, he told reporters. ''We now have complete control of the area,'' he said.

Kozakcioglu heads overall operations against the guerrillas under special emergency laws currently in force in the area.

Sunday, the Istanbul newspaper Hurriyet said 40 Kurdish separatists, believed to be members of the Kurdish Workers Party, were killed in the search operation. Tercuman, another Istanbul newspaper, put the toll among the guerrillas at 54.

A statement from Kozakciolgu's office said 17 Kurdish rebels including two women died in the operation in Pervari near Sirnak over a three-day period last week.

The search and destroy operation began after the authorities received information that rebels from the Kurdish Workers Party, or PKK by its Kurdish initials, were assembled for a powwow.

Included among the dead was a rebel leader believed to be a close aide of PKK chief Abdullah Ocalan.

#90211u1587 07/30/1990 ~United Press International

LUSAKA, ZAMBIA (JULY 30) UPI - A former high court commissioner and three other men sentenced to life imprisonment for a 1980 coup attempt against President Kenneth Kaunda were freed unconditionally Monday in a gesture of reconcilation by the Zambian leader.

Edward Shamwana, 57, whose death sentence was commuted to life in 1986, was among the first prisoners to be freed in connection with an amnesty announced by the 26-year ruler last week in the wake of intense rioting

against his government.

Released with Shamwana Monday were accomplices Goodwin Yoram Mumba, a businessman, Zairean politician Deogratius Symba, and driver Albert Chilambe, all sentenced to death in January 1983 in connection with the plot.

Shamwana, who accused prison authorities in 1985 of torture, said his death row warders were ''quite sadistic'' but that he stepped into freedom with ''no hard feelings.

A key architect of Zambia's multi-party constitution, which was abolished in favor of one-party rule in 1973, he met with Kaunda moments after his release. He said he thanked Kaunda for pardoning him and agreed to ''let bygones be bygones.''

But he added, ''quite clearly, the present political set-up has not worked... we have entered into a period where we have to re-examine it.''

Following a wave of rioting against Kaunda's single-handed rule, Kaunda announced last week the release of several coup plotters and hundreds of political detainees and vowed to begin building a ''new Zambia.''

Former Army commander Lt. Gen. Christon Tembo and three colleagues, implicated in a 1988 coup attempt, also are expected to be released soon along with a lieutenant who staged a single-handled hoax coup announcement on June 30.

Kaunda's order came a month after at least 27 people died in riots sparked by increases in food prices and posed the greatest threat to Kaunda's rule since he took power on independence from Britain in 1964.

Under pressure to relax Zambia's political system, Kaunda has agreed to a national referendum in August 1991 on whether to reintroduce a multi-party political system.

#90211u1599 07/30/1990 ~United Press International

CAIRO, EGYPT (JULY 30) UPI - Envoys from Iraq and Kuwait have delayed until Tuesday face-to-face talks called to defuse a dispute between the two neighbors over oil production, Riyadh Radio reported Monday.

The radio quoted a Saudi government spokesman as saying the two Arab states would meet Tuesday in the Red Sea port of Jeddah. The envoys had originally been scheduled to meet in Jeddah over the weekend, but no official reason was given for the delay.

Arab diplomatic sources in Cairo, which has mediated in the dispute since it broke about two weeks ago, said Kuwait had been seeking clarifications from Iraq via Saudi Arabia on the content of the talks and their next venue.

According to the diplomatic sources, the Iraqis placed conditions on the talks, such as Baghdad's demand for billions of dollars in compensation from Kuwait to make up for alleged Kuwaiti oil drilling in an Iraqi well, and Iraq's insistence that the talks continue in Baghdad after Saudi Arabia.

Kuwait wants the agenda of the talks to be open, and would prefer a more neutral venue than Baghdad for the continued discussions.

The tiny emirate is also concerned Iraq will try to force it to accept demarcation of the Iraqi-Kuwaiti border, which would go against Kuwaiti interests, and would prefer the talks with Iraq to occur at a slower pace and with the participation of other neutral Arab states such as Saudi Arabia and Egypt.

The dispute grew serious last week, when Iraq staged military maneuvers along its border with Kuwait, and the emirate moved Soviet-made missiles to its border with Iraq.

The row erupted two weeks ago, when regional superpower Iraq accused Gulf Arab states Kuwait and the United Arab Emirates of dumping crude on the world market and Crown Prince of Kuwait came after mediation in the dispute by Palestine Liberation Organization leader Yasser Arafat and Jordan's King Hussein.

PLO and Jordan mediation efforts came after Saudi Foreign Minister Prince Saud al Faisal also held talks over the weekend with Iraqi and Kuwaiti leaders.

Al Faisal arrived in Cairo Monday for an Islamic conference and told reporters the gap between Iraq and Kuwait prior to their Jeddah talks ''have been narrowed, thanks to Arab mediation.''

Meanwhile, Jordan's King Hussein left Kuwait after talks with the Emir, Sheikh Jaber al Ahmad al Sabah. Hussein arrived in the emirate early Monday from Baghdad, where he also held talks with Iraqi President Saddam Hussein.

Details of Hussein's talks were not revealed, but Arab diplomatic sources said they focused on the Iraqi-Kuwaiti dispute.

UAE President Sheikh Zayed bin Sultan al Nahayan meanwhile was to arrive in Cairo Tuesday for a three-day official visit and talks with Egyptian

President Hosni Mubarak, who last week shuttled between Iraq and Kuwait in a bid to mediate the dispute.

#90211u1616 07/30/1990 ~United Press International

PRAGUE, Czechoslovakia (JULY 30) UPI - The former chairman of the Czechoslovak People's Party, who was accused of having worked for the secret police under the ousted Communist regime, was reinstated Monday as party leader.

Josef Bartoncik, also a member and former deputy chairman of Parliament, had been suspended as chief of the conservative party last month because of allegations that he was a paid secret police agent for 17 years.

Th decision to restore his party position was made at a long and secret meeting of a special committee of the People's Party in Prague on Saturday night.

The deputy party chairman, Tomas Hanak, said 76 percent of the special committee's membership had voted to reinstate Bartoncik, who has repeatedly denied serving as an agent of the STB, or secret police.

He said the confidential reports on the case reviewed by the committee did not include any new information.

''He was contacted by the STB,'' Hanak said of Bartoncik, ''but it is not shown by the material (reviewed by the committee) that he would have harmed anybody or that he would have been paid for his services to the STB''.

The so-called Bartoncik-Ruml affair erupted on the second day of voting in last month's elections with an announcement of the allegations by one of President Vaclav Havel's advisers.

It was alleged that Bartoncik had broken an agreement with Havel and Deputy Interior Minister Jan Ruml to withdraw from political life in return for suppression of allegations against him made by a member of the secret police.

The Christian Democratic Union, an alliance of the People's Party and the Christian Democratic Party, fared badly in the Czech elections, finishing a poor third to Havel's Civic Forum and the Communist Party.

Party leaders blamed their defeat on the rumors about Bartoncik's past, which had been circulating widely since May. The election commission described the public release of the allegations during the election as ''a gross violation of election regulations.''

Prosecutors have prepared a lawsuit against Ruml on behalf of Bartoncik, who has recently been released from the hospital after suffering a heart attack. They are also preparing charges against the deputy interior minister of violating election laws and upsetting the campaign.

The reports reviewed by the special party committee included one by the former interior minister and party member, Richard Sacher.

The Bartoncik-Ruml affair broke amidst growing criticism of then-Interior Minister Sacher over the lack of progress on unraveling the complex secret police network since February, when he had ''ordered'' the secret police to hand in their weapons and identity cards.

A bomb explosion in Prague's Old Town Square in June, which injured 20 people, generated fears of a secret police effort to disrupt Czechoslovakia's first democratic elections for more than 40 years.

#90211u1620 07/30/1990 ~United Press International

LIMA, PERU (JULY 30) UPI - Banks and most shops in the capital were closed Monday in anticipation of a crash economic recovery plan being devised by the government of newly inaugurated President Alberto Fujimori. The value of the U.S. dollar on the black market fell, a reflection of the shortage of national currency - the inti - due to the bank closures.

Security in downtown Lima streets was heavy. Police in armored cars and trucks patrolled near the two main hotels in the vicinity of the presidential palace, the Crillon and Bolivar, and some avenues in that area were blocked to traffic.

Banks had also been shut down Friday to honor the July 28 independence holiday and will be closed Tuesday to provide more time for Fujimori's economic team to devise a stability plan, making a total of three business days in which Peru will have been without banking services.

Fujimori, an independent who has appointed a mostly non-partisan cabinet, said at a news conference Sunday his plan to restore economic stability would include hikes in public services rates. He specifically mentioned electricity, water, gasoline, and telephones.

Within hours, however, he was contradicted by his own mines and energy minister, Fernando Sanchez Albavera, who said the subsidized price of gasoline - now the equivalent of 11 U.S. cents a gallon - would not be raised "for the time being."

The U.S. dollar sold on the black market for 142 intis late Monday morning

a slight drop from Sunday's rate of 145 intis. The last published figure on the official exchange rate was 53 intis per dollar.

Most shops in downtown Lima were closed, apparently due to financial uncertainty. "I would have preferred that the president to have announced his measures in his inaugural speech (Saturday)," said Eduarde Arce, 39, a graphics worker.

"He must stop the rise in prices," Arce said. "Rice costs 90 intis a (kilogram) (20 U.S. cents a pound). It costs twice as much as it did last week. A liter of vegetable oil now sells at 200 intis a liter ($1.40 a quart). That's twice as much as last week."

Peru's inflation rate for the 12-month period ending June 30 was 2,296 percent. Prices are expected to have climbed by at least another 60 percent by the end of July.

Shortages of gasoline and long lines at service stations, which plagued Lima last week, were not visible Monday. "We got supplies today from Petroperu (the government oil monopoly) and the shortage is over for now," said Sucesion Humberto Gracelli, owner of a gas station.

She said she expected gasoline prices to go up soon, despite the assurances of the energy minister that they would not. "Gas prices always go up every month anyway," she said.

The mood in Lima appeared to be acceptance of the inevitable price hikes announced Sunday by Fujimori, who did not give specific figures. "People are used to these (financial) packages," said Juan Ramirez, 32, an bank employee.

He said Mario Vargas Llosa, the conservative candidate whom Fujimori defeated in a runoff election July 10, "would have been a lot tougher" than the incumbent president.

While details of Fujimori's economic program are not expected to be announced until later this week, the president has said since taking office that he would reform money-losing state enterprises, but not sell them to the private sector.

He has also ruled out confiscation of savings deposits, a forced savings measure already undertaken this year by the governments of Brazil and Argentina to curb inflation.

Fujimori has said he would try to keep purchasing power of the lowest registered income sector of society, which earns between $30 and $35 a month, "at its present level for the time being," until Peru achieves economic growth.

He appealed Sunday in a news conference for $700 million in aid from industrialized nations to help Peru out of its present crisis, characterized by runaway inflation, an empty national treasury and a cutoff from international credit.

#90211u1663 07/30/1990 ~United Press International

SALT LAKE CITY (JULY 30) UPI - The Utah chapter of the American Civil Liberties Union filed a lawsuit Monday in federal court seeking to end all prayer in state public schools.

The suit charges prayer in the Alpine School District in Utah County and Granite School District in Salt Lake County violates the First and 14th Amendments of the U.S. Constitution and the Utah state Constitution.

Michele Parish-Pixler, director of the Utah ACLU, said junior and senior high school students and teachers in the predominantly Mormon state are forced to take part in acts of worship that often violate their personal religious beliefs.

''Refusal to participate in this school-sponsored praying often leaves students and teachers vulnerable to ostracism, ridicule and discrimination '' Parish-Pixler said.

Gov. Norm Bangerter said last week he will ask the state Legislature for a one-time appropriation to defray the school districts' legal costs in the suit.

''The governor's position is about as religion-neutral as you can get,'' said Bangerter's chief of staff, Bud Scruggs. ''The governor's position is that locally-elected school boards should be making policy decisions, not some national organization threatening lawsuits,'' Scruggs said, describing the lawsuit as ''bully tactics.''

Parish-Pixler said the lawsuit was a last resort after other avenues had been unsuccessful.

''It is with reluctance that the ACLU has sponsored the filing of these lawsuits, given the shortage of funds available to the school districts for important programs and teacher salries,'' Parish-Pixler said.

Plaintiffs in the litigation include Kecia Albright, a 1989 graduate of Granite High School; Nancy Moore, a counselor at Orem High School; Adrienne Morris, an English teacher at Orem High School; and three students and their parents identified only with their initials to protect their anonymity.

''Freedom of religion must have freedom from religion,'' said Morris. ''I do not like religion forced down my head. It's a matter of simple justice.''

Michael O'Brien, an attorney for the ACLU, said the group has not ruled out suing other Utah school districts. And, he said the ACLU is looking into the legality of the governor using taxpayers' money to defend the practice.

BIRMINGHAM, Ala. (JULY 30) UPI - The Southern Christian Leadership Conference has delivered a proposal to officials at the Shoal Creek Country Club that could bring an end to plans to protest at the PGA Championship next week.

SCLC President Joseph Lowery said the proposal was delivered to Shoal Creek officials during the weekend, but he would not provide details. The SCLC has said it would picket the golf tournament unless the all-white club invites a black to become a member before the tournament begins.

''We would like something concrete to come forward so we would not have to demonstrate,'' Lowery said. ''We made a proposal, we'd like a favorable response.

''We need something more than saying someday - in the by and by - we'll have black members,'' he said.

The head of the SCLC in Birmingham, the Rev. Abraham Woods, said Monday the SCLC had not heard from club leaders.

''We wanted to make contact with the Shoal Creek people and see if they were interested in talking,'' Woods said. ''They haven't responded yet, to my knowledge.''

The controversy over Shoal Creek erupted after club founder Hall Thompson said the club would not be pressured into accepting blacks as members. The club later said blacks would be welcome as guests and that it would consider blacks for membership.

Two prominent black professionals in Birmingham, attorney Donald Watkins and former state Revenue Commissioner James White, have said they are willing to become members of Shoal Creek if that would end the controversy. Both play golf and said they can afford the $35,000 entrance fee.

White, however, said over the weekend that neither he nor Watkins had been contacted by the club.

''If they (Shoal Creek officials) would start processing their memberships we could possibly work something out,'' said Woods, who also revealed that he had received several death threats since the dispute began.

Several major companies, including Anheuser-Busch, Toyota, Honda and IBM, have pulled advertising for the golf tournament because of the controversy. Lowery is continuing to ask televsion sponsors to pull their ads from the ABC and ESPN telecasts of the event.

The SCLC had also threatened to protest at Augusta National Golf Club in Georgia, the site of the Masters golf tournament, if it continued to exclude blacks as members. But Augusta Chairman Hord Hardin said during the weekend that the all-white club plans to invite its first black member this year.

''I'm not going to question the motive, just appreciate the deed,'' Lowery said.

EL SEGUNDO, CA (JULY 30) UPI - Zsa Zsa Gabor was spending her final hours in an 8-foot-by-10-foot jail cell Monday as punishment for slapping a Beverly Hills policeman last year.

Upon completing her 72-hour sentence Monday afternoon, the 71-year-old actress and former beauty queen planned to accompany her husband, Prince Frederick Von Anhalt, to Europe for rest before she begins shooting a movie on the continent.

She complained of poor food and being cold during her first night behind bars, so Von Anhalt brought her some pillows, silk comforters, Diet Pepsi and Dreyer's Grand Light ice cream.

That brand of ice cream was touted by Gabor in a television ad before the spot was pulled because of more than 300 complaints from viewers who objected to her profiting from an ad that made light of her brush with the law.

''She complained that she was freezing very much last night,'' Von Anhalt said Saturday after visiting his wife. ''Last night must have been terrible. She only had two thin blankets.''

Gabor opted to pay $85 a night to stay in an 8-foot by 10-foot cell at the 17-bed municipal jail rather than serve her time in a crowded Los Angeles County lockup.

Dinner Friday night consisted of a hamburger steak, peas, mashed potatoes, a roll with butter and coffee or water, said El Segundo Police Sgt. Byron Sumrow.

Breakfast consists of ''TV-type frozen breakfast of hash browns, toast and scrambled eggs,'' while lunch was a cold sandwich and coffee, he said.

''She said the food wasn't the greatest and I can agree with her on that '' Sumrow said.

Gabor was expected to do some filing work in police department offices during her jail term and also planned to work on her book.

Gabor was convicted in September of slapping a Beverly Hills Police motorcycle officer, Paul Kramer, who pulled over her Rolls-Royce for traffic violations. Gabor said she struck the officer because he treated her rudely and brutally.

Gabor dominated international headlines during her three-week trial, talking with reporters and photographers outside the courtroom - often in violation of a gag order. She argued with the judge and dashed from the courtroom in tears.

Gabor was sentenced to three days in jail, fined nearly $13,000, and ordered to perform 120 days of community service. Gabor donated her time to a Westside shelter for homeless women.

''It was an expensive slap,'' Von Anhalt said. ''Hopefully she won't do it again.

PHILADELPHIA (JULY 30) UPI - Entertainer Pearl Bailey, walking with a cane, left Pennsylvania Hospital Monday, 2 1/2 weeks after undergoing surgery to replace an arthritic left knee.

The 72-year-old singer will remain in the Philadelphia area for about a week to continue the physical therapy she started while a patient in the hospital, said hospital spokeswoman Laura Feragen.

When Bailey returns home she will continue the rehabilitation with daily exercise. In six weeks she should be able to resume her daily activities, including daily walks for exercise, Feragen said.

During the 55-minute operation at the hospital's Rothman Institute on July 11, doctors removed the bone and cartilage from Bailey's knee and replaced them with prosthetic parts made of metal and plastic.

The institute performs about 500 such surgeries each year, mostly on elderly patients.

#90211u1736 07/30/1990 ~United Press International
DETROIT (JULY 30) UPI - The nation's top carmaker and world's largest industrial organization gets a new boss this week, as Robert C. Stempel slips into the driver's seat Wednesday at General Motors Corp.

Stempel, who wields a booming voice, solid handshake and engaging gaze, replaces Roger B. Smith. Smith officially retires this week, although he will remain on the board of directors. Some industry observers have said Stempel's ascension from GM's presidency to the chairmanship could be the best change the auto giant has had in years.

While Smith is widely regarded as financially oriented, Stempel, 57, has spent much of his career on the engineering side of the business. He joined GM's Oldsmobile division in 1958, rising to general manager of Pontiac in 1978 before becoming managing director of GM's Adam-Opel unit in Germany two years later.

In 1982 Stempel returned to Detroit to head Chevrolet, GM's largest car division. He was named head of GM's Buick-Oldsmobile-Cadillac group under GM's massive corporate reorganization in 1984. In September 1987, he became president of GM, with observers predicting the chairmanship was his to lose.

Stempel's rise to the top spot drew cheers from Wall Street to the West Coast, including the United Auto Workers union, which has blamed Smith for placing profits ahead of products, resulting in a dramatic jobs shrinkage at GM during the past decade.

But the UAW, currently negotiating a new labor pact with GM as well as Ford Motor Co. and Chrysler Corp., has advised Stempel to "create a new era in labor relations by proving that it values its employees as an asset, not a liability."

Critics have charged that as chairman for nearly ten years, Smith placed too much emphasis on non-automotive areas, spending billions to get GM into the electronics and defense businesses while ignoring sales declines, especially in its traditionally strong mid-sized car segment.

Many have pointed to GM's sales as the ultimate assessment of Smith's failed leadership. Beset by quality woes and relentless competition, the company had its share of the U.S. vehicle market fall to 35.8 percent from 44.5 percent in 1980.

But Smith, in a series of farewell interviews, points to GM's restored profitability, to a $4.2 billion profit last year from a loss of $763 million in 1980. "I'd rather explain a drop in market share than explain

going from a $4.2 billion profit to a $763 million loss," he said.

Smith is credited with positioning GM as a "21st century company," in his words, with over $70 billion in plant modernizations and the acquisitions of Electronic Data Systems Corp. in 1984 and Hughes Aircraft in 1985.

He said EDS, which GM bought for $2.5 billion, is now worth $10 billion. Hughes, part of GM's giant electronics, aerospace, and defense unit, has yet to translate into meaningful technology in today's cars, but Smith said the automaker would benefit when Hughes' contributions become tangible.

Even without those major acquisitions, Smith's presence will be felt for years, since management decisions on products and programs usually take time to bear fruit in the marketplace.

One such example is Saturn, an ambitious program announced seven years ago to give GM a domestically made subcompact car touted as America's answer to the Japanese challenge.

Smith got his wish Monday by driving one of the first Saturn cars off the line just two days before retiring. But the public and media were barred from the $2 billion Saturn factory in Spring Hill, Tenn., with Smith defending the ceremony as "a family affair." That has fueled speculation that the car is still not ready for its fall introduction.

"Roger Smith has broken almost every assurance that he has made regarding the Saturn automobile," consumer advocate Ralph Nader told Stempel in open letter released Monday. "The consumer and auto worker have lost out as the price of the car has doubled, while the number of jobs created, cars being produced, and fuel efficiency has been cut in half."

Stempel appears to have already made some promises - a dangerous practice that only gave more fuel to Smith's detractors. One is to have GM's North American assembly plants fully utilized by 1992, which analysts say may mean more plant closings unless GM's market share dramatically increases. "There is no higher priority than to increase our North American market share profitably," Stempel said after his new post was announced.

For now, Stempel has a full agenda as he heads the automaker in an era of unprecedented competition. He must first reach an equitable labor contract before dealing with tightened fuel economy and emission standards. The new chairman also must be concerned with what some observers have said is GM's tarnished "Mark of Excellence" slogan.

#90211u1739 07/30/1990 ~United Press International

NEW YORK (JULY 30) UPI - The state's Republican gubernatorial candidate described Monday how he scared off two muggers by telling them to ''go to hell,'' but he warned that the average citizen would be better off not resisting an attack.

Pierre Rinfret, who has never before run for political office, told of the mugging at an informal news conference in the East New York section of Brooklyn.

The Republican candidate called the news conference, the first of three around the state on Monday, to emphasize his support for the death penalty bill that Gov. Mario Cuomo, his Democratic opponent, has vetoed eight times.

Rinfret said the state needed the death penalty because violence in the streets has been steadily increasing. ''Does anybody need to be told that crime is out of control in this city?'' he asked.

He cited his own personal experience with crime five years ago - when two men wielding knives confronted him in front of his apartment on Manhattan's posh Upper East Side.

Rinfret, 66, said he refused to be intimidated by the muggers and would not give up his gold watch.

''I told them to drop dead. I really did,'' he said. ''Unfortunately, I had my ego. I had taught armed combat in World War II and had been involved in it, so ... I forgot how old I was.

The Republican candidate said he told the attackers, ''You're not about to mug me.''

''In my stupidity and my ego, I just told them to go to hell,'' he said. ''And I did that three times, and the third time, I walked away.''

But Rinfret, who was a decorated forward scout in the Army during World War II, said the average citizen should not resist a mugging.

''I hope they're not that dumb,'' he said. ''I admit to you very honestly that my ego was involved. I was insulted. I wasn't frightened.''

''I'm very proud of what I did in the war. And I refuse to be frightened '' he said. ''But the average person is frightened, the average person hasn't done combat. The average person doesn't know how to protect themselves.''

PROVIDENCE, RI (JULY 30) UPI - Narragansett Bay would be the test site for an experimental satellite tracking system for oil tankers under legislation that is about to go before Congress, officials said Monday.

The Global Positioning System would allow the Coast Guard to monitor tanker traffic through the use of receiver-transmitters called transponders, officials said.

Each tanker would carry a transponder that would be linked to an Air Force satellite. The transponder would be designed to set off an alarm aboard a tanker if the vessel went outside its channel, near a reef or toward some other form of danger.

It would also quickly let the Coast Guard know if a tanker is heading for trouble and where the vessel is, said Curt Spalding, acting director of the local environmental group Save the Bay.

"I think frankly that Narragansett Bay is an excellent place to test but in the long run the system would benefit more areas with higher volumes of

ship traffic," Spalding said.

The tracking system was developed by the Coast Guard at a Groton, Conn., research station and received a great deal of attention last year after the Exxon Valdez oil spill in March in Alaska and three subsequent spills that summer.

One of the three spills occurred at the mouth of Narragansett Bay on June 30, 1989, when the tanker World Prodigy hit a reef off Newport, R.I. The spill prompted the Rhode Island congressional delegation and Save the Bay to push for the tracking system to be tested in Narragansett Bay.

It had appeared that the system would possibly receive its trial in Prince William Sound, Alaska, site of the Exxon Valdez disaster, or another U.S. site, but a congressional conference committee last Thursday designated Narragansett Bay as the test location, officials said.

It was unclear when the experiment might begin if Congress approves funding for it. The program is part of a larger bill that would create a $1 billion oil spill cleanup fund, mandate double hulls on most new and existing oil tankers and barges within 20 years, and establish spill response teams in all 10 Coast Guard districts in the United States.

The Narragansett Bay experiment would be funded with part of the $27.3 million the bill sets aside for research and development.

#90211u1751 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Faced with a government leader held hostage in Trinidad and massacres in the war in Liberia, the Bush administration Monday laid out guidelines for U.S. military intervention in other countries.

The rules - described by a senior administration official speaking on the basis of no further identification - establish several basic tests that must be met before the United States will consider any direct military involvement:

-There must be a legitimate authority in control in the country involved, preferably a freely elected government.

-That legitimate authority must directly ask the United States for military intervention.

-The United States must be convinced that use of American forces will help the situation, not further complicate it.

-The United States will not intervene to impose a favored political client. With the waning of the Cold War, halting the spread of communism is no longer a persuasive reason.

State Department spokesman Richard Boucher articulated the evolving policy Monday in the case of Liberia, where government troops massacred 200 civilians in a refugee camp in Monrovia.

While calling on all parties to stop the bloodbath, Boucher said, ''The administration believes that it's not our role to intervene, to engage in peacekeeping or to impose a government or political system.''

Ultimately, he said, ''The only durable government in Liberia will be one that the Liberian people have freely chosen.''

In the case of Trinidad and Tobago, a senior official said, the government of Prime Minister Arthur Robinson is clearly in control, even though the prime minister himself was taken hostage by a rebel group with previous connections to Libya.

But the official said the government of Trinidad had not asked for U.S. intervention and the idea of direct U.S. military involvement had not been considered.

One senior official said the history of U.S. involvement in Lebanon has been a factor in limiting the U.S. policy on intervention. In 1983, when U.S. troops were sent to restore order and open Beirut airport, 241 Americans died in a terrorist bombing of a Marine barracks.

Lebanon is now cited by administration officials as a case where the United States would never intervene, even if asked by a legitimate authority. The Lebanese political situation has become so chaotic and complex it is beyond the ability of any outside power to correct, one official said.

The 1989 U.S. invasion of Panama was undertaken by President Bush because he feared a loss of American lives and that the regime led by Manuel Antonio Noriega would undercut the trend toward democracy in Central America.

Despite the capture of Noriega and the replacement of his government, the Panamanian episode remains a controversial one within the administration.

Secretary of State James Baker conceded the operation had negative reverberations globally, including the unintended bolstering of anti-Gorbachev ''hawks'' in the Soviet Union's military establishment.

#90211u1774 07/30/1990 ~United Press International
BISMARCK, ND (JULY 30) UPI - Sen. Kent Conrad, D-N.D., said Monday he would give the Treasury $2,000 in political action committee contributions

from the savings and loan industry.

According to Federal Election Commission records, Conrad received the $2,000 from the U.S. League of Savings Associations, a Washington trade organization that represents S&Ls in North Dakota. Conrad decided to return the money after he was asked about the contributions during a news conference in Bismarck Monday.

He said he did not know until last week that he received $1,000 from the S&L PAC after his 1986 election to the Senate and another $1,000 from the same PAC last year. "If people feel it's an issue, I'll be happy to give it back this week," Conrad said.

At first, Conrad was undecided about returning the money. "I must say that we've got in North Dakota a legitiamte savings and loan industry. There's not been fraud in this state. There's not been wrongdoing like we've had in these other states," he said. North Dakota has six S&Ls, two of which - in Bismarck and Minot - failed and were taken over by the government's Resolution Trust Corp.

Asked again about the contributions, Conrad said: "I received money that I just don't think that has any attachment to any wrongdoing. This is North Dakota. We've had a legitimate industry here, not legitimate in these other states." Then he decided, "It seems a reasonable thing to give it to the Treasury."

Sen. Quentin Burdick, D-N.D., has received $19,265 from thrift PACs between January 1981 and April 1990, according to the citizens' lobby group Common Cause. A Burdick spokeswoman said the senator has no plans now to return the contributions.

#90211u1775 07/30/1990 ~United Press International

GALVESTON, TX (JULY 30) UPI - Oil from a 120,000-gallon spill soiled an island in environmentally sensitive Galveston Bay Monday, despite efforts to contain and clean up crude leaking from two barges that collided with a tanker.

Coast Guard officials who flew over the spill area estimated its size Monday at 120,000 gallons, more than double their earlier estimate of 50,000 gallons.

''There are three areas of oil that have moved (from the collision site) '' said Coast Guard Petty Officer Dennis Schaefer.

One area extended about 4 miles eastward from the spill site with ribbons of oil sheen and heavy patches, he said. A second heavy patch about an

acre in size was concentrated along Redfish Island and the third patch stretched southwest of the accident site about a mile.

Skimmer boats were in place at all three sites to collect the oil. A vacuum barge also was at Redfish Island, roughly in the center of Galveston Bay, where oil already had stained beaches.

The Coast Guard also was trying to determine the source of oil that washed up on Stewart Beach, one of Galveston's main tourist beaches, on the Gulf of Mexico side of Galveston Island.

''The oil from this spill is not reaching any other beaches at this time. However, our mystery spill has reached Stewart's Beach,'' Schaefer said. ''It's approximately one-quarter to a mile in length. We have some reports of an inch to two inches thick.''

Samples of the oil were sent to a Connecticut laboratory for analysis, and the Coast Guard expected results by Tuesday. Officials do not believe the Stewart Beach oil was from the barge-tanker collision, Schaefer said.

All of the oil was pumped from one of two disabled barges Monday and workers were siphoning crude from a second partially submerged barge. Booms surrounded the sunken barge in an effort to contain some of the spill.

Booms also were set up to keep the oil from reaching Salt and Dickinson bayous, areas of saltwater marsh that are home to migratory birds and sensitive marine life.

Any oil reaching the Galveston Bay shore would have ''a horrible impact on fish-eating herons, egrets and pelicans,'' said Gary Clark, president of the Houston Audubon Society.

Shrimpers and fishermen also worried about the oil's impact on shrimp that live in the marshes until they grow enough to swim to gulf waters.

''If they're out there in that shallow water and it's all covered with oil it would virtually destroy them,'' said shrimper Jim Duderstadt. ''It would destroy an entire crop.''

The Houston Ship Channel was closed following the Saturday accident, and the Coast Guard said it could remain shut down until Wednesday. The Port of Houston Authority said 28 inbound and 30 outbound ships were stalled because of the shutdown.

An estimate of the financial impact of the channel closing was not immediately available, but port spokesman Lee Vela said it would be substantial.

Texas Water Commission Chairman B.J. ''Buck'' Wynne was to meet later Monday with federal officials to discuss the possible spraying of oil-eating microbes onto the spill.

The microbes, part of a process known as bioremediation, were used on a small portion of the 3.9 million gallons of light crude that spilled from the tanker Mega Borg in the Gulf of Mexico last month.

''It's not the same kind of oil spill we had with the Mega Borg,'' Wynne said. ''It's not the same kind of oil and it's not in the same place. We're going to have to evaluate the particular circumstances of this spill and compare it with the results we got the last time and make a decision if this type of technology is something we want to try in this instance.

''I think everything is being done that can be done, and I'm cautiously optimistic about this situation with the understanding this oil spill has occurred in a very, very bad place. It's almost worse than the Mega Borg in that it's occurred in the estuary system, which is very environmentally sensitive.''

State officials said earlier this month the microbes worked against the oil without harming the environment.

Three barges were being pushed by a tug toward Houston at 3 p.m. Saturday when two of the barges collided with the outward-bound tanker Shinoussa.

The 601-foot tanker, which was carrying 29,450 metric tons of jet fuel, was slightly damaged, but its double hull saved the Texas coast from a ''catastrophic'' explosion and spill, Coast Guard spokesmen said.

#90211u1792 07/30/1990 ~United Press International

MONROVIA, LIBERIA (JULY 30) UPI - Government troops stormed a Lutheran church and refugee camp Monday and massacred about 600 people - many of them women and children - in an outburst of intertribal killing, survivors of the attack said Monday.

The survivors said a group of 30 soldiers burst into St. Peter's Lutheran church on the outskirts of the capital at about 9 p.m. Sunday and butchered men, women, children and babies with knives, guns and machetes.

The survivors said Monday the soldiers used machine guns to shoot the door down and immediately opened fire on the ground floor, where as many as 2,000 people had taken refuge after fighting broke out in Monrovia three weeks ago.

''We thought they had come to ask us questions. Then they started killing, and everyone began screaming and trying to hide,'' said one man who hid in the roof of the church while the massacre was going on.

A group of soldiers then went to the upper floor and opened fire on about 1,000 sleeping refugees. The survivors said they saw soldiers butcher the men with knives while the women and children were shot with machine guns.

Soldiers ordered some women with their children who tried to flee to stand aside. Then other soldiers opened fire on them.

The soldiers were from President Samuel Doe's Krahn tribe, said the survivors.

Most of the slain refugees were members of the Gio and Mano tribes, which have formed the main support for the rebel armies that have fought their way to the base of the hill in Monrovia where President Samuel Doe is holed up in his heavily fortified executive mansion.

Most of Doe's troops are from his Krahn tribe and their allies, the Mandingos. Intertribal killings have occurred frequently during the six-month civil war.

In Washington, the U.S. government condemned the massacre of ''helpless and innocent'' Liberians. The government urged all sides in the civil war to ''forego a military solution,'' a spokesman said.

Reporters who visited the site of the massacre saw the entire floor of the church thick with blood stains. Bodies were huddled under the pews where people tried to hide. The bodies of 7- and 8-year-old boys lay draped on the church altar.

Beside the altar bodies lay in the corner of the dark building.

Dead women lay on the blood-stained floor with children still wrapped in shawls on their backs. The church crucifix had been thrown to the ground. Bullet holes riddled the ceiling.

''My people, help me. My son, where is my son. I beg you, don't leave me '' pleaded an injured woman who had been lain on the church steps.

A man nearby, his kneck slashed with a cutlass, called out for water.

Survivors were seen Monday afternoon being rounded up by government soldiers.

Witnesses said the survivors - who were mostly women and children - were moved from the building by soldiers who shot into the air.

They reported many Gio and Mano tribe members were ordered out of nearby houses where they had taken refuge and forced to move under heavy army guard towards a nearby beach.

There was no indication what happened to them after that.

The church compound was filled with the bodies of women and children brought outside after the massacre.

People passing the church were numb and speechless as they saw the rows of corpses.

One witness who visited the church compound in the Sinkor district of Monrovia earlier said he had seen bodies hanging from the window frames of the church building, apparently killed while trying to escape.

''I saw dead bodies all around,'' the witness said. ''This is genocide.''

The church is one of Monrovia's six Red Cross-sponsored refugee centers. Relief organizations had set up the refugee camps and allocated civilians to them, but were unable to provide them with protection.

The Red Cross has been unable to cross the battle lines to reach the injured, as the city is now divided between the warring parties.

There was no immediate comment on the massacre from the Liberian Red Cross society, nor from the International Committee of the Red Cross.

#90211u1804 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Questions about the views of Supreme Court nominee David Souter multiplied Monday when a liberal interest group revealed that he filed legal papers in a New Hampshire case calling abortion the ''killing of unborn children.''

People for the American Way, a group that was active in the defeat of Robert Bork's high court nomination in 1987, acknowledged that Souter did not write the legal brief, but noted he filed it on behalf of the state in his role as New Hampshire's attorney general.

Arthur Kropp, president of the group that favors abortion rights, said the language in the 1976 brief ''suggests a clear sympathy for an anti-abortion viewpoint. Clearly the Senate should ask Judge Souter to address himself to this document at his confirmation hearings.''

Souter was chosen last week by President Bush to fill the Supreme Court seat vacated by the retirement of liberal Justice William Brennan. Senate hearings on the lifetime position are to begin in September.

The announcement was the latest in a series of moves by interest groups and members of the Senate to try to pin down Souter's position on the controversial Roe vs. Wade decision that legalized abortion. Many believe that Souter's addition to the court could spell the end for the 1973 ruling.

Last week, it was revealed Souter wrote a letter in 1981, while he was a member of the New Hampshire Superior Court, that urged the state legislature not to enact a parental consent law for minors seeking abortions.

He said at that time that the law, which would have included a provision for a teenager to appeal to a judge to avoid having to get her parent's permission, would have forced judges to ''make fundamental moral decisions.''

The letter caused some anti-abortion groups to question Souter's position on the issue.

Bush, as he has from the beginning, brushed aside questions about Souter's stand on abortion, choosing instead to focus on his legal qualifications.

At a gathering of youth groups in the auditorium of the Executive Office Building Monday, Bush said ''we can't choose a justice based on some simplistic, they call it a litmus test, on one issue or another.

''It's a much broader responsbiility and I tried to have that in mind in this nomination. We have to choose the next Supreme Court justice on the basis of his inner core as a human being, on the strength of character as it informs his decision. Then I would also say his intellect, and his caring, and his thoughtfulness and his fairness and his faithfulness to the Constitution.''

People for the American Way said the 1976 brief in question, while acknowledging Roe vs. Wade, referred to abortion as the ''killing of unborn children.''

The brief was filed in the name of Attorney General Souter in a case involving efforts by the state to end state funding for abortion for poor women. Assistant Attorney General Richard Wiebusch drafted the brief, and although it was submitted in Souter's name, it was - as is customary - signed by the drafter.

The brief said that a ''requirement that the state of New Hampshire pay for all abortions performed on Medicaid recipients ... will be morally offensive to the thousands of New Hampshire citizens who do not wish their taxes to finance the killing of unborn children.''

According to Kropp, the ''brief's use of the phrase 'the killing of unborn children' as a synonym for the exercise of a constitutionally protected right can be source of little comfort for those of us who want to see that right protected by the Supreme Court.''

''No doubt,'' he added, ''the Senate will give Souter ample opportunity to

explain whether the brief fairly represents his views.''

Regardless, New Hampshire's effort to end state financing if Medicaid abortions was vindicated by the Supreme Court in 1977 in a case from Connecticut and again in 1980 in a case involving federal funds.

Other controversial actions by Souter during his tenure in the New Hampshire attorney general's office also have come to light.

One of his jobs was the prosecution of anti-nuclear activists for occupying the Seabrook nuclear power plant.

In 1978, as attorney general, he argued against a federal court injunction to block Republican Gov. Meldrin Thompson's order to fly flags on public buildings at half-staff on Good Friday. Souter claimed Thompson was seeking to recognize Jesus as a ''historical figure'' without endorsing Christianity and that the flag-flying plan was therefore ''secular.''

#90211u1826 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Defense Secretary Dick Cheney decided Monday to cut 13 of the 27 generals and admirals assigned to his office staff as part of a larger overall effort to trim the ranks of top military officers.

''With fewer generals and admirals, those who remain must be placed in positions of command and crucial military responsibility,'' Cheney said in a statement. ''We cannot afford to assign our most seasoned and experienced military officers to Pentagon staff jobs that could be handled by civilians or less senior military officers.''

To cut costs and reduce forces, Cheney ordered on June 27 the elimination of 78 of the military's 1,073 general and admiral positions over the next four years.

Monday's action specifies that 13 of those 78 positions should be cut from his own staff, which currently has 27 generals and admirals.

#90211u1890 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Great American Management and Investment Inc. said Monday it will spin off its Florida savings and loan as part of its $50 million stock sale to Hellman & Friedman, an investment banking firm.

Firstate Financial a Savings Bank, based in Orlando, Fla., will be distributed to GAMI shareholders under a July agreement between GAMI and a pair of Hellman & Friedman partnerships.

GAMI said in mid-July that Equity Holdings Ltd., an investment company indirectly controlled by Chicago investor Sam Zell that owns 92 percent of GAMI's shares outstanding, would sell two million shares at $25 a share to

Hellman & Friedman, of San Francisco.

The transaction, scheduled for completion August 22, will give Hellman & Friedman an 18 percent stake in GAMI, which is headquartered in Chicago.

Susan Obuchowski, a GAMI spokeswoman said that Firstate would be spun off because Hellman & Friedman "did not want to be a part of" the savings and loan industry, with its attendant business restrictions.

Obuchowski said Firstate had a book value of $12 million to $13 million. Its loan receivables equaled approximately $228 million as of April 30, while deposits totaled about $192 million.

Pending approval by the Resolution Trust Corp., the federal agency that oversees savings and loans, GAMI will likely issue Firstate stock to Equity Holdings and cash to GAMI minority shareholders.

Separately, Hellman and Friedman said in the SEC filing that if it believed that "further investment in (GAMI) is attractive, whether because of the market price of (GAMI') securities or otherwise, they may acquire additional shares of common stock or other securities ... to the extent and in a manner consistent with the purchase agreement."

A purchase agreement for the deal gives Equity Holdings and Hellman & Friedman the right to participate in future GAMI stock sales.

GAMI is a holding company for about 75 manufacturing subsidiaries that are divided into four different business segments, including air machinery (such as compressors), utility products, building and specialty goods, and process equipment. In the nine months ended April 30, the manufacturing segments had a total of $1.26 billion in sales.

LOS ANGELES (JULY 30) UPI - A one-time Mexican policeman who served as a bodyguard for Mexican drug lords was convicted Monday of aiding and abetting in the 1985 torture-slaying of U.S. drug agent Enrique Camarena.

In a blow to the prosecution, however, a federal jury acquitted Juan Jose Bernabe Ramirez, 31, of murdering Camarena and his Mexican pilot, Alfredo Zavala Avelar. Bernabe also was acquitted of conspiracy to kidnap the agent and his pilot.

He was found guilty of three counts: aiding and abetting in the kidnapping of Camarena, committing violent crimes in support of a racketeering enterprise - drug trafficking - and of being an accessory after the fact to the murder.

The verdict was announced on the 11th day of deliberations by the jury of six women and six men. It was the second round of verdicts returned in the case.

On Thursday, the jury convicted Honduran drug kingpin Juan Ramon Matta Ballesteros, 45, of three counts of kidnaping, conspiracy and committing

violent crimes to further drug trafficking. However, he, too, was acquitted of Camarena's murder.

After announcing the verdict Monday, U.S. District Judge Edward Rafeedie ordered the jury to continue deliberations on the fate of two remaining defendants.

The judge also ordered prosecutors and defense attorneys to make no comment on the case, which has been closely watched by the U.S. government and Mexico, until the remaining verdicts are rendered.

In secretly tape-recordered conversations with U.S. drug agents, Bernabe admitted helping drug lord Rafael Caro Quintero escape from Guadalajara after Camarena's murder in Guadalajara.

Caro is among several ranking drug traffickers now serving a long prison sentence in Mexico in the agent's murder.

U.S. Drug Enforcement Administration agents testified that Bernabe also admitted he was at the Guadalajara house where Camarena was interogated and tortured for more than 30 hours before being killed by drug traffickers in retaliation for raids on huge marijuana plantations.

Bernabe, who admitted he was a bodyguard for the drug traffickers, testified that he visited the house with drug baron Ernesto Fonseca Carrillo, but never went inside, where the beatings of Camarena and Zavala occurred.

Camarena's ribs were broken, his skull fractured at numerous points and a hole was drilled through his head, apparently with a screwdriver, a doctor testified.

In all, 22 people have been indicted in the United States in connection with the Camarena murder, including three men convicted after a 1988 trial in Los Angeles.

Since the convictions of Fonseca and Caro last year in Mexico last year, Mexico has maintained all those responsible for Camarena's murder have been brought to justice.

But, to the outrage of Mexican officials, prosecutors in Los Angeles presented to the jury paid informants who implicated high-ranking Mexican officials in the plot to abduct Camarena, including Javier Garcia Paniagua the former head of PRI, Mexico's ranking political party, as well as a former Cabinet member. Paniagua is currently chief of police in Mexico City.

Among those Mexico has refused to extradite for trial are the former head

of Interpol in Mexico and a former director of the Mexican Federal Judicial Police.

The two remaining defendants on trial are prominent Mexican businessman Ruben Zuno Arce, the brother-in-law of former Mexican president Luis Echeverria, and Javier Vasquez Velasco, another alleged bodyguard for drug traffickers.

A separate trial has yet to be scheduled for a fifth defendant, Mexican gynecologist Humberto Alvarez Machain, who was abducted from his Guadalajara office in April by what the Mexican government alleges were bounty hunters and arrested by DEA agents in Texas.

(JULY 30) UPI - A Bush administration official today said the United States will NOT intervene militarily in another country unless that nation's legitimate government asks for such intervention. The issue took on urgency because both Liberia and Trinidad are facing armed rebellions.

Residents of Monrovia, Liberia, say government troops stormed a church today and massacred about 600 people. Survivors said the soldiers butchered men, women, children and babies in an intertribal bloodbath.

A Los Angeles jury today convicted a former Mexican policeman for playing a part in the 1985 torture and murder of U-S drug agent Enrique Camerena. However, the jury acquitted another of five defendants charged in the murder.

The Utah chapter of the American Civil Liberties Union filed suit today in federal court seeking to end all prayer in state public schools. Utah's governor wants to fight the suit... saying decisions on prayer should be up to local school boards.

The value of the U-S dollar took a rare fall in Peru today... where banks are closed while the government puts together an economic recovery plan. The bank closures have created a shortage of the national currency.

The Coast Guard is trying to learn where a second oil spill in Galveston

Bay, Texas, is coming from. A collision of two barges has dumped 120-thousand gallons of oil into the bay... but officials say some oil is coming from another source.

Pennsylvania authorities say five people... including three children... were killed when a fire swept through a Lancaster row house that was NOT equipped with smoke detectors. State police say the fire was the work of an arsonist.

Veteran movie actor Richard Widmark is recovering from a run-in earlier today with a lawn mower. Connecticut doctors are treating the actor for leg injuries sustained while he was mowing his lawn at his home in Roxbury Connecticut.

Connie Chung's C-B-S news program ''Face to Face'' will be pared down from a weekly show to a series of specials. Chung says she wants to trim her work schedule so she can concentrate on having a baby with her husband, Maury Povich.

Zsa Zsa Gabor completes her 72-hour sentence today in a Los Angeles area jail, where she was sent for slapping a Beverly Hills policeman last year. The actress didn't exactly serve hard time, though. Her husband brought her pillows, a silk comforter and ice cream.

#90211u1998 07/30/1990 ~United Press International
WARSAW, POLAND (JULY 30) UPI - The former Communist government foiled a 1983 plot to kill Pope John Paul II but did not disclose the scheme to the public, Polish television reported Monday.

The television report quoted law Professor Krystyna Daszkiewicz as saying the plot was disclosed by former Communist Gen. Zenon Platek at the 1985 trial of four former secret agents who were convicted of killing pro-Solidarity priest Jerzy Popieluszko. Daszkiewicz is about to publish a book about a coverup.

Daszkiewicz told Polish TV that Platek testified in court the Interior Ministry had discovered ''operational signals'' about a plot to assassinate the pope when he traveled to Poland in 1983.

''There were some persons with arms and explosives arrested,'' Daszkiewicz quoted Platek as saying.

Daszkiewicz suggested one or more of the four convicted agents may have been involved in the plot and someone in the Interior Ministry in 1983 may also have been linked to the attempt because forged passes allowing the bearer to come close to the pope were found in the safe of Adam Pietruszka one of four agents.

She said Pietruszka explained he wanted some people to test how good the forged passes were by trying them with guards in sectors close to the pope.

Daszkiewicz said the court in the northern city of Torun did it not pursue the revelation. She believed this may have been on orders of Communist authorities.

Several reporters, including this writer, who covered the '83 trial, do not remember any such disclosure by Platek. Some thought the revelation may have been presented during a closed partion of the trial.

Daszkiewicz said the Solidarity government should investigate the plot the court revelations.

''The following questions must be asked: Who was arrested? What were the names of those arrested? What arms did they have? Was an investigation conducted?'' she said.

''Where are the documents? '' she asked.

Observers speculated that the plotters could have come from one of the former East bloc countries whose intelligence services were connected with the Soviet secret police.

They reasoned that any plot launched in the West would have received ''huge publicity.'' There was no publicity so they thought its roots must have been in the East.

The office of the Solidarity Interior Minister Krzysztof Kozlowski inherited files that were damaged from the communists, Daszkiewicz said. Some suggested this would hamper any potential investigation.

A Bulgarian official was kept in custody for a long time by the Italian authorities on charges of having links with the Turkish terrorist who fired at the pope in 1981. Some believe the KGB may have been behind the attempt.

The pontiff visited Poland for the third time in 1987 and is scheduled to come again in 1991.

#90211u2028 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - There are 2.14 million farms in the United States, a drop of 1 percent from last year, the government said Monday in reporting the latest installment in a long-standing trend toward fewer farms.

Only four states - California, Georgia, North Dakota and Utah - showed increases while 31 states, including nearly every state in the Midwest and the Northeast, showed losses. Overall, farm numbers were down by 27,370 farms.

As part of the annual report, the Agriculture Department said the average farm size increased to 461 acres this year, up four acres from 1989. There are 988 million acres in farm use, a drop of 3 million acres.

The size of the average farm has doubled since 1950, when the government began estimating how much land was devoted to farm use.

Since the Great Depression, when one-fourth of the U.S. population lived on farms and there were 6.8 million farms, the number of farms has been declining. Slightly less than 5 million people live on farms nowadays, according to the Census Bureau.

Observers have attributed the decline in farm numbers to mechanization, use of hybrid seeds and farm chemicals to increase production, and shifts in farm profitability, among other factors. The Agriculture Department report did not suggest causes for the latest shifts.

Illinois, Indiana and North Carolina each lost 3,000 farms since last year the largest losses in the nation. Fifteen states held even with last year.

Texas has the largest number of farms for any state, 186,000, the same as last year. Missouri was No. 2 with 108,000 farms, down 1,000 from last year, and Iowa was third with 104,000, down 1,000.

California gained 1,000 farms from last year for a new total of 85,000 while Georgia was up 1,000 to total 49,000; North Dakota up 500 for a total of 34,000; and Utah, up 200 for a total of 13,200 farms.

The number of small farms, 1.019 million, was down 2.7 percent from last year, while medium-size farms decreased nearly 1 percent to 806,200 and the number of large size farms, 317,700, was up 2.5 percent.

In 1989, the number of large-size farms dipped slightly while medium-size farms grew slightly in numbers.

Agriculture Department studies indicate medium-size farms showed the highest attrition rates during the 1980s compared to other classes of farms. One analysis said medium-size farms accounted for 75 percent of the drop in farm numbers from 1982-1987.

In a report issued last month, the Economic Research Service said the figures ''reinforce the concept of an emerging dual structure'' in agriculture. One portion would be large commercial farms which provide most agricultural production. The other would be small farms, ''existing primarily as a means of preserving a rural lifestyle for operators and their families.''

However, medium-size farms account for 37.4 percent of all U.S. farms and 40.3 percent of the farm land. Small farms, those with less than $10,000 in sales annually, account for 47.6 percent of U.S. farms but have only 10.1 percent of the land.

Large farms, with sales exceeding $100,000 a year, are 14.8 percent of the U.S. farm total but operate 49.5 percent of the land. Their average size exceeds 1,200 acres.

Farm numbers fell by about 11 percent during the 1980s. The 1970s recorded a 17 percent drop, the 1960s a 25 percent reduction, the 1950s a 30 percent decline and the 1940s an 11 percent decrease.

#90211u2033 07/30/1990 ~United Press International
BETHESDA, MD (JULY 30) UPI - The first government-authorized attempts at human gene therapy cleared a crucial hurdle Monday, paving the way for sick children and cancer patients to possibly start receiving the pioneering treatment by year's end.

By a 12-1 vote, the National Institutes of Health's Human Gene Therapy Subcommittee approved a request by NIH researchers W. French Anderson and Michael Blaese to use gene therapy to treat children stricken by the extremely rare immune disorder that afflicted the famed Texas ''bubble boy.''

The committee also unanimously approved a plan by Dr. Steven Rosenberg of the National Cancer Institute to insert a gene that codes for tumor necrosis factor - a substance that has dramatically shrunk tumors in mice - into tumor-fighting immune cells removed from cancer patients, multiplied in the test-tube and then returned to the patients' bodies.

Jeremy Rifkin, president of the non-profit Foundation on Economic Trends in Washington, criticized the decision as premature.

''We have a technology that is speeding into application without any of the appropriate ethical and social issues being raised,'' said Rifkin, who has long called for tighter regulation of genetic research to prevent abuses.

Rosenberg said he could begin treating about five patients with melanoma, a deadly type of skin cancer, ''within a month'' of receiving final approval from the Food and Drug Administration.

Unlike Anderson's work, Rosenberg's is designed to look only at the safety of the treatment, not its effectiveness. But the researcher, who eventually hopes to expand his study to 50 melanoma patients, said: ''I wouldn't be doing this if I didn't think it would work.''

Although both researchers' hope to use gene therapy initially to treat relatively rare diseases, the work could open the door to developing a new breed of treatments for a wide variety of illnesses.

Every human has about 100,000 genes, which contain the blueprint for everything from eye color to the risk of developing certain diseases. Gene therapy involves inserting genes with correct information into cells that contain defective genes or inserting new genes that code for disease-fighting substances.

''This committee historically has been our largest obstacle,'' Anderson

said, adding that he was witholding celebration until the full 25-member Recombinant DNA Advisory Committee votes on the plan Tuesday.

The gene therapy plan must also get the nod from the director of NIH and the FDA. But Anderson said clearing the NIH advisory panel was the most crucial hurdle.

If no further roadblocks are encountered, Anderson said he expects to start gene transfers into humans by late fall.

The NIH team wants to correct a rare childhood immune system deficiency, caused by a defective gene's failure to code for an enzyme called adenosine deaminase, by insering correct copies of the gene into patients' blood cells.

The rare disease affects no more than 20 children worldwide at any given time. In the past, some affected youngsters have been forced to live in plastic bubbles for protection against life-threatening infections. Most such children now undergo bone marrow transplants or receive injections of the missing ADA enzyme.

Anderson's team plans to perform gene therapy on three to four children annually who do not have siblings who can donate bone marrow, and who are not responding well to enzyme replacement.

The proposal has gone through more than three years of review and has been slowed by objections that gene therapy would open a scientific Pandora's box and perhaps lead to ethically questionable attempts at genetic engineering.

In 1980, without the government's blessing, Dr. Martin Cline from the University of California-Los Angeles unsucessfully used gene transplant techniques on two women in Italy and Israel who had an inherited blood disorder.

The NIH severely reprimanded Cline, and there has been an unofficial moratorium on human gene therapy experiments since.

Last year, Rosenberg and Anderson inserted genes with no treatment value into experimental cancer-fighting cells to help track where the cells went in a patient's body.

After the years of exhaustive review of the safety and merits of the gene treatment plan, committee member Dr. Charles Epstein of the University of California-San Francisco said: ''We're at a point where we'd like to see if it works or not.''

#90211u2055 07/30/1990 ~United Press International

PORT-OF-SPAIN, TRINIDAD (JULY 30) UPI - The government and Moslem rebels struck a deal Monday granting amnesty to the insurgents in return for the release of Prime Minister Arthur Robinson and other hostages, news reports said.

The deal was announced after government troops earlier Monday attacked the state television station while the leader of the Moslem coup attempt was believed inside, leaving the building in flames.

Heavy gunfire also erupted near the Red House, or Parliament building, where the rebels had been holding Robinson, 63, and at least 19 Cabinet officials and legislators since the coup attempt began Friday evening in Trinidad and Tobago, a two-island nation in the Caribbean 8 miles north of Venezuala.

''Trinidad and Tobago Defense Force says an agreement granting Muslim rebels an amnesty has been reached and that the hostages, including Prime Minister A.N.R. Robinson, will be released shortly,'' the Caribbean News Agency, or CANA, reported.

CANA quoted Trinidad Army spokesman Ralph Brown as saying the agreement was reached Monday afternoon.

CANA quoted Brown as saying the agreement calls for the army to escort Yasin Abu Bakr - the leader of the 300-strong Libyan-backed Jamat al Muslimem group that staged the coup attempt Friday evening - from the state television station to his commune in Trinidad's northwest.

After Bakr is safe, the army was to go to Parliament to free Robinson and the other hostages, Brown was quoted as saying.

The rebels holding Robinson had insisted since Sunday that an agreement was being worked out for Robinson to resign and be replaced by a transition government leading to early elections. It was not immediately clear if Monday's agreement included those provisions.

In an impassioned speech on state-run radio over the weekend, Abu Bakr accused the government, which was elected in 1986, of corruption and gross mismanagement of the Trinidad and Tobago economy.

Caribbean experts in Washington traced the discontent in Trinidad and Tobago to the collapse of the price of oil, a primary export, in the early 1980s, leading to the sudden imposition of fiscal austerity.

''They got rich quick and got poor quick. There's no better formula for discontent,'' a State Department official said.

But the official said there had been a ''tradition of democratic government since independence from Britain in 1962.''

''There's no reason to believe there's (widespread) discontent with the system,'' he said. ''The discontent is with the government.''

Larry Birns, director of the Council on Hemispheric Relations, said austerity measures imposed as a condition of aid from the International Monetary Fund had led to the loss of Robinson's popular mandate.

''Economic conditions are so poor they turn to violence,'' he said, saying unemployment was at least 30 percent.

Only about 6 percent of the country is Moslem. About a third of the residents are Roman Catholic and a quarter are Hindu.

Trinidad and Tobago gained independence from Britain in 1962. The country's English-speaking population is about 40 percent black and 40 percent Indian, with the rest made up of whites and other ethnic groups.

The government had imposed a 24-hour curfew on parts of the capital of Port-of-Spain as combat broke out Monday morning.

A U.S. administration official in Washington said Jamaica - like Trinidad and Tobago, a former British colony - had sent troops to Barbados, northeast of Trinidad, apparently placing them in position to intervene if needed. The official said Jamaica did not consult with the U.S. government.

Before the agreement was announced, government troops had attacked the state-run television station, which was held by the Moslem rebels. The station was set ablaze and a thick gray smoke arose from the building, residents said.

Abu Bakr was believed to have been inside the building at the time of the attack.

At the Parliament building, where Robinson was being held, gunfire was heard and some reports said troops surrounding the building shot at rebels inside. One report said unspecified ''foreign troops'' were involved in the attack, but the report could not immediately be verified.

#90211u2060 07/30/1990 ~United Press International

LONDON (JULY 30) UPI - A car bomb exploded and killed a prominent Conservative Party member of Parliament and strident critic of the Irish Republican Army as he moved his car to leave his home Monday morning,

officials said.

Police said Ian Gow died as ambulance workers tried to remove the 53-year-old politician from the wreckage of the vehicle at his home in the East Sussex town of Hankham, 50 miles south of London.

There was no immediate claim of responsibility, but the IRA this year has staged 12 bombings across England in its drive to end British rule in Northern Ireland.

George Churchill-Coleman, the head of Scotland Yard's anti-terrorist squad, said the bomb contained between 2 and 5 pounds of high explosives, and was planted on the bottom of Gow's car on the driver's side.

A switch detonated the device as Gow moved the car to leave the driveway, he said.

Churchill-Coleman said Gow's name was on a hit list of about 100 people found during a raid last year on an IRA hideout in London's district of Clapham, and that the attack bore hallmarks of an IRA assault.

If the radicals staged the attack, Gow would be the fourth British politician killed by the IRA.

Prime Minister Margaret Thatcher, a personal friend of Gow, visited the site and met his widow, Jane.

''Many members of Parliament have been given advice to have a special regard for their safety,'' said a visibly stricken Thatcher. ''I make one plea that they take that advice very seriously indeed for themselves, their family and their staff. I think they are not so careful after the time.''

Earlier, at Downing Street she said the death of Gow, her personal parliamentary secretary for four years, was ''a grievious loss both to me personally, and to the parliamentary life in this country.''

''He was the first to say that terrorists must never be allowed to triumph no matter how barbarous their methods,'' said Thatcher.

''If he could speak to me now, he would say, 'You fight that battle against them. You bring them to justice. You see that they are properly condemned and found guilty for what they have done,''' she stated. ''And that is how we will carry on.''

Gow was a strident critic of the IRA, and an obvious target as chairman of the Conservative Party's backbench committee on Northern Ireland, a body that advises the government on policy toward the disputed region.

''Their campaign is totally futile. It is causing great misery, and it will never, never win,'' Gow said last Tuesday about the IRA after a land-mine attack that left a Roman Catholic nun and three police officers dead.

''These matters are as odious as they are futile,'' he said. ''Once again, wives have been turned into widows and children into orphans, and to what purpose?''

Party members said Gow, who was married with two sons, knew he was a likely target of the IRA.

''He spent a great deal of his time in the full knowledge that this could happen,'' said Matthew Palmer, chairman of the London's Young Conservatives.

Gow was elected as a representative for Eastbourne in 1974. He made headlines in 1985 when he quit as a minister of the Treasury to protest government moves to reach an accord with Dublin on Northern Ireland. He believed the agreement giving the Irish Republic a say in the affairs of Northern Ireland would only prolong the protracted conflict.

His action established his reputation as an honorable politician. Gow was firmly in the right wing of the Conservative Party and seen as one of its rising stars.

Politicians from across the spectrum condemned his murder.

''He held his views with sincerity and great courage,'' said Neil Kinnock, the leader of the main opposition Labor Party. ''In this democracy, people should not be daunted by what has happened to Ian Gow.''

''This is an attack not on the British establishment but on democracy itself,'' said Paddy Ashdown of the centrist Liberal Democrats. ''Whatever outrage they commit cannot deflect us from our determination to defeat terrorism, defeat the IRA and bring peace to Northern Ireland.''

In Washington, State Department spokesman Richard Boucher said the United States condemns Gow's ''senseless murder.'' Boucher noted Gow had been an outspoken critic of the IRA and said the United States would ''continue to work with the United Kingdom and other nations to fight against international terrorism.''

#90211u2079 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - President Bush may have more in common with retired liberal Justice William Brennan than he realizes.

Bush, in promoting David Souter to succeed Brennan, told a gathering of youth groups at the Executive Office Building Monday that the country is facing a period of dramatic change and the Supreme Court must be prepared to adapt.

''You know America is going to change tremendously over the coming decades and technology may really make this world unrecognizable from today's standards,'' he said. ''So we can't even imagine the variety and the complexity of the decisions that the next Supreme Court is called on to make.''

Bush went on to predict that Souter ''will serve us all fairly and wisely and well. ... He will bring to this country experience, informed impartiality and an admirable moral compass that will guide us through the changes and crises that lie ahead.''

Bush's comments recalled Brennan's remarks in October 1985 that the Constitution and the court must adapt to a changing world.

''We look to the history of the time of framing and to the intervening history of interpretation. But the ultimate question must be, what do the words of the text mean in our time. For the genius of the Constitution rests not in any static meaning it might have had in a world dead and gone but in the adaptability of its great principles to cope with current problems and current needs,'' Brennan said.

Brennan also said that those ''who would restrict claims of right to the values of 1789 specifically articulated in the Constitution turn a blind eye to social progress and eschew adaptation of overarching principles to changes of social circumstances.''

At the time of Brennan's remarks, the Reagan administration was actively promoting the idea that the only ''reliable guide for judgment'' was the ''original meaning of the constitutional provisions and statutes.''

The call for viewing the Constitution with the ''original intention'' of the Founding Fathers has been a repeated cry of conservatives seeking to curb the power of the federal judiciary. If judges restricted themselves to the original intent, they reason, courts would never become involved in such issues as abortion and affirmative action.

On the other hand, if the court limited itself to concepts of the late 18th century, the justices never would have considered limits on wiretapping or ruled that citizens have the right to videotape television programs.

MOBILE, AL (JULY 30) UPI - President Bush Monday endorsed a proposal by the nation's governors to create a bi-partisan panel to measure the country's progress in education, but he sidestepped another proposal to form a commission to study the causes of the savings and loan debacle.

"I want to commend your executive committee for recommending the establishment of a bipartisan panel that will determine how to measure progress ... toward these education goals during the '90s," Bush said in a telephone call broadcast to the National Governors Association luncheon.

The president called on the governors to "continue the partnership" begun at last year's "education summit," where state and federal officials established objectetives to improve the quality of U.S. schools.

The governors' nine-member executive committee voted to create a bipartisan panel to determine how to measure the nation's progress toward implementing six education goals, including making American students No. 1 in math and science, increasing the adult literacy rate and attaining a national high-school graduation rate of 90 percent. The panel's first report card to the nation is due in September 1991.

The group will include six governors appointed by the chairman of the NGA - no more than three from the same party, four Bush appointees and four members of Congress who do not have a vote in the proceedings. "We appreciate your partnership in this educational effort," Gov. Bruce Gardner of Washington, incoming chairman of the NGA, told the president,

The 45 governors attending the convention spent much of Monday in committee meetings, discussing such topics as improving American competitiveness in world trade, economic cooperation with Europe and environmental concerns.

Earlier, the governors called on the government to make a thorough investigation of the savings and loan disaster and criticized Washington's plan to limit the amount of state and local taxes that can be deducted from federal taxes.

They adopted a position Sunday calling for the creation of a commission to study the cause and impact of the multibillion dollar savings and loan debacle and to come up with ways to prevent another one.

"Realistically, the president and Congress aren't going to convene a commission to oversee what they are doing but they probably should," said Gov. James Blanchard of Michigan, who described the committee's stand as "a vote of no-confidence in federal action at this point." "The people in this country feel like they're getting the shaft," he said.

White House chief of staff John Sununu tried to reassure the governors by saying the federal government was working to close the worst thrift associations and prosecute those responsible for their fall.

#90211u2099 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - A nationwide sweep by the U.S. Customs Service has netted more than 650,000 toy gun imports worth $900,000 because the replicas look too much like deadly weapons, officials said Monday.

The latest seizure was made July 5 in Los Angeles when agents confiscated 12,000 toy rifles from an undisclosed location, said Ed Kittredge, a spokesman for the Customs Service.

Kittredge was unable to provide any other details about the Los Angeles case, but said seizures have also been made in Boston, Seattle, San Juan and other major ports since April.

The toy guns, which range from cheap water pistols to costly authentic collectors' replicas, violate a federal law enacted last year that requires markings to distinguish the toys from real weapons.

The markings usually consist of a bright orange plug permanently fixed in the muzzle or a bright orange band around the end of the muzzle, the Customs Service said.

"The new law is intended to prevent fake firearms from being used in assaults and robberies," the agency said. "There have even been instances when police officers have fired on people who were threatening them with what turned out to be fake weapons."

Kittredge said the guns would probably be destroyed unless the importers agreed to bring the toys into conformity with the law.

(JULY 30) UPI - People who say they survived an attack by government soldiers in Liberia describe a massacre that left 600 people dead. The witnesses say troops burst into a Lutheran church last night in the capital of Monrovia, and opened fire with machine guns. The soldiers then allegedly went to an upper floor and opened fire on about one-thousand sleeping refugees. Most of the refugees were members of the two tribes which support rebel armies.

Polish t-v reports say the former Communist government foiled a 1983 plot to kill Pope John Paul, but kept it secret. The report quotes a law professor as saying the plot was revealed in a 1985 trial of four former secret agents who were accused of killing a pro-Solidarity priest. Italian police charged a Bulgarian triggerman in a 1981 attempt to assassinate the pontiff.

Senate Democrats and Republicans are trying to haggle out campaign finance reform. Months of negotiations have made little progress... so the parties decided to take the fight to the Senate floor today. Democrats did adopt the Republican plan to abolish all political action committee contributions. The Dems also want to put a limit on spending... but the G-O-P is fighting that.

Texas Coast Guard officials say two barges stranded in the Houston Ship Channel have leaked some 120-thousand gallons of oil... twice as much oil as originally thought. The new estimate comes as workers try to transfer the oil from the second, partially submerged barge. The spill occurred Saturday when the barges collided with a Liberian tanker.

A Texas pilot who flew supplies to Contra rebels in Central America testified today the supply planes were easy targets that lacked the proper equipment. The pilot testified on behalf of Eugene Hasenfus , who was shot down over Nicaragua in 1986 during a Contra supply flight. Hasenfus has filed a civil suit against the C-I-A-connected Southern Air Transport and Richard Secord ... saying they broke promises to supply equipment and pay legal expenses.

#90211u2114 07/30/1990 ~United Press International

NEW YORK (JULY 30) UPI - The dollar's slide continued Monday in New York trading as a skeptical foreign exchange market digested weak U.S. economic indicators and cast a jaundiced eye on the burgeoning savings and loan debacle.

Currency traders said the dollar, already under pressure after the release of feeble gross national product figures last week, was further depressed by news the S&L cleanup could cost $100 billion in fiscal 1991.

L. William Seidman, chairman of the federal Resolution Trust Corp. overseeing the thrift bailout, told Congress Monday of the heavy requirement to keep the RTC operating and to reimburse depositor losses.

"There has been a lot of emphasis placed on the S&L (situation), and it comes on the back of other bad news for the U.S. economy," said Audrey McNiff, a vice president for corporate trading with the Hongkong & Shanghai Banking Corp.

In late New York trading, the dollar was quoted at 1.6040 German marks, down from 1.6112 marks Friday, and at 147.80 Japanese yen, down from 149.10.

Swiss Bank Corp. trader John Nasti said the dollar found some buyers

whenever it fell below 1.6030 marks and 147.80 yen. But when these buyers "get taken out of the market," the dollar could fall again, he said.

McNiff said sentiment on the dollar is bearish given economic prospects, the nervous stock market and the S&L burden. Even the yen, which had been weakened by Japanese domestic problems, is gaining against the dollar. "We talk about some of the scandals which have been facing the Japanese," she said. "They pale compared to the S&L catastrophe."

Mideast oil turmoil cast a pall over the yen last week, but now there is some skepticism as to whether the OPEC cartel can make oil prices stick at higher levels, said McNiff. So the impact on heavy importer Japan could be minimal.

Other New York dollar rates: 1.3595 Swiss francs, off from 1.3620; 5.3700 French francs, down from 5.3950; and 1,174 Italian lire, down from 1,179.50. The British pound climbed to $1.8460 from $1.8380.

In Europe, the dollar, still smarting from Friday's U.S. gross national product data, closed weaker against the major European currencies.

Martin Kay of Shearson Lehman Hutton's London office said players are coming to the conclusion the Federal Reserve, the U.S. central bank, will have to bring short-term U.S. interest rates even lower to stave off a recession.

"There's no strong demand for the dollar in sight. Its going to continue to test the downside for a while yet," he predicted.

The dollar closed lower in Frankfurt, at 1.6085 marks against 1.6222 at Friday's close, and in Zurich, at 1.3630 Swiss francs compared to 1.3655 late last week.

In London, the pound moved up on the dollar by almost a cent, to $1.8440 against $1.8345 at last week's close. Dealers said the dollar was boosted by high U.K. interest rates, currently at 15 percent.

The U.S. unit declined in Paris, Brussels and Milan, to, respectively, 5.3975 French francs vs. 5.4375, 33.03 Belgian francs vs. 33.29 and 1,180 lire vs. 1,187.80.

The dollar's close against the Italian currency was the lowest fixing since January 1988, when it was trading at 1,166.50 lire.

Earlier in Tokyo, the dollar plummeted against the yen on disappointment at the GNP data, ending at 148.60 yen against 150.75 amid speculation U.S. interest rates would be declining.

In Zurich, gold moved up to $367.50 ounce against $367. But the precious metal fell in London to $366.75 an ounce against $367.50.

Republic National Bank in New York closed cash gold at $368 an ounce, up from $367.50 at Friday's close. The New York Commodity Exchange settled August gold contracts at $367.80 an ounce, down from $368.

Silver closed unchanged in Zurich at $4.85 an ounce but rose in London to $4.85 an ounce vs. $4.84 last week.

Republic closed cash silver at $4.825 an ounce, down from $4.85. Comex silver contracts for August closed at $4.803 an ounce, down from $4.831.

WASHINGTON (JULY 30) UPI - The Federal Reserve Board said Monday is approved an application by First Regional Bancorporation, of Hartford, Conn., to provide private placement of securities and offer advisory services.

A private placement, also known as a direct placement, is the sale of an entire issue of stock to a small group of investors.

The Fed said the investment and advisory activity will be conducted through a subsidiary, First Regional Investcorp, also of Hartford. The parent corporation has assets $108.9 million.

The advisory services will include advice on mergers, acquisitions, divestitures, reorganizations and loan syndications, as well as business valuations, financial feasibility studies, and tender offer evaluations.

#90211u2128 07/30/1990 ~United Press International

WARSAW, POLAND (JULY 30) UPI - Poland wants the Soviet Union to interrogate a former secret police major who signed execution orders in

1939 for thousands of Polish officers murdered in the Katyn forest, the official news agency PAP said Monday.

PAP identified the former Red Army officer as Maj. Pyotr K. Soprunenko of the NKVD, predecessor of the KGB. It said the Polish Justice Ministry learned he now resides in Moscow.

''Justice Minister Aleksander Bentkowski asked Soviet Public Prosecutor Alexandr Sukhorev to interrogate Soprunenko,'' PAP said.

The ministry also asked that the questioning be carried out in the presence of a top prosecution official.

Soviet authorities officially admitted in April - after 50 years of vehement denials - that Russians killed some 4,500 Polish officers captured in 1939 when Russia and Nazi Germany attacked the country.

The crime and the secrecy surrounding it became a major obstacle to reconciliation between Poles and Russians despite the officially good relations between the Soviet Union and Poland, which was ruled by communist governments until last year.

Earlier this year, Poland was given files related to the crime but there had been no information about witnesses still alive who could testify on how the killings had actually been carried out.

The officers, captured by the Russians, had been kept in a Russian POW camp in Starobielsk but were later transported by train to the Katyn Forest, near the city of Smolensk in the Russian Republic, where they were shot in the back.

Following the outbreak of Soviet-German hostilities in 1941, the Nazis publicized the massacre when they found evidence of it, but the Soviets insisted the atrocity was committed by the Germans.

Successive Polish communist regimes repeated the Russian version of the Katyn Forest incident over the years.

Katyn has become the symbol of the martyrdom of Poles in the Soviet Union. In addition to the estimated 4,500 officers from the Starobielsk camp, about 10,500 other Polish army and police officers were killed by the NKVD in Katyn Forest.

WASHINGTON (JULY 30) UPI - Telecommunications company US Sprint said Monday it has requested a price reduction for high-speed data transmission services in its FTS2000 service for the federal government.

The price reduction, if approved by the General Services Administration, would be the seventh time the company has lowered its prices on various FTS2000 services, Sprint said.

A company spokesman said the amount of money the government saves with the price reductions was difficult to quantify. The figure depends on the volume of a service used by each agency, she said.

Gary Forsee, chief operating officer of Sprint's network systems division, said the company was able to reduce prices for a number of services because of changes in the marketplace and greater-than-anticipated call volumes.

"FTS2000 must offer agencies the most advanced features and services at costs that are competitive with those in the commercial marketplace," Forsee said.

In the last 13 months, GSA has granted six other requests by Sprint for

price reductions on several other services. US Sprint is a unit of United Telecommunications Inc. of Kansas City, Mo.

#90211u2133 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - Senate Democrats and Republicans renewed their political battle Monday on campaign finance reform still ''far apart'' on limiting candidate spending - the divisive partisan issue that has repeatedly scuttled the legislation.

Despite months of high-level negotiations, Democrats and Republicans failed to find a bipartisan common ground on spending ceilings and decided to fight it out in the Senate chamber.

Proposals and counter-proposals narrowed differences on several parts of the legislation, with Democrats adopting at the last moment the Republican plan to abolish all political action committee contributions.

Opening statements by the two Senate leaders, Democrat George Mitchell and Republican Robert Dole, showed the two sides no closer on putting limits on candidate spending and no indication the differences can be bridged.

''We remain far apart on the basic issue of spending limits,'' Mitchell said. ''We cannot give up on spending limits. That is the key to real reform.''

Dole said, ''The real culprit is not spending but the source of the funding. It's the source - not how much - the source.''

The Democratic proposal would set voluntary spending ceilings for Senate candidates, ranging from $950,000 to $5 million depending on the size of the state. The limit could be exceeded by 25 percent with in-state contributions of $100 or less.

Candidates who accept the voluntary spending limits could get taxpayer money if his or her opponent exceeds the ceiling. They also would get broadcast vouchers equal to 20 percent of the general election limit and lower mail costs.

The Republican proposal has no spending limits but ''flexible fund-raising targets'' based on the voting age population in each state. Candidates could get unlimited contributions from in-state sources and unlimited contributions of $250 or less from outside the state.

No contributor who does not live in the candidates' state could give more than $500. The current cap on contributions to a single candidates is $1,000.

Both Republicans and Democrats would ban political action committee donations and provide candidates with low-cost broadcast rates. The competing plans also have several provisions dealing with party activities.

The last major attempt to enact campaign finance reform came in 1988 and was stymied by a Republican filibuster. Despite eight attempts, the Senate refused along party lines to cut off the debate.

Mitchell said, however, that the ''situation is different'' than it was two weeks ago because ''the American people have begun to realize how bad the system is. It must be changed.''

''The only meaningful way to reform the system is spending limits,'' Mitchell said. ''Anything else only gives the appearance of reform.''

Dole said Republicans have ''walked to extra mile'' to reach a bipartisan agreement, adding: ''It is still my hope there will be some way to come together.''

But Dole said spending ceilings would ''stifle challengers'' and ''guarantee Democratic control ... for generations to come. It is a spending limits bill that President Bish simply will not sign.''

In the House, Democratic leaders detailed their plan to limit spending in House races to $550,000, with a limit of $275,000 on the amount that political action committees can contribute. No more than $300,000 could be spent in a primary, and anything saved under that level could be added to the remaining $250,000 available for the general election. The plan also has limits on the size of contributions that the PACs can make based on the size of contributions they accept from members, and it contains a tax credit for contributions of $50 or less.

Rep. Al Swift, D-Wash., one of the architects of the plan, said an amendment building on the core bill but taking some of the provisions a bit further - such as having matching federal contributions for donations of $50 or less and holding PAC contributions to 40 percent - would be offered to ''allow the party to try and press the frontiers of the art of the possible as far as we can.

House Speaker Tom Foley of Washington said the proposal drafted by House Democratic leaders ''offers an effective way to bring reform to the campaign process. And House Democratic leader Richard Gephardt of Missouri added, ''It returns the political system back to ordinary average Americans, working Americans.''

House Republican leader Robert Michel of Illinois later criticized the Democrats for not being able to agree on their own plan. He also

complained that the Democrats plan to allow only one vote on GOP proposals while the debate in the Senate ''is going to be free and unfettered.''

Michel said the Republicans have had a comprehensive reform package ready for several months.

SOFIA, BULGARIA (JULY 30) UPI - Deposed Bulgarian President Todor Zhikov informed Parliament Monday he does not want to address the body until he is charged with wrongdoing.

Zhivkov, whose hardline communist regime was ousted last November, asked the Grand National Assembly two weeks ago if he could address the deputies in person. Monday, he postponed the speech indefinitely.

The former dictator said he did not have enough time to prepare for answers to questions the lawmakers might ask.

Zhivkov has been under house arrest during a 6-month-long investigation into the alleged crimes of his regime. He has not been formally charged and apparently doesn't want to speak until he is put on trial.

Zhivkov's resignation last Nov. 10 led to the election of Peter Mladenov as president. Mladenov was forced to resign over videotaped comments that he wanted to send in tanks to quell an anti-government demonstration last December.

Meanwhile, after more than three weeks without a president, the National Assembly failed again Monday to elect a new head of state. The race has been deadlocked among three candidates for almost a week because the presidential post requires a two-thirds majority vote.

The sudden withdrawal of the candidate for the ruling Bulgarian Socialist Party altered the voting patterns in the fifth round, but neither the Agrarian Party candidate nor the candidate from the Union of Democratic Forces received the necessary votes.

The Socialist Party, formerly the Communist Party, has 53 percent of 400 seat parliament. The Socialist Party members apparently cast their votes for the Agrarian Party candidate, Viktor Vulkov, who missed the two-thirds majority by just a few votes.

Vulkov told Western journalists he received a high percentage because he is a ''more neutral and acceptable'' candidate. Unlike the UDF, the Agrarian party favours a three- part coalition government with the ruling Socialist Party and the UDF.

Vulkov said the vote was a ''test of strength'' for his party, which will merge with the smaller Agrarian Party faction in the UDF. A top ranking Western diplomat suggested that the vote also indicated a weakness in the organization of the opposition.

More than a dozen of the UDF Members of Parliament cast their votes for Vulkov. Some opposition party members support nominating a new candidate for the next round of voting Tuesday.

WASHINGTON (JULY 31) UPI - Sales of stock, bond and income mutual funds totaled $13 billion in June, up from $12.5 billion in May, the national association of the mutual fund industry said Monday.

June sales one year ago were $9.9 billion, according to the Investment Company Institute,

Assets of all mutual funds reached a record high of $1.034 trillion in June, up from $1.028 trillion in May.

Assets of stock and bond funds increased to $580.6 billion in June from $574.3 billion in May. Assets of money market - including both taxable and tax-free - funds fell to $453.5 billion in June from $453.7 billion in May.

Sales of stock mutual funds totaled $6.7 billion in June, up from the May total of $6 billion. June sales one year ago were $4.1 billion. Growth-and-income funds led all categories with sales of $2.4 billion.

Sales of bond and income mutual funds totaled $6.4 billion, down from $6.5 billion in May and $5.9 billion in June 1989. Long-term municipal bond funds recorded total sales in June of $2.4 billion, compared to $2.6 billion in May 1990. These funds had sales of $2.4 billion in June 1989, the ICI said.

(JULY 30) UPI - President Bush defended his Supreme Court nominee, David Souter , today in talking to a gathering of youth groups in the nation's

capital. Bush said Souter has ''an admirable moral compass'' that will guide him through legal judgments the framers of the Constitution could NOT have foreseen. Bush echoed an appropriate source- outgoing Justice William Brennan, who maintains that the Constitution must be re-interpreted by each generation.

President Bush addressed the National Governors Association today via telephone at their meeting in Mobile, Alabama. Bush concentrated on what he viewed as progress in education. He praised the governors for their ''partnership'' with the White House on education and for their move to create a bipartisan committee charged with improving teaching practices across the nation.

Defense Secretary Dick Cheney decided today to cut almost half of the generals and admirals assigned to his office staff. That will trim his staff from 27 to 14. The cuts are part of a larger over-all effort to trim the ranks of top military officers. Last month... Cheney ordered 78 positions eliminated from the more than one-thousand general and admiral slots over the next four years.

Chicago Mayor Richard Daley says the media has overblown reports of looting following a severe power outage. Daley says that despite news reports... there was ''NO chaos'' on Chicago's West Side... where power has been out since a fire at a transformer Saturday night. The Chicago police chief said traffic has been the biggest problem... but added 83 people have been arrested for looting, mob action, and other charges.

MOSCOW (JULY 30) UPI - The Soviet Union and Albania agreed Monday to restore diplomatic relations, ending nearly three decades of rancor, the official news agency Tass reported.

Albania, one of the world's most isolationist nations and until the late 1970s, the sole satellite of China in Europe, split with Moscow in 1961 over Soviet government disavowal of the regime of the late dictator Josef Stalin.

''Today, it was reported officially that the U.S.S.R. and Albania have agreed to normalize bilateral relations and to revitalize in the immediate future the embassies in their respective capitals,'' Tass said.

It said the agreement to re-establish ties was reached during talks Monday in the Albanian capital of Tirana. A Soviet Foreign Ministry delegation headed by Deputy Foreign Minister Yuli Kvitsinsky arrived in Tirana on Saturday, Tass said.

''The (two) sides were guided by a mutual desire to develop relations of friendship and cooperation on the basis of sovereignty, equality and non-interference in each other's internal affairs,'' Tass said.

Europe's poorest and most underdeveloped country, Albania is also the only remaining self-proclaimed Stalinist nation. The winds of dissent that swept most of Eastern Europe in 1989 reached earlier this summer to Tirana where the government, under pressure from the West, finally relented and allowed the refugees to be evacuated from Albania by boat.

Communist partisans took power in the small Adriatic nation in 1944 and was a satellite of Moscow until 1961, when it broke relations.

From 1961 until 1978, Albania was China's surrogate in Europe, often attacking what Beijing called the Soviet Union's ''bourgeois'' development. But in 1974, Albania's relations with China cooled when Beijing cut back aid.

The two nations split in 1978, when the Tirana regime of Enver Hoxha criticized Chinese policies after the death of Mao Tse-tung.

So bitter was Tirana's enmity with Moscow that in 1985, it rejected as unacceptable the Kremlin's message of condolences upon Hoxha's death.

#90211u2264 07/30/1990 ~United Press International
TORONTO (JULY 30) UPI - Shareholders of troubled Campeau Corp. on Monday applauded Chairman Robert Campeau's presence at the annual meeting but fell silent when he told them he sympathized with their losses and that it was time to focus on the future.

"I truly sympathize with all of you who have incurred losses," a tanned and confident Campeau told shareholders. "Believe me, I know how you feel." Campeau, who founded the company more than 40 years ago, added: "The time has now come to focus on the future." Several hundred people attended the meeting, but it was unclear exactly how many were shareholders.

The company decided not to consider a special resolution to be voted on at the meeting that would have allowed the company "to sell, lease, or exchange all or substantially all of" its Canadian real estate assets.

Campeau said it was "premature" for shareholders to approve the resolution because the company has not yet negotiated standstill agreements with its

two key lenders, The Edward J. DeBartolo Corp. of Youngstown, Ohio and Olympia & York Developments Ltd. Campeau Corp. has been holding talks with both DeBartolo and Olympia & York for months, but no definitive announcements have been made.

On the Chapter 11 reorganization of the company's U.S. holdings, Campeau Corp. President Paul Campbell said the process was in a "very preliminary stage". Campbell said substantial progress was being made, but that it was impossible to predict the terms or timetable for the reorganization.

On Jan. 15, Campeau's U.S. retailers - Federated Department Stores Inc. and Allied Stores Corp. - filed for protection from creditors under Chapter 11. That was followed by a similar filing on March 30 by Federated Stores Inc., Campeau's U.S. holding company. Campeau seemed to sum up the company's situation by saying, "Campeau is what it is. We are what we are."

Only a handful of shareholders queried Campeau and Campbell about the state of the company, except for shareholder rights advocate Evelyn Davis of Washington, D.C. who herself was shouted down.

In his address to the meeting, Campeau defended the company's decision to acquire Federated, saying the market then was quite different. In 1988, Campeau Corp. paid $6.6 billion for Federated. "In the frenzy of Wall Street, it was a deal that made sense," Campeau said.

Campeau said the company's investment brokers, commercial lenders and professional advisers indicated that the acquisition was both "desirable and appropriate." But Campeau added, "The deal certainly did not turn out the way we hoped it would." Campeau Corp.'s current debt totaled $13.28 billion at the end of 1989, according to the company's 1989 annual report.

Since the retail and real estate company's last annual meeting in June 1989, Campeau's stock has fallen on the Toronto Stock Exchange from a high of $18.91 to a low of 72 cents, a drop in value of 96.2 percent. On the TSE Monday, Campeau closed down four cents at $1.25 with 16,500 shares traded.

Campeau said the company's new business plan includes selling a substantial part of its Canadian real estate assets, using cash flow to make payments on secured loans and deferring preferred share dividends.

Campeau's first-quarter 1990 results showed a loss of $80 million up from a loss of $67 million a year earlier. Revenues edged up to $2.26 billion from $2.23 billion in the year-ago period.

-30- 3662
#90211u2278 07/30/1990 ~United Press International

NEW YORK (JULY 30) UPI - A defense attorney tried to show Monday that police knew one of three youths on trial in the gang rape of a woman jogger was only 15 but continued to illegally question him for another 80 minutes without a parent present.

The second cousin of defendant Yusef Salaam, Marilyn Hatcher, testified that she arrived at the 20th Precinct at 11:10 p.m. on April 20, 1989, and almost immediately told police that ''Yusef is 15 years old. I repeated again that he was 15 years old and I said he was a minor.''

His mother, Sharonne Salaam, rushed to the precinct at 11:30 p.m. and urged police to let her see her son, also telling them ''he was only 15 years old,'' Hatcher testified.

All the while, Detective Thomas McKenna was grilling Salaam on another floor and his questions didn't stop until 12:30 a.m. on April 21, the detective has testified. Under New York State law, youths under age 16 must have a parent present during police questioning.

Salaam admitted hitting the woman jogger twice with a metal pipe and fondling her breasts during the ''wilding'' attack in Central Park on the night of Apr. 19, McKenna testified.

Earlier in the trial, McKenna testified that he was unaware Salaam was underage because he had two conflicting pieces of identification, including a bus pass that put his age at 16. It was later revealed that Salaam altered the birthdate to impress girls.

Hatcher, testifying in the rape and attempted murder trial at state Supreme Court in Manhattan, said police asked her about the conflicting identification. Again, she insisted Salaam was only 15 but admitted she did not know his birthdate.

In later testimony Monday, an assistant United States Attorney who was a friend of the Salaam family said he arrived at the precinct at 11:25 p.m. When he refused to give police permission to question Salaam he was almost thrown out by Assistant District Attorney Linda Fairstein.

''She said it was improper for me to be there and asked for the name of my supervisor at the U.S. attorney's office (in Brooklyn),'' testified David Nocenti, who was matched with Salaam through the Big Brother/Big Sister Program some five years ago.

As late as 12:05 a.m., he said, Salaam's mother reminded Fairstein that she had not given police permission to question her son. But apparently authorities still believed they had a right to question the youth.

''Either Fairstein or one of the detectives said, 'We do not need your

permission,''' Nocenti testified.

The trial was slated to resume at 10 a.m. Tuesday with Nocenti returning to the stand.

In a case which lacks physical proof against the three youths, their statements and videotaped confessions to police are the strongest evidence against them. Defense attorneys, who opened their case last week, are trying to prove the statements were illegally obtained through threats and trickery and therefore should be disregarded by the jury.

Tawana Brawley, the black teenager whose claims that she was raped by a gang of whites touched off a racial firestorm two years ago, showed up at court Monday to watch the trial, now in its sixth week. A state grand jury later determined her claims were false.

At the lunch recess, Brawley, now a student at Howard University, approached two of the youths, Salaam and Antron McCray, and shook their hands.

Brawley was accompanied by the Rev. Al Sharpton, who said, ''Tawana wants to observe how whites are treated in the courts as opposed to how she was treated.''

Brawley refused to talk to reporters.

Earlier Monday, Justice Thomas Galligan refused a defense bid to dismiss any of the 13 charges against the youths accused of beating and gang raping the 30-year-old Wall Steet investment banker and leaving her for dead.

''Based on my reading of the record, the motion to dismiss on all counts is denied on all counts,'' the judge ruled.

Salaam, now 16, McCray, 16, and Raymond Santana, 15, are the first of six youths to go to trial on rape and attempted murder charges.

The youths are accused of being part of a gang of about 30 youngsters who went on a 'wilding' spree in the park.

(JULY 30) UPI - The attempted coup in Trinidad and Tobago may be nearing a resolution. Reports from the two-island nation in the Caribbean say the government has reached a deal in which it will grant amnesty to Moslem rebels. In return, the rebels will release Prime Minister Arthur Robinson and other members of the government taken hostage last Friday. The

Caribbean country says Robinson will be released shortly.

The United States is redoubling diplomatic efforts to end the civil war in Liberia. White House officials announced today that they had repeated their offer to aid the departure of President Samuel Doe... who is holed up in a coastal mansion in the capital of Monrovia. The White House also decried last night's massacre of 600 Liberian civilians at the hands of government troops.

Lawmakers took their debate on campaign finance reform to the Senate floor today. Months of negotiations between Democrats and Republicans had only produced an agreement to abolish contributions from political action committees. Democrats also want to put a cap on campaign spending. But Senate Republican leader Robert Dole says spending ceilings would ''stifle challengers'' and guarantee Democratic control ''for generations to come.''

Zsa Zsa Gabor stepped out into the bright light of day in El Segundo, California, this afternoon after serving her 72-hour jail sentence for slapping a police officer. The 71-year-old actress did NOT look much the worse for the wear. She said she was ''happily surprised'' by the treatment she received and that everyone she encountered in jail was- quote- ''nice and sweet.''

#90211u2343 07/30/1990 ~United Press International

WASHINGTON (JULY 31) UPI - Cray Computer Corp., pressing to develop the next generation of supercomputers, has had to lay off workers and slow production schedules, a Securities and Exchange Commission filing showed Monday.

Cray, which is based in Colorado Springs, Colo., said in the amended quarterly report that it had it incurred $900,000 in costs in April when it permanently laid off 22 members of its 250-person staff.

The company also said it will seek only $55 million in financing to start up manufacturing, a figure that indicated to analysts that Cray was gearing up for piecemeal rather than full-scale production.

Rick Martin, an analyst with Prudential Bache Securities in New York, said the delays are coming in Cray's research and development, a common problem in the industry.

''My understanding is the (reason for the schedule) slippage is that Seymour Cray (the company chairman) has decided to go through one more design iteration,'' Martin said.

Greg Barnum, Cray's chief financial officer, confirmed that layoffs were

needed in the module test area because manufacturing had not begun.

''We are not at the point where we are building modules to test,'' he explained, adding that the company planned to replace the technicians on that staff with 12 engineers over the next six months.

In regards to the financing, Barnum said the additional funds would be needed to cover production and marketing costs after the company begins production in late 1991 or early 1992.

The company had indicated in its initial prospectus that it would need as much as $120 million to finance production and start-up costs. slowed in development of the supercomputers.

''If you have machines ready to run and you are ready to start building a lot, it takes a lot of money,'' said Rick Martin. ''But if you put them out in dribs and drabs, which I think is the reality, you can get away with less.''

Since the funds are not needed now, Cray is waiting before deciding how to raise the money.

''The leading candidate is an equity offering, but we are not going to lock ourselves into that,'' Barnum said.

Until production begins, the company will continue to rely on a $98.8 million contribution to capital it received from its founder, Cray Research Inc.

CRI spun Cray Computer off as a separate public company in late 1989, giving CRI shareholders one stock in the new company for every two shares of CRI stock they owned.

Cray Computer is developing a supercomputer that relies on gallium arsenide rather than silicon, a materials change that company experts think will make its supercomputer three times faster than those now on the market.

#90211u2400 07/30/1990 ~United Press International

MIAMI (JULY 30) UPI - Hurricane Bertha gained strength Monday as it moved northeast through the open Atlantic, and forecasters said the storm system could pose a threat to Canada's maritime provinces by Wednesday.

Bertha regained its status as the first hurricane of the Atlantic-Caribbean season with the noon advisory issued by the National Hurricane Center.

Meteorlogist Mark Zimmer said Bertha's winds picked up speed Monday after slowing steadily on Sunday. Further strengthening was unlikely, he said.

By 6 p.m. EDT Monday, Bertha was centered near latitude 36.5 north and longitude 67.4 west, about 600 miles south southwest of Halifax, Nova Scotia.

''It's moving northeastward right now,'' Zimmer said. ''It looks like in a couple of days it could turn a little more northward. ... If it does, it could be threat to the Canadian maritime provinces.''

The system was moving over the Atlantic at about 14 mph, and little change in that course was expected during the next 24 hours, Zimmer said.

Maximum sustained winds were near 75 mph, 1 mph above the threshold for a minimal hurricane.

Bertha formed Friday as a tropical depression off the east coast of

Florida, and grew to hurricane strength on Saturday. By Sunday evening, however, the storm system had weakened and forecasters downgraded it to a tropical storm.

Forecasters at the hurricane center Monday also were watching several other weather systems in the Gulf of Mexico and the east Atlantic.

''We have a couple things we're looking at. We are getting into the time of the season that things can get active out there,'' Zimmer said.

The center said a pattern of circulation appeared to be forming in the central Gulf of Mexico that could develop into a tropical depression. A plane was scheduled to investigate further on Tuesday.

Arthur, the first tropical storm of the season, dissipated in the western Caribbean south of Jamaica Friday and was downgraded to a tropical wave.

The Atlantic-Caribbean hurricane season runs from June 1 to Nov. 30.

#90211u2408 07/30/1990 ~United Press International

WASHINGTON (JULY 30) UPI - The biotechnology industry received a mixed message Monday, when a government panel endorsed one genetically engineered drug for a rare immune system disease but rejected another one for advanced kidney cancer.

The Food and Drug Administration's nine-member Biological Response Modifiers Advisory Committee, meeting in Rockville, Md., voted the benefits of a substance called interferon gamma outweighed the risks for an inherited disease of white blood cells.

But the committee failed to recommend approval of a substance produced by Cetus Corp., of Emeryville, Calif., known as interleukin-2 for the treatment of advanced kidney cancer.

Committee members said there was insufficient evidence supporting the drug's effectiveness and were concerned about the severity of adverse side effects the substance can produce, said FDA spokeswoman Faye Peterson.

Peterson added, however, that committee members had not had time to review additional supporting data Cetus submitted on Friday, urged the new data be analyzed and said they would review the drug again in several months.

The drugs are among four agents produced through so-called genetic engineering techniques that are being considered by the panel over two days.

The hearings are considered important for the biotechnology industry because approval would indicate that years of costly research can produce marketable products.

''From the point of view of investors, there's been a lot of disillusionment ... in investing in biotechnology,'' said Pamela Bridgen, executive director of the Association of Biotechnology Companies in Washington.

''If three or four of these get approved, that looks very promising for the industry and hopefully stimulate investor interest. If people see now that products are starting to get to market, that gives the industry a boost,'' she said.

The biotech industry has grown around fairly recently developed techniques known as recombinant DNA technology, which involves manipulating genes - the blueprints for all life.

The techniques are used to produce drugs by inserting a gene for a substance that occurs naturally in the human body in tiny amounts into another organism, usually a bacterium, to produce the substance or a version of the substance in amounts large enough to treat a disease.

The committee voted unanimously that the benefits of interferon gamma outweighed the risks for treating the disorder known as chronic granulomatous disease.

''We're pleased,'' said Susan Rogers of South San Francisco, Calif.-based Genentech Inc., which makes the substance. ''We view this as an endorsement of interferon gamma by a highly respected group of experts.''

The disease affects only about 250 to 400 people in the United States, but the substance also is being tested as a treatment for trauma-related infections and a serious skin condition known as atopic dermititis, Rogers said.

''It's an important first step. We think that gamma interferon has other approvable treatment areas which are currently being studied,'' she said.

Cetus had sought approval for interleukin-2 to treat advanced kidney cancer. Interleukin-2 triggers production of cancer-destroying white blood cells and has been shown to shrink tumors in a small percentage of patients.

The drug's effectiveness, however, has been questioned and the drug can trigger large, temporary water weight gains that stress internal organs and require the treatment be given to patients in an intensive care unit.

The company could not be reached for immediate comment.

The committee Tuesday will consider a request from Immunex Corp. of Seattle to approve a substance known as GM-CSF for use in connection with bone marrow transplants.

The committee will also consider a request from Schering-Plough Corp. of Madison, N.J., to approve a drug called interferon alpha 2b to treat forms of hepatitis.

#90211u2414 07/30/1990 ~United Press International

HOLLYWOOD (JULY 30) UPI - Harrison Ford's courtroom drama ''Presumed Innocent'' slayed its competition in its debut at the box office, exorcising ''Ghost'' from the No. 1 spot by taking in $11.7 million over the weekend.

The film, based on Scott Turow's best-selling novel about a prosecutor charged with murder his estranged lover, made its opening argument with conviction at 1,349 theaters for an impressive per-screen average of $8,687 for Warner Bros.

Paramount's ''Ghost'' continued to hover strongly, however, as the thriller-love story took in $11.1 million at 1,694 screens in its third week.

''Ghost,'' starring Demi Moore and Patrick Swayze, has been holding up well, with a more-than-ethereal $51.4 million in its first 17 days of business, making it one of this summer's surprise hits.

"Problem Child" behaved fairly nicely for Universal in its opening, taking in $10 million at 1,714 screens in its opening weekend, good enough for third place. The comedy stars John Ritter as the adoptive father of a hell-raising child.

Disney's horror-comedy ''Arachnophobia'' showed it still had plenty of bite although it fell from third to fourth place with $8.1 million in its second weekend on 1,831 screens. The film, which has been fairly well-received by critics, has caught $23.7 million in its web during its first dozen days of release.

After an explosive opening of three weeks in first place, ''Die Hard 2'' fell from second to fifth place, drawing a still-lively $6 million over the weekend on 2,116 screens. The movie, which sees Bruce Willis an off-duty cop battle terrorists at an airport, has booked an arresting $87.8 million during its first four weeks in release and will likely finish among the top grossers of the year.

Tri-Star's Marlon Brando comedy ''The Freshman'' received good grades at the box office as it moved into sixth place with a $4.2 million wide-release opening at 1,040 theaters. With its impressive six-screen debut the previous weekend, the film's total take has reached $4.6 million.

Disney's re-issue of ''The Jungle Book'' swung from fifth to seventh place in its third weekend, pulling in $4 million on 1,795 screens. The animated feature has brought in a solid $26.3 million in 17 days of release.

As expected, Orion's ''Navy SEALS'' dropped off sharply in its second weekend with a $3.34 million take at 1,347 theatrical installations to wind up in eighth place. The action-adventure, set in the Middle East and starring Charlie Sheen, has grossed $13.1 million in two weeks.

Stock car drama ''Days of Thunder'' began to slide off track in its fifth week, posting a $3.27 million take in 1,991 theaters for ninth place. It has brought in a total of $69.3 million, but clearly will not be the mega-hit that Paramount had anticipated.

Disney's comic-book extravaganza, ''Dick Tracy'' wound up the top 10 for the weekend with $1.6 million at 1,223 screens. The film, starring Warren Beatty, has now reached $98.9 million during its seven weeks in release and should pass the $100 million benchmark soon.

The weekend saw shock comedian Andrew Dice Clay's vehicle, ''The Adventures of Ford Fairlane,'' head for the off-ramp with a $1.1 million gross on 1,116 screens after a surprisingly strong opening week. The film has drawn $18.7 million in three weeks.

''Total Recall,'' the top grosser so far among the crop of summer movies, took in $1.2 million during the weekend on 936 screens and has now topped $110.9 million in eight weeks.

The year's top grosser, ''Pretty Woman,'' continued to perform well after 19 weeks of release, adding $1.2 million during the weekend at 903 screens to give it a total of $162.3 million so far.

The top 10, last weekend's gross, total gross, weeks in release:

1. ''Presumed Innocent,'' $11.7 million, 1 week.
2. ''Ghost,'' $11.1 million, $51.4 million, 3 weeks.
3. ''Problem Child,'' $10 million, 1 week.
4. ''Arachnophobia,'' $8.1 million, $23.7 million, 2 weeks.
5. ''Die Hard 2,'' $6 million, $87.8 million, 4 weeks.
6. ''The Freshman,'' $4.2 million, $4.6 million, 2 weeks.
7. ''The Jungle Book,'' $4 million, $26.3 million, 3 weeks.
8. ''Navy SEALS,'' $3.34 million, $13.1 million, 2 weeks.

9. ''Days of Thunder,'' $3.27 million, $69.3 million, 5 weeks.
10. ''Dick Tracy,'' $1.6 million, $98.9 million, 7 weeks.

#90211u2452 07/30/1990 ~United Press International

READING, PA (JULY 30) UPI - Pennsylvania's abortion laws, the most restrictive in the 50 states, endanger the health of women seeking the procedure by ''creating confusion and likely delaying care,'' a doctor testified Monday in a federal lawsuit challenging the statutes.

The lawsuit, brought by several doctors and family counseling agencies represented by the American Civil Liberties Union, is the first court test of the Pennsylvania abortion laws, which they say are unconstitutional.

U.S. District Judge Daniel Huyett III, who is hearing the case, has put the Pennsylvania abortion laws on hold while the courts decide the issue.

ACLU lawyers say the case is pivotal because a ruling upholding the Pennsylvania laws could provide the U.S. Supreme Court with the impetus to overturn the high court's Roe vs. Wade decision that legalized abortions nationwide in 1973.

''The Pennsylvania laws could provide the U.S. Supreme Court with the opportunity to overturn Roe, thus leading back to the days when abortion was totally banned in some states,'' ACLU attorney Thomas Zemait told the court.

Pennsylvania passed its abortion laws in 1988 and 1989, the latter being the only new controls imposed by any state since the Supreme Court's Webster ruling last year opened the doors to broader restrictions by states.

Kate Mershimer, Senior Deputy State Attorney General, contends the tighter rules fall within the broader restrictions permitted since the Webster decision.

The laws require all women to wait 24 hours before having an abortion, married women to notify their husbands before undergoing abortions and minors to obtain parental consent. They also require abortion counseling changes and amend the state's definition of a medical emergency.

Lawyers for the state and the ACLU did battle with seven boxes of documents rather than the emotional invective which normally accompanies debates on abortion in Pennsylvania. No protestors on either side of the issue showed up at the federal courtroom in Berks County.

Medical experts who testified Monday for the plaintiffs detailed scores of

scenarios, such as complications during pregnancy, in which abortion is necessary to prevent harm or death.

Several physicians and a Boston medical ethics expert also outlined ways the restrictions could pose ethical dilemmas for physicians or impede doctors' ability to treat their patients.

''I think (the law) would certainly create a degree of confusion and likely delay care to those seeking those services,'' said Steven Davidson, a doctor in the emergency unit at the Medical College of Pennsylvania in Philadelphia.

Ronald Bolognese, a doctor at the Pennsylvania Hospital in Philadelphia, said the change would panic doctors and frighten them from performing abortions.

Thomas Allen, a Pittsburgh physician and plaintiff in the case, contested the parental consent provision was unnecessary for an operation that he said is two-times safer than a tonsilectomy and 100 times safer than an appendectomy.

Mershimer is expected to begin defending the laws Tuesday after the plaintiffs finish their arguments.

Huyett is unlikely to rule on the case before late fall. But any decision is likely to prompt an appeal by either side, sending the case to the next level of justice and closer to the Supreme Court, Kolbert said.

More restrictive abortion bills made their way through the Idaho and Louisiana legislatures but were vetoed by those states' governors. Guam, a territory, passed a restrictive law, which is now making its way through the courts.

The Supreme Court last year upheld, 5-4, a Missouri law in Webster vs. Reproductive Health Services, interpreted as a sign the majority is willing to narrow and possibly eliminate abortion rights established when the court legalized abortion more than 17 years ago in the case of Roe vs. Wade.

#90211x2641 07/30/1990 ~Comtex
NEW YORK (UPI) _ Commissioner Fay Vincent announced Monday night that George Steinbrenner has agreed to resign by August 20 as general partner of the New York Yankees for his dealings with an admitted gambler.

Vincent, who met with Steinbrenner for 11 hours Monday, said at a news conference at the Helmsley Palace that Steinbrenner had agreed to a seven-part arangement and that the Yankees owner will not challenge or litigate the decision.

Steinbrenner would be allowed to consult in major financial decision with the club but only with Vincent's approval.

Vincent went on to say that a new general partner would need to be named by August 20.

Steinbrenner, who did not attend the conference said before leaving: ''I'm very happy that it was resolved, and I'm very satisfied with the resolution.''

Vincent, who was apologetic and seemed relieved that the ordeal was over,

said that Steinbrenner's dealings with gambler Howard Spira ''constituted conduct not in the best interests of baseball.''

The commisssioner also said that Steinbrenner agreed to be treated as if he had been placed on the permanently ineligible list. The exceptions being with Vincent's approval he could participate in major financial dealings and beginning in 1991 Steinbrenner could seek approval to see a limited amount of major league games.

#90212b0016 07/31/1990 ~Business Wire

CHATTANOOGA, TN (JULY 31) BUSINESS WIRE - Dixie Yarns Inc. (NASDAQ/NMS:DXYN) Tuesday announced sales for the second quarter ended June 30, 1990, of $147,118,000, compared with sales of $151,439,000 for the second quarter of 1989.

Net income for the quarter was $2,032,000, or 21 cents per share (fully diluted) compared with $3,757,000, or 36 cents per share (fully diluted), in 1989.

Sales for the first six months of 1990 were $293,131,000, compared with $302,755,000 for 1989. Net income was $3,384,000, or 34 cents per share (fully diluted), compared with $7,335,000, or 69 cents per share (fully diluted), in the similar period last year.

Chairman Daniel K. Frierson commented: ''Dixie's results for the quarter and for the six months continue to reflect the industry's cyclical downturn and reduced margins. Market conditions have not allowed Dixie the opportunity to pass along increased costs for cotton, synthetic fiber, labor, power, and other expenses as they have occurred.

''During the slowdown, we have increased our capital expenditure program in all four business groups. The new projects have tended to disrupt operations in the short-run, but we believe they will put Dixie in a much stronger strategic position when market conditions improve.''

Dixie also announced that it has approved the purchase of 500,000 additional shares of Common Stock in the open market or in negotiated transactions. Purchases of Common Stock have totaled approximately two and one-half million shares since mid-1988.

Dixie's business consists of four product categories: specialty yarns, industrial sewing threads, knit fabrics, and carpet and rug yarns. The company manufactures and markets yarns and threads from a variety of natural and man-made fibers and also processes yarns into knit fabrics. Its products are used in the apparel, carpeting, domestics, drapery and upholstery, hosiery, industrial fabrics, transportation, and other

industries.

SANTA CLARA, CA (JULY 31) BUSINESS WIRE - Siliconix Inc. (NASDAQ/NMS:SILIQ) announced Tuesday that it has reached an agreement with AEG Aktiengesellschaft, an 80 percent subsidiary of Daimier-Benz AG, on a proposed plan of reorganization that will be jointly developed by the two companies and submitted by Siliconix to the Bankruptcy Court for confirmation.

Richard Kulle, president and chief executive officer of Siliconix, stated that he believes the agreement is a very positive step toward the emergence by Siliconix from the Chapter 11 proceedings on a timely basis.

The proposed plan provides that, upon confirmation, AEG would contribute $13 million to Siliconix in cash and would cancel its $2 million secured note. The outstanding equity of Siliconix would be reorganized so that AEG or an affiliate would own 80.1 percent of the equity on a fully diluted basis, and the current shareholders of

Siliconix (other than AEG) would own 19.9 percent of the equity on a fully diluted basis.

The agreement between Siliconix and AEG also provides that upon confirmation of the Plan of Reorganization, Siliconix will have no more than $46.7 million in principal amount of indebtedness outstanding on a consolidated basis, and its annual interest expense will not exceed $3.8 million.

The agreement is further subject to the condition that the Plan of Reorganization to be developed by the two companies be confirmed by the Bankruptcy Court no later than Oct. 31.

In connection with the plan, AEG has also agreed to provide, at Siliconix's option, either $6.0 million in principal amount of debtor-in-possession financing for working capital and certain capital expenditures, or a guarantee of such financing to be provided by a responsible third party on terms and conditions reasonably acceptable to AEG.

The credit facility would be provided at the prime rate of interest on a revolving basis.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems. In business for 28 years, Siliconix is a publicly traded company on the NASDAQ National Market System.

#90212b0032 07/31/1990 ~Business Wire

REDWOOD CITY, CALIF. (JULY 31) BUSINESS WIRE - FAFCO Inc., the nation's oldest and largest manufacturer of solar heating systems, announced that it has signed a contract with Snyder General Corp. to market its IceStor off-peak air conditioning equipment exclusively through the Snyder General Corp. in the United States and Canada under the McQuay brand name.

Snyder General Corp. is a leading manufacturer of air conditioning equipment with well-established manufacturing and distribution facilities throughout the United States and Canada.

Freeman Ford, FAFCO's president, commented that, ''Combining FAFCO's off-peak air conditioning equipment expertise with Snyder General Corporation's established distribution and application engineering experience is expected to have a positive effect on sales of FAFCO IceStor products.''

Thermal energy storage products offer a partial solution to the electric utility industry's summer peaking problem. By storing inexpensive off-peak energy at night in the from of ice, the utility can use the cold energy from the ice for air conditioning the following day.

This ''peak shaving'' avoids the necessity for the utility company to build generation capacity to meet peak air conditioning demands.

SANTA CLARA, CA (JULY 31) BUSINESS WIRE - Siliconix Inc. (NASDAQ:SILIQ) announced Tuesday that a new license agreement with International Rectifier Corp. has been approved by the Bankruptcy Court.

The agreement covers the patents that were the subject of the litigation

between them that began in July 1986. Implementation of the previously announced $12 million settlement agreement between the companies for past Siliconix infringement will require separate approval by the Bankruptcy Court.

Under the agreement, Siliconix will pay International Rectifier a one-time license fee of $250,000 and will acquire a royalty-bearing license under the litigated patents.

The new agreement will terminate on Aug. 29, but may be extended beyond that date by International Rectifier, in its sole discretion, upon payment by Siliconix to International Rectifier of a fee of $20,000 per week, plus ongoing royalties.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems. In business for twenty-eight years, Siliconix is a publicly traded company on the NASDAQ National Market System.

HOUSTON (JULY 31) BUSINESS WIRE - Union Texas Petroleum Holdings Inc. Tuesday announced that an overseas subsidiary has been granted two new exploration permits offshore Spain.

The Ministry of Industry and Energy has issued two permits to Union Texas Espana Inc. to explore for hydrocarbons offshore the Asturian Basin in the Bay of Biscay. The permits call for four-year exploration programs with an option to enter an additional four-year period in each permit.

The tracts are known as Nuberu and Trasgu and comprise 133,948 and 105,069 acres, respectively. Union Texas is operator of both tracts during the exploration phase with 100 percent interest in each block.

The Nuberu and Trasgu tracts are contiguous to the Asturias E tract in the Bay of Biscay. Union Texas Espana entered into an agreement in 1989 to explore for and produce oil and gas in the Asturias E tract. An exploration well is scheduled to be drilled there in late 1990 or early 1991.

Union Texas has been actively involved in exploring for and producing oil in Spain for 16 years. In addition to its interests in Spain, Union Texas

is involved in international ventures in Indonesia, the U.K. North Sea, Pakistan, Argentina, France, Egypt, onshore U.K. and Papua New Guinea.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. (NYSE:UTH) explores for and produces oil and gas in the U.S. and overseas and has petrochemicals and natural gas processing interests.

#90212b0056 07/31/1990 ~Business Wire

KANSAS CITY, MO. (JULY 31) BUSINESS WIRE - Revenue of ConCorde Career Colleges Inc. in the second quarter and six months ended June 30, 1990, increased marginally but net income fell below the comparable 1989 periods.

Contributing to the lower profit was the reduction in student enrollment primarily due to the adverse publicity affecting the entire vocational school industry. This situation stems from the uncertainties relating to the changing conditions resulting from governmental concerns over student loan defaults.

Revenue for the second quarter was $9,006,000, including management fee income of $150,000 from the recently acquired home study paralegal school, compared to $8,687,000 a year earlier, or a gain of 3.7 percent. Net income of $546,000 was equal to 8 cents a share on the average 6,978,976 shares outstanding, against $771,000, or 12 cents a share on 500,000 fewer shares a year earlier.

For the six months the revenue total was $19,128,000 against $18,325,000 a year before, a gain of $803,000, or 4.4 percent. Net income was $1,858,000, equal to 27 cents a share, against $1,931,000, equal to 30 cents a share, or a per share reduction of 10 percent from a year earlier.

In July 1990, a jury verdict in the amount of $323,000 was awarded against one of the company's subsidiaries, Computer Career Institute Inc., located in Portland, Ore., in a lawsuit brought by nine former students. The plaintiffs alleged, among other things, violation of the Oregon Unlawful Trade Practices Act. Prior to the court entering its judgment, the company intends to seek a judgment notwithstanding the verdict. In the event the jury award is not dismissed or substantially reduced by the court, the company will appeal the judgment.

Additionally, in July 1990 the company settled, at no cost to the company other than its counsel's legal fees, an employee benefit lawsuit brought by an ex-employee, her minor children and all participants and

beneficiaries of the benefit plans of the company's former parent company, CenCor Inc.

ConCorde operates 22 schools including 17 allied health schools providing primarily medical and dental assistant training, three computer schools offering technical service training, microcomputer operation and programming, one travel school offering training for various travel services, and one home study operation, specializing in professional paralegal training which was acquired May 31, 1990. The company also offers C.P.A. review courses through 51 locations in 20 states.

#90212b0058 07/31/1990 ~Business Wire

DALLAS (JULY 31) BUSINESS WIRE - Trammell Crow Real Estate Investors (NYSE:TCR) declared a cash distribution to shareholders of $.175 per share for the second quarter of 1990 ended June 30, 1990.

The distribution is payable Aug. 16, 1990 to shareholders of record on Aug. 9, 1990. It is estimated that the entire second quarter distribution will constitute a tax-free return of capital.

Distributable cash for the quarter ended June 30, 1990 amounted to $1,820,000 or $.201 per share, almost unchanged from distributable cash for the previous quarter ended March 31, 1990 of $1,857,000 or $.205 per share. Distributable cash for the comparable quarter ended June 30, 1989 amounted to $2,669,000 or $.294 per share.

Distributable cash for the first six months of 1990 amounted to $3,676,000 or $.405 per share, compared with $5,531,000 or $.609 per share for the first six months of 1989. The decrease in distributable cash resulted primarily from the expiration of the Trust's developers' leases.

Commenting on the outlook for the Trust, Philip Norwood, president and chief executive officer of the Trust stated that, ''We believe that the Trust's relatively steady distributable cash level over the past four quarters demonstrates stabilized operating performance of its portfolio of properties.

Any of such transactions would be subject to various contingencies, and there can be no assurance that the Trust will determine to pursue any of them or, if it determines to do so, that the Trust will be able to surmount the contingencies connected with them.

Trammell Crow Real Estate Investors is an equity real estate investment

trust that has acquired from Trammell Crow Co. entities 19 commercial real estate projects, consisting of 18 industrial properties located in California, Florida, Maryland, Minnesota, North Carolina, Texas, Washington, and Wisconsin, and one retail mall located in Colorado.

The Trust's investment objective is to maximize the total return to its shareholders through the leasing, management, and eventual disposition of is industrial and retail properties.

TUSTIN, CA (JULY 31) BUSINESS WIRE - South Coast Group President Joseph Allen announced that Jane E. Whaley has joined the public relations/investor relations firm as account manager, effective July 30.

Whaley will be responsible for investor and corporate media relations.

''Our range of services and client roster have expanded rapidly,'' said Allen. ''Jane's extensive background with the wire services and her knowledge of companies in Southern California will be a real asset to our firm,'' he said.

Before joining South Coast Group, Whaley served as regional manager for Business Wire, an international media-relations wire service. Whaley opened and staffed the Business Wire Orange County office, where it is the dominant service of its type, and built its clientele. For the past three

years, she has handled all aspects of sales and marketing for Orange and Riverside counties.

Previously, Whaley was a brand manager at CSI Productions/Video in Los Angeles, a VCR-games development company. There, she supervised the marketing and public relations plans for all new products.

Prior to CSI, Whaley was a merchandise promotions coordinator at J.W. Robinson Co. in Los Angeles. Her responsibilities included the organizing and executing of promotions for fashion presentations, cosmetic campaigns, bridal registry and epicurean cooking-school events.

Before her work at J.W. Robinson, Whaley was an English instructor at the University of Southern California.

Whaley received a master's degree in English from the University of Southern California and received a bachelor's degree in English from Albion College in Michigan. She currently resides in Long Beach.

South Coast Group offers a full range of investor relations, public relations, marketing communications, crisis management and consulting services to clients in a variety of industries.

NEW ORLEANS (JULY 31) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE:FTX) announced Tuesday that its board of directors has extended for the next four quarterly periods the company's intention to pay a special 25 cent quarterly cash dividend in addition to the regular 37.5 cent quarterly cash dividend beginning with the FTX dividend payment for the third quarter of 1990, which will be paid in early December 1990.

In October 1985, FTX initiated a new special dividend policy whereby for 20 consecutive quarters FTX would distribute property distributions of stock in its affiliated entities to FTX common shareholders in addition to paying a regular quarterly cash dividend of 15 cents per share. Thirteen such property distributions were made by the end of 1988.

In January 1989, the FTX board of directors discontinued paying property distributions and increased the regular quarterly cash dividend on the company's common stock from 15 cents per share to 37.5 cents per share (or from 60 cents per share annually to $1.50 per share annually) and provided for special quarterly cash dividends of 25 cents per share on FTX common stock for the remaining seven quarterly periods.

Seven such special quarterly cash dividends have been declared and will have been paid including the special quarterly cash dividend that was declared on July 31, 1990, and that is payable on Sept. 4, 1990.

The conversion price on Freeport-McMoRan Inc.'s $1.875 Convertible Exchangeable Preferred Stock and its 8-3/4 percent Convertible Subordinated Debentures Due 2013 will not continue to be adjusted beyond FTX's common stock dividend payment of Sept. 4, 1990.

KANSAS CITY, MO (JULY 31) BUSINESS WIRE - BMA Corp. (BMAC) announced Tuesday that the previously announced sale of its insurance subsidiary, Business Men's Assurance Company of America to Generali-Assicurazioni Generali S.p.A. has been completed.

W. Thomas Grant II, president and chief executive officer of BMA Corp.

said, ''While we still estimate the after-tax gain from the sale to total approximately $35 million, the full financial effect of the transaction will be reported when the corporation's second quarter results are disclosed.''

Grant further said, ''At BMA Corp.'s regular quarterly board meeting scheduled for Aug. 8 the board of directors is expected to declare a special, one-time dividend of $3.70 per share, as well as the third quarter regular dividend of 30 cents per share, and at that time set the record date for payment. Payment is expected to occur in early to mid-September.''

Additionally, Grant confirmed that the board of directors had canceled previous unused authorizations for repurchase of BMA Corp. common stock and established a new authorization of $70 million for BMAC to enter the market from time to time, for the purpose of acquiring shares of BMAC and/or Home Office Reference Laboratory (HORL).

The board has indicated that of the $70 million purchase authority, up to but not in excess of $20 million may be utilized for repurchase of HORL stock.

#90212b0102 07/31/1990 ~Business Wire

SEATTLE (JULY 31) BUSINESS WIRE - Plum Creek Timber Company, L.P. (''Plum Creek'') (NYSE:PCL) Tuesday announced earnings and a distribution of $0.80 per unit for the second quarter ending June 30, 1990.

The distribution is 14 percent higher than the distribution of $0.70 in the three prior quarters and 33 percent higher than the intended minimum distribution of $0.60 per unit.

Earnings for the second quarter were $3.5 million, or $0.21 per fully diluted unit, on revenues of $83.2 million. Since the company went public on June 8, 1989, comparable results for the second quarter of 1989 are not available. For the first six months of 1990 earnings were $16.4 million, or $1.02 per fully diluted unit, on revenues of $178.8 million. The revenues represent an increase of 7 percent over the same period in 1989.

The company will distribute $0.80 per depositary unit on August 29, 1990, to unitholders of record as of August 14, 1990. This is the fourth consecutive quarter in which the company has made a higher distribution than the intended $0.60 minimum. The distribution represents available

cash generated from the second quarter of 1990.

Commenting on the company's results, David D. Leland, president and chief executive officer, said, ''I'm pleased with the performance of the company during the first half of 1990, particularly in our ability to once again increase the distribution to our unitholders. The increase reflects the confidence of our directors and management in the company's prospects, and is based on our continuing profitability, strong financial position and our commitment to maximizing unitholder value.''

''Operating results were as we expected. Harvest levels declined while export and domestic log prices continue to be at relatively high levels. Higher log and lumber inventory levels in Japan during the second quarter of 1990 resulted in a slight decrease in export log prices from their record first quarter levels. However, export log prices continue to be significantly above 1989 levels,'' he said.

Plum Creek is the second largest private timberland owner in the Pacific Northwest and one of the largest in the nation. The company was formed in June 1989 to acquire, own and operate substantially all of the timber business and wood products manufacturing operations formerly owned by Burlington Resources Inc.

DENVER (JULY 31) BUSINESS WIRE - Petro-Global Inc. announced Tuesday that it entered into a non-binding letter of intent on or about July 23, 1990, with San Val Inc., a Colorado corporation and Robert L. Sandifer, its president, for the exchange of approximately 80 percent (6,584,103 shares) of common stock of San Val Inc. owned by Robert L. Sandifer for controlling interest in Petro-Global Inc.

The letter of intent also provides that San Val Inc. shall obtain interim financing for Petro-Global Inc. in the approximate amount of $350,000. After the closing of the transaction between San Val Inc. and Petro-Global Inc., Petro-Global Inc. intends to raise additional funding in a public offering of its common stock for the primary purpose of financing additional acquisitions of security alarm companies for San Val Inc.

San Val Inc. is in that portion of the telecommunications industry dealing with security systems in the Palm Desert and Southern California areas.

San Val Inc. is a public corporation, traded in the ''pink sheets.'' Its current annual sales are in excess of $15 million, it has an asset base of approximately $4 million and net worth of about $200,000.

#90212b0117 07/31/1990 ~Business Wire

CARLSBAD, CA (JULY 31) BUSINESS WIRE - Jazzercise Inc., a privately held dance-fitness franchise, lowered their continuing franchise fee from 25 percent to 20 percent on Jan. 1, 1988, in an effort to make their 4,400 franchises worldwide more profitable.

The decision proved a success for both franchisees and the franchisor, earning Jazzercise a 13 percent increase in franchise fees as of the end of the third quarter in March 1990.

This past fiscal year Jazzercise franchisees worldwide grossed $45 million. Revenue for Jazzercise Inc. totalled $15.1 million, including the new lower 20 percent fee from franchise class revenues, video and clothing sales and other profitable ventures. The result is an overall increase of 17.5 percent over the previous fiscal year's sales.

Due to increased profitability, the number of franchises has grown 8 percent each year since the franchise fees were lowered in 1988. The increased number of franchised instructors the company has trained and retained boosted enrollment and profits. This success ended initial doubts of the Jazzercise field management, who earn a percentage of the franchise royalties paid to Jazzercise Inc.

''Lowering the continuing franchise fee was an effort to make franchisees more profitable in light of steadily increasing operating costs on their part,'' said Robin Wilkins, vice president of finance for Jazzercise Inc.

''We felt this decision was necessary to ensure that veteran instructors would stay with us and to improve our recruiting efforts. Today, the fee decision has proven to be successful.''

Judi Sheppard Missett, founder and chief executive officer of Jazzercise Inc. has always been an innovator both in the dance studio and in the office. Missett was the first to franchise her program to the instructors the first to challenge the ''no pain, no gain'' theory and the first to offer low-impact aerobics and other less strenuous exercise options.

Missett was also the first in her organization to suggest the lower franchise fees. Although outside advisors warned that this would be a

mistake, she followed the instincts that have served her well for so many years.

''It just goes to show you that after 20 years, we're in business to stay '' says Missett. ''The best trained business consultants don't always know what works best for your company. We've never done business in a traditional way because we've never been a traditional business.''

SANTA BARBARA, CA (JULY 31) BUSINESS WIRE - County Bank (NASDAQ:CNBA) Tuesday reported earnings from operations for the second quarter ended June 30 of $408,000, or 5 cents per share, compared with an operating loss of $469,000, or 5 cents per share, in the second quarter of 1989.

Net earnings were $408,000, or 5 cents per share, for the quarter this year, compared with $625,000, or 7 cents per share, reported for the second quarter of 1989, which included a non-recurring extraordinary gain.

For the six months ended June 30, earnings from operations were $1,080,000 or 13 cents per share, compared with $149,000, or 2 cents, per share, for the like period in 1989. Net earnings through June 30 were $1,080,000, or 13 cents per share, compared with $1,243,000, or 14 cents per share, including an extraordinary gain in the first half of 1989.

Roy G. Green, president and chief executive officer, in announcing another profitable quarter for the bank, stressed the importance of recurring income from operations. He cited a 56 percent increase in net interest income and a 4 percent decrease in expenses as major contributors to increased earnings for the quarter.

Green credited this year's positive earnings performance to an intense three-year effort to reduce operating expenses and to concentrate lending in the bank's primary market area.

County Bank is based in Santa Barbara and serves Santa Barbara, Ventura and San Luis Obispo counties with assets of $1.3 billion.

SAN JOSE, CA (JULY 31) BUSINESS WIRE - MITEM Corp. Tuesday announced MitemMail -- a family of products providing Macintosh users with a consistent graphical user interface to electronic mail systems.

The first product in this series, MitemMail for PROFS, allows Macintosh users to access IBM's PROFS Notes.

MitemMail provides users with a ''Macintosh-like'' user interface when directly connecting to host-based mail systems. Using MitemView, MitemMail can be easily modified to work with customized versions of PROFS or other popular mail systems, including DEC's All-In-One and VMS Mail, and ADR's E-Mail.

''MitemMail represents an important development for Macintosh users in terms of simplifying their access to PROFS. It allows Macintosh users to take even greater advantage of their corporate information systems,'' said Peter Hirshberg, Apple Group executive for Information Management.

MitemMail's access to IBM mainframes is enabled by hardware support from Tri-Data's Netway, Avatar's MacMainFrame, and DCA's MacIRMA products. MitemMail will be distributed by Businessland Inc. and directly by MITEM Corp.

Kevin Compton, vice president of Businessland's Advanced Systems Group, stated, ''With MitemMail, Businessland can satisfy the needs of two important constituencies -- both our corporate end users and their respective IS organizations.'' Pricing and Availablity

MitemMail for PROFS is expected to be released in the fourth quarter, 1990. The single quantity license fee for MitemMail is $250, with volume discounts and site-licensing available.

MitemMail will be presented publicly for the first time during MacWorld Boston. Interested persons are welcome to preview MitemMail at the following locations: MITEM: World Trade Center, Upper Level, Suite 400, Conference Room B DCA: World Trade Center, Booth 5551 Tri-Data: World Trade Center, Booth 5666 Avatar: World Trade Center, Booth 5362

Based in San Jose, MITEM Corp. develops products to simplify user access and communications with minicomputers, mainframes and other information sources.

LOS ANGELES (JULY 31) BUSINESS WIRE - Teradata Corp. (NASDAQ:TDAT), a manufacturer of high-performance relational database computer systems, Tuesday announced record revenues and earnings for the three- and 12-month periods ended June 30, 1990.

Income before extraordinary items for fiscal 1990 rose 89 percent to $18,758,000, or $1.25 per share, from the $9,904,000, or 70 cents per share, reported in fiscal 1989. The extraordinary items, which consist of tax loss carryforwards and R&D credits, brought net income to $22,212,000,

or $1.48 per share, compared with $16,285,000, or $1.15 per share, in the prior year.

For the year ended June 30, 1990, revenues increased 63 percent to $224,206,000, compared with $137,411,000 reported in fiscal 1989.

Revenue for the fourth quarter ended June 30, 1990 was $64,924,000, compared with $50,543,000 in the fourth quarter of fiscal 1989. Income before extraordinary items for the fourth quarter was $7,052,000, or 44 cents per share, compared with $6,061,000, or 43 cents per share, in the fourth quarter of fiscal 1989.

Kenneth W. Simonds, Teradata's chairman and chief executive officer, said: ''We achieved our aggressive revenue growth objectives, and are extremely pleased with our earnings growth.

''We are particularly pleased with our fourth-quarter income results in light of the demanding comparison with last year's fourth quarter, which had very high income resulting from the shipment of several orders that had been deferred from the third quarter.

''We have achieved our objectives for new customers and new systems this fiscal year. The new Unisys interface is becoming an important part of the business, especially in generating new account activity, and we look forward to another year of strong growth in the customer base.

''Our international business rebounded in the fourth quarter from a weaker third quarter, and we have now established a relationship with a Japanese distributor, to whom we sold our first system for installation in Japan.''

Simonds continued: ''Our gross margin, at 64.3 percent, was higher in the fourth quarter as the result of favorable foreign exchange rates and a better mix of customers and product. ShareBase Corp., which we acquired on June 27, had a negligible effect on our financial results, but will be included in future reporting periods.''

Simonds concluded: ''We are looking forward to yet another year of record results. We expect to continue to expand geographically, in Europe and the Far East, and within our established markets, with products such as the Unisys interface, which has already resulted in additional systems sales.''

Teradata sold 774 processors in 56 transactions during the fourth fiscal quarter. Twenty-seven of these transactions, comprising 166 processors, were expansions or upgrades of previously installed systems, and a record 29 were new systems. International customers accounted for 20 percent of total revenues in the quarter.

Los Angeles-based Teradata designs, manufactures and markets high-performance systems and related products and services for relational database management.

COSTA MESA, CA (JULY 31) BUSINESS WIRE - Del Taco Inc., which operates 339 Del Taco and Naugles restaurants in California, Arizona, Utah, Nevada, Illinois and Missouri, has appointed Kevin K. Moriarty as president and chief executive officer.

Moriarty replaces Wayne W. Armstrong who has resigned to pursue other interests.

Moriarty, 42, was formerly executive vice president and general manager of the North Central and Western divisions of Burger King, USA. The six regions included in those divisions covered 30 states, and contributed almost half of the fast food chain's profits. Moriarty was also one of five members of the Burger King USA executive committee, which provided the company's strategic direction.

During his 16 years with Burger King, Moriarty's various responsibilities at Burger King have included sales, marketing, training, franchise negotiations and operations, finance, real estate, and construction.

He served as New York area manager of Burger King, and then as vice president of the Chicago Region, where he was responsible for a major sales and consumer satisfaction ratings turnaround, which resulted in a 50 percent profit increase. Prior to joining Burger King, Moriarty, a Brooklyn native, was a self-employed restauranteur in New York.

Del Taco Inc. is the second largest international quick service chain specializing in Mexican/American food. Del Taco and Naugles stores serve more than one million customers per week.

The company was formed in a 1988 merger of 25-year-old Del Taco, a private company, and 20-year-old Naugles, a high quality Mexican/American restaurant group owned by Collins Food international. In January, 1990, the previous owners of the chain sold their interests in the chain to a management-led investor group.

DALLAS (JULY 31) BUSINESS WIRE - Southwest Airlines (NYSE:LUV) Tuesday slashed its already low systemwide Fun Fares by about 20 percent for travel during the Labor Day holiday period.

''This special sale will be good for travel starting August 30 and continuing through September 4,'' said Don Valentine, Southwest's vice president, marketing.

He explained that the one-day advance-purchase, one-way fares require that customers make reservations at least one day before departure.

In addition, flights cannot be changed and tickets may not be used for confirmed or standby travel on other flights. Also, unused tickets cannot be refunded and seats are limited on each flight.

Valentine said that Southwest will begin accepting reservations August 1 for the special sale seats. Some examples of the low one-way Fun Fares are as follows:

Albuquerque-El Paso	$20
Albuquerque-Los Angeles	$39
Amarillo-Dallas	$20
Austin-Dallas	$20
Austin-Phoenix	$55
Birmingham-New Orleans	$25
Chicago Midway-Kansas City	$20
Chicago-Houston	$79
Dallas-Houston Hobby	$20
El Paso-Phoenix	$20
El Paso-Dallas	$35
Harlingen-St. Louis	$55
Houston Hobby-New Orleans	$25
Houston Hobby-Los Angeles	$109
Kansas City-Chicago Midway	$20
Las Vegas-San Diego	$20
Little Rock-Dallas	$20
Los Angeles-Phoenix	$20
Lubbock-Houston	$29
Midland/Odessa-Dallas	$20
Nashville-Birmingham	$20
Nashville-Los Angeles	$125
Oakland-Burbank	$25
Oakland-Phoenix	$39
Oklahoma City-Dallas	$20
Ontario-Phoenix	$20

Phoenix-Las Vegas	$20
San Antonio-Dallas	$20
San Antonio-Los Angeles	$65
San Francisco-San Diego	$25
Tulsa-Houston	$25

Dallas-based Southwest flies to 32 airports in 30 cities in 14 states. It is the eighth largest carrier in the United States in terms of customers carried and it earned ''major airline'' status by virtue of its more than $1 billion in operating revenues in 1989.

DALLAS (JULY 31) BUSINESS WIRE - Diamond Shamrock Offshore Partners (NYSE:DSP), the master limited partnership of Maxus Energy Corp. (NYSE:MXS), reported net income of $2.1 million, or 3 cents per unit, for second-quarter 1990, compared with a net loss of $6.6 million, or 12 cents per unit, in second-quarter 1989.

The 1989 second quarter included a net loss of approximately $13.0 million on anticipated property sales. For the first six months of 1990, DSP reported net income of $8.3 million, or 12 cents per unit, compared with net income of $3.0 million, or 5 cents per unit, in the first half of 1989.

Sales for second-quarter 1990 were $23.9 million, compared with $28.9 million in the like quarter a year ago. Net cash provided by operating activities totaled $19.9 million in second-quarter 1990, compared with $26.3 million in second-quarter 1989.

Capital spending increased to $22.1 million in second-quarter 1990, compared with $7.5 million in the like period last year. This increased spending was due primarily to lease acquisitions, new platform construction in the Brazos and Main Pass areas and developmental expenditures.

For the first half of 1990, sales were $53.3 million, compared with $62.8 million a year ago. Net cash provided by operating activities was $42.2 million in the first six-month period of 1990, compared with $52.7 million in the first six months of 1989.

Maxus Energy Corp., the special general partner of DSP, is an independent exploration and production company based in Dallas.

GAINESVILLE, FL (JULY 31) BUSINESS WIRE - Quadrex Corp. (NASDAQ, NMS:QUAD) Tuesday announced that it is offering a private placement of common stock to a limited number of accredited investors.

The company hopes to raise up to $3 million in this private placement. Funds raised from this offering will be used for working capital, general corporate purposes, and for investing in related business activities.

In general, shares offered in this placement will be offered to parties who either currently are shareholders or who have an existing relationship with either the company or one of its shareholders. Shares offered in this transaction will not be registered under the Securities Act of 1933 or any applicable state securities laws, and will be subject to restrictions in accordance with the provisions of the Private Placement Memorandum, related documents, and applicable Federal and state securities laws.

William B. Derrickson, chairman and chief executive officer, said today, ''We have explored the options available to us to obtain working capital for the company and believe that this private placement of equity is the best option for the company at this time.''

Quadrex Corp. provides technical support, waste disposal, recycling and

decontamination services to utilities, industrial companies, institutions and government agencies.

HOUSTON (JULY 31) BUSINESS WIRE - Transco Energy Co. (NYSE:E) reported net income for the quarter ended June 30, 1990, of $12.6 million, or 44 cents per common share, including $10.6 million after-tax, or 37 cents per common share, related to Federal Energy Regulatory Commission (FERC) approval of a Texas Gas Transmission Corporation rate case settlement.

These earnings compare with net income of $19.1 million, or 67 cents per common share, for the second quarter of 1989, which included a gain of $13.7 million after-tax, or 48 cents per common share, from the sale of 50 percent of Transco Energy Ventures Co.'s interest in certain power-generation projects.

Revenues for the second quarter of 1990 were $684 million, compared with second-quarter-1989 revenues of $737 million.

Transco's consolidated net income for the six months ended June 30, 1990, was $33.8 million, or $1.16 per common share, compared with $36.6 million, or $1.28 per common share, for the same period last year. Revenues for the first six months of 1990 were $1,633 million compared with $1,451 million a year ago.

For the quarter, earnings from the natural-gas pipeline systems, coal and energy-ventures segments offset losses from the company's hydrocarbon marketing and exploration and production segments.

The natural-gas pipeline-systems segment reported earnings for the quarter of $30.3 million compared with earnings of $11 million for the same period last year. Transcontinental Gas Pipe Line Corp. (TGPL) contributed $15 million to segment and consolidated results compared with $16 million for the second quarter in 1989.

Texas Gas Transmission Corp. reported net income of $15.3 million, including the $10.6 million from the rate case settlement, compared with a loss of $1.6 million in the second quarter of 1989. The pipeline-segment results also reflect reduced interest expense as a result of the re-payment of acquisition debt associated with the purchase of Texas Gas.

Transco's hydrocarbon marketing segment, including Transco Energy Marketing Co. (TEMCO), reported a loss of $2.1 million for the quarter

compared with earnings of $1.8 milion for the second quarter of 1989. TEMCO earnings were lower due primarily to reduced natural-gas sales attributed to mild weather and competition from other gas suppliers and alternate fuels.

CHICAGO (JULY 31) BUSINESS WIRE - United Airlines has launched its United Vacations Europe Fly/Drive 1990 brochure.

The brochure features complete flexibility for the independent traveler and special land rates for United Airlines passengers using Frankfurt or Paris as a gateway city.

United's Europe Fly/Drive package offers unlimited options in planning a trip from one night to one month, or more. A wide selection of first class and deluxe hotels is available at various price ranges in Germany, France, Italy, Austria and Switzerland. Instant confirmation is available through Apollo for hotel accommodations and optional car rentals with Kemwel, United's European car rental supplier.

The extensive route system of United/United Express, serving 225 cities in the United States, makes a European vacation with United Vacations accessible from virtually every city in the U.S.

With one convenient phone call, confirmed reservations for air travel, hotels and car rentals can be obtained. Sightseeing excursions and airport transfers via Unitours, United's European ground handler, are confirmed through United's Vacation Planning Center at 1-800/328 6877.

As a special introductory offer, Mileage Plus members who purchase a ticket and fly roundtrip on United to Frankfurt or Paris through Oct. 31, 1990 will receive a 10 percent discount on the land package (hotels, car rental and sightseeing). This offer is available through travel agents or by calling United's Vacation Planning Center at 1-800/328-6877. The Mileage Plus account number is required when booking a trip at this special rate.

DALLAS (JULY 31) BUSINESS WIRE - The board of directors of the managing general partner of Diamond Shamrock Offshore Partners (NYSE:DSP) announced that no cash distribution will be paid in the third quarter 1990.

Consistent with the previously announced policy, the partnership will distribute on a quarterly basis substantially all distributable cash. For this purpose, distributable cash means net cash provided by operating activities and proceeds from sale of assets, less expenditures for oil and gas properties and equipment, including dry-hole costs, reserves for future operating and capital requirements and contingencies, and other partnership obligations.

Distributable cash for the quarter was a $2.2 million deficit, due to increased expenditures for oil and gas properties and equipment and lower oil and gas prices compared to first quarter 1990.

DSP is the master limited partnership of Maxus Energy Corp. (NYSE:MXS), an independent exploration and production company based in Dallas.

SAN FRANCISCO (JULY 31) BUSINESS WIRE - URS Corp. (NYSE:URS) announced Tuesday that its URS Consultants Inc. subsidiary has successfully completed negotiations with the U.S. Navy for exercising the first option year of the Comprehensive Long-Term Environmental Action, Navy (CLEAN) contract in the Pacific Northwest.

The base year, 1989-90, contract with the Navy resulted in more than $15 million in task order environmental work. The recently signed contract provides funding of the program for the first of nine option years remaining in the CLEAN program. The CLEAN contract is the principal vehicle through which the Navy implements its Installation Restoration Program in the Pacific Northwest and Alaska. The program focuses on waste management, spill prevention and environmental monitoring at naval facilities.

During the first contract year, more than 20 individual projects were undertaken at locations from remote arctic villages to large facilities on Puget Sound.

URS Corp. is a publicly owned company listed on the New York Stock Exchange. Its subsidiary, URS Consultants Inc., is a nationwide

consulting firm with 25 offices which provides planning, architectural, engineering and construction management services to a variety of public and private clients.

Utilizing staff resources of more than 1,000 professionals, URS meets the challenges of today's complex hazardous waste/environmental, water resources, transportation, architectural/engineering and construction management projects.

VANCOUVER, WA (JULY 31) BUSINESS WIRE - Red Lion Hotels & Inns will open its first property in San Diego in October 1990.

The 11-story luxury hotel is under construction in Mission Valley and will be the centerpiece of an office, shopping and entertainment center called The Brickyard.

The 300-room property features turrets and towers, large expanses of glass skylights and a two-story open atrium. A second-foor walkway connects the Red Lion/San Diego to The Brickyard, 135,000-square-feet of space for retail and specialty shops and a seven-plex theatre.

The new hotel boasts such signature Red Lion features as oversized guest rooms, high-quality food and beverage services and flexible meeting facilities. Most guest rooms include a king-size bed, love seat, desk with chair and armoire. Guests will also enjoy remote color television, in-room movies, card key locking system, and individual climate control.

Red Lion/San Diego will have a variety of dining choices. Brickstone's Grille will feature continental cuisine for lunch or dinner. The Fountain Cafe will serve breakfast, lunch and dinner in a casual setting. And Club Max, a contemporary lounge, will feature live bands, a roomy dance floor and disc jockey entertainment. A lobby bar will overlook the outdoor pool area.

A professional and functional meeting environment will be provided with more than 15,000 square feet of flexible meeting and banquet space. A ballroom with a 1,000-person capacity and seven additional meeting rooms can serve large or small groups. The hotel's convention service and executive conference managers will work closely with meeting planners to accommodate groups ranging from large conventions to corporate board meetings.

The full-service 3,000-square-foot health club will provide weight

machines, stationary bikes, and circuit training equipment. Other fitness amenities include an indoor lap pool, outdoor pool, hydrotherapy pool, sauna and two lighted tennis courts.

The Red Lion/San Diego is 10 minutes from the airport with easy access to highways, ocean beaches and downtown San Diego.

Red Lion Hotels & Inns operates 55 hotels in 11 Western states. In addition to San Diego, Red Lion has a hotel in development in Glendale, Calif.

MARLBOROUGH, MA (JULY 31) BUSINESSWIRE - Sequoia Systems, Inc. (NASDAQ: SEQS), which completed an initial public offering on March 13, Tuesday reported record sales and earnings for the fiscal year ended June 30, 1990.

Revenues for the year increased 56 percent to a record $48,612,000 from $31,094,000 a year earlier. Fiscal 1990 net income more than tripled to $4,470,000, or $0.61 per share, from $1,422,000, or $0.26 per share a year earlier when 36 percent less shares were outstanding.

Fourth quarter revenues were up 67 percent to a record $17,198,000 compared with $10,305,000 in the prior year. Net income for the three months ended June 30, 1990 increased 80 percent to $2,166,000, or $0.24 per share, from $1,204,000, or $0.21 per share in the prior year.

Pointing out that fourth quarter sales of Sequoia Systems to the Unix marketplace represented a higher number of customer shipments than at any time in recent periods, Fusco said, ''We are very pleased with last year's results and with the reception the market is according our products. In fact, we are meeting, or surpassing, our internal goals and remain optimistic about our prospects in the current fiscal year.''

In the fourth quarter, Sequoia also delivered its largest UNIX/Pick-based computer system ever -- a 16-processor configuration for a 2,000-plus terminal network -- to Ferguson Enterprises Inc. The system was sold by the Ultimate Corp., a Sequoia strategic partner, to Ferguson's Newport News, Va., headquarters. With annual revenues of over $600 million, Ferguson is the largest wholesale plumbing distributor in the United States with operations in 19 states and the District of Columbia.

Sequoia Systems Inc. (NASDAQ: SEQS) designs, manufactures and markets fault-tolerant computer systems to serve on-line transaction processing (OLTP) needs. Sequoia's systems have an open architecture adhering to industry standards and a UNIX-based operating system. The company also offers the Pick Open Architecture operating system and provides on-line service and maintenance support to its worldwide customer base. Major customers include manufacturers, distributors, banks and financial institutions, insurance companies, telecommunications operations, and federal agencies.

Founded in 1981, Sequoia has shipped over 110 systems to customers in the United States and seven other countries.

MIAMI, FL (JULY 31) BUSINESS WIRE - FRENCHTEX, INC., (NASDAQ Symbol: FRCH) Tuesday announced that the company has acquired a controlling interest in Deritex, N.A., a major towel mill, and VVA, a towel dyeing plant, which is a sister corporation of Deritex. Deritex is a private company.

The company stated that it acquired 82 percent of the common stock of Deritex and 35 1/2 percent of the common stock of VVA. As a result of the acquisition, FRENCHTEX's total assets have increased to more than $23 million and estimates of combined revenues for the 12 months ending July 31, 1990 exceed $18 million (Deritex's fiscal year end is December 31).

With operations in Belgium, Deritex and VVA have been in business for almost 40 years. Deritex is situated on 12 acres of land in a state-of-the-art 160,000 square foot facility with approximately 300 employees. VVA is located on 5 acres of land including a 60,000 square foot plant.

In commenting on the acquisition, Don M. Waters, president and director of FRENCHTEX INC., stated, ''Owning an established successful towel mill and dyeing plant is a very important strategic move for the company. The acquisition of Deritex and VVA will enable us to control the sourcing and manufacturing processes, enhance the company's European exposure and significantly strengthen the company's financial position. Furthermore, this gives us the international market exposure to expand FRENCHTEX, INC.''

FRENCHTEX, INC. distributes European home textiles, including towels, robes, coordinated sheets, pillow shams, pillow cases, comforters, bed ruffles, duvet covers, blankets and bedspreads.

#90212b0616 07/31/1990 ~Business Wire
SUNNYVALE, CA (JULY 31) BUSINESS WIRE - ZyMOS Corp. (NASDAQ, NMS: ZMOS) and Renaissance GRX (RENX) announced that the acquisition of Renaissance by ZyMOS was completed yesterday.

Per the terms of the agreement ZyMOS has acquired all of the assets and assumed certain liabilities of Renaissance GRX. ZyMOS issued its common stock to Renaissance GRX, based on .75 of a share for each outstanding share of Renaissance GRX. Renaissance will dissolve and distribute the ZyMOS stock pro rata to its shareholders.

ZyMOS, known for its design, development and marketing capabilities of personal computer logic chips sets, graphics chips, and custom integrated circuits, will be incorporating the microcomputer graphics hardware and software capabilities of Renaissance GRX into the company. Renaissance, as a group within ZyMOS, will remain in Bellevue, Wash., at the company's current location. Commenting on the acquisition, ZyMOS President and Chief Executive Officer David A. Handorf said, ''ZyMOS has quite successfully established itself as a substantial participant in the PC Chip Set and ASIC market segments. We moved into graphics two years ago and have made significant headway. However, the expertise gained through this acquisition will accelerate our progress in the graphics area at a rate that we would not be able to achieve any other way.''

Renaissance GRX president Bob Butchko added, ''Renaissance has developed a reputation for graphics products which are excellent in performance and features. The coupling of ZyMOS' semiconductor technology with our graphics technology will allow us to produce more innovative, powerful, feature-rich and cost effective graphics solutions for our customers.''

Through this acquisition ZyMOS now addresses a much larger market segment including original equipment manufacturers (OEMs) in the personal computer, workstation and microprocessor-based systems marketplaces; value added reseller (VAR) and system integrator marketplaces; and retail distribution market. The company will market a complete line of semiconductor chips, chip sets, and board-level products with product development focused on integration for higher level performance and system cost reduction. The company's graphics controller board product line

will continue to be marketed under the Renaissance name. The overall thrust of ZyMOS will continue to be the ability to provide high-value, system-level solutions to its customers.

#90212b0617 07/31/1990 ~Business Wire

BOSTON (JULY 31) BUSINESS WIRE - IntelliCorp Inc. (NASDAQ:INAI) demonstrated PROKAPPA, a new application development and deployment environment that brings the benefits of object- and rule-based systems to mainstream business applications at the annual American Association of Artificial Intelligence meeting in Boston Tuesday. The PROKAPPA system is comprised of two integrated components; an application development environment and a set of high-performance runtime components.

The application development environment gives traditional 3GL and 4GL programmers access to a new ''descriptive programming'' capability through powerful development and debugging tools that speed application development while increasing the power and performance of applications compared to traditional approaches. The runtime components provide a foundation for integrating knowledge-based systems technology with conventionally developed systems to create high-impact end-user applications.

Both components are based on the industry standard C programming language, the UNIX operating system, and the X Windows interface, providing compatibility with many existing hardware and software applications. PROKAPPA runtime modules can be easily embedded into new or existing business applications to provide incremental power.

The developers' workbench component and runtime libraries run on Sun-3 and SPARCstation (Sun-4) workstations. Runtime modules will be portable to a variety of additional UNIX platforms that support ANSI C, including systems from Hewlett-Packard Company, International Business Machines Corp. and Digital Equipment Corp. with announcements anticipated in the fall.

PROKAPPA is part of the KAPPA family of application development products from IntelliCorp. Each product in the KAPPA family has been optimized and tailored for its specific platform, the software standards of that system, and for the scale of application for which it was selected. All KAPPA products are built in the standard ANSI C programming language, have an

open architecture, and use existing windowing and user interface standards. Each product offers an interactive development environment for enhanced productivity in building and maintaining applications, as well as a range of options to ensure highest performance run-time delivery of completed applications. The KAPPA family also includes KAPPA PC -- A high performance object-oriented software environment for developing and delivering powerful personal computer-based business applications under Microsoft Windows 2.1 or 3.0.

IntelliCorp has provided industry-leading software development tools and advanced engineering and manufacturing application solutions for more than seven years. The company's customers span all industries, including financial services, automotive, aerospace, telecommunications, chemical, government, energy, manufacturing and engineering. IntelliCorp products are marketed through a combination of the company's direct sales force and its authorized dealers, resellers, OEMs and VARs. Headquartered in Mountain View, Calif., IntelliCorp has 225 employees and offices throughout the United States, as well as in Europe and Asia.

LOS ANGELES (JULY 31) BUSINESS WIRE - RCM Technologies Inc. (NASDAQ Symbol: RCMT, RCMTZ; BSE SYMBOL: RMT) Tuesday announced that it has concluded an agreement with CBI Services, Inc., a subsidiary of CBI Industries (NYSE Symbol: CBH; Sales: $1.1 billion), to jointly provide a proposal for an installation, including professional engineering, equipment, construction and related services to a domestic electric utility with regard to RCM's ''System 99'' clean flue gas technology.

CBI Services will also work with RCM to provide the proposal and conduct contract negotiations for the ''System 99'' installation. CBI Services has performed construction, manufacturing and engineering services for utility clients for fossil fuel power plants for more than 50 years.

''System 99'' was developed to meet the electric utility industry's demand for combined Sulphur Dioxide and Nitrous Oxide reductions at coal-burning plants in order to comply with new and pending air pollution and acid rain emissions standards.

Commenting on the announcement, Robert Sackett, chairman of RCM TECHNOLOGIES, INC., stated, ''We are extremely pleased to be associated with CBI Services and look forward to establishing a strong and mutually beneficial working relationship. CBI offers significant experience and expertise in the electric utility industry with regard to submitting

proposals, negotiating contracts and providing superior construction and engineering services.''

Sackett continued, ''We are confident that this association will enhance current as well as future negotiations for 'System 99' installations.''

RCM TECHNOLOGIES, INC. is involved in the development and marketing of its patented ''System 99'' which is designed to control hazardous emissions from smoke stacks, a major cause of acid rain. RCM also provides professional engineering and technical services for major corporations in aerospace, chemical and industrial manufacturing since 1968.

REDMOND, WA (JULY 31) BUSINESS WIRE - Digital Systems International Inc. (NASDAQ:DGTL) Tuesday announced record net sales of $9.0 million for the second quarter ended June 30, 1990, up 45 percent from net sales of $6.2 million for the second quarter 1989.

Net income for the second quarter also set a new high for the company. Net income was reported at $2.0 million for the quarter, up 32 percent from net income of $1.5 million for the second quarter 1989. Earnings per share for second quarter were $.25 on 7.9 million shares outstanding, compared to $.21 on 7.2 million shares for the prior year second quarter.

''Our second quarter results exceeded expectations and provide a favorable comparison to 1989's results,'' said Michael L. Darland, president and chief executive officer of Digital Systems. ''We are particularly pleased to report this strong performance relative to last year's second quarter, our strongest quarter last year and a quarter in which our earnings were significantly above expectations.''

During the second quarter, the company's operating margin and net income margin improved from the prior quarter's already strong levels as sales growth exceeded growth in selling and administrative expenses. The company's investment in new product development increased as a percentage of net revenues during the quarter as well.

Net sales for the six months ended June 30, 1990, were $16.0 million, an increase of 60 percent from $10.0 million for the same period last year. Net income for the six months was $3.4 million, up 46 percent from $2.3

million for the first six months of 1989. Earnings per share for the six months were $.44 compared to $.32 for the prior year.

During June, the company completed its acquisition of Voicelink Data Services, as planned. Results of operations of Voicelink Data Services will be reported on a consolidated basis beginning with next quarter's results. Voicelink Data Services in one of the largest automated outbound calling service bureaus in the country.

Digital Systems International Inc. is a leading supplier of outbound call processing systems used to automate collections, teleservicing, and telemarketing applications. Its systems enhance the productivity, efficiency, and revenue-generating capabilities of organizations that use the telephone to contact their customers and prospects. Digital Systems' customers include financial institutions, utilities, cellular and Regional Bell operating companies, and other companies in the consumer credit, communications, collections, telemarketing and health care industries.

SANTA ANA, CA (JULY 31) BUSINESS WIRE - Tokos Medical Corp. (Delaware) (NASD:TKOS) reported an 87 percent increase in net income of $792,000, 6 cents per share, for the quarter ended June 30, 1990 on record net revenues of $17.2 million.

Net income was $423,000, 4 cents per share, on net revenues of $15.1 million in same period of the proceding year.

For the six months ended June 30, 1990, net income was $1,214,000, 10 cents per share, on net revenues of $32.9 million as compared to $694,000, 7 cents per share, on net revenues of $29.1 million for the comparable period in 1989.

Chief executive officer, Robert F. Byrnes, stated, ''The first half of this year has been a period of record net revenues due primarily to a continuing increase in physician prescriptions for our obstetrical and gynecological homecare services.''

On June 12, the company entered into a definitive agreement with Physiologic Diagnostic Service Inc. (PDS) of Atlanta. Pursuant to this agreement, Tokos will acquire all outstanding PDS shares in exchange for approximately 2.7 million shares of Tokos common stock.

The consummation of the transaction will be delayed pending a review by

the Federal Trade Commission. Earlier this year, the FDA obstetrics and gynecology panel recommended approval of the PDS Genesis home uterine activity monitor for use in the early detection of preterm labor.

In June, a supplement of the Obstetrics and Gynecology journal included 18 peer review articles demonstrating the effectiveness of the Tokos uterine activity monitor and preterm labor services.

Byrnes said, ''We expect that the clinical findings reported in this journal will accelerate broader acceptance within the payor community.''

Tokos Medical Corp. is the leading national provider of specialized home healthcare services to the OB/Gyn market with 64 sites of service nationwide. The company's corporate headquarters are located at 1821 East Dyer Road, Santa Ana, Calif.

JACKSONVILLE, FLA. (JULY 31) BUSINESS WIRE - Technology Applications Inc., a Bechtel company, announces the commercial availability of REALM (Reactor Emergency Action Level Monitor).

REALM is a software application that uses knowledge-based/expert systems technology to assist nuclear power plant managers, operators, and engineers, improving the speed and effectiveness with which they can respond to emergencies.

According to Robert Touchton, president of Technology Applications, REALM helps nuclear plant operators in a number of ways. ''It monitors plant conditions by interpreting live data from hundreds of sensors - twenty-four hours a day, seven days a week,'' he explains. ''If a problem develops, REALM processes the information and, in an instant, provides users with a thorough and consistent assessment of the situation, an assessment that embodies the thinking of experts.''

The development of REALM was sponsored by the Electric Power Research Institute (EPRI) and has become one of its flagship artificial intelligence projects for nuclear power generation facilities. Today's announcement follows the execution of an exclusive, worldwide commercialization agreement granted to Technology Applications by EPRI.

REALM knowledge bases contain generic information on instrumentation; reasoning; determination of conditions, states and events; and industry-wide issues and strategies. Custom information is added to

reflect plant design, emergency classification decision tables, management philosophies and in-house expertise.

When abnormal behavior is reported by the sensors, REALM's expert systems assess the situation and produce a dynamically constructed explanation of what has occurred. Both event-based and symptom-based reasoning are used when determining the emergency status to ensure validity.

Technology Applications Inc. is a premier provider of advanced software products and related professional services. The company has developed and implemented more than 50 knowledge-based systems to date. Technology Applications was founded in 1984 and purchased by Bechtel Corp. in 1988. The company is now part of Bechtel's Information Technology organization.

BOSTON (JULY 31) BUSINESS WIRE - IntelliCorp Inc. announced Tuesday that its KAPPA PC application development and runtime environment now runs under MS Windows 3.0, and also announced that its KEE (Knowledge Engineering Environment) system, release 4.0, now provides full support for X Windows, color Common Windows and the Lucid Lisp 4.0 development environment.

KAPPA PC, a high-performance software environment for developing and delivering powerful personal computer-based business applications, brings the power of object-oriented programming to PC applications, programmers and users. The new version, KAPPA PC 1.1 also features more efficient memory management and support for MS Windows 3.0 Dynamic Data Exchange (DDE) on both the client and server sides.

With Version 1.1's improved memory management, a 5,000 object application can run in less than 2mb of main memory. Competing systems require more than 8mb of main memory for the same number of objects. ''Even large-scale applications can run in standard personal computers with KAPPA PC,'' said Stephen Farber, director of business development.

KAPPA PC's support of DDE allows KAPPA PC to exchange data seamlessly with other Windows 3.0 applications, such as Excel and ToolBook that also support DDE. Support for both the client and server sides of DDE means data can be shared to and from KAPPA PC with equal ease.

Previous versions of KAPPA PC ran under MS Windows 2.1 and these will continue to be supported. Registered users of earlier versions of KAPPA PC can be upgraded to Version 1.1. Upgrades will be offered at no charge

to customers with a current maintenance contract. For those without maintenance contracts the upgrade charge is $165.00.

KAPPA PC 1.1 application development and runtime systems are available from IntelliCorp in the United States and other countries. U.S. pricing is $3,500 for the development system; runtime licenses are $450 each. Quantity discounts are available.

The company also announced today that, as a part of an ongoing product and services relationship between Hewlett-Packard Co. and IntelliCorp, Hewlett-Packard took delivery of over 200 copies of KAPPA PC diring IntelliCorp's fiscal fourth quarter. Hewlett-Packard plans to use KAPPA PC to develop and deploy strategic applications throughout its worldwide operations.

IntelliCorp Inc. has provided industry-leading software development tools and advanced engineering and manufacturing application solutions for more than seven years. The company's customers span all industries, including financial services, automotive, aerospace, telecommunications, chemical, government, energy, manufacturing and engineering.

#90212b0632 07/31/1990 ~Business Wire
SPRINGDALE, AR (JULY 31) BUSINESS WIRE - Cannon Express Inc.

(NASDAQ/NMS:CANX) Tuesday announced the results of its fourth quarter and fiscal year ended June 30, 1990.

Revenues 4th qtr. $ 5,823,542 vs. $ 4,068,330 (up 43 percent) Net income 4th qtr. $ 422,631 vs. $ 287,844 25 cents vs. 17 cents (up 47 percent)

Year end revenues 4th qtr. $18,930,380 vs. $16,055,334 (up 18 percent) Net income 4th qtr. $ 1,142,837 vs. $ 1,357,630 68 cents vs. 80 cents (down 16 percent)

Year to year comparisons of net income were lower largely due to unusually high fuel prices during December, January, and February. The company is continuing to increase the size of its fleet of tractors and trailers, as a part of management's long term growth plan.

Average monthly revenues are approaching $2,000,000, each as reflected in the results of the fourth quarter. The company intends to purchase an additional 40 tractors and 52 trailers prior to the end of December 1990, to be added to the current company fleet of 250 tractors and 307 trailers, bringing the new fleet totals to 290 tractors and 359 trailers.

Management believes adequate financing will be available to secure the new equipment either through long term borrowings or lease arrangements.

Management believes the company can rely on additional business from its current customer base as well as its ability to attract new customers to provide revenues for the increased fleet size.

LENEXA, KS (JULY 31) BUSINESS WIRE - Syntro Corp. (NASDAQ:SYNT) reported revenues of $962,408 for the quarter ended June 30, 1990, an increase of 64 percent over revenues $586,377 for the same quarter last year and 14 percent over the prior quarter.

Expenses were $1,462,980, down 23 percent from last year's third quarter. Net loss for the quarter was $500,572 (5 cents per share), a 62 percent improvement from the third quarter loss in fiscal 1989 of $1,318,413 (14 cents per share). Syntro's revenues for the nine month period ended June 30, 1990, were $2,523,814, compared to $1,474,864 for the same period last year.

Syntro's net loss for the nine month period ended June 30, 1990, was $1,556,608 (16 cents per share), compared to a net loss of $3,692,682 (39

cents per share) for the prior year's period.

''I continue to be excited over Syntro's constantly improving performance '' said Dr. J. Donald Todd, Syntro's president and chief executive officer.

''Our third quarter set a new 3-year record for total revenues and kept us on our charted course for achieving profitability. SyntroVet introduced PRV/Marker-KV, another new product developed from Syntro's technology, that contributed to a 21 percent increase in sales over the prior quarter. During our first 9 months, we have increased our revenues by 71 percent, decreased our expenses by 21 percent and improved our bottom line by 58 percent.''

Syntro Corp. founded in 1981, is a Lenexa and San Diego based biotechnology company engaged in the development and commercialization of animal health products. Its current strategy is focused on achieving rapid revenue growth and profitablity by penetration of the animal health market with innovative vaccines while pursuing corporate alliances that will broaden its product line in the future. SyntroVet, the company's animal health subsidiary, was established in 1985 to register, manufacture and market products resulting from Syntro's research.

MOUNT VERNON, NY (JULY 31) BUSINESS WIRE - Del Electronics Corporation (AMEX:DEL) announced that it achieved record sales of approximately $4.6 million for the just completed fourth quarter ended July 28, 1990.

Fourth quarter sales were up approximately 109 percent from the $2.2 million, level a year ago. Full year record sales were approximately $13.3 million, an increase of approximately 49 percent over last year's $8.9 million sales level.

Leonard A. Trugman, Chairman and President, said, ''We are pleased with our performance in fiscal 1990. All operating units had a positive contribution to our just completed fourth quarter. We are planning for continued growth in fiscal 1991.''

The Company said that its backlog at July 28, 1990 was in the range of $10 million and that full year financials would be available in October.

Del Electronics Corporation, founded in 1954, is a power conversion and electronic filter company, serving medical, industrial and military electronics markets.

SAN JOSE, CA (JULY 31) BUSINESS WIRE - CAD Solutions Inc. (CSI), the nation's largest reseller of computer-aided design hardware and software, Tuesday announced the opening of a new, full-service office in Irvine, Calif., as part of its aggressive national expansion program.

CAD Solutions recently announced the formation of its Southern California division and the acquisition of Focus Inc., the largest CAD reseller in San Diego County. ''Southern California is one of the largest CAD markets in the country and having offices in Irvine and San Diego will allow us to better serve our rapidly growing list of Southern California customers,'' said Vic Leventhal, president and CEO of CAD Solutions. CAD Solution's current list of Southern California clients include several aerospace and energy companies.

The Irvine office brings the number of CAD Solutions full-service offices to seven, and further enhances the company's position as the industry's leading reseller of CAD hardware and software.

''Having the added technical and service resources at the Irvine office will allow us to more easily expand into new segments of the Southern California market.'' said Dennis Bertken, CSI's vice president, Southern California division. Bertken has complete responsibility for sales, marketing and operations of the newly formed division.

CAD Solutions' new, fully-staffed office and demonstration center will be managed by Nancy Gruber, who has seven years experience selling CAD hardware and software into the Southern California market and has consistently ranked as one of the top sales performers for Autodesk products. The new office is located in the Koll Center, 18300 Von Karman Ave., Irvine, Calif. 92715. The telephone number is 714/724-0633.

The opening of the Irvine office follows CSI's other acquisitions of the Electronic Design Group (EDA) of Advanced Micro Consultants, CAD Southwest of Phoenix, and Focus Inc. of San Diego in the past three months.

CAD Solutions, based in San Jose, is the computer-aided design industry's leading ''SuperVAR'' providing especially-designed hardware and software, complete installation including networking, training and on-going customer support to Fortune 1000 companies and smaller firms involved in mechanical electrical printed circuit board design, and construction industries.

SARASOTA, FL (JULY 31) BUSINESS WIRE - Elcotel Inc. (NASDAQ/NMS:ECTL), manufacturer of public communications products, announced Tuesday that Thomas R. Wiltse has been elected to the board of directors and its audit committee as the third outside director of the five-man board. Wiltse, who was not previously affiliated with the company, is the beneficial owner of approximately 4 percent of the outstanding shares of Elcotel.

George C. Pierce, chief executive officer, commented, ''Mr. Wiltse is an excellent addition to our board. He was general manager of the foundry operations of General Motors from 1974 until his retirement in 1985, managing a $2 billion operation with approximately 25,000 employees. He holds a masters degree from MIT.

''Mr. Wiltse has made himself very knowledgeable about the business of Elcotel, and will be of significant assistance to management through his general business experience.''

Wiltse lives in Sarasota, where Elcotel is headquartered.

#90212b0641 07/31/1990 ~Business Wire

CARLSBAD, CA (JULY 31) BUSINESS WIRE - International Totalizator Systems Inc. (NASDAQ/NMS:ITSI) has released earnings for the fiscal period ended June 30.

The second quarter resulted in net income of $399,000, or 5 cents per share, on $6.7 million in revenues. This compares with like-period 1989 net income of $502,000, or 7 cents per share, on revenues of $7.8 million.

Year-to-date revenues of $15.8 million were up $2.9 million, or 22 percent from the prior year. Net income for the first six months of 1990 amounted to $1.4 million, an increase of $703,000, or 99 percent, from the comparable period in 1989.

Despite the $1.1 million decline in second-quarter revenues, pre-tax earnings increased by $44,000, or 9 percent. The company's pre-tax return on sales improved from 6.5 percent in the second quarter of 1989 to 8.1 percent in 1990.

The company attributes the lower second-quarter earnings per share to two factors: First, the benefit of tax loss carryforwards that were available in 1989 began expiring during the third quarter of 1989. Taxes for the second quarter of 1990 totalled $147,000 vs. $0 in 1989.

Second, the number of shares used to compute earnings per share increased 1.1 million due to continued conversion of the company's convertible debentures and activity relating to the company's employee stock option plans.

The company continues to view its progress for the year as solid. Shareholders' equity has increased 147 percent from June 30, 1989, to $11.3 million, while the market price of the company's common shares has grown 150 percent over the same span of time. Backlog at June 30, 1990, stood at just over $14 million.

ITS President James Walters commented: ''We are dedicated to enhancing shareholder value. We feel positive about our prospects and potential. And we look forward to our entry into the North American parimutuel wagering market, when we join forces with McKinnie & Associates, the pending acquisition of which is scheduled to close in August 1990.''

International Totalizator Systems Inc., with headquarters in Carlsbad, was founded in 1978 and went public in 1981. ITS has a global presence in the design, manufacture and marketing of customized ticketing systems for computerized wagering, lotteries and automated travel industry products.

BOULDER, CO (JULY 31) BUSINESS WIRE - Array Technology Corp. (ATC), a

wholly owned subsidiary of Tandem Computers Inc. (NYSE:TDM), announced Tuesday that it has entered into an original equipment manufacturer agreement to provide disk array subsystems to Storage Technology Corp. (NYSE:STK).

Under the agreement, ATC will develop software and hardware subsystems based on redundant arrays of inexpensive disks (RAID) to StorageTek's specifications. StorageTek will market the ATC systems in the 1991 timeframe. Terms of the agreement were not disclosed.

The parity approach to RAID technology, used by the two companies, offers high levels of availability at low cost with minimal overhead. StorageTek and ATC subsystems based on RAID provide the ability to gain access automatically to a standby spare if a drive fails and to reconstruct the data on a spare drive. This offers customers varying degrees of performance options and redundancy, including mirroring.

Storage Technology Corp. manufactures, markets and services, information storage and retrieval subsystems for high performance computers worldwide. The company is located in Louisville, Colo., telephone is 303/673-5151.

Array Technology Corp., a wholly owned subsidiary of Tandem Computers Inc. designs, develops and markets software and hardware disk subsystems based on redundant arrays of inexpensive disks. The company is located in Boulder, Colo., phone is 303/444-9300.

Tandem Computers Inc. manufactures and markets computer systems and networks for online transaction processing, large database, and UNIX system applications. The company headquarters are in Cupertino, Calif., telephone 408/725-6000.

SAN JOSE, CA (JULY 31) BUSINESS WIRE - Compression Labs Inc. (CLI) (NASDAQ/NMS:CLIX) Tuesday announced it has signed an agreement with Telecom Australia to supply videoconferencing equipment for the company's internal and public videoconferencing room network, as well as for resale to Telecom Australia customers.

The value of the contract is estimated at $2.0 million (U.S.).

The Sydney-based company will purchase both CLI's high-bandwidth Rembrandt and low-bandwidth Rembrandt II/06 video codecs, sophisticated devices that compress video signals to a fraction of their original size to permit them to be economically transmitted over digital transmission networks.

In addition, Telecom Australia will install CLI's new Multipoint Control Unit to allow videoconferencing among as many as eight sites simultaneously.

Telecom Australia selected CLI because of CLI's leading-edge technology and its leadership in the worldwide videoconferencing market. CLI's commitment to the upcoming CCITT standard and its ability to provide high-quality transmission from 64 Kbps to 2.048 Mbps were also important factors in the decision.

CLI's Rembrandt II/06 video codec, which operates at bandwidths from 56 to 384 kilobits per second (Kbps), is particularly well suited to Australia Telecom's ISDN network offering that is widely available in major centers around Australia with 148 access points already installed.

With a bandwidth range of 384 Kbps to 3.0 megabits per second (Mbps), CLI's Rembrandt video codecs are used to provide very high-quality video for Australia Telecom's public room network, which operates at 2.0 Mbps.

Telecom Australia, Australia's PTT (Public Telephone & Telegraph), offers the only nationwide public videoconferencing service in the country with public rooms operating in the capital cities of every state.

CLI is the market leader in full-motion, color videoconferencing systems for use by business, government and education. CLI provides complete videoconferencing solutions including room systems, codecs and multipoint units.

Considered an effective communications tool for innovative organizations around the world, videoconferencing has emerged as a strategic resource for competing successfully in the 1990s.

#90212b0651 07/31/1990 ~Business Wire

OAKLAND, CA (JULY 31) BUSINESS WIRE - Dreyer's Grand Ice Cream Inc. (OTC:DRYR) reported record sales and earnings for the second quarter ended June 30, 1990 over comparable prior period amounts, according to T. Gary Rogers, chairman.

Consolidated net sales for the 13 week period were $83,492,000, compared with $64,582,000 in 1989, an increase of 29 percent. Net sales for the first 26 weeks of 1990 were $146,256,000, an increase of 34 percent when compared with $108,854,000 for the like period last year.

Earnings for the second quarter totaled $4,440,000 or 71 cents per primary common share, an increase of 29 percent over comparable 1989 amounts -- $3,455,000 or 56 cents per primary common share. Earnings for the first two quarters of the year totaled $5,907,000 or 95 cents per primary common share, an increase of 32 percent over comparable results for 1989 -- $4,466,000 or 73 cents per primary common share. Income amounts presented above for 1989 do not include the effect of a one time extraordinary gain of $1,908,000 or 31 cents per primary common share.

Fully diluted earnings per common share were 63 cents for the second quarter and 88 cents for the first two quarters of 1990. Comparable 1989 fully diluted earnings per share were 51 cents for the second quarter and 71 cents for the first two quarters (exclusive of a 25 cent per share extraordinary gain).

The increase in earnings for the second quarter was primarily the result of strong sales growth and a higher gross margin resulting from lower material costs. These improvements were partially offset by a higher ratio of selling, general and administrative expenses to sales and a higher effective tax rate when compared to the like period of 1989.

The company also announced today a call for redemption of its $50 million 6 1/2-percent convertible subordinated debenture issue to occur on Aug. 31 1990. The debentures are convertible into the company's common stock on or prior to Aug. 30, 1990 at a conversion price of $32 per share.

The closing price of Dreyer's Grand Ice Cream Inc. common stock on July 30 1990 was $42, which was equal to $1,312.50 of conversion value for each $1,000 principal amount of debentures. The debentures are redeemable at a price of $1,055.25 (including accrued interest). The company has engaged Hambrecht & Quist Inc. to serve as a standby underwriter for the transaction. Hambrecht & Quist has also agreed to offer to purchase debentures at a price of $1,060 for each $1,000 principal amount.

Dreyer's also announced today its intention to distribute a 100 percent (one-for-one) common stock dividend payable on Oct. 1, 1990 for holders of record on Sept. 10, 1990.

Dreyer's Grand Ice Cream Inc. manufactures and distributes premium quality ice creams and other premium dairy-based products made only from the highest quality ingredients available.

NORTH STONINGTON, CT (JULY 31) BUSINESS WIRE - Analysis & Technology Inc. engineering services specialists for U.S. Navy submarines and antisubmarine warfare (ASW) and for commercial and military training, achieved record earnings and revenues for the first quarter ended June 30, 1990, A. T. Mollegen Jr., president and chief executive officer announced Tuesday.

Net earnings of $949,000 for the quarter were equal to 44 cents per share, compared with $873,000, or 39 cents per share in the previous June quarter. Revenues for this year's June quarter rose 17 percent to $25,736,000, a record first quarter, compared with $22,019,000 in the comparable 1989 quarter.

Applied Science Associates (ASA), A&T's training services subsidiary acquired June 1, 1989, contributed more than $3,000,000 to revenues in the just-ended quarter but did not contribute to net earnings as a result of interest expense and the amortization of goodwill related to the acquisition. The 1989 first-quarter results include one month of ASA revenues while the 1990 quarter includes three months of ASA revenues.

A&T's total contractual backlog at June 30, 1990 stood at approximately $297,700,000, up 6 percent compared with the previous year.

Commenting on the quarter's results, Mollegen said, ''Our business climate is very favorable both for U.S. Navy submarine and ASW work and for our customized training services. The Navy and the Congress are clearly committed to the U.S. maintaining a strong research and development effort -- A&T's area of emphasis -- to keep a qualitative undersea lead in the face of continuing Soviet improvement in their submarines.

''Similarly, a growing and fast-spreading emphasis and insistence in U.S. industry on quality improvement continues to create expanding opportunities for A&T's customized training systems, training courses, and training materials, and we are determined to seize those opportunities. Overall, we look forward to another excellent year in fiscal 1991 now so well underway.''

TURIN, ITALY (JULY 31) BUSINESS WIRE - Fiat Group and Ford Motor Company announced Tuesday that they have reached an agreement involving their worldwide tractor and farm and industrial equipment operations. A new company, to be formed, will incorporate Fiat's subsidiary FiatGeotech and Ford New Holland. Fiat will have an 80 percent majority interest. Ford will hold the remaining 20 percent and will receive a cash payment from Fiat. The agreement to form the new company is subject to governmental approvals. The new company intends to preserve the individual market and product identities of both FiatGeotech and Ford New Holland. FiatGeotech is based in Italy and has plants in Italy, Brazil, France and the United States. FiatGeotech has over 13,000 employees and 2,300 dealers worldwide. Its revenues in 1989 reached $2.3 billion. Ford New Holland is headquartered in New Holland, Pa., and employs almost 18,000 people in plants and offices, primarily in the United States, Canada, Great Britain, Belgium and Brazil. There are 3,700 Ford New Holland dealers worldwide. Revenues in 1989 were $2.8 billion.

Based on their 1989 results, FiatGeotech and Ford New Holland had sales of 95,000 agricultural tractors and an additional 30,000 tractors produced in joint ventures or under license. Sales of other agricultural and industrial product totaled more than 54,000 units.

Cesare Romiti, Fiat's president and chief executive officer, said: ''Our primary objective, in creating this new company, is to profit from the existing strengths of the two subsidiaries. We recognize that these two organizations, when combined, will complement each other remarkably well with a truly global presence in virtually every world market. This agreement once again demonstrates Fiat's long-standing tradition of internationality.''

Ford Motor Company's president and chief operating officer, Philip E. Benton, Jr., said: ''It is clear to us that Fiat considers agricultural and industrial equipment to be an integral part of its core business strategy and stands ready to support the new company in the continued

development of best-in-class products of the highest quality.

''We are confident that this arrangement is in the best interests of Ford New Holland's employees, customers, dealers and suppliers,'' Mr. Benton added.

As the majority shareholder in the new company, Fiat intends to provide substantially comparable pay and benefit packages to Ford New Holland employees and to honor existing collective bargaining agreements.

LOS ANGELES (JULY 31) BUSINESS WIRE - Gamma Electronic Systems Inc. (Alberta Stock Exchange:GE.A) Tuesday announced that it has entered into negotiations with a newly forming marketing corporation, which is being funded by a group of American and Japanese investors, for the marketing rights to the B.A.S.E. technology.

If consummated, the deal would result in minimum guaranteed revenues for Gamma in excess of $5 million over the next 3-1/2 years.

Gamma Electronic Systems is a publicly traded specialist in technology, with offices in Santa Monica, a sales office in Glendale and a manufacturing facility in Sylmar. B.A.S.E., Bedini Amplifiers and Bedini Research & Development are wholly owned subsidiaries of Gamma Electronic Systems.

For more information contact: Sylvio J. Pennucci, 213/392-3493, Gamma Electronic Systems, 1631 Sixteenth St., Santa Monica, Calif., 90404.

NEW ORLEANS (JULY 31) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE:FTX) announced Tuesday that it and Freeport-McMoRan Oil & Gas Co. (NYSE:FMP) have entered into an agreement and plan of merger whereby FMP will be merged into a subsidiary of FTX with each outstanding publicly held share of FMP common stock being converted into a fraction of a share of FTX common stock determined by valuing FMP at $10.50 per share and valuing FTX at an average of the composite tape closing prices for the last 10 trading days prior to the formal FMP shareholder approval.

For purposes of calculating this fractional FTX share, the FTX stock price will be no lower than $31.875 per share and no higher than $38.875 per share. Under the formula, the fraction of an FTX share to be received for each FMP share will be between .329 and .270 FTX share per FMP share. At June 30, 1990, there were 22,972,378 publicly held shares of FMP.

The merger has been unanimously approved by the members of the board of directors of FMP. The merger must also be approved by holders of a majority of the outstanding shares of FMP common stock. As a result, FMP will solicit its shareholders consent to the merger, but, since FTX owns an aggregate of approximately 81.5 percent of the outstanding FMP shares, and intends to consent to the merger, the approval of the merger is assured.

The consent of FMP's shareholders is being sought in accordance with the requirements of the New York Stock Exchange. The surviving corporation in the merger will be a wholly owned subsidiary of FTX with all the assets and liabilities of FMP.

Earlier this year Freeport-McMoRan Energy Partners Ltd. was converted from a partnership into a corporation, FMP, with the expectation that FMP would be a more attractive investment vehicle than Freeport-McMoRan Energy Partners for a variety of reasons, including the decision to reinvest substantially all excess cash generated by FMP into exploration and development activities and changes in the tax laws since 1986 as well as attendant reporting requirements applicable to ownership of oil and gas assets in publicly traded partnership form.

This expectation has not been realized in the marketplace. As a result of this merger, the stockholders of FMP will become stockholders of FTX, thereby providing the opportunity for FMP stockholders to continue their participation indirectly in oil and gas assets presently held by FMP as well as in FTX's other business operations.

FTX is a leader in the exploration, mining, development, production, processing, and marketing of natural resources. The company's assets include sulphur, phosphate rock, phosphate fertilizer products, oil and natural gas, copper, gold and other natural resources.

WILMINGTON, MASS. (JULY 31) BUSINESS WIRE - Altron Inc. (NASDAQ:ALRN) Tuesday announced its financial results for the quarter and six months ended June 30, 1990.

Sales for the quarter were $13,160,000 compared to $13,225,000 for the second quarter of 1989. Net income for the quarter was $340,000 or 10 cents per share as compared to net income of $330,000 or 10 cents per share during the same period a year ago.

Sales for the six months ended June 30, 1990 were $27,178,000 compared to $26,354,000 for the same period last year, an increase of 3 percent. Net income for the first six months of 1990 was up 48 percent to $875,000 or 26 cent per share as compared to net income of $590,000 or 18 cents per share for the first six months of 1989.

The company continues to maintain a solid financial position. As of June 30, 1990, the company had working capital of $11,539,000 and a current ratio of 2.7.

Altron Inc. manufactures and sells electronic interconnect products employing printed circuit technology to leading manufacturers of computer, telecommunication, instrumentation, and medical systems.

NEWPORT, KY (JULY 31) BUSINESS WIRE - NS Group Inc. (ASE:NSS) announced Tuesday that it has applied for listing of its common stock on the New York Stock Exchange (NYSE).

It expects to be listed on the Exchange by late August.

C.R. Borland, president and chief executive officer stated: ''We're very excited about becoming a NYSE-listed company. The benefits of listing on the NYSE are numerous and include a broader and more liquid market for NS Group shares, greater visibility and increased public interest in our company. We believe it provides the best opportunity to enhance shareholder value.''

NS Group Inc. is a holding company that owns four operating subsidiaries: Newport Steel Corp., a tubular steel producer; Kentucky Electric Steel Corp., a producer of steel bars; Erlanger Tubular Corp., a processor of tubular products; and Imperial Adhesives Inc., an adhesives manufacturer. NS Group Inc.'s common stock is currently traded on the American Stock Exchange.

COHASSET, MA (JULY 31) BUSINESS WIRE - Cohasset Savings Bank (NASDAQ:CHTB) Tuesday reported a loss of $80,000 or $(.08) per share, for the second quarter ended June 30, 1990, after a significant provision for possible loan losses.

For the 1989 second quarter, the bank had reported net income of $76,000, or $.08 per share.

For the six months ended June 30, 1990, the bank showed a loss of $23,000, or $(.02) per share, compared with net income of $207,000, or $.21 per share, for the comparable period of 1989.

''Although net interest income, both for the second quarter and for the first six months of 1990, was slightly ahead of 1989, net income continues to be impacted by the provision for possible loan losses, which amounted to $412,000 for the six months ended June 30, 1990. Net interest income for the six months was $1,134,000, compared with $1,126,000 for the comparable 1989 period,'' Donald E. Bates, president, stated. ''It seems prudent in light of the current real estate market to provide adequate loan loss provision to protect the bank against the deterioration in the economy.''

During the first six months of 1990, deposits increased to a record $52,543,000, compared with $49,210,000, at Dec. 31, 1989.

At June 30, 1990, the bank's total assets amounted to $65,676,000 and stockholders' equity amounted to $12,447,000 or 18.95 percent of assets.

Cohasset Savings is a 145-year-old community thrift institution serving a popular residential area of Massachusetts' South Shore. It converted to a stock form in May, 1987.

#90212b0673 07/31/1990 ~Business Wire

SANTA CLARA, CALIF. (JULY 31) BUSINESS WIRE - 3Com Corp. Tuesday announced availability of a high-performance, 16-bit Ethernet adapter designed for high-traffic network servers, workstations based on Intel 80386 and 80486 microprocessors, and high-performance 80286 personal computers.

EtherLink 16, the newest adapter in 3Com's EtherLink product family, offers customers exceptional performance, ease of installation, outstanding reliability, and manageability in multivendor system environments. Also, EtherLink 16 ships with specially tuned Network Driver Interface Specification drivers for 3+Open and LAN Manager, and drivers for NetWare 286 and NetWare 386.

''Not only does EtherLink 16's high performance offer the best solution for networks where traffic demands are heavy,'' said Dave De Puy, director of marketing for 3Com's Transmission Systems Division, ''but with our recently announced lifetime limited warranty for 3Com Ethernet adapters, customers are ensured EtherLink 16 will continue to satisfy their demanding performance requirements.

''Our 16-bit adapter is built to provide the highest performance possible, and to give customers maximum system up-time for running critical network applications.''

Benchmark testing performed by the LanQuest Group, an independent testing laboratory, indicates the EtherLink 16 card running in a NetWare 286 environment under Perform3, outperformed its major competition. Reported results were 6 percent to 11 percent higher than the Western Digital EtherCard Plus 16, and 30 percent to 49 percent higher than the Anthem NE-2000.

''The EtherLink 16 will be standard equipment in all our 386 machines,'' said Claude King, senior computer/programmer analyst at the University of Florida, College of Journalism and Communication.

''Windows 3.0 and the EtherLink 16 are made for each other; our graphic applications benefit from the added performance. We especially appreciate its jumperless configuration that gives us easy set-up and installation even in the most overworked machines. 3Com adapters are a comforting choice because I know I'll get quality construction, a lifetime limited warranty and superior Ethernet performance, all in one card.''

MILFORD, MA (JULY 31) BUSINESS WIRE - Ceramics Process Systems Corp. (CPS)(OTC:CPSX) received a two-year development contract from Texas Instruments Defense Systems and Electronics Group, Dallas, to develop low-cost, high-performance molded ceramic/metal composite packages for microwave applications.

This is a two-phased program with a potential funding level of $463,000. This contract is supported, in part, by the Electronic Technology Laboratory at the Wright Research and Development Center.

The company will use its Quickset Binderless Injection Molding Process to form the module housings. The Quickset process offers significant cost and performance advantages over traditional injection molding techniques. These high-performance electronic packages are intended for use in new generation phased array radar systems.

Peter L. Loconto, president and chief executive officer, commented, ''This program gives CPS the opportunity to be the market leader in ceramic/metal composite housings for the microwave industry.''

CPS develops, manufactures and markets advanced ceramic products for the microelectronics, automotive and defense industries and specializes in ceramic packaging and interconnecting of high-density, high-performance electronic devices using proprietary Micro-engineering processes.

VANCOUVER, BRITISH COLUMBIA (JULY 31) BUSINESS WIRE - TOTAL Energold Corp. (TSE:TGD)(NASDAQ:TGDGF) reported its results from operations for the first half ended June 30.

Net sales, including $76,000 in precious metals, for the six months ended June 30 were $16.7 million, up from $16.1 million in the previous year. Cost of sales increased marginally to $5.5 million from $4.8 million in the comparative period in 1989.

Operating earnings rose to $11.3 million from $11.2 million in 1989.

The loss for the period was $2.9 million or 9 cents per share compared to $2.3 million or 9 cents per share for the first six months of 1989.

Funds generated from operations were $6 million which was lower than the $7.3 million recorded in the comparative period in 1989.

In the six months ended June 30 the company's energy subsidiary, Ranchmen's Resources Ltd., reported a slight decline in oil production from 4,436 barrels of oil per day in 1989 to 4,315 in 1990, but an increase in gas production from 22.1 million cubic feet per day in 1989 to 23.1 million.

On June 22, the company acquired 6 million shares of Plexus Resources Corp. (51 percent), and consolidated its results from that period on. Plexus, located in Salt Lake City, has a 24.01 percent working interest and a 2.45 percent royalty interest in the Denton-Rawhide mine, which commenced production earlier this year.

Projected production for the Denton-Rawhide is expected to exceed 80,000 ounces of gold and 399,000 ounces of silver a year.

TOTAL Energold Corp. is engaged in mineral exploration in Canada and Western United States, and in oil and gas exploration and production primarily in Canada through Ranchmen's Resources Ltd., a 56.2 percent owned subsidiary of TOTAL Energold.

TOTAL Compagnie Francaise des Petroles, one of the world's largest producers and marketers of energy, holds 69 percent of TOTAL Energold's common shares.

#90212b0689 07/31/1990 ~Business Wire

NEW YORK (JULY 31) BUSINESS WIRE - Borden, Inc. (NYSE: BN) Tuesday reported 1990 second quarter net income of $90.4 million, up 7.7 percent from $83.9 million in the prior-year period, and earnings per share of $0.61, up 7.0 percent from $0.57 per share in the 1989 second quarter. Sales of $1.90 billion were up 0.7 percent from $1.89 billion in the 1989 second quarter.

For the first half of 1990, Borden reported net income of $153.5 million, up 7.4 percent from $143.0 million for the prior-year period, and earnings per share of $1.04, up 7.2 percent from $0.97 per share in 1989's first half. Sales increased 2.4 percent to $3.80 billion, from $3.71 billion in the first half of 1989.

Earnings increased in three of the company's four divisions: Grocery and Specialty Products, Snacks and International Consumer Products, and Packaging and Industrial Products. These gains more than offset a decline in the Dairy Division, where the company continued to withdraw from depressed fluid milk markets and to reconfigure production in its remaining regional markets.

R.J. Ventres, chairman and chief executive officer, said, "Borden continues to benefit from its product diversity and balance of businesses. During the quarter, we saw the beginning of a turnaround in domestic snack earnings and an improvement in dairy margins over the first quarter. However, all of our consumer products markets are becoming increasingly competitive, and we anticipate sharply higher raw milk costs this fall."

Operating income for the 1990 second quarter was $194.4 million, an increase of 7.4 percent from $181.1 million reported in the 1989 second quarter. The Grocery and Specialty Products Division posted a 17.2 percent gain in 1990 second quarter operating income, and sales were $486.4 million, up 5.6 percent from $460.6 million in the prior-year period.

There were strong advances in North American pasta operations, led by Catelli in Canada (acquired in June 1989) and Prince and Creamette in the United States. The division's niche grocery products gained in the quarter, including Eagle Brand sweetened condensed milk; Borden and Lite-line cheeses; Cremora non-dairy creamer; Wyler's and Steero bouillon; and Mrs. Grass dry soup mixes.

Its non-food consumer products, led by Elmer's and Krazy Glue consumer adhesives, also were up. In the Snacks and International Consumer Products Division, 1990 second quarter operating income increased 18.4 percent, and sales were $507.6 million, up 10.9 percent from $457.5 million.

North American snacks earnings increased more than eight percent over the same quarter a year ago, due to increased volume, lower commodity costs, and the benefits of plant and administrative consolidations. Substantial year-to-year gains were posted by Wise Foods, the division's largest snacks unit, and the Moore's snack unit, acquired in June 1989.

WAYNE, PA (JULY 31) BUSINESS WIRE - American Film Technologies Inc. (NASDAQ:AFTI, PHLX:AFT) Chairman George R. Jensen Jr., announced Tuesday that the company has signed an agreement to produce opening title sequences and commercial seques for ''The Guys Next Door,'' a new television series airing on NBC this fall.

The company is pleased that its state-of-the-art special effects, animation technologies and creative talents are gaining increased recognition by the entertainment industry. AFT's clients have been pleased with the superior quality and fast turn-around provided by AFT, particularly for difficult and innovative projects.

Jensen commented, ''We are very excited by the industry response to our new production technologies. In addition to this project, we are also completing a pilot to a network television show in association with a major studio, and are working on several projects with a large advertising agency.

''Our goal is to create a technologically advanced animation industry for use in the areas of special effects and animation for the advertising, film, television and music video industries.''

American Film Technologies Inc. is the leader in the color conversion of black-and-white motion pictures and television programming. The company currently has a backlog of $20 million for its all-digital COLORIMAGED technology. Among its clients are Turner Broadcasting, Republic Pictures, the Walt Disney Co. and Warner Brothers.

ROCHESTER, NH (JULY 31) BUSINESS WIRE - Building on its strategy to make LANVIEW network management software a universal approach to integrated management for TCP/IP-based networks, Cabletron Systems Inc. (NYSE:CS) Tuesday announced availability of LANVIEW/SunNet Manager, the first third-party sofware package to run on Sun Microsystems' SunNet Manager

network management platform.

LANVIEW/SunNet Manager -- UNIX-based, standards-oriented (Simple Network Management Protocol/SNMP) software package -- enables users of SunNet Manager physical and media access control (MAC)-layer management and monitoring capabilities of Cabletron manageable devices, including the Multi Media Access Center (MMAC) intelligent wiring hub, bridges and desktop network interface (DNI) cards.

The combination of the two products provides powerful physical and data-link layer management capabilities for Ethernet and Token Ring Local Area Networks (LANs), high speed Fiber Distributed Data Interface (FDDI) and Fractional T1 Wide Area Networks.

Through use of SNMP agents resident in all Cabletron manageable devices, LANVIEW/SunNet Manager addresses the functions defined under the ISO/OSI framework for network management. Key functional areas include configuration of network hardware and software, fault detection and isolation across network resources, and network information security.

LANVIEW SunNet Manager is the first UNIX-based network management product offered by Cabletron. It was developed to enhance the company's Integrated Network Architecture (INA), a product strategy that provides a framework for seamless network evolution and expansion, and connects groups of disparate networks into a single system in which all devices can be managed from a remote network management station.

LANVIEW/SunNet Manager, priced at $3,495, is available for immediate delivery through Cabletron or Sun Microsystems' sales representatives. The price does not include the SunNet Manager platform, which must be purchased separately through Sun Microsystems.

Headquartered in Rochester, Cabletron is a leading independent developer and manufacturer of standards-based networking solutions including software, hardware and connectivity products. The company currently has a worldwide installed base exceeding 1.3 million nodes.

Cabletron recently reported record annual revenues of $104.7 million and earnings of $22.3 million for the fiscal year 1990. The company has reported 130 percent revenue growth and 255 percent earnings growth annually since 1986.

HOUSTON (JULY 31) BUSINESS WIRE - TEPPCO Partners L.P. (NYSE:TPP) Tuesday reported second quarter 1990 net income of $4.2 million, or 29 cents per unit, an increase of 22 percent over pro forma net income of $3.4 million, or 23 cents per unit, for the comparable period in 1989.

The 1990 improved results reflect an increase in liquefied petroleum gases (LPGs) transportation and storage revenues, as well as interest income from short term cash investments.

Operating income was $12.3 million on revenues of $37.4 million for the second quarter of 1990, compared with pro forma operating income of $12.3 million and revenues of $37 million for the same period last year.

The partnership reported net income of $3.6 million or 25 cents per unit for the period March 7, the date of the completion of the initial public offering, through June 30. Revenues for the period were $49.6 million, while operating income was $14 million.

Pro forma net income for the six months ended June 30 of $4.6 million, or 31 cents per unit, compared with pro forma net income of $12.4 million, or 85 cents per unit, for the comparable six months of the previous year.

The decrease is the result of the first quarter impact of unseasonably warm weather in the partnership's market area, delayed gasoline shipments as a result of governmentally-mandated seasonal vapor pressure changes, a $1.5 million charge for costs associated with the propane explosion and fire on the LPG pipeline system in North Blenheim, N.Y., on March 13 and a decrease in profits from inventory sales.

Pro forma operating income was $21.4 million on revenues of $75.8 million for the first half of 1990, compared with pro forma operating income of $30.3 million on revenues of $81.5 million for the same period in 1989.

In other developments, the partnership Tuesday announced that the general rate increase of 6 percent filed with the Federal Energy Regulatory Commission (FERC) on June 29 relating to transportation of LPGs went into effect July 30 without challenge by the FERC. This follows the previously announced 12 percent rate increase on the transportation of refined products, which was effective June 1.

The partnership declared on July 20 a cash distribution of 55 cents per unit for the period April 1 through June 30 payable Aug. 17 to unitholders of record July 31.

TEPPCO Partners L.P. is a publicly owned master limited partnership. TE Products Pipeline Co. L.P., the operating partnership, is one of the largest pipeline common carriers of refined petroleum products and LPGs in the United States.

AKRON, OH (JULY 31) BUSINESS WIRE - Loral Defense Systems-Akron, a division of Loral Corp., has been awarded an initial $71.5 million U.S. Air Force contract to develop, operate and support an aircrew training system for special operations forces.

The contract provides initial funding to develop aircrew training devices and courseware for the MC-130H Combat Talon II and MC-130E Combat Talon I aircraft. Delivery of the first training system is expected in mid-1993.

The contract also includes funding of annual options for operation, management, and support of the training system. Additional contract options will provide complete training systems for AC-130U and AC-130H gunships, the HC-130 tanker and MH-53J and MH-60G helicopters.

The contract award follows a year-long competitive development program among Loral and two other companies. With options for additional development and production, as well as funding for annual operations, management and support during the next 15 years, total contract value is approximately $650 million. The program has significant growth potential.

Loral believes the special operations forces aircrew training program is one of the most comprehensive and complex training and mission rehearsal efforts ever undertaken by the simulation and training industry.

The training system will include Loral-developed weapon system trainers mission rehearsal devices, computer-based instruction, other course materials and the responsibility for all training of special operations aircrews at Hurlburt Field, Fla. and Kirtland Air Force Base, New Mexico.

Special operations aircrews will benefit from Loral's advanced training and mission rehearsal capability. Crew members at up to 45 different crew stations will be able to rehearse the full mission with realistic out-the-window visual scenes, night vision goggle simulation, and sensor images for the actual mission areas. With as little as 48 hours notice, the mission rehearsal facility will be prepared to begin rehearsals for missions anywhere in the world.

Loral, as prime contractor, is supported by a strong team that includes IBM, Owego, NY; Lockheed, Ontario, Calif., and Marietta, Ga.; FAAC Inc.,

Ann Arbor, Mich.; Perceptronics, Woodland Hills, Calif.; and Evans and Sutherland, Salt Lake City, Utah; General Dynamics Electronics, San Diego, Calif.; UNC Support Services, Annapolis, Md.; and Applied Science Associates, Butler, Pa.

Loral's team brings to the program unique capabilities in simulation technology, electronic system integration, sensor data systems, curriculum development, and training instruction.

PITTSBURGH (JULY 31) BUSINESS WIRE - Information Display Technology Inc. (AMEX:IDT), a leading supplier of visual information display systems headquartered in Pittsburgh, Tuesday reported second quarter net income increased by almost 12 percent to $227,000 compared with net income of $203,000 for the same 1989 period.

For the first six months, net income increased 42 percent to $171,000 compared with net income of $120,000 for the first six months of 1989.

Revenues for the second quarter 1990 amounted to $11,881,000 an increase of 18 percent over the $10,043,000 reported for the second 1989 quarter. Operating profits for the three months ended June 30, amounted to $347,000 down slightly from the $363,000 reported for the second quarter 1989.

For the six months ended June 30, the company reported revenues increased 14 percent to $21,807,000 compared with revenues of $19,140,000 for the six month 1989 period. Operating profits for the first six months also increased 14 percent to $285,000 compared with $250,000 for the first six months of 1989.

The company's backlog as of June 30, was $27 million compared with a backlog of $22 million as of June 30, 1989. The company expects all backlog orders to be filled within a year.

Commenting on second quarter and six month results, Herbert T. Kerr, chairman of Information Display Technology, noted that one of the company's major market segments is provision of custom-designed writing and projection surfaces, chalkboards and marketboards for educational institutions.

In addition to its educational products, Information Display Technology also designs, engineers, manufactures and markets writing and projection surfaces, custom cabinetry and partitions for healthcare facilities, offices and institutions; exterior architectural building panels and

cataloged office products.

The company is 81 percent owned by Adience Inc., a privately held company also headquartered in Pittsburgh. In 1990 Adience sold this business unit known as its Information Display Division and operating under the ''Greensteel'' trade name, to RT Acquisition Associates for 21 million shares of RT Acquisition common stock and a seven year $2.5 million convertible note (convertible at $2.00 per share) bearing interest at 6.67 percent per annum with principal due and payable in full seven years from the date of issuance.

Adience Inc. is a diversified manufacturing service corporation which in addition to the Information Display Group, operates through two divisions: the Heat Technology Group and the Industrial Services and Products Group. In 1989 the company had revenues of $240 million.

#90212b0702 07/31/1990 ~Business Wire

MONTGOMERY, AL (JULY 31) BUSINESS WIRE - The Enstar Group Inc. (OTC NASDAQ Symbol: ENST) Tuesday reported net earnings for the second quarter of $6,525,000 or 12 cents per share, compared to a net loss of $71,879,000 or $1.31 for the second quarter of 1989.

Net earnings for the six months ended June 30, were $14,171,000, or 26 cents per share, compared to a loss of $71,421,000, or $1.30 for the same period in 1989.

Consolidated results for the second quarter were affected by non-recurring gains and charges to earnings. Specifically, earnings benefitted $13,585,000 from discontinued operations, early retirement of a portion of the company's Swiss Franc bonds, and tax benefits from net operating losses.

Earnings were negatively impacted $2,673,000 by the net foreign currency adjustment on the company's remaining outstanding 5-3/4 percent Swiss Franc bonds. First quarter operating results reflect a reclassification of the gain from early retirement of debt. Management stated that earnings from operations will increase through the remainder of the year with significant operating income occurring during the fourth quarter.

Enstar's retail division reported pre-tax earnings of $1,828,000 on

revenues of $65,493,000 for the three months ended June 30. Second quarter results reflect the positive impacts of new store openings and an increase in same store sales combined with the operating leverage provided by the company's new distribution center.

During the second quarter the retail division opened 51 new stores and currently operates 629 stores including 342 Shoe City stores, and 287 AmRet facilities consisting of Simple 6, Bargain Town, and Max 10. Mr. Grassgreen, chairman of Enstar stated, ''Revenues, earnings, and new store openings for the retail division are on target for record growth this fiscal year. Income from this division will be significantly higher during the fourth quarter, due to the seasonal nature of the retail business.''

The financial services segment consists of Western Reserve Life Assurance Co. of Ohio (''Western Reserve''), Pioneer Western Distributors, (distributors of the IDEX mutual fund) and 50 percent interest in American Savings & Loan Association of Florida, (NASDAQ Symbol: ASLA). All of the financial services companies had operating income for the second quarter, prior to the additional provision for loan loss reserves of $7.2 million by American Savings. American Savings second quarter pretax profits were $524,000 before the additional loan loss provision. Enstar's operating results include one-half of American Savings profit or loss.

#90212b0707 07/31/1990 ~Business Wire

CARLSBAD, CA (JULY 31) BUSINESS WIRE - Decom Systems Inc. (NASDAQ:DSII) Tuesday announced net income of $11,000 for the third quarter ended June 30, 1990, compared to net income of $151,000, or $.05 per share in the same period last year.

Revenues were $2,276,000, up 16 percent from revenues of $1,961,000 a year ago.

Jack Robinson, president of Decom Systems, said, ''Our modest profit for the third quarter was due to improving sales and margins from the company's new Quad 7 telemetry processing systems and reductions in research and development expenses to $352,000, compared to $459,000 in this year's second quarter. The record gross margins of last year's third quarter were the product of volume shipments of DSI's core telemetry products for the ARTS II program.''

Robinson added, ''During the third quarter, DSI received over $1,000,000 in new orders for Quad 7 applications which we believe will lead to

significant future business opportunities.'' He said the new Quad 7 contracts pay for hardware and software development, enabling DSI to advance the maturation of the Quad 7's market.

For the nine months ended June 30, 1990, Decom Systems' net loss was $69,000, or $.03 per share on revenues of $6,569,000, versus net income of $413,000, or $.15 per share from revenues of $5,916,000 in the first nine months last year.

The two new orders for the Quad 7 brought DSI's backlog at June 30, 1990 to $3.4 million, compared to backlog of $3.2 at July 1, 1989. Robinson cautioned that for the balance of the year, it will be difficult to project future bookings levels with any confidence due to uncertainties in the defense industry and the timing of orders.

Decom Systems Inc. designs, manufactures and integrates aerospace telecommunications equipment and systems for military and commercial users.

CALGARY, ALBERTA - Intera Information Technologies Corp. Tuesday released quarterly results for the quarter ended June 30, 1990. These results show significant gains over the same quarter in the prior year.

Revenue for the quarter increased by 72% to $15,567,000. These gains were largely due to the continuation of operations in the six year ice reconnaissance program for the Government of Canada and the second full quarter of operations for the United States Defence Mapping Agency.

The company has also experienced strong demand for its products and services related to petroleum exploration and production activities, the sale and lease of software products, and mapping and Geographic Information Systems (GIS) products. Net earnings increased to $1,370,000 for the three months ended June 30, 1990 compared to a small loss in the same quarter in the prior year.

These increases are largely due to the increase in revenue in the mapping an d reconnaissance segment. Earnings per share increased to $0.74 cents and $0.25 cents per share for the nine months and three months ended June 30, 1990 respectively.

On June 1, 1990, Intera completed the acquisition of certain assets of Aero Service, a division of Western Atlas of Houston. These assets were purchased for $3,300,000 and were used in its digital mapping, airborne geophysics, and airborne radar businesses. The acquisition of Aero Service provides Intera with an important building block in its plans to enter the GIS market in the U.S.

On June 30, 1990, Intera also acquired Jerry R. Bergeson and Associates of Golden, Colorado. The staff of Bergeson and Associates will add considerable strength to our U.S. petroleum operations providing much needed training and customer support for our increased software customer base. The total consideration including contingent payments was $2,000,000.

Intera provides data collection, data processing and data interpretation products and services to petroleum and resource companies and governments worldwide and is a leading provider of these technologies to a broad base of customers in approximately 85 countries.

NASHVILLE, TN (JULY 31) BUSINESS WIRE - Dr. Jerome S. Tannenbaum, president and chief executive officer of REN Corporation-USA (NASDAQ/NMS:RENL), Tuesday announced increased net revenues and net income for the second quarter and six months ended June 30, 1990.

Net revenues for the second quarter rose to $9.0 million, up 207 percent from net revenues of $2.9 million recorded in the second quarter of 1989. Net income for the second quarter increased to $524,500, or 6 cents per share, compared with net income of $142,800, or 2 cents per share in the prior year.

In the second quarter, the company's operating margin increased to 34.0 percent from 29.7 percent in the second quarter of 1989.

The increase in net revenues and net income was due primarily to the acquisition or development of 11 dialysis centers since the second quarter of last year and the acquisition of Cardinal Laboratories on June 29, 1989.

The company currently operates 21 dialysis centers versus 10 dialysis centers on June 30, 1989. An increase in capacity from new and existing centers contributed to a 186 percent advance in patient treatments to 45,008 in the second quarter of 1990, up from 15,759 treatments in the same quarter of 1989.

On June 28, 1990, the company merged with a dialysis clinic in Douglas, Ga. The transaction was treated as a pooling of interests for accounting purposes. The company's results have been restated to include the Douglas center's operations for 1990 and all prior periods.

Net revenues for the first six months of 1990 increased to $16.5 million, up from net revenues of $5.4 million in the same period of 1989. Net income for the period rose to $928,600, or 11 cents per share, compared with net income of $68,100, or 1 cent per share, in the prior year. Patient treatments during the first six months of 1990 totaled 82,143 compared with 29,097 in the same period of 1989.

REN Corporation - USA is the nation's fourth largest provider of dialysis

services. The company owns or operates 21 dialysis centers in seven states and provides acute inpatient dialysis services to 16 hospitals in Tennessee, Georgia, Florida and North Carolina. The company also operates three clinical laboratories.

#90212b0719 07/31/1990 ~Business Wire

BEACHWOOD, OH (JULY 31) BUSINESS WIRE - Horizon Financial Services Inc. (NASDAQ:HFIN) announced higher earnings for the second quarter and first half of 1990.

Net income for the three months ended June 30, 1990, was $282,106, or 17 cents per share, compared with $74,243, or 5 cents per share, in the second quarter of 1989. Last year's figures were depressed by narrower interest rate spreads and high legal expenses.

For the six months ended June 30, 1990, net income amounted to $588,729, or 35 cents per share, compared with $375,467, or 23 cents per share, in the same period one year ago.

''Horizon's interest rate spread widened over the past six months as our cost of funds declined,'' explained Lynn L. Fritzsche, president and chief executive officer. ''This has had a favorable impact on operating income, which rose sharply from last year's levels. Lower expenses have also contributed to the improvement in earnings.''

Fritzsche continued, ''Unless the interest rate outlook changes considerably in the latter half of the year, we expect earnings to remain stable through year-end. We're following Congressional discussions on reducing the federal deficit to see what they might mean for interest rates. While it's unlikely that earnings in the remainder of this year will be affected by any related developments, they certainly will be affected in the long-term.''

Horizon Financial Services is the holding company for Horizon Savings and Loan and Horizon Financial Insurance Agency. Horizon provides a variety of investment and lending services through seven offices in the Greater Cleveland area.

#90212b0722 07/31/1990 ~Business Wire

MOUNT LAUREL, NJ (JULY 31) BUSINESS WIRE - Tyco Toys Inc. (NASDAQ: TTOY) announced net sales for the second quarter were $103.1 million, a 44-percent increase over the $71.7 million for the comparable period last year.

Net income for the second quarter was $3 million, or 41 cents per share fully diluted, compared to $2.8 million, or 48 cents per share fully diluted last year. Results for 1990 include a loss of $400,000 (3 cents per share) from Nasta International Inc., Tyco's 63-percent owned subsidiary, compared to income of $800,000 (14 cents per share) in the comparable 1989 period.

Average shares outstanding increased to 12.2 million, compared to 5.8 million last year.

Net sales for the first half of 1990 were $174.2 million, compared to $109.5 million for the same period last year. Net income was $3.8 million, or 63 cents per share fully diluted, compared to $3.1 million, or 52 cents per share fully diluted last year.

Results for 1990 include a loss of $1.5 million (12 cents per share) from Nasta, compared to income of $900,000 (15 cents per share) in the comparable 1989 period.

Richard E. Grey, president and chief executive officer of Tyco, stated: ''Second-quarter and first-half-of-1990 sales reflect higher shipments of dolls together with games, activity toys and 3-D viewers acquired from View Master Ideal Inc. in June 1989.

''International shipments were also considerably higher. Higher gross margins for the second quarter and first half of 1990 resulted in increases in operating profit and net income, despite higher interest costs and the loss from Nasta.''

Grey added: ''As previously announced, Nasta expects to report a loss for the year, due mostly to lower sales of television-promoted toys. We plan to make a revised offer shortly, based on Nasta's current prospects, to purchase the remaining shares not already owned by Tyco.

''Based on results to date and a strong backlog position,'' Grey noted, ''we continue to expect record sales and earnings for 1990.''

Tyco Toys Inc. markets a broad line of toy products.

BRISTOL, CT (JULY 31) BUSINESS WIRE - Frank J. Pascale, Chairman and Chief Executive Officer of Eagle Financial Corp. (AMEX:EAG) announced Tuesday that Eagle intends to repurchase up to 10 percent of its currently outstanding stock from time to time over the next 12 months in the open market and unsolicited negotiated transactions.

Pascale, in making the announcement, commented, ''The board of directors considers Eagle stock to be an attractive investment and this repurchase program will help to enhance shareholder value.''

Ralph T. Linsley, Vice Chairman and President, added, ''The board's objective in authorizing the repurchase program is to further increase book value and earnings per share of those shares of Eagle stock that remain outstanding after the repurchases.

Pascale also announced the realignment of Eagle's board of directors and the boards of its two subsidiaries, Bristol Federal Savings Bank and First Federal of Torrington. Ernest J. Torizzo, a First Federal director, and Steven E. Lasewicz, Jr., who has been serving on the Bristol Federal board, were elected to Eagle's board increasing its membership from eight to ten.

As part of the same reorganization, the existing boards of the subsidiaries have been replaced by Eagle's realigned board which will serve concurrently as the boards of directors for each subsidiary. The combined effect of these moves will reduce the number of directors to ten members from the current 19.

Pascale noted, ''This move will increase our efficiency of communications while simultaneously reducing costs.''

Eagle Financial Corp. is a $475 million holding company for the four-office Bristol Federal Savings Bank of Bristol, Connecticut and the five-office First Federal of Torrington, Connecticut. Eagle presently has 2,693,735 shares of common stock outstanding.

#90212b0747 07/31/1990 ~Business Wire
YONKERS, NY (JULY 31) BUSINESS WIRE - Codenoll Technology Corp. Tuesday reported quarterly and mid-year results for the period ending June 30.

Quarterly net sales reached a record $2,402,053, up 14 percent from $2,100,982 for the first quarter of 1990, which ended March 31. For the six month period ending June 30, Codenoll reported $4,503,035 in net sales up 14 percent from $3,940,867 for the same period one year ago.

Although orders reached record levels in the second quarter, quarter-end revenues were lower than expected due to manufacturing delays. Codenoll has taken steps to eliminate the shipping bottleneck through a joint manufacturing agreement with the Packard Electric Division of General Motors Corp.

Codenoll has contracted with General Motors' Packard Electric Division for the manufacturing of Codenoll's CodeNet fiber optic Ethernet Local Area Network (LAN) products, and the first of these products have already begun coming off the assembly line. In conjunction with this transition,

Codenoll initiated an internal reorganization to emphasize sales, engineering, and marketing, and to streamline manufacturing.

''We are delighted to announce this newest step in the ongoing strategic relationship between Packard Electric/GM and Codenoll,'' said Codenoll President Michael H. Coden. ''This will allow us to increase shipments and decrease costs beginning as early as the third quarter of 1990.''

Codenoll Technology Corp. is the leading supplier of fiber optic Ethernet computer network systems with thousands of installations worldwide. In 1989, the company announced two lines of FDDI (Fiber Distributed Data Interface) high speed computer network products that will ship in volume this year. Under the tradename CodeNet, the company's products are sold worldwide by companies including: Bosch, C&P Telephone, Contel, Digital Equipment Corp., Eurolan, Groupe Bull, Southwestern Bell, 3Com, and hundreds of others. Codenoll's stock is publicly traded in the Over The Counter Market, under NASDAQ symbol CODN.

DALLAS (JULY 31) BUSINESS WIRE - Future Communications Inc. (NASDAQ:FCMI) Tuesday announced that Multifamily Cablevision Inc., (''MFC'') a wholly owned subsidiary of FCMI has reached a meeting of the minds and intends to execute a written letter of intent with a privately owned Texas corporation that previously purchased cable properties from MFC in a cash transaction, for the sale of all of MFC's remaining cable properties.

The letter of intent is subject to the approval of a major cable financing corporation and the consummation of a $5.4 million refinancing transaction with such entity.

According to Sergio Bosco, the president of FCMI, ''This transaction, which is the next logical step in our previously announced transaction out

of cable operation and ownership, should generate up to $1 million of pre-tax income (25 cents per share) and improve our current ratio.''

Additionally, FCMI announced that MFC has finalized negotiations for the acquisition of 8,500 additional single master cable passes.

Future Communications Inc. is engaged in the development, implementation, marketing and sales of innovative nostalgic programming, the acquisitions, construction and sales of SMATV cable systems, and the furnishing of specialized telecommunications consulting services.

#90212b0765 07/31/1990 ~Business Wire

PORTLAND, ME (JULY 31) BUSINESS WIRE - The One Bancorp (NASDAQ:TONE), a Maine-based bank holding company, Tuesday announced a net loss of $29.8 million, or $3.63 per common share, on a primary and fully diluted basis for the second quarter ended June 30, 1990.

Second-quarter results were adversely affected by a $15.5 million provision for loan losses, loss of interest income on problem commercial real estate loans and an adjustment of $6.2 million to the company's investment in Southstate Bank for Savings, which has been offered for sale.

Second quarter 1989 results were a net loss of $10.5 million, or $1.28 per share, on a primary and fully diluted basis.

The One Bancorp's non-performing (problem) assets rose during the second quarter by $7 million, to $297 million, after rising by $15 million in the first quarter and by an average of $40 million in each quarter of 1989. Although this level of non-performing assets exceeds the amounts contemplated by its capital plan, The One Bancorp has slowed the growth of its non-performing assets through the success of its loan recovery and asset disposition teams in selling or returning to performing status, since June 30, 1989, $153 million of such assets -- $70 million in the last quarter.

Vincent E. Furey Jr., president and chief executive officer of The One Bancorp, said that preservation of any value in the holding company's securities will not be possible unless The One Bancorp can substantially reduce its non-performing assets and restore Maine Savings' capital to required levels in time frames acceptable to regulators.

At June 30, 1990, The One Bancorp's retail deposits increased slightly to $1.726 billion from $1.711 billion at June 30, 1989, while brokered

deposits over the same period were reduced by 10 percent, from $294 million to $263 million. Total deposits of $1.989 billion at June 30 were slightly lower than those of $2.005 billion a year ago.

For the first six months of 1990, The One Bancorp reported a net loss of $12.4 million, or $1.51 per share on a primary and fully diluted basis, due to the recognition of a $29.7 million gain upon the repurchase of the company's capital notes in January. This compares with a net loss of $26.0 million, or $3.18 per share on a primary and fully diluted basis, during the comparable period of 1989.

The One Bancorp is a $2.2-billion, Maine-based bank holding company with FDIC-insured banking subsidiaries in Maine, Connecticut and Massachusetts.

NEW YORK (JULY 31) BUSINESS WIRE - James B. Farley, chairman, president and chief executive officer of Mutual Of New York (MONY) announced Tuesday that Tom H. Barrett and Claude M. Ballard Jr. were elected Trustees of MONY, one of the nation's premier insurance, pension and investment management firms.

Barrett is chairman, president and chief executive officer of Goodyear Tire & Rubber Co. and Ballard is a partner at Goldman, Sachs & Co.

''We are proud to have these outstanding business leaders join our distinguished group of Trustees,'' said Farley. ''Their wealth of experience and knowledge will benefit our company and policyholders well into the 1990's.''

Barrett joined Goodyear Tire, which manufactures and markets tires, rubber chemicals and plastics, in 1953. He held various management positions prior to his appointment as president and chief operating officer in 1982. In January 1989 he was appointed president and chief executive officer, and in April 1989, was named to the additional post of chairman.

Barrett serves on the boards of Goodyear Tire & Rubber Company Rubbermaind Inc. and A.O. Smith Corporation. He earned his B.S. from Kansas State University, and his M.B.A. from Massachusetts Institute of Technology. Barrett resides in Akron, Ohio.

Claude Ballard joined Goldman, Sachs & Co. - a securities underwriter and

brokerage firm - as a partner in 1981. Previously, he was senior vice president of real estate investments for Prudential Insurance Co. of America, which he joined in 1948.

Ballard serves on the boards of American Building Maintenance Industries, Rockefeller Center Properties, Horizon Hotels Ltd., and the Bechtel Realty Advisory Council. Ballard resides in New York and in Bal Harbour, Fl.

In business since 1843, Mutual Of New York (MONY) sold the nation's first mutual life insurance policy. Today, MONY has nearly $22 billion in assets under management, and is an industry leader in providing outstanding and innovative insurance, pension and investment products and services to more than one million policyholders and customers nationwide.

SAN FRANCISCO (JULY 31) BUSINESS WIRE - Itel Distribution Systems, in a major reorganization, has created four regional business groups, each with its own president.

Robert E. Dornbush, president and chief executive officer of Itel Distribution Systems, said, ''The new regional business structure will increase our responsiveness to customer needs, enhance decision making and improve Itel Distribution Systems' competitive advantage. The creation of the new organization reflects our intention of becoming the premier, global logistics provider.

''Each region will operate as a self-contained business unit with operational, marketing, finance and business development responsibilities. The regions will be led by individuals with strong, hands-on entrepreneurial credentials,'' Dornbush said.

Robert L. Shaunnessey will be president of the Central Region, headquartered in Chicago. He recently joined the company from Dry Storage of Chicago, where he was vice president of finance and administration. Shaunnessey will have responsibility for all Ohio and Chicago distribution facilities.

J. Jeffrey Solomon will be president of the company's Northeast Region, headquartered in Syracuse, N.Y. He is currently an Itel Distribution Systems corporate vice president and chairman of the Paul Jeffrey Co. Division. Solomon will have responsibility for the Syracuse and Philadelphia distribution facilities.

J. Leonard Sklawer has been named president of the Southeast Region and will be based in Atlanta. He is currently president of the Southeastern Bonded Warehouse Co., an Itel Distribution Systems subsidiary. Before that, he was president of Smith Terminal Warehouse in Miami and Tampa, Fla. Sklawer will have responsibility for Atlanta and Memphis, Tenn., distribution facilities.

Jeffrey M. Miller will be president of the West Region, based in Dallas. He is currently vice president of operations for the company. Miller will have responsibility for Commerce, Calif.; Dallas; Kansas City, Mo.; New Orleans; Phoenix; and Meridian, Miss., distribution facilities.

Dornbush said, ''The creation of regional organizations will enable us to give immediate attention to local facility needs, bring us closer to our customers and provide them with the quality service they expect and deserve.''

Currently, Itel Distribution Systems operates 37 nationwide distribution facilities with more than 8 million square feet of space. Its primary business involves supplying integrated logistics services to a varied customer base.

WOODBURY, N.Y. (JULY 31) BUSINESS WIRE - Research Frontiers Inc. (NASDAQ:REFR/BSE:RFR) announced today that the company has entered into two new license agreements with its licensee, Litton Systems Canada Ltd.

One agreement replaces the previous license agreement between the company and Litton Systems Canada Ltd. and has been expanded to cover electrically-controllable variable light transmission visor products and certain other eyewear products as well as flat panel displays for military and avionics applications.

Research Frontiers will receive a royalty equal to 5 - 6 percent of net sales for visor and other eyewear products, and $2 per square inch plus an adjustment for inflation for any display products sold under the agreement. The minimum royalty for 1990 has been increased to $135,000.

The second license agreement covers variable light transmission windows for military transportation vehicles, and grants Litton an option to enlarge the scope of this license to cover windows for commercial aircraft. Under the second agreement Research Frontiers will receive 5 - 6 percent of net sales of licensed products and a minimum annual royalty of $60,000. In the event that Litton exercises its option to include windows for commercial aircraft, the minimum royalty will increase to $240,000 per annum.

The company stated that it expects to jointly develop some of these products with Litton.

DRESHER, Pa. (JULY 31) BUSINESS WIRE - Selas Corporation of America (ASE) Tuesday reported net income for the six months ended June 30, 1990, of $2,793,000, or $1.22 per share, on sales of $31,428,000, compared to net income of $835,000, or 38 cents per share, on sales of $18,268,000, reported for the six months ended June 30, 1989.

The results include a tax benefit from a net operating loss carryforward in 1990 and 1989 of 21 cents and 2 cents per share, respectively.

For the quarter ended June 30, 1990, net income was $1,526,000, or 67 cents per share, on sales of $15,212,000, compared to net income of $462,000, or 21 cents per share, on sales of $10,053,000, reported for the same period in 1989.

The results include a tax benefit from a net operating loss carryforward in 1990 and 1989 of 21 cents and 2 cents per share, respectively.

Company President and Chief Executive Officer, Stephen F. Ryan, stated that ''We are extremely pleased with the significant contributions of our custom engineered furnace business to both revenues and earnings for the quarter and six months compared to the comparable periods of the prior year.''

Separately, the company announced the declaration of a quarterly dividend of 3 cents per share on its common stock, payable on Oct. 1 to shareholders of record on Sept. 20.

Selas is an international design, development, engineering and manufacturing company.

VALENCIA, CA (JULY 31) BUSINESS WIRE - 3-D Systems Inc. (NASDAQ:TDSSF and Vancouver: TDS.V) Tuesday announced its final figures for the second quarter.

(The company released partial preliminary figures on July 12, 1990.)

Sales for the quarter were $7,067,117 (all figures are in U.S. dollars) versus $3,727,081 for the corresponding period a year earlier. The company recorded a profit for the quarter of $129,163 versus a loss of $969,262 in 1989.

The profit per share for the period was 1 cent versus a loss per share of 10 cents last year. For the first half, the company reported a profit of $529,784 (4 cents per share), as compared to a loss of $2,735,825 (28 cents per share) the previous year. Sales for the first six months of 1990 were $14,255,040 versus $5,309,095 the previous year.

3-D Systems Inc. is the Canadian parent company of 3D Systems Inc., a California company formed in March, 1986 to develop, manufacture and market equipment which produces plastic models from solid modeling CAD data.

The company's StereoLithography process currently utilizes an ultra-violet laser beam which passes over a vat of liquid polymer, hardening the liquid wherever the beam impinges on the liquid, so that it creates a solid, three-dimensional object which conforms exactly to the stored computer design.

INDIANAPOLIS (JULY 31) BUSINESS WIRE - Indiana Energy Inc. announced that its purchase of Terre Haute Gas Corp. and Richmond Gas Corp. is now completed.

Closing of the $61 million purchase took place today, with the purchase price primarily payable in Indiana Energy common stock.

''All parties involved are pleased with today's transaction,'' said L.A. Ferger, chief executive officer of Indiana Energy. ''We welcome Terre Haute and Richmond to our IEI family and are committed to providing a high level of utility service in both areas.''

IEI announced in June 1989 its intent to acquire the capital stock of the two natural gas distribution companies. All parties signed definitive agreements in November 1989 and the shareholders of all three corporations approved the acquisition March 14, 1990.

Indiana Gas Co. Inc., IEI's principal subsidiary, filed a joint petition, along with Terre Haute and Richmond Gas Corps., with the Indiana Utility Regulatory Commission for authority to merge the three, for adjustment and approval of uniform rates and for related financing.

In accordance with applicable financial reporting requirements, the inclusion of the shares issued in connection with these transactions will result in some dilution of earnings for the consolidated group for the fiscal year ending Sept. 30, 1990.

Terre Haute Gas and Richmond Gas will operate as IEI subsidiaries, pending IURC approval to merge the two with Indiana Gas Co. IEI's various natural gas distribution subsidiaries now serve more than 400,000 customers, with the 47,000 total customers added today.

#90212b0815 07/31/1990 ~Business Wire
OTTAWA (JULY 31) BUSINESS WIRE - AT&T Tuesday opened a new office here for marketing its network-based Global Messaging Services, which are designed to increase the productivity and efficiency of Canadian and multinational businesses.

Global Messaging services include AT&T Mail (electronic mail), a global electronic data interchange (EDI) service, and AT&T Enhanced FAX (a store-and-forward facsimile service).

The first services offered from the new office will be AT&T Mail and AT&T Enhanced FAX.

AT&T already offers Global Messaging services through electronic nodes in the United States, the United Kingdom, and Japan. The nodes were

designed by AT&T Bell Laboratories, and include AT&T data switches, computers and the UNIX (R) operating system.

AT&T also announced the appointment of J. D. (Doug) McKinnon as managing director of the Canadian Global Messaging office in Canada. McKinnon, formerly a marketing and sales manager for AT&T Canada, previously held marketing and technical management positions in a variety of Canadian telecommunications companies.

The Global Messaging portfolio of services allows business customers to subscribe to one or all of an integrated set of electronic services from a single supplier, using a common technology platform -- the AT&T Unified Messaging Architecture (UMA).

AT&T Enhanced FAX is a feature-rich global store-and- forward service offered via the AT&T Global Messaging network. Its features include automatic retry, which makes repeated transmission attempts for up to six hours; automated broadcast, which can send the same document to over 1000 destinations; and a private 24-hour electronic mailbox for secure message delivery.

AT&T Mail is a worldwide public messaging service which supports a wide range of data communications equipment and computers. It provides connections to all major electronic communication media, including facsimile and telex services, and through X.400 interconnections to other public messaging services, such as Envoy 100 (Canada) and Transpac (France).

In addition to establishing the first Global Messaging Services group in Canada, last month AT&T announced plans to acquire certain assets of Western Union Corp., including EasyLink, an electronic mail service.

This acquisition is an additional move to strengthen AT&T's position as a worldwide leader in electronic messaging services and is another sign of the company's commitment to customers' global communication needs.

AT&T Global Messaging Services offer businesses complete end-to-end connectivity, global billing, and technical service support in key world markets. AT&T expects its Global Messaging Services will be of primary interest to the hundreds of multinational companies in Canada doing business with the U.S., and to the smaller Canadian businesses that have not yet begun to use electronic messaging services.

#90212b0820 07/31/1990 ~Business Wire

MORTON GROVE, IL (JULY 31) BUSINESS WIRE - The Middleby Corporation (AMEX: MBY), a manufacturer of foodservice equipment, Tuesday reported a 238 percent increase in sales and, in keeping with its expectations, a modest profit for the three months ended June 30, 1990.

Sales for the first half of fiscal 1990 increased 193 percent while net income reflected the small loss reported for the first quarter.

Sales for the second quarter rose to $30,825,000 from $9,101,000 in the comparable 1989 quarter primarily as a result of the July 1989 acquisition of the foodservice equipment group of Hussmann Corporation. Net income for the period was $151,000, or $0.02 per share, compared to $1,190,000, or $0.14 per share, a year earlier.

''The extended softness in the restaurant and foodservice industries, along with the increased interest expenses related to the acquisition, continued to hurt the results of our acquired foodservice businesses. At the same time, our traditional middleby marshall high-speed oven business is experiencing growing strength from the pizza segment of the fast food industry,'' reported David P. Riley, president and chief executive officer of the Middleby Corporation.

Pointing to a 26 percent reduction in the workforce of the acquired businesses, which moved Middleby from being a single line manufacturer with annual sales of $35 million to a diversified manufacturer with annualized sales of $125 million, Riley said, ''We have made significant progress in improving the productivity of our operations and this will be reflected in better operating profits as the year progresses,'' Riley remarked.

''While interest expenses related to our acquisition continue to penalize our bottom-line, our cash flow has been good and we were able to reduce debt by $1,015,000 in the second quarter,'' he added. During the second quarter, Middleby completed two acquisitions of businesses which have annualized sales of about $5 million. The company purchased the assets of the foodservice equipment distribution operations of Hussmann of Canada and a controlling interest in a pacific-area distributor.

Commenting on the acquisitions, Riley said, ''This is in keeping with our objective to significantly enhance our international presence which we believe has great potential for us.''

The Middleby Corporation (AMEX: MBY) designs, develops, manufactures and

markets a broad line of equipment used for the preparation, cooking, refrigeration, serving and storage of food in commercial and institutional kitchens and restaurants throughout the world. An industry leader in high- speed cooking ovens, the company expanded its product lines in 1989 through the acquisition of four companies with well-known industry brand names -- Southbend (heavy-duty cooking equipment), Toastmaster (cooking and warming equipment), Victory (refrigeration) and Seco (holding and serving systems).

ORLANDO, FL (JULY 31) BUSINESS WIRE - Hardee's Food Systems Inc. announced Tuesday that Fry/Hammond/Barr of Orlando, Fla. has been selected to be the advertising agency for over 300 Hardee's Restaurants in the southeast region.

The account is expected to bill in the $4 million range annually. The agency will handle all media and promotions for the region with exception of the national television campaign that is handled by Ogilvy & Mather, New York.

Becky Killarney, director of marketing for Hardee's southeast region, made the official announcement adding, ''The Hardee's marketing staff and I were impressed by the agency's business-like approach to the task. Fry/Hammond/Barr displayed depth and stability and has a proven track record in the restaurant field.''

Peter C. Barr, agency executive vice president, reported the extent of the preparation for the presentation was not only to win the business, but be

ready to do business. ''This is a great opportunity for all of us at Fry/Hammond/Barr,'' he added.

Fry/Hammond/Barr is a $27-million, 33-year old agency.

WALNUT CREEK, CALIF. (JULY 31) BUSINESS WIRE - Novell Inc., developer of NetWare systems software products, Tuesday announced a new release of its NetWare for Macintosh software, supporting Apple Computer's AppleTalk Phase 2, AppleTalk Filing Protocol (AFP) v2.0 and TokenTalk, thereby continuing to provide Macintosh users with transparent access to NetWare 2.15 files and services.

By keeping pace with Apple's latest networking technology, NetWare for Macintosh 2.0 offers full Macintosh integration with the NetWare network computing environment while providing connectivity to other DOS and OS/2 clients. NetWare for Macintosh utilities have been enhanced in this release to allow added network administrative capabilities from the Macintosh.

In addition, NetWare for Macintosh 2.0 can be used as a bridge to store files and folders on a NetWare 386 server.

NetWare for Macintosh 2.0 is a value-added process (VAP) that runs on the NetWare 2.15 network operating system. The product integrates NetWare and AFP functions. NetWare services appear to the user as AppleShare services and are accessed via the standard Macintosh graphical user interface.

''NetWare for Macintosh has been instrumental in linking the rapidly growing Macintosh installed base in corporate environments with the millions of NetWare users worldwide,'' said Robert Wohnoutka, Apple's

acting director of networking and communications product marketing.

Novell Inc., (NASDAQ: NOVL) develops NetWare systems software products that manage and control the sharing of data across a variety of network computing environments, including computer workgroups, departmental networks and business-wide information systems.

Novell and NetWare are registered trademarks of Novell, Inc. Apple, Macintosh, AppleTalk, AppleShare and TokenTalk are registered trademarks of Apple Computer, Inc.

#90212b0831 07/31/1990 ~Business Wire

PORTLAND, ME (JULY 31) BUSINESS WIRE - John van C. Parker, president of Consumers Water Company (NASDAQ:CONW), Tuesday announced six months income from continuing operations of $3,595,000 for the period ending June 30, compared to $3,474,000 for the same period in 1989.

The earnings before gains from sales of properties were $2,858,000 for the current half vs. $3,397,000 in 1989.

As noted in a prior communication, the company has decided to dispose of the assets of its two real estate companies, The Dartmouth Company and Arcadia Company. As a result of this decision the company has established a reserve of $4,600,000 consisting primarily of the anticipated aggregate operating losses during the disposal plus the costs associated with the property sales.

The 1990 first half result, then, is a net loss of $1,418,000 compared to net income of $3,318,000 for the 1989 period.

For the second quarter alone, net income from continuing operations was $1,709,000 in 1990 compared to $2,168,000 in 1989. Because of the reserve established for the discontinued operations, the 1990 second quarter net loss was $3,025,000 compared with $1,992,000 of net income in 1989.

Parker stated that a primary advantage of taking the action on the real estate companies, which have not achieved expected earnings in recent

years, is the elimination of the company's exposure to the uncertain future of the slowing New England real estate market. By eliminating this exposure and providing now for estimated losses during disposal, the true earnings power of the continuing operations will be more clearly reflected in the company's financial statements.

Consumers Water owns and operates ten water utility companies, a utility service company, and a manufactured housing company in addition to the real estate companies.

TEMPE, AZ (JULY 31) BUSINESS WIRE - FCS Laboratories Inc.'s common stock will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotations System (NASDAQ) via an exception from the Capital and Surplus requirement.

While FCS Laboratories Inc. (the ''company'') failed to meet this requirement as of March 31, the NASD has granted a temporary exception from this standard subject to the company meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that it will do so.

If at some future date the company's securities should cease to be quoted on the NASDAQ System, they should continue to be quoted in the over-the-counter market. For the duration of the exception the company's NASDAQ Symbol will be FCSIC.

FCS Laboratories Inc. is a healthcare company engaged in serving the general practice physician and veterinarian with diagnostic and therapeutic products for various diseases, including allergy.

CAMBRIDGE, MASS. (JULY 31) BUSINESS WIRE - The Open Software Foundation Tuesday issued its fourth Request for Technology (RFT).

Through this RFT, OSF is soliciting technologies that will provide a distributed management environment and an essential set of system management applications.

OSF's Distributed Management Environment RFT will result in an architecture and services that will simplify the process of developing and using system management applications across multiple platforms. The RFT is also expected to elicit the essential applications to cover basic management tasks such as backup and restore, printer services, software installations and distribution, software licenses and user management.

''End user organizations should be able to depend on a consistent approach to managing their systems regardless of platform, operating system, or architecture,'' said Jonathan Gossels, OSF business area manager. ''OSF's Distributed Management Environment will provide that unified framework for the efficient, cost-effective management of open systems. It will also simplify the development of portable system management applications. The true beneficiaries here are the users.''

''Open systems-based computing environments can be characterized by a variety of administrative approaches, inconsistent management tools, and inadequate facilities for managing distributed systems,'' said Arno Schmidt, OSF director of European development. ''In order for open systems to move into commercial environments, a common framework must be adopted.''

The RPT technical evaluation will be conducted by OSF's European development office, in Munich, West Germany. This facility has been in full operation since May 1989.

The Open Software Foundation is a non-profit research and development organization dedicated to develop and deliver an open software environment based on standards for the benefit of the information processing industry.

OSF uses an innovative open process, soliciting technologies from the industry-at-large and invites member participation in setting technical direction for the Foundation's efforts. Headquartered in Cambridge, Mass., the OSF has 200 members and 260 employees worldwide.

ARMONK, NY (JULY 31) BUSINESS WIRE - The IBM Board of Directors has elected Earl F. Wheeler an IBM senior vice president, and Dr. James C. McGroddy and Mary Lee Turner IBM vice presidents.

Separately, IBM Vice President Paul R. Low has been named to the Corporate Management Board (CMB).

Wheeler continues as general manager, programming systems line of business IBM United States. A graduate of Union College, Schenectady, N.Y., he joined IBM in Endicott in 1955 as a junior engineer and served in several applications and programming assignments before being named applied programming manager in Endicott in 1960.

McGroddy continues as head of the Research Division, where he has been director since 1989. He joined IBM in 1965 in the Research Division, where he held a variety of technical management positions, including director of semiconductor science and technology; and vice president, logic and memory.

Turner continues as head of the corporate communications staff where she was named IBM director in 1988. She joined IBM in 1967 in Nashville and subsequently advanced through a series of assignments in systems engineering, marketing and marketing management.

Dr. Low last week was named general manager, Technology Products line of business. The CMB, to which he was named, advises John F. Akers, IBM chairman and chief executive officer, and acts as a forum for communicating to its members strategic matters and key operating decisions.

IBM Senior Vice President Patrick A. Toole, who last week was named general manager, operations, IBM US, continues as a CMB member.

#90212b0854 07/31/1990 ~Business Wire
EXETER, NH (JULY 31) BUSINESS WIRE - A consultant report supplied

recently to the New Hampshire Public Utility Commission (NHPUC) validates many of the claims made by UNITIL that a proposed hostile takeover by Boston-based Eastern Utilities Associates (EUA) would provide no benefits and impose increased risks on New Hampshire electric customers.

The Office of Consumer Advocate of the State of New Hampshire has already issued a report by its consultant concluding that EUA had failed to make a case and that the public good would not be served by the proposed takeover of UNITIL.

The report was prepared by Ernst & Young (E&Y), and although funded by EUA found that in area after area either no cost savings would occur as alleged by EUA or that assumption of opertions by EUA would ''... come at a hihger cost to UNITIL's customers.''

In the only area that the consultant found the potential for savings, power supply, the consultant eliminated virtually all the potential savings that had been claimed by EUA's own study callit it ''basically flawed.'' UNITIL's power supply expenses have historiclly been less than EUA's. Undertaking their own analysis, E&Y found the potential for up to $25 million of savings but noted that ''... given the present power market conditions in New England, it is conceivable that UNITIL could do ... as well ....''

The E&Y study used high-cost planning numbers for UNITIL in its analysis. Commenting on this aspect of the study, Michael J. Dalton, president of UNITIL, said, ''By taking advantage of the favorable New England power supply market referenced in the E&Y report, UNITIL has recently executed a long-term agreement with Central Vermont Public Service Corp. for a significant, low-cost addition to our power supply.

''When E&Y updates their study to reflect our actual power supply, even the potential for these savings found by E&Y will vanish, and in fact, UNITIL's power supply costs will continue to be lower than EUA's.''

Additionally, E&Y found that with an acquisition of UNITIL by EUA, New Hampshire electric ratepayers ''...are not immune from risk...'' due to EUA's heavy involvement in Seabrook, but that the resulting risk would be manageable by the NHPUC should problems occur. We believe the consultant is naive as to the magnitude of risk to our customers that this represents.

Because of EUA's impending financial problems related to its heavy Seabrook investment, UNITIL has warned that an acquisition of it by EUA could result in an attempt by EUA, to force its high cost Seabrook power onto UNITIL's New Hampshire electric customers.

In fact, EUA has recently been forced to admit that it has been unable to find a long-term Rhode Island electric customers. EUA, in a recent

disclosure to the Securities and Exchange Commission, has said that its inability to enter into long-term contracts to sell Seabrook power for an extended period ''...would have a significant financial impact on the EUA System and its shareholders.''

The New Hampshire Consumer Advocate, the consulting firms of Putnam, Hayes & Bartlett and the National Economic Research Associates have all strongly expressed concerns over the substantial EUA Seabrook-related risks to New Hampshire ratepayers.

UNITIL is a New Hampshire-based utility holding company. Subsidiaries are Concord Electric Co., Exeter & Hampton Electric Co., UNITIL Power Corp., UNITIL Realty Corp., and UNITIL Service Corp.

#90212b0858 07/31/1990 ~Business Wire

ARLINGTON, TX (JULY 31) BUSINESS WIRE - BizMart Inc. (NASDAQ:BZMT), one of the nation's fastest-growing office products superstore retailers, Tuesday reported that sales for the first quarter of fiscal 1991 ended July 28 reached $48.3 million, 145 percent higher than a year ago, based on unaudited initial numbers.

Comparable stores sales, including stronger July comparisons, were 22 percent ahead for the 15 stores open during the same period of both years. Earnings results for the quarter will be released during the week of Aug. 20.

''As we noted during recent investment community meetings, the company has experienced some softness in sales in all its markets during this quarter '' said Ron Stegall, president and chief executive officer. ''We believe this is a normal seasonality trend, but this is the first year that BizMart's store base has been large enough and established enough for us to be able to discern any seasonality,'' said Stegall.

BizMart has continued its rapid expansion with nine new stores opened during the quarter, including seven in the Houston market. The company had 41 stores in operation at the end of the quarter.

''Our expansion into the Houston market positions the company for strong future growth. We have been able to penetrate this major market with a sizeable number of stores very quickly which should enable us to achieve a major share of this market earlier than originally anticipated,'' said Stegall.

''Pre-opening expenses associated with the nine new stores opened during this summer period and two stores that will open early in our second quarter will be a significant factor in the company's first quarter results. This major expansion, coupled with the soft summer sales in the first quarter will contribute to a loss in the initial quarter of this fiscal year,'' Stegall pointed out.

''Looking to fiscal 1991 as a whole, we believe our sales and earnings comparisons will be very positive.''

BizMart Inc. operates 41 high-volume office products superstores in Texas Missouri, Kansas, Colorado, Arizona, Nevada, New Mexico and Utah. Over 7,000 high-quality, brand-name office products are sold to small and large businesses at everyday low prices that are discounted 40 to 60 percent from manufacturers' suggested retail prices.

#90212b0861 07/31/1990 ~Business Wire

CONCORD, NH (JULY 31) BUSINESS WIRE - New Hampshire Savings Bank Corp. (NASDAQ:NHSB) reports a net loss of $13.0 million, or $2.11 per share, for the second quarter ended June 30, 1990 compared to a net loss of $7.3 million, or $1.18 per share, for the same quarter of 1989.

For the first six months of 1990, the company reports a net loss of $19.7 million, or $3.20 per share, compared to a net loss of $13.3 million, or $2.15 per share, for the same period a year ago.

Nonperforming assets increased from $133.4 million at March 30, 1990 to $159.5 million at June 30, 1990, or from 9.65 percent to 12.19 percent of total assets. At June 30, 1990 nonperforming assets consisted of $137.4 million of loans and leases on nonaccrual and 90 days past due and $22.1 million of other real estate owned.

During the quarter a provision of $10.7 million was made to the allowance for credit losses. At June 30, 1990 the allowance for credit losses was $59.4 million which represented 5.88 percent of net loans and leases and 37.16 percent of total nonperforming assets. Net charge-offs for the quarter were $9.4 million.

During the quarter the company sold New England Capital Corp., its lease financing affiliate headquartered in Avon, Conn. The proceeds of this transaction added $65.0 million to the liquidity position of New Hampshire Savings Bank, the company's lead bank, and reduced shareholders' equity by $957,000.

At June 30, 1990 the company's shareholders' equity was $11.6 million, or .89 percent of consolidated total assets, and its primary capital ratio was 5.19 percent. The company, together with its lead bank, remain out of compliance with minimum regulatory capital requirements. As the company announced in May, New Hampshire Savings Bank has received from the Federal Deposit Insurance Corp. a draft consent Cease and Desist Order which deals comprehensively with virtually all material aspects of the bank's operations, including such matters as capital, asset quality, liquidity and earnings. The bank's negotiations with the FDIC about the terms of this order are in progress.

New Hampshire Savings Bank Corp., headquartered in Concord, the the capital of N.H., is the fourth largest bank holding company in the states with assets of $1.3 billion divided among four banking affiliates, all insured by the FDIC to the maximum extent permitted by law, and three nonbanking subsidiaries which together serve individuals, corporations and municipalities throughout central and southern N.H.

#90212b0863 07/31/1990 ~Business Wire

WINTER PARK, FL (JULY 31) BUSINESS WIRE - The board of directors of America's All Seasons Income Fund is pleased to announce a number of significant developments concerning the Fund.

At their recent board meeting the directors decided that, given current uncertainty regarding both the increasing weakness of the U.S. dollar and the continued concern over domestic debt levels, the Fund would entirely reposition its assets in an attempt to reduce risk and provide for increased protection against a marked further decline in the value of the dollar.

It was determined, therefore, that the Fund would position at least 90 percent of its assets in the 'short-term, government obligations' of major industrialized economies.

The board is delighted to announce, furthermore, significant actions taken by the Fund's Investment Manager and Underwriter. These actions will be effective Aug. 1, and continue through Oct. 31. They may be extended beyond this date at the discretion of the parties involved.

First, Global Advisors Inc., the Investment Manager, will continue to forego the management fee. In addition, the Manger will assume 100 percent of the custodial and transfer agency fees. The only major

expenses to be absorbed by the Fund will be the legal and audit fees; thus significantly reducing the Fund's operating expenses.

Second, the Fund is announcing a 90 day period during which all sales loads are waived, and purchasers will not be required to pay the scheduled sales load, presently set at a maximum of three percent. This ''zero percent'' sales load will be applied to all purchases made between 'Aug. 1 and Oct. 31.' In effect, the Fund has assumed a no-load posture for that time period.

It should be added that other important aspects of the Fund's structure remain unchanged: minimum initial investment is $2,500; dividends are distributed quarterly and may be reinvested at net asset value; and, there are no back-end sales charges. The Fund does not charge 12b-1 fees for distribution and marketing expenses.

For further information please contact America's All Seasons Income Fund Inc. 800/333-4222, ext. 89.

ATLANTIC CITY, NJ (JULY 31) BUSINESS WIRE - Edward M. Tracy, president and chief operating officer, Trump Atlantic City Properties announced Tuesday the appointment of I.G. (Jack) Davis as president and chief operating officer of Trump Taj Mahal Casino Resort.

One of the gaming industry's most respected and talented executives, Davis is the former president and chief executive officer of Resorts International.

''Jack is one of the most experienced operators in this industry. As a visionary and businessman, he helped build the foundation for the revitalization of Atlantic City as a world class destination resort. His leadership will prove invaluable in taking us through the 1990s,'' said Tracy.

A graduate of Williams College and Harvard Business School, Davis, 65, joined Resorts International as president in 1960. One of the gaming industry's most successful visionaries, he pioneered the advent of casino gambling in New Jersey.

In 1986, Davis was named chief executive officer of Resorts International, a position he held until November 1988, when the company was purchased by Merv Griffin.

''I'm very happy to be back in action in Atlantic City, and working with Ed Tracy and the Trump Organization at the Trump Taj Mahal,'' said Davis. ''The property has always been very speical to me. I was there from its inception and contributed to its design and development until it was taken over by Mr. Trump in November, 1988,'' he added.

In addition, Tracy also announced that Howard J. Klein has been named senior vice president of marketing for Trump Taj Mahal. Klein most recently served as vice president of casino marketing for Bally's Park Place Inc.

A master marketer, author and lecturer, Klein began his gaming career in 1979 as co-founder of Gaming International Magazine (Gaming and Wagering Business), a leading publication of the casino industry. In November 1983, he joined Caesars Atlantic City Hotel Casino as vice president of marketing, a position he held until February 1988 when he became vice president of casino marketing for Bally's Park Place Inc., the parent holding company for Bally's Nevada and Atlantic City operations. Klein, 52, is a graduate of Columbia University.

BROOKLYN (JULY 31) BUSINESS WIRE - On July 26, presiding Administrative Law Judge Edward D. Cohen recommended that Brooklyn Union be allowed a $40.4 million rate increase in fiscal 1991.

This reflects a 12 percent return on utility common equity, compared to the New York State Public Service Commission staff's proposal of $28 million in rate relief with a return on equity of 11.2 percent. The company's updated request is $49 million which reflects a 13.2 percent return on utility common equity.

Judge Cohen recommended approval of a stipulation and agreement which settled the rate year sales, rate based and the majority of operation and maintenance expenses. The recommended decision addressed the four remaining issues which had not been settled: health insurance costs, management incentive compensation, return on utility common equity and Brooklyn Union's capital structure. All of these issues, except return on equity, were decided in the company's favor.

Brooklyn Union Gas is reviewing the recommended decision and will file its brief on exception by August 14th. The PSC is expected to make a final decision by October 1990.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 31) COMTEX - The chairman of the Federal Deposit Insurance Corp. said today the nation's deposit insurance fund is under "stress" but added there is sufficient capital available to meet existing needs.

"Clearly, the insurance fund is under stress because it is at its lowest point in history," L. William Seidman told the Senate Banking Committee. "As far as we can tell, the fund is adequate to meet any (bank) failures we can identify. Our point of view is we can handle the costs, although we may have another loss by the end of the year."

At the end of 1989, Seidman said the ratio of the bank insurance fund to insured deposits hit the lowest level in the FDIC's history. The fund, at $13.2 billion, amounted to 0.70 percent of insured deposits. Seidman said an ideal level is 1.25 percent and added the figure could fall to as low as 0.50 to 0.60 percent by year-end.

Treasury Secretary Nicholas Brady recently testified before the Senate Banking panel and said the Resolution Trust Corp., the agency responsible for the savings and loan cleanup, would need approximately $90 billion to $130 billion to handle the task. Seidman, who is also the chairman of the RTC, agreed with Brady's assessment.

"I still think that's a pretty good estimate," said Seidman, who yesterday told the House Banking Committee the RTC would need an additonal $100 billion over the next fiscal year to cope with the S&L debacle. "Obviously, as the real estate market changes, it affects the loss. "We're looking at a moving target and no one will ever know the total costs until this is all over."

"I don't question the sincerity of your estimates but my gut tells me this

will not be enough," said Sen. Jake Garn (R-Utah). "I'll be terribly surprised if $130 billion will cover it."

The FDIC chief, appearing on Capitol Hill to give his views on updating the regulatory structure of the financial services industry, said structural reform of the banking industry should center on the Glass-Steagall Act, the Bank Holding Company Act, and geographic barriers to bank expansion.

Specifically, Seidman calls for the elimination of Glass-Steagall, which generally bars banks from securities activities, but maintaining proper safeguards so that many of the new products and services banks would be able to offer would be in uninsured subsidiaries or affiliates of a bank rather than the bank itself.

In addition, Seidman would do away with the ownership and activities restrictions of the Bank Holding Company Act which prohibits ownership of banks by non-banking firms, and remove all restrictions on the establishment of bank branches across state lines.

Without endorsing a specific plan, Seidman outlined a broad-based deposit insurance reform agenda to be implemented in conjunction with his proposed banking changes. Among the proposals presently under study are reducing the statutory coverage limit from the current $100,000; limitation of coverage for each individual to a maximum of $100,000 per institution, across all institutions, or per lifetime; and limitation of coverage according to type of liability.

Seidman said other proposals under review include private insurance models in which deposit insurance would be mandated by the government but capitalized and operated by the private sector and private insurance guarantees for deposits in excess of the $100,000 limit.

TOKYO (JULY 31) - Hitachi Ltd. will market a new magnetic disk storage subsystem with the world's largest storage capacity, the major Japanese computer maker said on Tuesday.

The new H-6587 series of magnetic disk storage sybsystems, to enter the market Wednesday, has a capacity of 35 gigabytes (GB), representing a 2.3-fold improvement over Hitachi's previous models, Hitachi officials said.

A memory of 35 GB can store the equivalent of 70 years' worth of a daily newspaper, they said.

The data transfer rate also has been increased from three megabytes (MB) per second to 4.2 MBsec and can be increased to nine MBsec if the subsystem is connected to Hitachi's latest general-purpose computer model, the 880 processor group marketed last month, they said.

IBM's latest model, the IBM-3390 series unveiled in November last year, has a memory capacity of 22.7 GB with a data transfer rate of 4.2 MBsec, according to IBM Japan Ltd.

Hitachi's new storage subsystem, including the control unit, requires two-thirds the floor space used by the previous model, the Hitachi officials said.

SEOUL (JULY 31) - A heatwave in South Korea has caused the deaths of 40 people, police said here Tuesday.

They said five people have died of heat stroke and 35 others had drowned in

the sea and in rivers in the last few days of hot weather with temperatures up to 40 degrees centigrade.

Officials said there was a record demand for drinking water in the capital Seoul over the weekend.

With night-time temperatures little below 30 degrees, many people in the poorer parts of the city have been sleeping in the open, it was reported.

LONDON (JULY 31) - Britain is preparing to evacuate its nationals from northern Sri Lanka where fierce fighting is going on between government troops and Tamil secessionists, the Foreign Office said.

A ship chartered by the International Committee of the Red Cross left Colombo on Monday to pick up about 20 Britons stranded in the Jaffna peninsula area. The ship is due to return to the capital at the end of the week.

Jaffna has been cut off from the rest of Sri Lanka since July 11 when a ceasefire between the Tamil Tigers, the biggest rebel group, and the government broke down.

SEOUL (JULY 31) - South Korea's unemployment rate dropped to a record low of two percent in June thanks to a sharp rise in employment in the construction and service industries, the government Economic Planning Board (EPB) said Tuesday.

The official report said that the nation's total number of employed rose by 470,000 in the year to the end of June, to 18.686 million, and the number of unemployed declined by 28,000 to 388,000.

It said that the economically active population was estimated at 19.07 million.

The lowest previous unemployment rate, 2.1 percent, was registered in October.

The report expressed concern over an increasing shortage of personnel in the manufacturing sector with workers preferring jobs in the booming service industry.

Press reports say the construction industry wants to import cheap labor from Southeast Asia, but the government adamantly opposes the idea.

#90212d5380 07/31/1990 ~French/German News Agency

MUSCAT (JULY 31) - Oman has ordered a consignment of Hawk fighter aircraft and other military equipment from Britain, the Oman News Agency (ONA) reported Tuesday.

ONA said the contract was signed Monday in London but did not specify the value of the deal or the number of Hawk planes to be purchased from the firm British Aerospace.

For financial reasons, Oman in May 1989 scrapped plans to buy eight Tornado fighter-bombers, built jointly by Britain, Italy and West Germany, and opted instead for the Hawk.

The Tornado contract was estimated at 350 million dollars.

The Hawk will replace the ageing Hunter aircraft in the Omani air force, which were also built by Britain.

According to unconfirmed press reports, Oman has opened negotiations with France for the purchase of an unspecified number of Mirage-2000 fighters.

FRANKFURT, West Germany (JULY 31) - The West German Government will offer an 8.42 percent interest rate on its next 10-year loan, down from 8.60 percent on the last, the German unification fund launched July 4, the Bundesbank said Tuesday.

The government is seeking to raise three billion Deutsche marks (1.8 billion dollars).

-30- 517
#90212d5570 07/31/1990 ~French/German News Agency
SEOUL (JULY 31) - South Korea has reported its first current account deficit in six years due in part to a mounting trade imbalance, the central Bank of Korea said Tuesday.

The country had a 1.58 billion dollar deficit in the first half of the year, a sharp downturn from a 2.56 billion dollar surplus in the same period last year, the bank said.

South Korea enjoyed a mounting annual current account surplus from 1986 to 1988, during which the surplus rose from 4.61 billion dollars to 14.16 billion dollars.

From January to June, the nation's commodity exports rose by a meager 0.5 percent to 29.21 billion dollars against imports of 30.60 billion dollars, an increase of 13.6 percent over the same period last year, giving a 1.39 billion dollar deficit, the bank report said.

The invisible trade balance also suffered a 230 million dollar deficit, while unrequited transfers showed a 30.7-million-dollar surplus.

The report also noted that exports of footwear, ships, machinery and electronic products were brisk, while those of automobiles, tape-recorders and toys did less well.

As for imports, crude oil and machineries rose sharply by 24 percent.

-30- 1373
#90212d5590 07/31/1990 ~French/German News Agency
LONDON (JULY 31) - The National Westminster bank said Tuesday its taxable profit rose 22 percent in the first half of this year, to 431 million pounds (798 million dollars) from 352 million (651 million dollars).

The first half figure last year was reduced by provisions of 585 million pounds (1.08 billion dollars) for risky debt.

The first half profit was below market forecasts of profit of between 480 million and 637 million pounds (888 million to 1.17 billion dollars).

#90212d5680 07/31/1990 ~French/German News Agency

NAIROBI (JULY 31) - The United States is to give Kenya cash and food aid worth about 55 million dollars over four years, officials said.

Washington, which has warned one-party Kenya that aid could be conditional on democratic reforms and expressed concern about human rights amid a crackdown on dissent this month, is to give food aid worth 920 million shillings (39.79 million dollars).

Another 345 million Kenyan shillings (14.92 million dollars) will be provided in cash and technical assistance, under an agreement signed here Monday by U.S. Ambassador Smith Hempstone and Charles Mbindyo, a permanent secretary in the Kenyan Finance Ministry.

Mr. Hempstone came under fire in the pro-government media here after warning Kenya that Congress might insist that aid went to countries practising multi-party democracy.

U.S. lawmakers proposed legislation on July 19 to halt U.S. aid to Kenya until President Daniel arap Moi's government frees political prisoners and introduces democratic reforms.

The proposals, put forward in the Senate and the House of Representatives, came in reaction to five days of anti-goverment riots here this month that left 22 dead.

Kenya, the biggest recipient of U.S. aid in sub-Saharan Africa, was scheduled to receive 46 million dollars in assistance this year. But 13 million dollars have been frozen by Senator Paul Simon, chairman of the subcommittee on Africa, in a sign of displeasure with Mr. Moi's government.

Mr. Simon said 27 percent of Kenya's budget came from foreign aid and loans. For next year, the White House has requested 42 million dollars in assistance for Kenya, one third of it in military aid.

-30- 1850

#90212d5800 07/31/1990 ~French/German News Agency

Munich (JULY 31) - The West German insurance group Allianz Ag holding reported here Tuesday a nine per cent rise in premium income to a record

31.83 billion Deutschmarks (19.9 billion dollars) in 1989 and said it was on course to set a new record this year.

Europe's largest insurance concern, Allianz said its capital assets in 1989 reached 121.8 billion D-marks, a 13.7 percent gain on the year before.

Reporting its first-ever world group results - reflecting acquisitions in France, Italy and Britain - Allianz said its group pre-tax profits reached 2.13 billion D-marks, while the net corporate surplus amounted to 1.16 billion D-marks.

The executive board proposed an unchanged dividend of 12 D-marks per share, plus a special 100th anniversary bonus of four D-marks.

In its report, the board said it expected a major expansion of business in view of the further liberalisation of financial markets in the European Community and the opening of the East Bloc countries.

It cautioned however that the new 51 percent holding in the former East German insurance monopoly would require large investments which would produce ''tangible start-up losses'' in the early going.

Allianz said that based on performance in the first six months of 1990, the group's insurance premium income could rise by a further 10 percent this year to a new record of some 36 billion D-marks.

-30- 1596

#90212d6100 07/31/1990 ~French/German News Agency

HANOI (JULY 31) - Vietnam produced nearly 1.2 million tons of oil in the first six months of 1990, and hopes to reach 2.5 million tons by the end of the year, the Vietnamese press reported Tuesday.

The Ho Chi Minh daily Saigon Giai Phong said that the Soviet-Vietnamese company Vietsopetro produced 1.184 million tons of crude oil by the end of June from its southern offshore deposits.

Of that, they exported 1.172 million tons, most of it to Japan.

According to official government figures, Vietnam's total oil production for 1989 was 1.51 million tons.

Vietsopetro, which employs 1,000 Soviets among its work force of 5,000, is the only one of five oil companies in Vietnam that is currently in production.

British Petroleum, the Anglo-Dutch-Belgian consortium Petrofina-Shell, Total and the Franco-British group CEPT-Entreprise are working in

Vietnamese waters but are still at the exploration stage.

The Swedish firm SECAB signed a contract in March with the state company PetroVietnam.

Vietnam, which has no refineries, imports three million tons of refined oil products each year, mainly from the Soviet Union, supplying 80 percent of the country's needs.

-30- 1388
#90212d6150 07/31/1990 ~French/German News Agency
TOKYO (JULY 31) - Crude oil prices are likely to rise in the future, but a third global oil crisis is not on the cards, the president of Nippon Oil Co. said Tuesday.

"Prices should not go beyond about 25 dollars per barrel," Kentaro Iwamoto, president of Japan's largest oil company, told the Manichi Daily News.

"If they go higher, consuming nations will reduce their dependence on oil," Mr. Iwamoto added. But he said "there will not be a third oil shock."

He based his prediction on increased world demand for oil because of the growing needs of Eastern countries and dwindling production capabilities of oil-producing countries outside the Organisation of Petroleum Exporting Countries (OPEC).

To safeguard the supply of oil to Japan, "strengthening relations with OPEC nations is more important than ever before," Mr. Iwamoto said, commending efforts by the Ministry of International Trade and Commerce in this direction.

He noted that his company had recently opened an office in Abu Dhabi and reached an oil accord with Saudi Arabia.

Asked whether Tokyo would accede to Arab demands that Japan open up its market to Middle Eastern oil companies, Mr. Iwamoto said such a move would be useful only if it furthered relations between Japan and the Arab states concerned.

-30- 1481
#90212d6870 07/31/1990 ~French/German News Agency
TOKYO (JULY 31) - Japan is set to play a major role in the European economy as mutual dependence between the two areas grows, a commentary in the influential Japanese daily Asahi Shimbum said Tuesday.

The newspaper cited Monday's acquisition by Fujitsu Ltd. of an 80 percent

stake in Britain's largest computer manufacturer, International Computers Ltd. (ICL), as an example of Japan's new role as an "indispensable element" in the European economy.

"A previously unknown interdependent relationship between Japan and Europe is in the process of developing," it said. "Frankly speaking, Japan has become more important to Europe in this new situation."

The Fujitsu deal coupled with the recent agreement between the Japanese and West German auto giants Mitsibushi and Daimler-Benz, "suggest the future of Japanese-European economic relations," the article said.

However, it also pointed out practical difficulties that Japan will have to face in dealing with Europe, especially the diverging attitudes in the European Economic Community (EEC) towards industrial and technological policy.

"France and its allies," the daily said "tend to be exclusionary," while Britain and West Germany welcome the entry of Japanese or U.S. firms into the European economy.

The beginning of a U.S.-Japanese battle over the European market is another important factor, Asahi Shimbum said.

"It goes without saying that the coupling of Fujitsu and ICL is a countermeasure to America's IBM (International Business Machines), which has dominated the European computer market," the newspaper said.

The editorial said it was also necessary to understand the fierce competition between European firms prior to the creation of a single European market in 1992, as well as some countries' anxieties about German reunification and the changes in eastern Europe.

Most important of all, the newspaper said, was the need to consider "the feelings of others, a factor that had been missing in previous advances by Japanese corporations into the European market."

#90212d6880 07/31/1990 ~French/German News Agency

COLOGNE, West Germany (JULY 31) - West German and British specialists working for U.S. automaker Ford have developed with Sony of Japan a c system reducing the time needed to design a new model of car, Ford said here Tuesday.

The system unveiled here reduces the time needed to design a new model from 68 months to 48 and can build in requirements such as client requests or safety needs.

Ford said that developing a new model using this system would take into account trends on the auto market.

The project, which is already in operation, has taken investment of some 30 million Deutsche marks (18.75 million dollars), and the first model designed with the new system is expected to roll off the Ford production line in the mid-1990's.

#90212d6950 07/31/1990 ~French/German News Agency

MANILA (JULY 31) - President Corazon Aquino on Tuesday launched Philippine government bonds to raise money for reconstruction after a major earthquake this month which left 2,600 people dead and more than 100,000 homeless.

Finance Secretary Jesus Estanislao also said the country's economic reform program would continue depsite the damage.

"We are launching the economic reform program perhaps under more difficult circumstances," after the July 16 tremor, but these problems only made the reforms "much more crucial," Estanislao told foreign businessmen.

Aquino launched the "reconstruction bonds," in three categories with a total value of 368 million dollars.

Aquino said the country, already saddled with a 26 billion dollar foreign debt, should rely primarily on its own savings and sacrifices before resorting to foreign loans to finance the rebuilding effort.

"As the cost of repairing the damage is being finalized, we are certain that the bill is not going to be small," Aquino said in a speech at the presidential palace.

"But for the more demanding task of reconstruction and development, the figure is certain to be much bigger and far in excess of whatever resources our government has at present," she added.

Aquino made the first pledge to buy the bonds, reserving 200,000 pesos (8,400 dollars) out of her own savings.

She earlier estimated the damage to roads, bridges, buildings and other stuctures at up to 15 billion pesos (630 billion dollars).

The reconstruction bond will have a three-year maturity and earn 14 percent annually, while the yield of the one-year dollar bills, aimed at Filipinos abroad, will be based on the 180-day London Interbank Offered Rate.

The third category features a quarterly raffle offering cash prizes to winning bond numbers. Its mechanics were not immediately available.

The earthquake, one of the worst natural calamities to hit this archipelago, left 2,600 people dead or missing and more than 100,000 others homeless. Damage to private property was also massive.

Aquino previously said she would seek to rebuild not only quake-hit areas but also parts of the country untouched by the disaster.

Aides said the session ended with up to two billion pesos (84 million dollars) in pledges from businessmen, politicians and ordinary citizens invited to attend the launch, including schoolchildren using their personal savings.

Estanislao said government reforms were intended to "address the greater problem of inflation" by shrinking the government deficit.

However, he admitted that the quake and the cost of reconstruction would cause the public sector deficit to exceed the 38 billion peso (1.6 billion dollar) ceiling set for this year.

"The lynchpin of the entire economic program is to bring down the fiscal deficit," he said.

Estanislao also said that the government was preparing to liberalize investment regulations to encourage the entry of more foreign capital and to reduce protectionism.

"Despite the earthquake, we're moving ahead with our economic recovery program. There is no turning back," he said.

Estanislao said last week that the country's economic growth in 1990 could

surpass the 5.6 percent growth in 1989 despite the damage by the quake.

TOKYO (JULY 31) - Japanese tiremaker Bridgestone Corp. said Tuesday its net profit grew 27 percent in the six months to June from a year earlier to 24.4 billion yen (160 million dollars).

Sales rose five percent to 352 billion yen (2.3 billion dollars), it said. Domestic sales climbed six percent to 238 billion yen (1.6 billion dollars) while exports rose five percent to 114 billion yen (746 million dollars).

"Exports to Europe and Asia improved although the demand by North America has been sluggish," a company statement said.

Tire sales rose two percent to 268 billion yen (1.8 billion dollars) while sales of other items such as industrial rubber and chemical products as well as sporting goods jumped 15 percent to 84 billion yen (552 million dollars).

The company predicted its net profit to climb 25 percent in the full year to 51 billion yen (334 million dollars) with sales rising four percent to 730 billion yen (4.8 billion dollars).

#90212d7090 07/31/1990 ~French/German News Agency

MANILA (JULY 31) - The state-owned Philippine Airlines (PAL) said Tuesday it was operating normally despite the suspension of eight top officials linked to alleged multi-million-dollar irregularities.

A PAL statement said subordinates of the suspended executives would take over their functions, and that the firm's president Dante Santos had assured there would be no interruption of services.

PAL chairman Catalino Macaraig on Monday announced the suspension of eight executives led by executive vice president and chief operating officer Leslie Espino and two senior vice presidents.

Macaraig said 14 other executives were also being investigated but that the board had not yet decided whether to file criminal charges against them.

The government has been probing reports that the national flag-carrier had been losing millions of dollars due to overpayments to agents, irregular lease charges, missing aircraft parts and other irregularities.

Government officials earlier vowed to file criminal charges against anyone found to have been involved in such practices.

PAL, whose privatization has been delayed by various problems, enjoyed a net income of almost 14 million dollars in fiscal year 1988-89.

LONDON (JULY 31) - Britain is facing a severe risk of recession, largely due to high interest rates, the business leaders' organization the Confederation of British Industry (CBI) said Tuesday.

"We are saying for the first time that if the present trends continue ... then the risk of a recession is there," said David Wigglesworth, chairman of the CBI economic situation committee.

The CBI warned in its quarterly report that the country faced "severe risk of recession," predicting a net fall in industrial production and a rise in unemployment in the coming months.

Mr. Wigglesworth said that a recession could be seen in the second half of this year or in early 1991, and blamed the country's current high interest rates.

The squeeze "is hurting -- in particular it is hurting industry," he added.

David Kern, chief economist with the National Westminster Bank, the country's second largest clearing bank, meanwhile predicted Tuesday that unemployment would rise by 400,000 by the end of 1991, taking the number of jobless to more than two million.

The government is pursuing a high interest rate policy in a bid to curb inflation, currently running at close to 10 per cent.

TOKYO (JULY 31) - Japan's Fair Trade Commission raided the Tokyo headquarters and 16 offices of pharmaceutical firm Eisai Co. Ltd. Tuesday on suspicion of violating anti-monopoly laws, officials said.

The company allegedly prevented retailers from competing against each other by forcing them to sell Vitamin-E tablets at fixed prices.

Vitamins accounted for six percent of the company's sales of about 200 billion yen (1.3 billion dollars) last year.

#90212d7330 07/31/1990 ~French/German News Agency
PARIS (JULY 31) - European rocket-maker Arianespace named a new president on Tuesday: Managing director Charles Bigot, 58, succeeding Frederic d'Allest, informed sources said here.

Mr. Bigot was unanimously elected by the Board of Directors of the French company, which was set up at Mr. d'Allest's inititive in 1980 and commercializes the Ariane European rockets.

Arianespace actually consists of three companies: Arianespace SA, Arianespace Participation holding company, and S3R (which sees to reinsurance of launch risks). Like Mr. d'Allest, Mr. Bigot will be the president of all three companies.

Arianespace SA has a capital of 270 million francs (50 million dollars). Its sales last year amounted to 3.79 billion francs, on which it made a profit of 135 million francs, up six per cent on 1988. Since its establishment, it has signed 84 satellite launch contracts, and has a backlog of 37 yet to be launched.

Arianespace Participation has a capital of 1.05 billion francs, and S3R one of 28 million francs.

Mr. Bigot said his election was "a great honor for me" as well as a "great responsibility to the international community of space users, almost all of which are customers of ours".

He was born July 29, 1932, in Angers, west-central France. He attended the prestigious Polytechnique school in 1952-54, and graduated from the Higher National School for Aeronautics and Space in 1957.

He worked for the French Defence Ministry from 1958 to 1961, and then spent a decade at the National Center for Space Studies (CNES). He was at Air Inter airline in 1971-75, and was then managing director of Seri-Renault Engineering company for five years. After two years at Aerospatiale (aircraft engines), he joined Arianespace in 1982 as managing director.

FRANKFURT, West Germany (JULY 31) - West German store chain Co op said Tuesday it is to sell 400 stores in the south of the country to the Rewe group.

It did not reveal the price of the deal, but the stores, which employ 8,600 people, have a total annual turnover of some 1.8 billion Deutsche marks

(1.1 billion dollars).

It is the fourth such sell-off in a month for the troubled retail group, rescued at the 11th hour from bankruptcy at the end of 1988.

Co op said last week it had sold 47 shops to French retailer Promodos, after the sale at the end of June of 120 shops to an East German cooperative retailer and the signing of a deal with West German retailer Edeka.

#90212d7450 07/31/1990 ~French/German News Agency

PARIS (JULY 31) - Independent French airlines should be given the right to operate regular domestic and international services this year, the head of major travel operator Nouvelles Frontieres said here Tuesday.

Jacques Maillot, who has been battling for years against the monopoly held by the Air France group, said in an interview with Agence France-Presse that he was very optimistic that independents would be given regular routes.

Air Liberte, Corse Air, Minerve, TEA and EAS, all companies which have until now operated only charter flights, are asking for regular route slots.

They plan to urge the authorities in August to allow several companies to operate on a number of domestic routes.

Air France now controls 97 percent of French airlines' traffic, after taking control of UTA and domestic airline Air Inter in January.

Disruption of air travel during a recent strike at Air Inter showed that "each time you strengthen a monopoly's position, it is bad news for the consumer," Maillot said.

Nouvelles Frontieres is France's second largest travel operator after Club Mediterranee and is involved in charter airline Corse Air.

Maillot said the French government must introduce competition between French airlines in France ahead of the single European market in 1993, which would be good for the consumer and would force Air Inter to prepare to meet the challenge of foreign competitors such as British Airways or Lufthansa.

He said he expected the French government to allow French independent airlines to operate regular services on both European and long-haul routes, such as to New York.

Budapest (JULY 31) - The West German media giant Bertelsmann has become the main shareholder along with Hungary's largest daily newspaper, Nepszabadsag, in a new media venture in Hungary, the paper disclosed Tuesday.

The paper in a front-page item reported on the agreement signed on Monday. It said a joint stock venture company was formed which later would branch out into other publishing ventures in Hungary.

Nepszabadsag said that of the start-up capital of 340 million forint (5.4 million dollars), Bertelsmann's share was 140 million forints, with the remaining 200 million forints held by the newspaper, two banks, a book publisher, and the editorial staff.

The paper said the new venture aimed to branch out into newspapers and magazines, books and music products in the Hungarian market.

Nepszabadsag, formerly the Hungarian communist party organ and then the mouthpiece for reform communists, secured its own political and publishing independence six months ago. At 400,000 daily circulation, it is Hungary's largest newspaper.

#90212d7740 07/31/1990 ~French/German News Agency
BEIJING (JULY 31) - The Chinese Communist Party's central committee will discuss a 10-year national development program at a plenum later this year according to State Council (cabinet) spokesman Yuan Mu.

The program will go hand-in-glove with China's eighth five-year plan for the economy, which will also be reviewed by the central committee, Yuan said in a weekend interview with Japan's business daily, Nihon Keizai Shimbun.

Excerpts were carried Tuesday by the New China News Agency.

China has been implementing five-year economic plans since 1952. State bureaucrats are now drafting a new plan for 1991-95 which, Yuan said, will probably call for economic growth of six percent a year.

But he added that a 10-year program was necessary to deal with long-term projects.

"The 10-year program is the framework, and the five-year plan the details,

but the two will be closely combined with each other," he said.

Dates for central committee plenums are never announced in advance, but Yuan said the timing for the next meeting would depend on preparations for the two economic blueprints.

VIENNA (JULY 31) - On the eve of the 15th anniversary of the signing of 1975 Helsinki final accord, a Vienna-based human rights organisation said Tuesday there were continuing human rights violations in European countries,
including the Soviet Union.

The International Helsinki Federation for the Protection of Human Rights said the Soviet Union still denied would-be emigrants permission to leave and confined people to mental hospitals for political reasons.

In Romania, the freedom of assembly and speech were not fully respected by the government.

It said it had reports from Turkey about torture by police and people being detained there for years without trial.

The Helsinki final accord was signed on August 1, 1975 by members of the Conference on Security and Cooperation in Europe (Csce).

#90212d8040 07/31/1990 ~French/German News Agency

BONN (JULY 31) - Amid charges that West German subsidies to East Germany are being ''wasted'', the two German governments clarified Tuesday their positions for the upcoming negotiations over a treaty on national union and all-German elections.

The two sides will start three-day talks in East Berlin Wednesday on a draft of the proposed treaty on political union.

Observers said the two sides are expected to find common ground on the controversial question of minimum vote percentages required to win seats in the first all-German parliament.

Meanwhile, East German Defence Minister Rainer Eppelmann, a Lutheran minister and former conscientious objector, remained under criticism from Bonn because he has ordered military hardware worth 1,000 million marks (600 million dollars) despite a budget deficit that already amounts to 20 billion marks for 1990.

A spokesman for the East Berlin defence ministry said the procurement orders were based on previous treaties that provide for large-scale penalties in the event of non-fulfillment.

Government officials in Bonn also charged that the East German administration appeared to be incapable of setting out a responsible economic policy four weeks after the start of the German economic and monetary union.

The West German government of Chancellor Helmut Kohl has made it clear it it not prepared to extend more subsidies to East Germany beyond what has already been pledged.

JAMMU, INDIA (JULY 31) - Fifteen Moslem militants and four suspected "police informers" were killed in India's troubled Kashmir state, where an indefinite curfew was imposed Tuesday to prevent anti-India protests.

Indian troops shot the militants on Monday night when they tried to sneak into the frontier state from Pakistan using forest cover, defense officials said in this winter capital of Kashmir.

The officials said the soldiers resorted to "indiscriminate firing" at the Titwal sector of the Kashmir valley after the Moslems crossed the border armed with automatic weapons and rockets.

Authorities said they later found 15 AK-47 assault rifles, two rockets, three rocket launchers and two light machine guns scattered by the bodies of the victims. No further details were available.

New Delhi accuses Islamabad of backing and arming the Moslem militants in Kashmir who are campaigning to secede from India. Nearly 900 people have been killed this year in the campaign.

Pakistan, which controls a third of the Kashmir region, has denied arming the rebels but supports the struggle.

Moslem militants also shot dead four civilians in the Moslem-dominated Kashmir valley. The three men and a woman were suspected of being "police informers," police said.

Kashmir is also India's only Moslem-majority state, the cause of two of three wars since 1947 between India and Pakistan.

Meanwhile, authorities imposed the curfew to prevent protests by outlawed Moslem groups to coincide with the Cairo summit of the Organization of Islamic Conference (OIC).

Foreign ministers of the OIC member nations were to hold talks on a number of issues, including Kashmir, on Tuesday. New Delhi failed to persuade the Islamic countries from discussing Kashmir.

The outlawed groups had called for demonstrations in Srinagar and other Moslem-majority areas to protest alleged excesses by security forces seeking to crush the militants, and to demand the right to secede.

Police also reported four bomb explosions in Kashmir but no one was wounded.

#90212d8230 07/31/1990 ~French/German News Agency
PORT MORESBY (JULY 31) - Papua New Guinea's government Tuesday moved towards meeting Bougainville demands that sanctions be lifted against the secessionist island, reports said.

The Australian Broadcasting Corp. (ABC), attending the peace talks on a New Zealand warship, said a memorandum of understanding was being drawn up to set conditions for the lifting of sanctions against Bougainville.

Officials from Bougainville and Papua New Guinea are meeting on the HMNZS Endeavour to try and resolve a 16-month secessionist war in which more than 80 people were killed before a March ceasefire.

Two months later Bougainville declared itself independent, which prompted Port Moresby to impose a communications and transportation blockade.

Landowners seeking compensation from the Bougainville's giant copper mine

sparked the South Pacific's bloodiest conflict since World War II.

LONDON (JULY 31) - A contract signed Monday by Oman and British Aerospace (BAe) calls for delivery to the sultanate of 16 Hawk 100 and 200 pursuit planes worth about 150 million pounds (250 million dollars), BAe announced here on Tuesday.

The contract also calls for supplying the Omani Air force with various types of military equipment and services.

The agreement is an important one for British Aerospace. In May last year, Oman, Jordan and Malaysia dropped the idea of buying Tornados (built jointly by Britain, West Germany and Italy). The Tornado contract would have been worth about 350 million dollars.

BAe said that Malaysia might also decide to buy Hawks, rather than the Tornado.

The new contract is the first sale of the single-seater Hawk 200, which is equipped with the latest electronic systems and high-performance arms.

#90212d8510 07/31/1990 ~French/German News Agency
JOHANNESBURG (JULY 31) - Namibian Prime Minister Hage Geingob has told parliament in Windhoek that a plot to overthrow the government has been uncovered, South African Radio said in a report from Windhoek Tuesday monitored here.

Geingob reportedly said 500 former members of police and army counter-insurgency units, together with former Unita elements from Angola, were believed to have been involved in the coup plot, allegedly financed from sources within the United States.

Namibia, which was ruled for years by South Africa in defiance of the world, won independence only last year.

The coup plot came to light when one of those involved defected to the Namibian security forces, the radio said.

Namibia's Permanent Secretary for Home Affairs, Ndali Kamati, told the radio's correspondent he could neither confirm nor deny the reports.

#90212d8520 07/31/1990 ~French/German News Agency
TUNIS (JULY 31) - The chairman of the Palestine Liberation Organization, Yassir Arafat, Tuesday discussed with Tunisian President Zine al-Abidine Ben Ali ways to revive the dialogue between the Plo and the United States.

This dialogue was suspended recently after a Plo suborganisation, the Palestine Liberation Front of Abu al-Abbas, was held responsible for a foiled attack against an Israeli beach. The U.S. demanded that Arafat discipline al-Abbas and explicitly condemn the attack as a condition to revive the dialogue with the Plo.

Arafat and Ben Ali also discussed the Palestinian uprising in the Israeli-occupied territories and a letter send by former U.S. President Jimmy Carter to Arafat. Its contents were not revealed.

After the meeting with Ben Ali, Arafat condemned ''crimes'' committed by Israeli troops against the Palestinian people in the occupied West Bank and Gaza Strip.

He sharply criticised the right-wing government of Israeli Premier Itzhak

Shamir for refusing to recognise the Plo as the sole and legitimate representative of the Palestinians.

#90212d8530 07/31/1990 ~French/German News Agency

LONDON (JULY 31) - Zinc prices slipped lower on the London Metal Exchange (LME) here Tuesday, continuing Monday's slide on by news that a short-lived strike by workers at Peru's Mineroperu operation ended.

Three-months metal was quoted in after-hours kerb deals at 1,465 dollars per ton against 1,469 dollars in afternoon ring deals and 1,483 on Monday.

Meanwhile bullish sentiment in copper was kept at bay by a 9,300-ton increase in LME stocks to 94,275 tons, a six-month high.

Sterling's strength against the dollar also exerted downward pressure on pound-quoted copper prices. The metal stood at 1,514 pounds per tonne on the kerb against 1,469 on the ring and 1,483 on Monday.

Nickel firmed strongly, reaching 9,875 dollars per tonne on the afternoon kerb against 9,825 on the ring and 9,450 on Monday.

But aluminium fell back from Monday's 10-month high despite a 1,250-ton drop in LME stocks to 156,775 tons.

Three-months aluminium was quoted at 1,725 dollars per ton on the kerb against 1,737 on the ring and 1,749 on Monday.

#90212d8580 07/31/1990 ~French/German News Agency

MOSCOW (JULY 31) - The Soviet Union will have to sell gold and diamonds to pay for grain imports, due to U.S. refusal to grant new credits for such purchases, Soviet television said on Tuesday.

The commentator, without indicating the value of the items to be sold, said the United States had taken its stand because the Soviet Union was 100 million dollars behind on payments for earlier shipments.

The United States has been selling large amounts of wheat to the Soviet Union for several years. But severe economic problems has led to the emergence of a Soviet official foreign debt of 34 billion rubles (54 billion dollars).

The television report said that even if there is a good harvest this year, difficulties in connection with transportation and storage threaten harvest results.

(In Geneva, Credit Suisse bank said Tuesday that the Soviet Union had sold 300 tonnes of gold in January-May, as much as for all 1989.)

Tass news agency said that Premier Nikolai Ryzhkov visited the Saratov region, in southern Russia, to check on harvest problems. He is to continue his farm tour for several days, Tass said.

#90212d8630 07/31/1990 ~French/German News Agency

VIENNA (JULY 31) - The International Atomic Energy Agency (IAEA) is to undertake a major programme of checking Europe's older nuclear reactors, particularly in Eastern Europe, an IAEA spokesman said here Tuesday.

The programme will begin with checks on first generation VVER reactors, which were used in the Bohunice, Kola and Noworenesch plants in Czechoslovakia, IAEA spokesman David Kyd said.

These reactors are also in use in other East European countries including the Soviet Union and Bulgaria. Reactors of this type at the Greifswald plant in East Germany were closed down recently.

Czechoslovakia, the Soviet Union, Bulgaria and East Germany will be attending a preparatory study meeting on the planned checks opening here August 27.

IAEA experts have already visited the Bohunice plant at the weekend, and the Kozlodey plant in Bulgaria at the invitation of the Bulgarian authorities.

The Kozlodey visit was aimed at examining the possibility of protecting the reactors there against the dangers of an earthquake, and the Bulgarian authorities have been informed of its conclusions.

The Soviet Union has not yet invited the IAEA to inspect the four VVER reactors in that country, the agency said.

All IEA members are due to attend a seminar in the second half of September, and in the longer term it is planned to inspect first generation reactors in Western Europe and the United States to see whether some parts need replacing, or if some reactors should be shut down.

The whole inspection process will take some time, Mr. Kyd said, noting that the inspection of the Griefswald plant took almost six weeks, and it was five months before the results were available.

MOGADISHU (JULY 31) - More than half a million people lined the streets of the Somali capital Mogadishu last weekend to mourn the death of human rights lawyer Ismail Jumale Osoble, a key figure in the pro-democracy movement.

He left the country in May to seek international support for a new constitution and multi-party democracy in Somalia, wracked by civil war.

Mr. Osoble died aged 59 in a Rome hospital after kidney surgery on July 22, and his body was brought back last week amid great lamenting.

The road from the airport to Imam Omer cemetery, 15 kilometres (nine miles) from the capital, was crowded with mourners who screamed "God is great" as his body was carried in an open truck to the burial ground on Saturday.

Despite the huge crowds, no security forces were in sight - unprecedented for such a big gathering here. Only youngsters with armbands directing traffic were in evidence.

The coffin was wrapped in the Somali flag, with Koranic verses inscribed on it. The mourners waved banners reading ''Born for the nation, died for the sake of the nation.''

Lima (JULY 31) - A total of 44 guerrillas and seven soldiers were killed in three separate clashes between Peruvian government troops and Maoist Sendero Luminoso (Shining Path) rebels in the past three days, military officials said Tuesday.

They said the clashes occurred in the province of San Martin, some 600 kilometres northeast of Lima.

The government troops suffered the worst losses in an rebel ambush on their boat on the Abiseo River when six soldiers were killed as the rebels opened fire on them. They said 12 rebels died as the soldiers fought back.

Another soldier and 15 more rebels were killed in a clash at the River Hullage. The other 17 rebels were shot dead when a military patrol discovered a guerrilla food transport at the Magdalena River.

#90212d8810 07/31/1990 ~French/German News Agency

PARIS (JULY 31) - A 19-year-old African youth has become the latest victim of a violent youth cult in which French gangs are increasingly settling scores with steel bars or with guns.

Omar Toure, a French resident of Malian origin, died following a street battle early Monday between dozens of African youths, who have dubbed themselves "Zulus", after the South African tribal grouping.

The scuffle broke out when a group of "Zulus" left a nightclub frequented by Africans under the Arch of La Defense Square, near the futuristic city development in the west end of Paris.

The young Malian was the third victim of similar violence in two months.

On July 9, Philippe Gomis, a 20-year-old Senegalese, the brother of boxer Louis Gomis, died in clash with the "Gypsies" in Marseilles, southern France.

In June, Rainaldo Ribeiro, 25, was killed when he was shot in the head in Acheres,in the Paris region. He was known by police to have been a caught up in local gang wars.

The gangs are often characterized by attachment to certain music. The

"Zulus" for example, who find the La Defense area, deserted at weekends an ideal place to meet, listen mainly to rap.

Much of the style is imported from the United States, with gangs having their own rituals, special clothing, their own language and even their own sub-groups within the gangs, with names such as the "Black Fist or "Worst Bastards."

#90212d8960 07/31/1990 ~French/German News Agency

JOHANNESBURG (JULY 31) - The world's largest platinum producers, Rustenburg Platinum Holdings (Rusplat), on Tuesday reported a drop in distributable profit for the first time since 1984.

The 7.5 percent decline in distributable profit to 551.3 million rands (212 million dollars) at Rusplat's Rustenburg mine, 80 kilometres (50 miles) north-west from here, was caused by a 12.6 percent increase in the cost of sales and a 67 percent increase in renewals and replacement charges.

Rusplat also announced an increased dividend of 310 cents (119.2 U.S. cents), 10 cents up on the previous financial year, according to the consolidated report for the year ending June 30, 1990.

Rusplat posted exceptional 1989 results when taxed income increased to 600.6 million rands (231.8 million dollars).

Gross sales revenue for the 1990 financial year increased from 2.932 billion rands (1.13 billion dollars) to 2.944 billion rands (1.136 billion

dollars) in spite of lower dollar prices received for most metals, the directors said.

Although earnings for rhodium were higher during 1990, the substantial increase in the free-market price, which soared to close to 6,000 dollars an ounce on July 2, came too late to have a material effect on the annual results.

Profit on sales of metals decreased by 11.9 percent to 1.28 billion rands (494 million dollars), and net operating profit was down 118.7 million rands (45.8 million dollars) to 1.465 billion rands (565.5 million dollars).

SOFIA (JULY 31) - The Bulgarian parliament adjourned here Tuesday after questioning the sole remaining candidate for the country's presidency, Shelo Shelev, and was to take a vote Wednesday.

Shelev was nominated by the Federation of Democratic Forces after that opposition group's previous candidate, Petar Dertliev, withdrew. The Peasants' Party also withdrew its nominations for the post Wednesday.

The parliament has voted five times so far in an attempt to elect a president to replace Petar Mladenov. No candidate has so far obtained a two-thirds majority as required in the constitution.

CAIRO (JULY 31) - Iran is determined to discuss at the Islamic ministerial meeting that opened here Tuesday a deadly tunnel stampede in Saudi Arabia but will avoid implicating Riyadh in the disaster, the chief Iranian delegate said.

"We will take any opportunity to raise this matter in order to prevent the same accident happening again and we will propose an investigation into the incident," Hojatoleslam Mohammad Ali Taskhiri told Agence France-Presse.

"For the unity of the conference," he said, Iran would avoid repeating charges that Riyadh was responsible for the tragedy and would not call for the holy sites of Mecca and Medina to be removed from Saudi jurisdiction.

"This matter will be pursued elsewhere," Mr. Taskhiri said.

He was speaking as delegates to the 45-member Organisation of the Islamic Conference (OIC) meeting began closed-door talks on a packed agenda including mass Soviet Jewish immigration to Israel and unrest in Kashmir.

Iran has repeatedly blamed Saudi Arabia for the July 2 stampede in the Mina tunnel near Mecca in which 1,426 Moslem pilgrims were crushed to death.

Riyadh has said the stampede was sparked by panic after some pilgrims fell, but Iranian President Ali Akbar Hashemi Rafsanjani called it a "shameful massacre." Other Iranian officials have accused Saudi security forces of shooting at the crowd.

Mr. Taskhiri denied Iran had come under pressure from Egypt or other countries to tone down its stand on the incident, which is not on the agenda at the five-day meeting here.

"We do not take pressure from any country and we usually try to maintain a good atmosphere at such conferences," he said.

Mr. Taskhiri, a senior religious official in Iran's Islamic Propagation Organisation, told reporters earlier Tuesday that Iran would free Egyptian soldiers captured during the Gulf war with Iran.

He said the move would be a good will gesture that had nothing to do with the possible resumption of relations with Cairo severed in 1979, after the shah took refuge in Egypt.

Egyptian Foreign Minister Esmat Abdel Meguid later said his country "welcomed favourably" Mr. Taskhiri's statements. He also said that no official Egyptian-Iranian meeting was planned in the sidelines of the OIC talks.

Some 20,000 Egyptian volunteers fought alongside Iraq in its eight-year-war

against Iran, according to Iraqi sources while press reports from the Gulf have suggested that as many as 13,000 Egyptians may be held in Iran.

Mr. Taskhiri dismissed the reports as "exaggerated."

The Iranian delegation here also met Tuesday with Lebanese Prime Minister Selim al-Hoss on the fringes of the conference to discuss the two-week-old fighting in southern Lebanon between rival Shiite Moslem groups.

"We have done our best to stop the fighting between our brothers and we will continue to do our utmost," Mr. Taskhiri said in reference to the onslaught pitting the pro-Iranian Hezbollah against the Syrian-backed Amal militia.

Mr. Hoss, also Lebanon's foreign minister, held talks later with his counterparts from Saudi Arabia, Algeria and Morocco.

The three countries drew up an Arab peace plan for Lebanon last year that paved the way for the election of Syrian-backed President Elias Hrawi, who has been unable to extend his authority to Christian embattled areas of Lebanon.

#90212d9820 07/31/1990 ~French/German News Agency

MAPUTO (JULY 31) - Mozambique Tuesday became the latest officially-Marxist African country to ditch one-party rule, with an announcement by President Joaquim Chissano that a multi-party system would be introduced.

Mr. Chissano told a news conference here that the 12-member ruling Politburo had unanimously decided in favour of abandoning the one-party state, and switching to a pluralist political system.

Regional and international factors had played a role in the decision, he said, including the political upheavals in eastern Europe. These had ''led to reflections on democracy and on the one-party state."

Tuesday's move means that next year's scheduled elections are likely to take place under a multi-party system. Other Marxist African countries such as Ethiopia and Benin have in the past year taken a similar decision to end one-party rule.

The Politburo decision must be approved by the central committee of the ruling FRELIMO party, and by parliament. Neither bodies have in the 15-year history of independent Mozambique voted against the party leadership.

Mr. Chissano said the Politburo took its decision even though a

recently-concluded nationwide debate on the new draft of the Mozambican constitution showed a majority of participants in favour of retaining the one-party state.

But there were also ''a very appreciable number of people'' who had expressed themselves in favour of pluralism, he added, and the Politburo took the view that it was not legitimate to deny these citizens their rights.

''As for those who want to form parties, as long as they obey the law, as long as they behave peacefully, we have no right to prevent them from doing so."

The favoured a new law on political parties, that would define what a political party was ''so that parties do not spring up that are opposed to basic principles of the social life of our country, such as national unity or patriotism''.

Asked whether rebels of the Mozambique National Resistance (RENAMO) would qualify as a political party, Mr. Chissano said that would depend on whether RENAMO fulfilled whatever conditions would be established in the future law on political parties.

''I don't imagine that RENAMO will have any difficulty fulfilling the criteria'', he added.

Both a new constitution and the new law on political parties will be put before parliament in the near future, Mr. Chissano said.

In the draft constitution first unveiled in January, FRELIMO renounced its previous claim to a ''leading role'' in state and society.

With Tuesday's announcement, the single party state, the dominant feature in Mozambican political life since independence in 1975, has been effectively buried.

#90212d9870 07/31/1990 ~French/German News Agency

VENICE, Italy (JULY 31) - Five Central European countries opened a two-day summit here Tuesday aimed at strengthening democracy in Hungary, Czechoslovakia and Yugoslavia with a view to their future membership in the EEC.

Rising nationalist tension among Eastern Europe's ethnic minorities is expected to be high on the agenda as foreign ministers of those three nations, plus Austria and Italy, held informal talks in an atmosphere of old-world opulence here late Tuesday.

The nationalist trend runs counter to the goal of the Central European Cooperation Zone, formed by the five states last November, to lay the groundwork for wide-ranging cooperation in the region.

Italian Foreign Minister Gianni De Michelis said late Tuesday that the Baltic countries would set up a similar cooperation scheme in September.

Bulgaria and Romania are attending the conference here as observers, as are delegates from the United Nations' economic committee, European Investment Bank, and European Commission, a conference spokesman said.

Twenty-five leading intellectuals, five from each of the Cooperation Zone's member states, will also be holding talks on "the common roots" of Central Europe's social and cultural heritage, the spokesman said.

STOCKHOLM (JULY 31) EFE - The Swedish government Tuesday granted Moscow's request for the extradition of a Soviet hijacker, the second to be sent back by Sweden in a rash of attempts to hijack planes out of the Soviet Union, Justice Minister Mona Sahlin said.

In a special cabinet meeting the government decided to extradite Anatoli Michailenko, 19, two weeks after he threatened with a false bomb to blow up a Soviet passenger plane if it did not land in Sweden.

The extradition was granted on the condition that Michailenko be tried only for hijacking the plane, and not for leaving the country illegally or requesting political asylum.

Earlier this month, Stockholm handed over 17-year-old Dimitri Semionov, whose June 9 successful hijacking of a Soviet plane sparked a wave of such attempts, many of which have failed.

Officials have indicated that the extradition of a third hijacker, Mijail Mokretsov, 19, will also be approved.

Last week Finland extradited a Soviet teenager who forced a plane to land in Helsinki.

#90212e0019 07/31/1990 ~Latin America New Agency

BUENOS AIRES (JULY 31) EFE - Argentine President Carlos Menem has given up his campaign to reinstitute the death penalty, yielding to pressure from opposition parties, human rights groups and the church, the press

reported Tuesday.

Citing government officials, the press said Menem had decided to withdraw a legislative proposal to apply capital punishment for certain "heinous" crimes because of forseeable international objections after Argentina signed the San Jose Pact condemning death sentences.

The government will instead push for stiffer prison terms for murder, extortion and drug trafficking, for which Menem had sought the death penalty.

Presidential legal adviser Raul Granillo Ocampo said the government would present a new bill modifying the country's penal code within three weeks.

Menem initiated moves to restore the death penalty, abolished when military rule ended in 1983, last week following the murder of the 28-year-old son of a labor leader and personal friend of the president who had been kidnapped.

#90212e0023 07/31/1990 ~Latin America New Agency

ABIDJAN (JULY 31) EFE - Liberian rebels closed in on the fortified executive palace of President Samuel Doe from the east and west Tuesday, as witnesses charged that Army troops had slaughtered at least 600 women and children.

According to news from the front which reached the Ivory Coast capital, National Patriotic Front (NPF) rebels led by Charles Taylor were approaching from the east on the Monrovian capital seaside mansion where Doe has been hiding out for weeks under the watch of 500 personal guards.

Guerrillas under Prince Johnson, meanwhile, were reported to be closing in from the western neighborhood of the capital, where most of the city's foreign embassies are located.

In spite of rivalries between the two rebel groups, both have converged in their conviction to take Doe dead or alive, and not allow him flee the country.

The war took a particularly bloody turn Monday when the Army, composed mainly of members of Doe's Krahn tribe, was blamed for the slaughter of hundreds of women and children who had taken refuge in St. Peter's Lutheran church in the capital.

Original reports put the death toll at 200, but witnesses and the International Red Cross later said at least 600 had been killed.

The massacre unleashed international outrage and the Organization of African Unity (OAU), which groups together all African states, for the first time Monday called for an end to the fighting.

Liberian government officials, however, charged that NPF rebels dressed in Army uniforms had committed the slaying in order to later blame Army troops and turn the tide of public opinion.

But various sources confirmed that a special anti-terrorist unit of the presidential guard broke into the church and opened fire on the 2,000 sleeping refugees.

Meanwhile, in Geneva, Red Cross officials said that +insecurity+ in Monrovia had made helping refugees in the embattled capital impossible.

Observers in the area predicted the final battles of the war, which began in December with a failed coup attempt by former government minister Taylor, would be the bloodiest.

Since December, the conflict has turned into a vicious tribal war between Doe's Krahn and allied Mandingo tribes on one side, and Gio and Mano tribes on the other.

But analysts said Doe's resignation or death is unlikely to bring an end to the violence, given that Prince Johnson said Sunday that his forces are not fighting to later hand over power to Taylor.

Johnson has promised free general elections within six months, but Taylor has already declared himself president and appointed a cabinet.

#90212e0027 07/31/1990 ~Latin America New Agency

Brasilia (JULY 31) EFE - With the arrival Tuesday of a team of International Monetary Fund (IMF) experts to examine the state of the country's financial health, Brazil's chief debt negotiatior was adamant that Brazil will not pay interest arrears on its massive dlrs 114.77 billion foreign debt.

While eager to secure an IMF stand-by loan of the type recently negotiated by Argentina, Brazil would not have to pay off its arrears to get a fresh loan since +there is nothing in the IMF statutes that says the arrears have to be paid first,+ debt chief Jorio Dauster said.

Brazil's former president, Jose Sarney, suspended interest payments on the developing world's largest foreign debt a year ago and since then the arrears have accumulated to over dlrs eight billion.

The country owes some dlrs six billion in back-payments to private banks and dlrs two billion to the international government creditors of the Paris Club.

The country had no interest in keeping track of past defaults in payments because +the meter on the taxi is still running,+ said Dauster.

The arrears are practically equal to Brazil's entire currency reserve of dlrs eight billion and payment would plunge the country into "total penury", the debt negotiator admitted.

Dauster calculated that between 1985 and 1989 Brazil had paid the IMF dlrs 4.7 billion and another dlrs one billion during 1990.

The Brazilian negotiating team has been putting the final touches on a plan for economic stability which they will present to the IMF visitors.

The cornerstone of the scheme are government forecasts which predict that by the end of 1990 Brazil's budget deficit will disappear and be replaced by a budget surplus of 1.22 per cent of GDP.

Prior to the implementation of a shock economic austerity plan introduced when Brazilian President Fernando Collor de Mello took office in March, analysts had been forecasting a 1990 budget deficit equal to 7.8 per cent of GDP.

Observers have suggested, however, that the new forecasts, based on zero inflation since May and zero economic growth, might be rather too optimistic.

The level of inflation has been steadily on the rise since May and may have reached 12 per cent during July, while government ministers have admitted that economic growth shrank in the first six months of 1990, the skeptics point out.

Arrears payments aside, IMF acceptance of the government's forecast figures could well prove a stumbling block to acceptance of the economic plan.

As the private banks have not made fresh loans to Brazil since 1982, the government needs IMF support to finance what it hopes will be the stabilization of an extremely shaky economy.

#90212e0034 07/31/1990 ~Latin America New Agency

Tijuana, Mexico (JULY 31) EFE - Mexican police have arrested three suspected U.S. "bounty hunters" searching for people in Mexico wanted by

the U.S. Federal Bureau of Investigation, a police spokesman in the border city of Tijuana said Tuesday.

The suspects, Brent McMillan, 26, William Todd and Michelle Jaress, both 24, were to be paid dlrs 4,000 for every person abducted to the United States to face trial, the spokesman said.

In a search of the suspects, police found a pistol and photographs of people the three were apparently looking for, the spokesman added.

Over the past few months the issue of illegal abductions have caused tension between the Mexican and U.S. governments.

In May, the U.S. Drug Enforcement Administration paid dlrs 20,000 to have a Mexican doctor abducted to the United States to face trial in connection with the 1985 torture-murder of one agent Enrique Camarena.

Camarena and his Mexican pilot were kidnapped by drug traffickers in Mexico's Gauadalajara state in February 1985 while searching for marijuana plantations.

Last week Mexican Attorney General Enrique Alvarez said that if the United States continued to kidnap Mexicans to face trial, Mexico would be forced to change its extradition treaty with the United States.

#90212e0038 07/31/1990 ~Latin America New Agency

ULAN BATOR (JULY 31) EFE - There were no surprises Tuesday as Mongolia's electoral commission produced the provisional results of first ever multi-party elections, with the ruling communists sweeping the board but the opposition making a good showing.

Results from Sunday's vote for the nation's upper house, or Great Hural, showed the ruling Mongolian People's Revolutionary Party (MPRP) to have garnered 343 of the 430 seats, with the country's leading opposition group the Democratic Party, getting 23 seats.

The National Progress Party won seven seats, and the Social Democrats four with the Free Work party winning one seat.

Independent candidates won 20 seats.

A further 28 seats were either being contested, or re-counted following alleged irregularities.

At 97.9 percent, turnout was even higher than in June's first round of polling when 92.4 percent of Mongolia's electorate, which forms almost half the two million population, voted.

However, attention had been focused before the elections on the opposition's chances of robbing the MPRP of a majority control in the 50-seat Lesser Hural, the permanent legislative body responsible for selecting a government.

The combined opposition won 20 of the Lesser Hural's seats, although final results to be published August 7 are expected to boost this figure.

Before the elections the opposition was talking of a 20-seat yield in the Lesser Hural as a "victory."

The MPRP gave in to opposition demands before the election that the make-up of the Lesser Hural be decided on a proportional basis rather than on a candidate-only basis.

While the opposition's gains have been modest, there is optimism that after only four months, the various parties could round up such support and plant the seeds of multi-party democracy so firmly.

The majority of the opposition's support comes from the cities and among the young, although almost half the population lives in remote rural areas dedicated to sheep farming.

Of the 430 candidates standing for the Great Hural, only 10 were shepherds with the overwhelming majority either intellectuals or civil servants.

LIMA (JULY 31) EFE - Peruvian troops have killed 32 suspected Peruvian rebels in a battle in a northern jungle region, a government daily

newspaper said Tuesday.

One soldier was killed and at least 30 rebels were wounded in the clash Monday between some 150 insurgents and a military patrol near the town of Dos de Mayo in the jungle province of San Martin, the La Cronica daily said.

The Army seized weapons left by the rebels and sent reinforcements to the area.

Both the Maoist "Shining Path" and the smaller Tupac Amaru Revolutionary Movement guerrilla groups are active in the San Martin region.

The battle took place two days after Peruvian President Alberto Fujimori was sworn in.

Fujimori said he would open talks with the rebels if they stopped their violence.

Another clash in the San Martin region Saturday left 15 suspected rebels and four soldiers dead.

More than 20,000 people have died in political violence since Shining Path took up arms against the government in 1980.

#90212e0044 07/31/1990 ~Latin America New Agency

BERLIN (JULY 31) EFE - East German Labor Minister Regine Hildebrandt Tuesday called on the West German government to prop up East Germany's weak economy with increased financial aid.

At a press conference in Berlin, Hildebrandt said the situation in the East German labor market had worsened "dramatically" since monetary union of the two Germanys on July 1.

She added that there were now 250,000 East German workers unemployed and 500,000 more doing temporary jobs.

Unemployment was almost unknown in East Germany under Communist rule which came to end earlier this year.

Hildebrandt did not specify how much money was needed.

East German businesses, used to decades of hefty state subsidies, have found it difficult to cope with the increasing competition from West German companies.

MADRID (JULY 31) EFE - Demand for Spanish products in new markets outside the European Community has led to an improved adjustment in the forecasts for Spain's 1990 balance of trade figures, an optimistic Secretary of State for Trade Apolonio Ruiz Ligero said Tuesday.

The trade deficit for 1990 will be nine percent higher than in 1989, six points lower than previously forecast, according to official government predictions released by Ruiz.

The previous forecast figure of a 15 percent increase over the 1989 trade deficit was comparable with poor trade figures for the first half of the year released last week by the Bank of Spain.

These showed a swollen trade deficit of dlrs 7.5 billion, up by 17 percent over the same period in 1989 and blamed by officials on a sharp rise in imports and a slump in tourism revenue.

External demand for Spanish products, particularly in European countries outside the EC, such as Scandinavia, had led to the positive readjustment in the balance of trade forecasts, Ruiz said.

Official forecasts put 1990 import growth at around 7.1 per- cent above the 1989 levels, suggesing a stable continuation of the levels registered in the first half of the year, Ruiz said.

Exports would be up eight percent on the previous year, he predicted.

The trade deficit on the current account was forecast at dlrs 16 billion, 3.2 percent of GDP, compared to the 3.6 percent originally predicted.

The Secretary of Trade considered the 0.4 percent adjustment in the forecast "a signigicant break in the tendency toward the growing trade deficit we have seen since 1987."

The forecast for the capital account saw a surplus of four per- cent of GDP, down on 1989's 5.2 percent.

The government wanted to encourage long-term direct investment rather than the short-term influx of capital which has accompanied the strong peseta, Ruiz said.

MANILA (JULY 31) XINHUA -- PHILIPPINE PRESIDENT CORAZON AQUINO TODAY SIGNED INTO LAW A BILL ESTABLISHING PROVINCIAL CENTERS FOR SCIENCE AND TECHNOLOGY IN ALL PROVINCES OF THE COUNTRY.

THE LAW AIMS TO ACCELERATE THE APPLICATION AND TRANSFER OF THE BENEFITS OF MODERN SCIENCE AND TECHNOLOGY TO THE RURAL AREAS, THEREBY IMPROVING THE QUALITY OF LIFE OF THE GREAT MAJORITY OF THE PEOPLE THROUGH HIGHER PRODUCTIVITY AND INCREASED EARNING POWER.

ACCORDING TO THE PRESIDENT, THE LAW "WILL INSTITUTIONALIZE THE LINKAGES AND PARTNERSHIP BETWEEN THE DEPARTMENT OF SCIENCE AND TECHNOLOGY (DOST) AND THE LINE AGENCIES ON THE ONE HAND, AND THE STATE COLLEGES AND UNIVERSITIES, THE PRIVATE SECTOR AND THE LOCAL GOVERNMENT UNITS ON THE OTHER."

UNDER THE LAW, THE SCIENCE AND TECHNOLOGY PROVINCIAL CENTERS WILL BE UNDER THE DIRECT SUPERVISION OF THE DOST. THEIR MAIN FUNCTIONS WILL BE TO IDENTIFY THE NEEDS AND OPPORTUNITIES IN SCIENCE AND TECHNOLOGY IN THE PROVINCES, AND DEVELOP INSTITUTIONAL LINKAGES WITH PROVINCIAL OFFICES OF OTHER DEPARTMENTS, LOCAL GOVERNMENT UNITS AND NON-GOVERNMENT ORGANIZATIONS FOR THE EFFECTIVE IMPLEMENTATION OF SCIENCE AND TECHNOLOGY PROGRAMS IN THE PROVINCES.

MANILA (JULY 31) XINHUA - AN EGYPTIAN ACCOUNTANT OF THE UNITED ARAB EMIRATES (UAE) EMBASSY IN THE PHILIPPINES WAS HELD UP OF SOME 100,000 PESOS (ABOUT 4,300 U.S. DOLLARS) IN PAYROLL MONEY BY THREE ARMED MEN HERE TODAY.

LOCAL POLICE IDENTIFIED THE VICTIM AS MAHMOD BADAWI, 43, AN EGYPTIAN ARAB ACCOUNTANT OF THE UAE EMBASSY IN MANILA, ACCORDING TO A REPORT OF THE PHILIPPINE NEWS AGENCY.

THE SUSPECTS, ARMED WITH .45 CALIBER PISTOLS, ESCAPED ON BOARD A WHITE TOYOTA CAR WITH THE LOOT.

THE VICTIM AND FILIPINO DRIVER JOE CAWANG, 23, WERE NOT HURT BY THE SUSPECTS.

INVESTIGATORS DISCLOSED THAT BADAWI HAS JUST WITHDRAWN THE MONEY FROM THE CITYBANK BRANCH IN MAKATI, A FINANCIAL DISTRICT HERE, AND HE AND HIS DRIVER WERE ON THEIR WAY BACK TO THE EMBASSY ON BOARD A WHITE MITSUBISHI LANCER WHEN THE SUSPECTS' CAR WITH SIREN BLARING BLOCKED THEIR CAR ON THE STREET.

ONE OF THE SUSPECTS DEMANDED THE DRIVER'S LICENSE AND THE OTHER GRABBED THE ENVELOPE CONTAINING THE MONEY AND SPED OFF WITH BADAWI'S KEY TO THE CAR.

MANILA POLICE ARE NOW TRYING TO ARREST THE SUSPECTS.

DAR ES SALAAM (JULY 31) XINHUA - DRUG ABUSE EXPERTS IN TANZANIA HAVE WARNED THAT MORE THAN 3 PERCENT OF THE YOUNG PEOPLE AGED 20 TO 24 YEARS IN THE COUNTRY SMOKE BHANG DAILY.

THE EXPERTS, ATTENDING AN ANTI-DRUG ABUSE WORKSHOP HELD HERE RECENTLY, SAID THE NUMBER OF PEOPLE TAKING DRUGS HAS BEEN IN- CREASING TREMENDOUSLY IN MOST CITIES OF THE COUNTRY SINCE THE INTRODUCTION OF THE TRADE LIBERALISATION POLICY IN 1985.

THEY SAID THE AVAILABLE FIGURES SHOW THAT MORE THAN 3 PERCENT OF THE YOUTHS SMOKE BHANG DAILY, WHILE 4.3 PERCENT SMOKE WITHIN INTERVALS OF DAYS.

THE EXPERTS ALSO SAID 4 PERCENT OF PEOPLE SUFFERING FROM MENTAL BREAKDOWN IN TANZANIA ARE VICTIMS OF DRUG SMOKING WHICH THEY SAID IS MUSHROOMING IN URBAN AND RURAL AREAS.

THEY SAID DRUG TRAFFICKING IN THE COUNTRY, INCLUDING BHANG, HEROINE, COCAINE AND OPIUM, HAS ALSO INCREASED SINCE 1985.

THEY CALLED ON THE CUSTOMS AND THE GOVERNMENT DEPARTMENTS CONCERNED TO TAKE IMMEDIATE ACTIONS TO CURB THE SITUATION.

#90212j0001 07/31/1990 ~Journal Graphics (TV show transcripts)

(JULY 31) JOURNAL GRAPHICS - Summarizing the previous day's television

programs transcribed by Journal Graphics, Inc.

Full transcripts available by fax or mail.

For more information, or to order transcripts, call (800) TALK- SHO. In New York City call: (212) 732-8552.

Nightline (ABC) July 26, 1990

Private Clubs: Racial Barrier to Golf: Following country club head Hall Thompson's shocking remark about keeping blacks out of his club, the fact that most golf clubs hosting championship tournaments have no black members is being challenged by protests, advertisers withdrawaling from sponsorship and, perhaps, more. (#2394)

See also: Nightline #1825, 5/20/88, ''Private Clubs: Bastions of Commerce?''

Crossfire (CNN) July 26, 1990

The Farm Bill: Leland Swenson, President of the National Farmers Union, and Republican Senator Steve Symms of Idaho discuss the farm bill on the Senate floor and farm subsidies in general. (Transcript #104)

See also: 60 Minutes #1205, 10/7/79, ''The Grapes of Wealth'' (loans made to rich farmers by the Farmers Home Administration); 60 Minutes #1418, 1/31/82, ''The Farmer's Market'' (legislation that permits farmers to withhold crops from the market in order to keep prices up); 60 Minutes #1925, 3/8/87, ''Call Me Whole Hog'' (critic of Reagan farm policy).

48 Hours (CBS) July 26, 1990

Supercarrier: The USS John F. Kennedy aircraft carrier is home to 5,000 Naval officers and crew. What's it like to be on-board, and are critics correct in calling it a ''floating dinosaur''? (#118)

See also: 20/20 #123, 6/11/81, ''The Mighty Carrier'' (controversy over role of Navy's aircraft carriers); Donahue #2125, 5/21/87, ''Are U.S. Navy Vessels Sitting Ducks?''; Frontline #212, 5/14/84, ''Return of the Great White Fleet'' (examines debate inside Navy establishment over wisdom of current development of fleet); and the ''Military Defense'' topic list in the Journal Graphics catalog.

Primetime Live (ABC) July 26, 1990

''The Last Liberal'' (interview with Supreme Court Justice Thurgood Marshall); ''To Save the Children'' (hundreds of homeless children live in the sewers beneath Bogota, Colombia); ''Sacramento Sting'' (a California

businessman goes undercover to nail corrupt politicians for the FBI); also: a bank examiner tells how she tried unsuccessfully to halt part of the savings and loan disaster; a photographer obsessed with filming the Mt. Kilauea lava flow in Hawaii. (Transcript #151)

Back transcripts available on the Supreme Court, Thurgood Marshall, political corruption and the savings and loan crisis.

Moneyline (CNN) July 26, 1990

The GOP went public with its deficit reduction proposal at the budget summit; federal regulators are selling their stake in Continental Bank of Chicago; OPEC beginning its semi-annual pricing meeting in Geneva; Gorbachev told Cuba the days of massive Soviet subsidies are coming to an end; because of concerns over ELF radiation, many people are hiring consultants to check levels in their homes; Pennsylvania anti-takover measure, the nation's toughest; a course in Japanese business and culture, taught by Japanese companies; a surge in volume is sparking renewed takeover excitement in the chemical giant Union Carbide. (Transcript #148)

Back transcripts available on the economy, the Soviet Union, Cuba and Japan.

Donahue July 26, 1990

Arsenio Hall: Late night talk show host Arsenio Hall talks about his show, his friendship with Eddie Murphy and other subjects. (Transcript #2998)

Oprah Winfrey July 26, 1990

Girlfriend Reunions: Seven pairs of long-lost girlfriends, some of whom have not seen each other in as many as 48 years, are reunited and share tears, laughter and old memories. (Transcript #1009)

See also: Donahue #439, 10/29/80, ''Friendship.''

Geraldo July 26, 1990

Toxic Trucks: An investigation into the dangers of backhauling and how mixing a chemical transport with a food transport can lead to contamination even if the trucks are cleaned out. Ways in which the government can help change this procedure and who's responsibility this should be are also discussed. (Transcript #746)

See also: 20/20 #931, 8/4//89, ''Pollution or Profit?'' (controversy over recycled toxic waste); Burning Questions #1, 9/8/88, ''The Poisoning of America'' (are toxic wastes and pollution killing us?); Geraldo #506, 8/24/89, ''Poisoned by Progress: Saving Our Piece of the Planet''

(environment and toxic chemicals); 60 Minutes #1430, 4/25/82, ''In Your Own Backyard'' (garbage dump in Port Washington, NY, similar to thousands across the country, which is filled with toxic chemicals which leak into nearby homes); 60 Minutes #1825, 3/2/86, ''What Killed Jimmy Anderson?'' (charges that Woburn, Massachusetts children died of leukemia as a result of toxic waste in their water supply); Donahue #1556, 2/8/85, ''Toxic Dangers: Dr. Sidney Wolfe''; Nova #1306, 2/25/86, ''Toxic Trials'' (case study of effects of hazardous wastes in Woburn, Massachusetts and implications of link between pollution and illness); and the ''Environment'' topic list in the Journal Graphics catalog.

Sally Jessy Raphael July 26, 1990

Grade School Suicide: Parents of pre-adolescent children who committed suicide tell their stories. One 10-year-old boy shot himself, his parents believe, because he was taunted in school and couldn't live with it anymore. Another 10-year-old boy in the same neighborhood, a week later, hung himself in his bedroom closet because he was upset when his mother told him they weren't going swimming. (Transcript #494)

See also: Donahue #1367, 5/21/84 #1367 ''Teen Suicide''; Nightline #1233 2/12/86, ''Teen Suicide''; and the ''Suicide'' topic list in the Journal Graphics catalog.

Newsline New York (WNYW-TV) July 26, 1990

More Violence in New York City: Four o'clock in the morning, little Chuka Williams was sleeping. Somebody shot 18 bullets through the door of his apartment for kicks, and Chuka was fatally wounded. He died in the hospital, the third time this week a child was accidentally shot to death in our city. (Transcript #134)

Good Morning America (ABC) July 26, 1990

''Litmus test'' for Souter?; U.K. crop-circle mystery; deceptive food health claims; Presumed Innocent review; Bruno Kirby interview; Chincoteague Pony Swim; Encore! Ballroom Dancing in Pittsburgh; young inventors; Barbara Taylor Bradford interview. (Transcript #1074)

Larry King Live (CNN) July 26, 1990

McMartin Trial Defendant Raymond Buckey: The entire hour is devoted to a conversation with Raymond Buckey, who along with his mother Peggy, was acquitted in the McMartin Preschool child molestation trial. Buckey spent five years in jail before a verdict was reached, and the D.A. has now called for a new trial. Buckey maintains his innocence and explains the large numbers of children testifying as a result of witch-hunt-type hysteria. The jury acquitted Buckey and his mother because they felt the

evidence did not prove them guilty without doubt, and they felt the children were led into testimony by the people from the Children's Institute International people who questioned them. (Transcript #95)

See also: Geraldo #618, 1/29/90, ''The McMartin Outrage: What Went Wrong?''; Sally Jessy Raphael #363, 1/24/90, ''Day Care Scandal: The McMartin Case''; 60 Minutes #1908, 11/2/86, ''The McMartin Pre-School'' (biggest child molestation case in history, now coming to trial in Los Angeles); Nightline #2259, 1/18/90, ''McMartin Trial Verdict'; and the ''Sexual Abuse'' topics list in the Journal Graphics catalog.

Friday's Line-Up: (To be summarized in Monday's Weekend Report) 20/20 (ABC): S&L Primer (what can be done to get the banks back on track?); Dolphins (a trip inside America's amusement parks shows the brutal existence of this wonderful species); Phyllis McGuire Update (girlfriend of the legendary gangster Sam Giancana) Donahue: Highschool Sweethearts Sally Jessy Raphael: Funny Ladies Oprah Winfrey: First Amendment Debate Geraldo: Stage Moms Larry King Live (CNN), Crossfire (CNN), Nightline (ABC), Washington Week in Review (PBS), Moneyline (CNN), Moneyweek (CNN), Inside Business (CNN), Pinnacle (CNN), Health Week (CNN), Science and Technology Week (CNN), This Week with David Brinkley (ABC), Business World (ABC), Wall Street Journal Report, Your Money (CNN) 60 Minutes (CBS) 40,000 A Day (child mortality in the third world and lack of media attention); Thy Brothers' Keeper (Rabbi who believes in remembering the heroic acts of Christians who risked their lives to save the Jews); Maximum Morphonios (Florida District Judge Ellen Morphonios, who believes in tough sentencing) Like It Is: Mandela: A New Standard of Leadership

#90212k0020 07/31/1990 ~Japanese News Agency

TOKYO (JULY 31) KYODO - THIS YEAR'S TRAFFIC DEATH TOLL AS OF MONDAY HIT 6,031, THE HIGHEST SINCE 1975, THE NATIONAL POLICE AGENCY SAID TUESDAY.

THE 6,000-DEATH MARK WAS EXCEEDED ONE DAY EARLIER THAN LAST YEAR AND THE DEATH TOLL IN THE PERIOD UP TO MONDAY WAS 67 MORE THAN IN THE SAME PERIOD

LAST YEAR, THE AGENCY SAID.

AND IN A TURNAROUND FROM RECENT YEARS, THE NUMBER KILLED WHILE DRIVING OR RIDING IN A PASSENGER CAR ROSE TO A RECORD 42 PERCENT OF ALL 5,119 PERSONS KILLED IN TRAFFIC ACCIDENTS AS OF THE END OF JUNE.

THE AGENCY SAID IT HAS BEEN TRYING TO CRACK DOWN ON SPEEDING, RECKLESS DRIVING, AND NON-USE OF SEATBELTS IN AN ATTEMPT TO REDUCE TRAFFIC INJURIES AND DEATHS.

BY PREFECTURE, THE HIGHEST DEATH TOLL, 356, WAS REPORTED IN HOKKAIDO, FOLLOWED BY 339 IN OSAKA, 295 IN AICHI, 288 IN CHIBA, AND 267 IN SAITAMA.

#90212k0034 07/31/1990 ~Japanese News Agency

TOKYO (JULY 31) KYODO - THE FINANCE MINISTRY HAS GIVEN PERMISSION TO CHANG HWA COMMERCIAL BANK OF TAIWAN TO OPEN A REPRESENTATIVE OFFICE IN TOKYO, MINISTRY SOURCES SAID TUESDAY.

THE MINISTRY HAS SO FAR BEEN CAUTIOUS ABOUT ALLOWING TAIWAN BANKS INTO JAPAN OUT OF CONCERN THAT IT COULD AFFECT JAPAN'S RELATIONS WITH CHINA.

WITH THE ADVANCING GLOBALIZATION OF FINANCIAL MARKETS, HOWEVER, THE MINISTRY HAS DECIDED TO TAKE A MORE FLEXIBLE ATTITUDE TOWARD REPRESENTATIVE OFFICES, WHICH AS A RULE DO NOT ENGAGE IN BANKING ACTIVITIES, THE SOURCES SAID.

TWO OTHER TAIWAN BANKS, HUA NAN COMMERCIAL BANK AND THE FIRST COMMERCIAL BANK OF TAIWAN, ARE ALSO SAID TO BE PLANNING SUCH OFFICES IN TOKYO AND THE MINISTRY IS EXPECTED TO GIVE THEM PERMISSION TO DO SO, THEY SAID.

-30- 928

#90212k0061 07/31/1990 ~Japanese News Agency

OKAYAMA (JULY 31) KYODO - A MOUNTAINEERING TEAM FROM OKAYAMA UNIVERSITY REACHED THE SUMMIT OF MT. GASHERBRUM 1 ALONG THE BORDERS OF PAKISTAN, CHINA AND INDIA ON JULY 16, ACCORDING TO A REPORT REACHING THE UNIVERSITY.

IT IS THE SECOND TIME THE 8,068 METER PEAK HAS BEEN CLIMBED FROM THE WESTERN ROUTE. THE FIRST TIME WAS IN 1977 BY A YUGOSLAV TEAM.

LEAVING THE BALTORO BASE CAMP ON JUNE 1, THE TEAMBRAVED SNOW DRIFTS NEAR THE SUMMIT BEFORE TAKAHIRO KATAYAMA AND SATOYUKI YAMANE REACHED THE PEAK ON JULY 16, SIX DAYS BEHIND SCHEDULE.

ALL MEMBERS ARE REPORTEDLY IN GOOD HEALTH AND EXPECTED TO RETURN HOME BY AUGUST 10.

#90212k0066 07/31/1990 ~Japanese News Agency
OSAKA (JULY 31) KYODO - TOYO TIRE AND RUBBER CO. SAID TUESDAY IT HAS FORMED A WHOLLY OWNED FINANCIAL SUBSIDIARY IN THE NETHERLANDS TO SMOOTH ITS FUND-RAISING OPERATIONS IN EUROPE.

CAPITALIZED AT 300,000 GUILDERS, TOYO TIRE INTERNATIONAL FINANCE B.V. WILL CHIEFLY HANDLE FUND-RAISING OPERATIONS TO FINANCE A TIRE-MAKING PROJECT NOW UNDER WAY IN IRELAND IN CONJUNCTION WITH CONTINENTAL A.G., A MAJOR WEST GERMAN TIRE MANUFACTURER, THE JAPANESE COMPANY SAID.

THE NEW FINANCIAL SUBSIDIARY IS TOYO'S SECOND ABROAD, FOLLOWING ONE ESTABLISHED IN LOS ANGELES IN 1988, IT SAID.

-30- 743
#90212k0067 07/31/1990 ~Japanese News Agency
TOKYO (JULY 31) KYODO - JAPANESE SALARIED WORKERS IN NINE KEY INDUSTRIES EARNED AN AVERAGE OF 276,296 YEN IN JUNE, UP 5.4 PERCENT OVER A YEAR BEFORE, ACCORDING TO A REPORT RELEASED BY THE LABOR MINISTRY ON TUESDAY.

THE MONTHLY SURVEY OF WAGES COVERED 22.99 MILLION WORKERS IN MINING, CONSTRUCTION, MANUFACTURING, POWER AND GAS, TRANSPORTATION AND COMMUNICATION, COMMERCE, FINANCE, REAL ESTATE, AND SERVICE.

THE REPORT SAID THEIR AVERAGE WORKING HOURS CAME TO 179.9 HOURS IN JUNE, DOWN 0.3 PERCENT OVER A YEAR EARLIER.

OVERTIME IN THE MANUFACTURING INDUSTRY AVERAGED 19.8 HOURS, DOWN 0.9 PERCENT FROM A YEAR BEFORE, IT SAID.

-30- 793
#90212k0076 07/31/1990 ~Japanese News Agency
TOKYO (JULY 31) KYODO - JAPAN'S EXPORTS OF VIDEOCASSETTE RECORDERS (VCR) IN JUNE MARKED A DOUBLE-DIGIT INCREASE FOR THE SECOND STRAIGHT MONTH, WHILE SHIPMENTS OF COLOR TELEVISION SETS SHOWED THEIR STRONGEST GAIN IN THREE YEARS, AN INDUSTRY ASSOCIATION SAID TUESDAY.

TOTAL EXPORTS OF VCRS ROSE 12.9 PERCENT TO 2,162,000 IN JUNE, THE JAPAN ELECTRONICS INDUSTRY ASSOCIATION SAID.

SHIPMENTS TO THE UNITED STATES, THE LARGEST IMPORTER OF JAPANESE-MADE VCRS FELL 27.5 PERCENT FROM JUNE 1989 TO 658,000. THE EUROPEAN COMMUNITY (EC) IMPORTED 296,000, UP 89.9 PERCENT.

EXPORTS TO OTHER MARKETS JUMPED 41.8 PERCENT TO 1,208,000 UNITS. SHIPMENTS TO SINGAPORE GREW 74.6 PERCENT TO 240,000 VCRS, HONG KONG 67.5 PERCENT TO 206,000 AND WEST GERMANY 130.1 PERCENT TO 158,000.

JAPAN'S VCR INDUSTRY ALSO ENJOYED BRISK BUSINESS WITH THE SOVIET UNION AND EAST EUROPEAN COUNTRIES. EXPORTS TO THE SOVIET UNION SOARED 237.6 PERCENT TO 37,000 VCRS AND THOSE TO POLAND ADVANCED 57.7 PERCENT TO 38,000.

EXPORTS OF JAPANESE COLOR TV SETS ROSE 63.1 PERCENT TO 334,000 IN JUNE COMPARED WITH THE SAME MONTH LAST YEAR.

SHIPMENTS TO THE U.S. DECLINED 43.1 PERCENT TO 11,000 BUT THOSE TO THE EC SWELLED 148.3 PERCENT TO 28,000.

CHINA, ANOTHER MAJOR EXPORT MARKET, BOUGHT 33.3 PERCENT MORE TO TOTAL 69,000 SETS, ENDING IN THE PLUS COLUMN FOR THE FIRST TIME IN 13 MONTHS.

-30- 1518

#90212k0084 07/31/1990 ~Japanese News Agency

SHANGHAI (JULY 31) KYODO - MARRIED COUPLES IN SHANGHAI WHO HAVE MORE THAN ONE CHILD WILL BE FINED THREE TIMES THE AVERAGE LOCAL ANNUAL INCOME, LOCAL NEWSPAPERS SAID TUESDAY.

THE NEWSPAPER REPORTS SAID THE NEW CITY ORDER WILL GO INTO EFFECT ON WEDNESDAY IN ORDER TO STIFFEN CHINA'S ''ONE BABY PER COUPLE'' POLICY.

FINES WILL BE INCREASED TO AS MUCH AS SIX TIMES THE AVERAGE ANNUAL SALARY IF A COUPLE HAS A THIRD CHILD.

THE PREVIOUS REGULATIONS IMPOSED FINES OF 10 PERCENT THE ANNUAL INCOME ON COUPLES WHO HAD A SECOND CHILD AND 20 PERCENT THE ANNUAL INCOME ON THOSE WHO HAD A THIRD.

THE NEW ORDER WILL PERMIT A REMARRIED COUPLE TO HAVE ANOTHER BABY EVEN IF ONE OF THE TWO ALREADY HAS A CHILD.

BUT THE NEW RULE ABOLISHES PREVIOUS EXEMPTIONS THAT CHILDREN OR BROTHERS OF REVOLUTIONARY HEROES, MINERS AND LONG-DISTANCE SAILORS MAY HAVE A SECOND CHILD WITHOUT HAVING TO PAY FINES.

CHINA, WITH AN ESTIMATED POPULATION OF 1.1 BILLION, MAKES IT A NATIONAL POLICY TO LIMIT THE BIRTHRATE TO ONLY ONE CHILD PER COUPLE. CHINESE OFFICIALS ARE SEEKING TO SLOW THE NATION'S POPULATION GROWTH TO 1.2 BILLION AT THE END OF THE CENTURY.

BUT THE RULE IS OFTEN IGNORED, ESPECIALLY IN RURAL AREAS, BECAUSE SOME STUDIES SHOW AS MANY AS 9.6 MILLION ''ILLEGAL'' BABIES HAVE BEEN BORN

ANNUALLY.

A SENIOR CHINESE OFFICIAL HAS SAID THE NATIONAL POPULATION MAY EXCEED THE 1.2 BILLION TARGET AS EARLY AS 1995.

-30- 1588

#90212k0085 07/31/1990 ~Japanese News Agency

BANGKOK, JULY 31 KYODO -- THE UNITED STATES IS LIKELY TO RELEASE 10 MILLION DOLLARS IN HUMANITARIAN AID TO AUTHORITIES IN CAMBODIA, AN AMERICAN PRIVATE AID ORGANIZATION SAID HERE TUESDAY.

THE MONEY, APPROVED RECENTLY BY THE U.S. CONGRESS, IS EARMARKED FOR AID TO CAMBODIAN CHILDREN.

RICHARD WALDEN, PRESIDENT OF THE LOS-ANGELES BASED OPERATION USA, SAID TWO OFFICERS FROM THE U.S. AGENCY FOR INTERNATIONAL DEVELOPMENT (USAID) HAVE BEEN INVITED BY CAMBODIAN DEPUTY FOREIGN MINISTER SOK AN TO VISIT CAMBODIA.

WALDEN SAID USAID OFFICIALS HAD TOLD HIM OF THEIR INTENTION TO RELEASE THE 10 MILLION DOLLARS AFTER U.S. SECRETARY OF STATE JAMES BAKER ANNOUNCED A MAJOR SHIFT OF U.S. POLICY ON CAMBODIA EALIER THIS MONTH.

OPERATION USA, WHICH SERVES AS A LINK BETWEEN USAID AND THE PHNOM PENH GOVERNMENT, IS THE FIRST AMERICAN AID AGENCY TO ENTER CAMBODIA SINCE 1979. IT HAS PROVIDED A TOTAL OF MORE THAN 7 MILLION DOLLARS IN ITS 11 YEARS OF RELIEF OPERATIONS INSIDE CAMBODIA, ACCORDING TO WALDEN.

-30- 1177

#90212k0086 07/31/1990 ~Japanese News Agency

TOKYO (JULY 31) KYODO - CHUBU ELECTRIC POWER CO. SAID TUESDAY IT HAS AGREED WITH POWER GEN, A BRITISH POWER GENERATION FIRM, TO EXCHANGE TECHNICAL INFORMATION ON POWER GENERATION TECHNOLOGIES, ENVIRONMENTAL POLLUTION AND OTHER MATTERS OF MUTUAL INTEREST.

UNDER THE AGREEMENT, SENIOR EXECUTIVES OF CHUBU ELECTRIC AND POWER GEN WILL VISIT EACH OTHER ONCE OR TWICE A YEAR. CHUBU ELECTRIC WILL ALSO EXCHANGE TECHNICAL INFORMATION WITH POWER GEN FOR PRACTICAL APPLICATIONS, A COMPANY SPOKESMAN SAID.

POWER GEN SPLIT OFF FROM THE BRITISH GOVERMENT-MANAGED CORPORATION IN MARCH AND IS ENGAGED MAINLY IN COAL-BASED THERMAL POWER GENERATION, WHILE CHUBU ELECTRIC IS OUT TO ACQUIRE SUCH TECHNOLOGY, THE SPOKESMAN ADDED.

-30- 889

#90212k0087 07/31/1990 ~Japanese News Agency

TOKYO (JULY 31) KYODO - THE NUMBER OF AIDS PATIENTS AND CARRIERS OF THE AIDS VIRUS IS GROWING IN JAPAN AND THE DISEASE IS BEGINNING TO SPREAD TO HETEROSEXUALS AND CHILDREN, A GOVERNMENT PANEL SAID TUESDAY.

THE MINISTRY OF HEALTH AND WELFARE REPORTED SEVEN NEW CASES OF AIDS AND 14 CARRIERS OF THE HIV VIRUS DURING MAY AND JUNE.

ACCORDING TO THE AGENCY'S AIDS SURVEILLANCE PANEL, THE NEWLY DISCOVERED PATIENTS ARE ALL MALES. THE CARRIERS INCLUDE FOUR WOMEN.

THE REPORT RAISES THE NUMBER OF KNOWN AIDS PATIENTS IN JAPAN TO 285 AND THE NUMBER OF VIRUS CARRIERS TO 1,406. AMONG THE PATIENTS, 85 ARE BELIEVED TO BE INFECTED THROUGH BLOOD-BASED MEDICINE.

THE NEWLY-REGISTERED VIRUS CARRIERS INCLUDE A NEW-BORN WHO IS BELIEVED TO HAVE BECOME INFECTED BY THE MOTHER.

THE COMMITTEE, HEADED BY YUICHI SHIOKAWA, PROFESSOR EMERITUS AT JUNTENDO UNIVERSITY, SAID THE CASE IS THE SECOND MOTHER-TO-CHILD INFECTION REPORTED BUT THE FIRST IN WHICH THE BIRTH OCCURRED IN JAPAN.

OF THE 21 NEWLY DISCOVERED PATIENTS AND CARRIERS, THE COMMITTEE SAID, SEVEN ARE IN THEIR 30S AND FIVE ARE IN THEIR 20S. NINE ARE THOUGHT TO BE INFECTED THROUGH HETEROSEXUAL INTERCOURSE AND EIGHT THROUGH HOMOSEXUAL RELATIONS.

IN JAPAN, THE INFECTION IS SPREADING TO HETEROSEXUALS AND ''IT IS FEARED THIS TREND MAY CONTINUE FURTHER,'' SHIOKAWA SAID.

-30- 1512

#90212k0092 07/31/1990 ~Japanese News Agency

SEOUL (JULY 31) KYODO - SOUTH KOREA'S TRADE DEFICIT WITH JAPAN INCREASED TO 2.9 BILLION DOLLARS IN THE FIRST SIX MONTHS OF 1990 FROM 2.0 BILLION DOLLARS IN THE SAME PERIOD OF LAST YEAR, THE TRADE AND INDUSTRY MINISTRY REPORTED TUESDAY.

SOUTH KOREA HAD A TRADE DEFICIT OF 4.0 BILLION DOLLARS WITH JAPAN LAST YEAR, UP SLIGHLY FROM 3.9 BILLION DOLLARS IN 1988 BUT DOWN FROM A RECORD 5.2 BILLION DOLLARS IN 1987.

THE CHRONIC BILATERAL DEFICIT STEMS FROM SOUTH KOREA'S HEAVY DEPENDENCE ON IMPORTS OF PARTS AND CAPITAL GOODS FROM JAPAN, TRADING SOURCES SAID.

-30- 729

#90212k0094 07/31/1990 ~Japanese News Agency

TOKYO (JULY 31) KYODO - KDD, JAPAN'S TELECOMMUNICATIONS GIANT, SAID

TUESDAY IT WILL PROVIDE VOICE-ONLY LEASED CIRCUIT (BANDLINK-VO) SERVICES BETWEEN JAPAN AND AUSTRALIA BEGINNING WEDNESDAY.

BANDLINK-VO IS MAINLY USED TO FACILITATE TRADING BY FINANCIAL INSTITUTIONS AND IS ABOUT 30 PERCENT LESS EXPENSIVE THAN CONVENTIONAL VOICE-GRADE CIRCUIT (BANDLINK-VG) SERVICES, KDD OFFICIALS SAID.

BANDLINK-VO SERVICES ARE CURRENTLY BEING OFFERED FOR THE UNITED STATES, BAHRAIN, HONG KONG, SINGAPORE, BRITAIN AND NEW ZEALAND, THEY ADDED.

-30- 696

#90212k0097 07/31/1990 ~Japanese News Agency

BANGKOK (JULY 31) KYODO - THE THAI GOVERNMENT DECIDED TUESDAY TO LIFT THE COUNTRY'S BAN ON THE IMPORTATION OF SMALL PASSENGER CARS AND LIMITATIONS ON FOREIGN AUTOS ASSEMBLED LOCALLY, A GOVERNMENT SPOKESMAN SAID.

THE IMPORT BAN ON PASSENGER CARS OF 2,300 CC OR LESS, IMPOSED SINCE 1983 TO HELP THE NATION'S FLEDGLING AUTO INDUSTRY, IS BEING LIFTED TO COPE WITH A SEVERE DOMESTIC SHORTAGE OF SUCH CARS, THE SPOKESMAN TOLD REPORTERS AFTER A WEEKLY CABINET MEETING.

THE CABINET ALSO ORDERED THE RELEVANT GOVERNMENTAL AGENCIES TO STUDY REVAMPING THE TAX STRUCTURE FOR BOTH FINISHED AUTO IMPORTS AND KNOCK-DOWN KITS ASSEMBLED LOCALLY, HE SAID.

FINISHED IMPORTS ARE CURRENTLY TAXED 400 PERCENT, WHILE THE LEVIES IMPOSED ON KITS RUN AS HIGH AS 115 PERCENT. WHEN COMBINED WITH OTHER LOCAL TAXES, THE RATE ON SUCH CARS IS AROUND 350 PERCENT.

THERE ARE CURRENTLY 12 CAR ASSEMBLY COMPANIES IN THAILAND WITH A TOTAL ANNUAL CAPACITY OF ABOUT 225,000 UNITS, INCLUDING TRUCKS.

BOOMING ECONOMIC GROWTH IN THAILAND OVER THE PAST FEW YEARS HAS BOOSTED DEMAND FOR CARS. PRICES HAVE SHOT UP AS A RESULT AND CONSUMERS HAVE TO WAIT AN AVERAGE OF SIX MONTHS FOR A NEW AUTO.

-30- 1327

#90212m0001 07/31/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 31) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei continued its slide, falling 420.53 on light volume. Since July 19, the average has fallen over 2500 points, or 7.9%. ... The FT 100 is

down 11.3. ... UAL is indicated down to 158-162 in London on news that Chemical Bank is pulling out of a consortium to fund the employee takeover. ... U.S.-made machine tools orders rose 27.2% in June from May and 9.1% from June 1989. ... The TEAMSTERS union and UNITED PARCEL SERVICE agree to extend until Aug. 10 a deadline for voting on a new contract, delaying the threat of a nationwide strike.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT issues personal income figures today. ... TREASURY SECRETARY NICHOLAS BRADY, FDIC CHAIRMAN WILLIAM SEIDMAN and OFFICE OF THRIFT SUPERVISION DIRECTOR TIMOTHY RYAN testify before the HOUSE BANKING COMMITTEE this morning on the thrift bailout.

Among the major economic reports due out later this week are single-family home sales tomorrow, leading indicators and construction spending on Wednesday, manufacturers' shipments, inventories and orders on Thursday and unemployment on Friday.

FROM THE BULLS:

"Some stocks ran up in three months what they should have done in over a year," says DONNA CALDER of OPPENHEIMER. She thinks the recent pullback is positive for the market, as does CARMINE GRIGOLI of CS FIRST BOSTON. "Investors were getting complacent," says Grigoli. "This [drop] put some fear back in them." ("BusinessWeek", 8/6)

FROM THE BEARS:

"The psyche of the market is lousy," says STEVEN A. KROLL of SHEARSON LEHMAN HUTTON ASSET MANAGEMENT. He predicts the market will tumble to below 2700 in the next three months. ("BusinessWeek", 8/6)

"If we look at some intrinsic value benchmarks and we go back just to what are average valuation levels ... we're looking at a market that could drop 25%-27% from here," says STEVE LEUTHOLD, head of THE LEUTHOLD GROUP, a Minneapolis research and portfolio management 1 partnership. "I wouldn't be sitting near the exit, I would be standing in it." ("Barron's", 7/30)

Columnist JOHN CRUDELE says last week's stock market action shows that "the change from a trader-driven stock market to a market driven by fundamentals would seem to be irreversible. And if the economy continues to weaken, that means that stock prices are likely to decline a whole lot more in the face of economic reality." ("The Washington Post", 7/29)

STOCK MARKET:

"We've got a mental markdown, partly because it's Monday and because of

what happened last Monday," says SHEARSON'S MICHAEL BENSON from London this morning where U.S. stocks are generally indcated lower on light volume. He says the support level in the Dow is 2880. Today, he looks for the Dow to be off 10-15 points at the start. "But I don't think the sellers will follow her down and we'll drift back afterwards." (FNN "World Business Update", 7/30)

"Nobody wants to be a hero and buy stock on a Friday, especially after all the negative earnings surprises we've had," says MARC CHAIKIN, president of BOMAR SECURITIES. "I think we will see the Dow begin to probe the 2850 area. The retracement rally is finished. However, I see strong support in the 2820-2850 zone and think if the market holds there, it could begin to rally in about two weeks and could move to a significant new high over 3000." ("Investor's Daily", 7/30)

The market needs longer to "remediate the bullish consensus" that developed when the Dow was challenging 3000, says EUGENE PERONI of JANNEY MONTGOMERY SCOTT. "We have to dash those ... optimistic hopes. This will take at least several weeks in a very sloppy trading range," says Peroni. He looks for the Dow to retest last Monday's intra-day low around 2850, but expects strong support there. After some base building, Peroni sees another try at 3000 by the end of the third quarter. (FNN "World Business Update", 7/30)

LASZLO BIRINYI says all of last week's 70-point decline on the Dow "came during periods of intense program [trading] activity." But he said that scenario "probably bodes well because it suggests that the real fundamentalists are not selling and that, while it looks like there is a fire, there probably isn't one. It's really just a smokescreen raised by this [program trading] activity." ("Wall Street Week", 7/27)

"We're definitely seeing more bad earnings than good ones," says MELISSA BROWN of PRUDENTIAL-BACHE. "It seems to be across the board." ("USA Today", 7/30)

"For every [earnings] disaster, you can also find a company that surprises you on the upside," says BOB CZEPIEL, portfolio manager of RCS EMERGING GROWTH FUND. (WSJ, 7/30)

Earnings surprises bother J. DAVID MILLS of THE BOSTON CO. "It's like having a land mine inside your portfolio," says Mills. "You worry where the next one will go off." ("BusinessWeek", 8/6)

MARTIN ZWEIG of the "Zweig Forecast" says he is "not nervous enough to be an outright bear because my indicators are not great, but they're not awful. What bothers me is what is not directly in my indicators, namely the economy and the negative reaction to earnings surprises the last couple of months. I've never seen so many stocks crater on earnings news.

... My guess is that the market will be lower in six months." ("Wall Street Week", 7/27 and WSJ, 7/30)

"The narrowness of the market is one of the things that caused me to become more bearish when the market couldn't get above 3000," says BYRON WEIN, managing director of MORGAN STANLEY & CO. "That's what caused me to raise some cash in the last couple of weeks and I do think that this correction will take the market down a little bit further ... but from that point, when the market begins to rally sometime late in the summer, I think you will see a much broader market." ("Wall Street Week", 7/27)

STOCK TIPS:

"It's a good time for investors to take advantage of bargain merchandise in the telecommunications industry," says ROBERT MORGENTHAU with SHEARSON ASSET MANAGEMENT. He likes GTE where the stock price declined after a recently announced merger with CONTEL. Although NYNEX is having some "near term" regulatory problems, Morgenthau believes the company has more potential than any of the other Baby Bells. (CNN "Business Day", 7/30)

"We'll sell every drug stock except three - JOHNSON & JOHNSON, GLAXO and MONSANTO," says LOU EHRENKRANTZ of EHRENKRANTZ & KING. (CNBC "Money Wheel", 7/30)

CETUS CORP., IMMUNEX CORP., SCHERING CORP. and GENENTECH all have genetically engineered drugs up for review this week by FOOD AND DRUG ADMINISTRATION advisory panels. "To my mind, it means the industry has finally arrived," says STUART WEISBROD, a biotech analyst at PRUDENTIAL-BACHE. "The industry is entering the age of commercialization. It's possible the FDA could approve 20 products in the next two years." ("The Washington Post", 7/29)

JIM McCAMANT, editor of "Medical Technology Stock Letter," likes CALGENE, CALIFORNIA BIOTECHNOLOGY and SYNERGEN. LARRY BOWMAN, manager of the FIDELITY SELECT TECHNOLOGY FUND, likes AMGEN, BIOGEN, IMMUNEX, CHIRON and CETUS. (WSJ, 7/30)

One of the Dow component stocks, 3M managed to finish last week unchanged even though the Dow was down by more than 2%. EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT says the stock has strong support in the 86-88 area and expects a strong move to above 96. Peroni likes the whole energy area and recommends SONAT for those looking to increase their energy exposure. The natural gas company has built a base in the 50-51 area and Peroni says it has upside potential of 60 on a three-to-six month basis. (FNN "World Business Update", 7/30)

"Ironically, I like a few utility stocks," says MARTIN ZWEIG. "I don't love them, but they actually did well this week." He names DETROIT EDISON

and TEXAS UTILITIES as particularly good utility performers. "I think the oils are OK too." ("Wall Street Week", 7/27)

LOUIS NAVELLIER of "MPT Review" expects the major market averages to "flop around like a fish out of water" for the next few months and says he is not optimistic for the blue chips because they don't have earnings. He does like BOEING and PROCTOR & GAMBLE, but most of his favorites are smaller stocks like SCITEX, an Israeli maker of commercial color printing equipment, and SNYOPTICS COMMUNICATIONS, a California-based over-the-counter stock. (WSJ, 7/30)

CHILI'S INC. is a favorite stock of JAY TRACEY, manager of the $101 million FOUNDERS GROWTH FUND. "They're a very, very predictable company and I think we're in a market now that wants predictable companies," says Tracey. "I wouldn't be surprised to see the stock continue rising in an environment that mercilessly punishes any mistakes, What you're buying here is steady, predictable growth." ("Barron's", 7/30)

"To the extent that the Federal Reserve stimulates more, you have tremendous upside potential" in cyclical stocks, says STEFAN ABRAMS, chief investment strategist at KIDDER, PEABODY. (WSJ, 7/30)

#90212m0002 07/31/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 31) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The overwhelming majority of the [currency] market believes we're in a recession," says ROBERT RYAN, chief foreign exchange dealer with BANK OF NEW YORK. ("Investor's Daily", 7/30)

STAN SALVIGSEN, chairman and CEO of COMSTOCK PARTNERS, favors foreign currencies as he sees the dollar tumbling. "We think the dollar may not be as strong as it was over the past several years given the fact there is so much supply of government paper coming out this Spring." ("Nightly Business Report", 7/27)

EDDIE BROWN says Federal Reserve Chairman Alan Greenspan will be "very slow" to lower interest rates. "I think he is just going to kind of stand pat. However, if it looks like the economy is weakening, I would expect him to step in." ("Wall Street Week", 7/30)

"I do not think there will be any ease in response to the GNP report," says ROBERT CHANDROSS, economist at LLOYD'S BANK PIC in New York. He says

the Fed "certainly can ignore" the GNP report Friday even though it "clearly shows weakness in the second quarter." He says that is because the Fed "believes you have to create slack in the economy." ("Investor's Daily", 7/30)

"Interest rates could stay where they are or even pull back a little because of a reduction in private sector credit demands," says BYRON WEIN, managing director of MORGAN STANLEY & CO. ("Wall Street Week", 7/27)

Friday's GNP report should "make the Fed a little more inclined to ease," says MICHAEL PENZER, an economist with BANKAMERICA. "A weak employment report could be the catalyst," says ROBERT BRUSCA, economist at NIKKO SECURITIES CO. INTERNATIONAL. However, MICHAEL ENGLUND, economist at MMS INTERNATIONAL INC., says, "We think [the Fed] will wait until near the end of the third-quarter or early in the fourth quarter." ("USA Today", 7/30)

"We'll give back some of the rally bonds just enjoyed," says ALAN LEVENSON director of financial services at WEFA GROUP. ("USA Today", 7/30)

STEVEN SLIFER of SHEARSON LEHMAN HUTTON GOVERNMENT SECURITIES says Friday's GNP numbers will give the bond market a boost. "As recently as last Thursday, the market psychology was that the supply would be a problem," says Slifer. "Now, with these new economic numbers in hand, the perception is very different." (NYT, 7/30)

"There's such a narrow spread right now, between Japanese yields and U.S. yields that the Japanese investor does not seem to be as particularly attracted to the U.S market as he once was," says DAVID MARSHALL of MMS INTERNATIONAL. Marshall thinks the Japanese are waiting to invest in Europe, "and if that's the case, we could see a bit of a plunge in the bond market this week." (FNN "World Business Update", 7/30)

THE ECONOMY:

"We have a slow-growth economy," says FEDERAL RESERVE GOVERNOR EDWARD KELLY. "It's soggy." On the other hand, he says, "Things are about where we expected them to be. There's nothing ... that ... causes any new alarm bells to go off." (Reuters, 7/27)

"I'd say we're probably not in a real recession, although we're darn close " says JAMES SOLLOWAY, chief economist at ARGUS RESEARCH. "I think the economy will continue to slog along. My fingers are crossed." ("USA Today", 7/30)

"To the three times I mentioned recession the last time we talked, I will add three more ... Recession, recession, recession," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." He says Friday's GNP numbers make him happy "because they prevent me from thinking that I'm

crazy," after he had repeatedly said the economy was weaker than statistics showed. From a business standpoint, however, he says the numbers "are a very disturbing phenomenon." (CNBC "Market Wrap-Up", 7/27)

"The economy is very weak," says ROSANNE CAHN of FIRST BOSTON. "Cyclical indicators ... are declining, but they're not declining as much as they would be in a real recession." However, she says a recession may be coming. "The question is how fast you'll get there." (FNN "Marketwrap", 7/27)

The downward revisions of the 1989 growth rate "changes perceptions about where you had been," says STEVEN SLIFER of SHEARSON LEHMAN HUTTON GOVERNMENT SECURITIES. "It seems we have slowed down in the first six months of this year, and I have difficulty seeing where we are going to get strength in the second half." (NYT, 7/30)

"The best thing that you can say about inflation is that it has returned to its trend, that even though the numbers show no decline, they show no persistent increases," says SAM KAHAN, chief economist at FUJI SECURITIES INC. in Chicago. ("Investor's Daily", 7/30)

"I think what we are going to see is sluggish economic growth with positive GNP numbers, but fairly small numbers," says EDDIE BROWN. ("Wall Street Week", 7/27)

"I think there is an increasing risk of recession early in 1991," says LAWRENCE KROHN, an economist at SHEARSON LEHMAN HUTTON. "It's really up to the Fed. If they don't ease, then they're going to be held responsible." (NYT, 7/29)

"Almost everybody is poised for a recession, but I don't think we're going to see a recession and more importantly I think we're going to see a pickup in economic strength, maybe even to the 3% level for GNP," says BYRON WEIN, managing director of MORGAN STANLEY & CO. ("Wall Street Week", 7/27)

"Consumption spending was revised down [in Friday's GNP report] as well as personal income," says KEVIN LOGAN, chief economist at SWISS BANK CORP. "And with income low, we saw that the savings rate was low. This had the effect, overall, of bringing down the growth rate." ("Nightly Business Report", 7/27)

"Real oil prices will be stable or trend downward," says ISRAELI economist ELIYAHU KANOVSKY. "Another oil shock is not in the cards. "There is no need for the West to panic." ("USA Today", 7/30)

IN WASHINGTON:

"I think we probably will have [a tax increase] but I think we will have a budget reduction at the same time and I think the effect on the credit markets could be positive and that could offset the negative effects [on the stock market] of a historical tax increase," says BYRON WEIN, managing director of MORGAN STANLEY & CO. ("Wall Street Week", 7/27)

Many critics say the federal government would save money by converting savings and loans to banks, shut down the OFFICE OF THRIFT SUPERVISION and turn the whole S&L industry over to bank regulators. "The Bush administration should never have created it [the OTS] in the first place," says S&L analyst BERT ELY of Alexandria, Va. ("USA Today", 7/30)

"You get much in excess of $500 billion for the total cost" of the S&L bailout, says FDIC Chairman WILLIAM SEIDMAN. He predicts the government will be forced to takeover an additional 400 failed thrifts, bringing the total to around 1,000. "We're closing those down every day," says Seidman. He explains that costs have continued to rise because of falling real estate values and inaccurate reports filed by the S&Ls. (Reuters, 7/30)

"We've never seen a case where a company was completely debarred from doing business with the government - a major defense firm - and I don't think we're likely to," says PAUL NISBET, referring to a Congressional threat to deny NORTHROP future government contracts. "It's a very remote possibility." "On every contract [NORTHROP] has had they have screwed up criminally, complains REP. GERRY SIKORSKI (D. - MINN). (CNBC "Business View" and "Nightly Business Report, 7/27)

#90212p0348 07/31/1990 ~PR Newswire

SEATTLE (JULY 31) PR NEWSWIRE - If ET, the famed extraterrestrial in Steven Spielberg's 1982 film of the same name, could have "phoned home," he likely would have used NASA's Program Support Communications Network.

The network, developed by Boeing Computer Support Services, not only provides long-distance telephone service to the National Aeronautics and Space Administration (NASA), it also offers data, electronic mail, facsimile message, and video and voice teleconferencing services to some 100,000 users -- terrestrial users, that is.

In addition to supporting the day-to-day activities of the space agency's 17 installations throughout the nation, the network uses both satellite and ground-based transmission facilities to serve thousands of NASA contractors, university researchers and scientists -- 24 hours a day, 365 days a year.

"It's probably the most advanced telecommunications network in the world,"

said Paul Holyoak, Boeing's manager of the Program Support Communications contract, which is one of nine finalists for NASA's 1989/90 Excellence Award for Quality and Productivity.

NASA selected Boeing Computer Support Services in late 1984 for the long-term, multimillion dollar contract to design, install, implement and operate an integrated, digital network, headquartered at the Marshall Space Flight Center in Huntsville, Ala.

Though NASA stipulated specifications for the agency-wide network, the design was created by Boeing. Using experience gained from developing and operating its own telecommunications netwerk, Holyoak said, "Boeing engineers came up with a modular design that can easily accommodate upgrades.

Holyoak pointed to video teleconferencing as just one example of a service that's been upgraded over the network's five-year life. Today, the program support communications network (PSCN) has in excess of 25 connections for video teleconferencing, linking all of the NASA centers -- from the jet propulsion laboratory in Pasadena, Calif., to Kennedy Space Center, Fla. -- and several aerospace contractors, including Boeing.

But since many of PSCN's services can be provided by common carriers, why create such a sophisticated network?

SAN DIEGO (JULY 31) PR NEWSWIRE - Magma Power Co. (NASDAQ: MGMA) today announced that The Dow Chemical Co. (NYSE: DOW) recently reacquired the shares of Magma Power previously held through its subsidiary, Destec Energy Inc., on June 1, 1990. Dow, a long-term investor in Magma, had transferred the shares to Destec about a year ago when Destec was originally formed.

In a June 1, 1990 registration filing on Schedule 13D with the Securities and Exchange Commission (SEC), Dow reported that, "Magma shares are held for investment purposes and that it believes Magma's common stock represents an attractive investment opportunity at this time."

Magma Power holds geothermal leaseholds in California and Nevada, and manages the operation of geothermal power plants in which it owns a significant interest. Magma also receives royalties, management service fees, interest and rental income from the plants and properties.

CONTACT: Wally Dieckmann, VP and controller of Magma Power Co., 619-487-9412.

ROSWELL, GA (JULY 31) PR NEWSWIRE - T2 Medical Inc. (NASDAQ-NMS: TSQM) announced record revenue and earnings today for the three- and nine-month periods ended June 30.

Revenue for the third quarter was $18,837,800, a 45 percent increase over the $12,953,900 reported for the third quarter in FY 1989. Nine month year-to-date revenue increased 70 percent over the comparable year-to-date period.

Net income for the third quarter was a record $3,862,100 compared with $2,531,600 for the third quarter in FY 1989, a 53 percent increase. Earnings per share for the three and nine months ended June 30, 1989, were $.29 and $.80 compared with $.23 and $.61 for the same periods in 1989, a 26 percent and 31 percent increase respectively.

The third quarter revenue and earnings represents the positive impact from the acquisitions of 13 T2 managed infusion therapy centers since June 1989 and IntraCare Holding Corp. completed on Feb. 7, 1990. T2 average common shares outstanding for the three months ended June 30 increased to 13,424,192 from 10,981,122 for the same period ended June 30, 1989, primarily as a result of these acquisitions.

"This growth reflects well on our continuing strategy of acquiring our managed companies," said Thomas E. Haire, chairman. The continuation of this acquisition strategy will further define T2 as an owner/operator of home infusion therapy centers.

T2 Medical Inc. is a leading provider of home infusion therapy in the United States. Infusion therapy is the administration to a patient of nutrients, antibiotics and other drugs and fluids, either intravenously or through a feeding tube. T2 Medical currently owns 39 centers and manages 43 centers in 43 cities and 22 states. T2 Medical Inc. is headquartered in Roswell, Ga.

#90212p0363 07/31/1990 ~PR Newswire

OMAHA, NE (JULY 31) PR NEWSWIRE - ValCom Inc. (NASDAQ: VLCM) -- a nationwide chain of value-added computer resellers based in Omaha -- has

signed an agreement to acquire, for cash and stock, the majority of the assets and operations of the Computer Division of The Office Works Inc., a Lancaster, Pa.-based provider of computer systems and support. The announcement was made today by ValCom President and Chief Executive Officer Bill L. Fairfield. The parties are expected to close the acquisition within two weeks.

The Office Works has separate divisions that sell office supplies and office furniture and design services, which are not being acquired by ValCom.

The purchase price is expected to be between $12 million to $14.5 million, with $1.5 million in ValCom stock and the balance in cash and assumption of liabilities. For its fiscal year ending May 30, 1990, The Office Works' Computer Division reported revenues of approximately $52 million.

The Computer Division has seven computer centers in Lancaster, Harrisburg, York and Malvern, Pa., and in Greensboro, Winston-Salem and Research Triangle Park, N.C. These locations will now operate as The Office Works Computer Center/ValCom.

Consolidation remains a growing force in the computer reseller industry, as smaller chains find it increasingly difficult to prosper in an environment of shrinking margins.

"Growth among resellers will depend on intelligent expansion through company-owned and franchised locations, and an ability to provide sophisticated products and support for which higher margins are available " said ValCom's Fairfield. "Our value-added focus is well- represented by The Office Works' Computer Division, which provides consulting to many large businesses and, through its training centers, has prepared nearly 100,000 professionals to capitalize on the latest computer technology."

The president of The Office Works Computer Center/ValCom is Norman E. Corn formerly president of The Office Works Inc. Corn came to The Office Works in 1989 after 20 years in sales and marketing-related management positions with IBM, AT&T and other computer consulting companies.

With the addition of seven new locations, ValCom now serves business customers through a nationwide network of more than 300 locations in 46 states. That network includes franchised and company-owned business computer centers, as well as other specialized providers of computer systems and support services. Major computer lines include IBM, Compaq, NEC and Epson, along with related products from Hewlett-Packard, Oracle, Novell, Ingram Micro D and others.

ValCom shares are traded over the counter under the NASDAQ symbol VLCM. For more information, contact ValCom Inc., 10810 Farnam, Omaha, NE 68154.

CONTACT: Geri Michelic of ValCom Inc., 402-392-3923, or Jim Landis of The Office Works' Computer Division, 717-397-7721, or Jim Bierfeldt of Mintz & Hoke Public Relations, 203-678-0473, for ValCom Inc.

SAN DIMAS, CALIF. (JULY 31) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) announced today that product revenues from European use of AmBisome, the company's first proprietary product rose to $673,000 and $1,045,000 for the 1990 second quarter and first half ended June 30, 1990, respectively.

Revenues from AmBisome's use in Europe were $372,000 in the 1990 first quarter and $99,000 in the 1989 fourth quarter, when commercial shipments of AmBisome commenced.

Dr. Crossley, president and chief executive officer, said, "We are very pleased by AmBisome's revenue momentum in Europe, underscoring increasing physician acceptance of this new antifungal agent."

Vestar reported that revenues for the 1990 second quarter were $0.9 million compared to $1.1 million in the 1989 second quarter. The company reported a loss of $1.7 million, or $0.27 per share, in the 1990 second quarter compared to a loss of $1.7 million, or $0.26 per share, for the 1989 second quarter.

For the 1990 first half, revenues were $1.4 million versus revenues of $2.1 million last year. The company reported a loss of $3.4 million, or $0.53 per share, for the first six months of 1990 compared to a loss of $3.5 million, or $0.54 per share, for the same period last year.

1989 second quarter and first half revenues included collaborative agreement revenues of $818,000 and $1,396,000, respectively associated with the Joint Venture with Lyphomed. 1989 results also included charges of $475,000 and $864,000 for the second quarter and first half, respectively, reflecting Vestar's equity in the net loss of the Lyphomed-Vestar Joint Venture.

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer, AIDS and related diseases. AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad spectrum, anti- infective agent used to treat potentially fatal systemic fungal infections that often occur in immune-compromised patients who have undergone cancer therapy, post-organ/bone marrow transplants and AIDS patients.

#90212p0369 07/31/1990 ~PR Newswire

TAMPA, FL (JULY 31) PR NEWSWIRE - Belmac Corporation (AMEX: BLM) of Tampa, Fla., today announced that its common stock has been approved for listing on the American Stock Exchange. The company's common stock was previously traded in the over-the-counter market and was quoted on the NASDAQ system under the symbol BEMC. Belmac is a development-stage pharmaceutical company which expects to begin marketing a hemorrhoidal treatment drug called Alphanon (R) in Western Europe, the Middle East, and East Africa late this year.

The results of a year-long, double-blind, placebo-controlled clinical test of Alphanon (R) being finalized this week in France by Dr. Rene Lambert, chief of gastroenterology of the Hospital Edouard Herriot in Lyon, supports that the drug has the ability to stop most chronic hemorrhoidal bleeding that often requires surgery to correct.

Dr. Lambert reported that Alphanon (R) completely eliminated hemorrhoidal bleeding in just seven days for more than half of the patients who received the drug. All of the patients tested suffered at least three episodes of bleeding in the two weeks prior to the tests. The study's results also indicate that Alphanon (R) stopped hemorrhoidal bleeding just as quickly in over 40 percent of patients who had at least 10 bleeding episodes in the pretreatment period.

Hemorrhoids are a common medical condition in which more than 80 percent of sufferers experience bleeding episodes of varying frequency and severity.

Dr. Jean-Francois Rossignol, president and CEO of Belmac, emphasized that Alphanon (R) "is the only known drug that is an effective treatment for hemorrhoidal bleeding." He said the Lambert test results have been submitted to the French Ministry of Health and that a detailed report on the study findings will be published soon in Europe.

Dr. Rossignol said results of the Lambert study of Alphanon (R)'s effectiveness in the treatment of hemorrhoids will be used in conjunction with planned U.S.-based testing which will be necessary to obtain Food and Drug Administration approval for over-the-counter drug sales in the United States.

The F.D.A. has already approved the active ingredient in Alphanon (R) -- 2-Camphanone -- as a safe and effective topical medication for relief of minor pain. Alphanon (R) is a clear liquid applied with a dropper. Dr. Rossignol said placement of just two drops into a patient's navel each night for 14 days is an effective treatment regime. The drug is absorbed transdermally into the bloodstream as the patient remains supine for about 10 minutes.

#90212p0370 07/31/1990 ~PR Newswire

ST. LOUIS (JULY 31) PR NEWSWIRE - Jones Medical Industries, Inc. (NASDAQ: JMED) today announced a 116-percent increase in net income on a 61-percent sales increase for the three months ended June 30, 1990, compared to the same quarter of 1989.

Net income for the three months ended June 30, 1990, rose to $540,489, or 15 cents per share, on sales of $4,659,431. This compares with income of $250,531, or 7 cents per share, on sales of $2,901,993 a year ago. Average shares outstanding were 3,588,660 this year and 3,443,550 last year.

For the six months, net income rose to $1,060,989 or 30 cents per share, on sales of $9,100,523, compared with $525,287, or 15 cents per share, on sales of $5,569,653 for the first six months of 1989. Average shares outstanding were 3,574,800 this year and 3,443,550 last year.

Chairman Dennis M. Jones stated, "The hospital sales focus we have achieved with the acquisition of Thrombinar(R), a hemostat used in surgery

to arrest bleeding, has greatly contributed to our present momentum. It is gratifying to report that at June 30, 1990, our trailing 12-month earnings rose 84 percent to $2.13 million, or 61 cents per share, compared with $1.16 million, or 33 cents per share, for the trailing 12 months ended June 30, 1989. Sales increased to $16.85 million from $11.30 million during the period.

"The real significance of these results is that all operations are contributing to our record performance including the newly established hospital sales and marketing force."

#90212p0372 07/31/1990 ~PR Newswire

CHELMSFORD, MA (JULY 31) PR NEWSWIRE - MRS Technology, Inc., the first company to develop a production lithography system specifically designed for the manufacture of color active-matrix liquid crystal displays (LCDs), today announced the sale of its Model 4500 PanelPrinter(tm) to IBM's Thomas J. Watson Research Laboratory in Yorktown Heights, N.Y. The agreement is valued at about $1.5 million, according to Griffith Resor, president of MRS Technology.

IBM (NYSE: IBM) will use the Model 4500 PanelPrinter to continue research and development of manufacturing techniques of high resolution, large area active-matrix LCDs. Active-matrix LCD technology is a new type of flat screen technology in competition with the bulky cathode ray tube (CRT) display. Active matrix displays use microelectronic thin film transistors (TFTs) to produce bright, full-color images equal to the CRT in clarity and resolution. Because these active matrix screens are flat (less than 1 inch thick) and consume little power, they are in great demand by computer manufacturers for laptop machines and workstations. Active-matrix LCD technology is also expected to have important applications in the consumer market for high definition television.

"The flat panel display industry is entering a period of very rapid growth " said Resor. "MRS Technology's products provide manufacturers with a strategic competitive advantage in producing large area active-matrix LCDs. MRS Technology is very proud that IBM selected the PanelPrinter 4500 for their active-matrix flat screen product development." The Model 4500 PanelPrinter is the only stitching aligner capable of patterning TFTs on substrates as large as 18 inches square (450mm x 450 mm). Stitching accuracy is guaranteed to be better than 1 um across the entire 25 inch diagonal substrate. The 4500 system features advanced PanelCAD(tm) software that integrates the power of a workstation with easy-to-use software for rapid set-up, calibration and job creation. The machine also features PanelSCALE(tm) automatic magnification adjustment.

MRS Technology Inc. was founded in 1986 by the developers of the first commercially successful wafer stepper system for integrated circuits. MRS

Technology has recently announced a factory expansion in order to meet the growing demand for Model 4500 PanelPrinter systems worldwide. MRS Technology markets and sells the PanelPrinter directly in the USA. Dainippon Screen Mfg. Co. distributes the PanelPrinter system in Japan. The representative for European countries is Semitec Semiconductor Equipment, GmbH. In Korea the representative is Taesan Engineering Co. Ltd.

MOUNTAIN VIEW, CALIF. (JULY 31) PR NEWSWIRE - Additional storage devices and file systems were added to the Personal IRIS(TM) product line today by Silicon Graphics Inc. (NYSE: SGI). These storage additions allow for greater storage capacity and quicker access to stored information and can be purchased as either system or option disks. The new products are available immediately and include:

- -- IRIS File(TM)
- -- 1.2 Gigabyte disk drive
- -- Exabyte Tape Drive
- -- Faster version of the 760 Mb disk drive

The IRIS File is a new user configurable shell used to hold storage devices for Silicon Graphics' Personal IRIS. In the past this cabinet was field service configured to a maximum of 1.1 Gb. Now it is user installable and will hold up to five disks (three full height and two half height) with a maximum storage capacity of up to 7.2 Gb. The range of storage available with the Personal IRIS and the IRIS File is from 200 Mb to 8.4 Gb. The list price on this file system is $1,500.

"We are constantly looking for ways to increase the useability of the Personal IRIS," said John Metcalfe, Personal IRIS marketing director. "We feel these new storage devices will enable the users to install and custom configure their system."

The 1.2 Gigabyte disk drive is the largest 5.25 inch SCSI interface drive available for the Personal IRIS today. The hard drive can be used to hold system software and applications or as an option disk to expand system capacity. The 1.2 Gb drive has a list price of $7,000.

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. The workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three

dimensional products. The company's common stock trades on the New York Stock Exchange under the symbol SGI.

IRIS is a registered trademark, and Personal IRIS and IRIS File are trademarks of Silicon Graphics Inc.

#90212p0375 07/31/1990 ~PR Newswire

BURBANK, CA (JULY 31) PR NEWSWIRE - CII Financial Inc. (NASDAQ: CIIF) registered sharply higher profits for both the second quarter and first half ended June 30, 1990.

Net income for the second quarter more than doubled to $1,577,000 from $533,000 in 1989's similar period. Primary and fully diluted earnings per share were 29 cents, up 32 percent from 22 cents per share in the comparable period last year, reflecting the 125 percent increase in the weighted average number of shares outstanding as a result of the company's successful initial public offering in March 1990.

Primary weighted average shares outstanding were 5,482,194 in the current quarter, compared with $2,435,075 during the corresponding 1989 period.

Total revenues for the quarter climbed 51 percent to $18,622,000 from $12,307,000 in the year earlier quarter.

For the first half, net income grew 143 percent to $2,561,000 from $1,055,000 in the prior year. Primary and fully diluted earnings were 55 cents per share in the first six months of 1990, up 28 percent from 43 cents per share last year on the greater number of shares outstanding in the current period.

First half revenues increased 60 percent to $35,681,000 from $22,264,000 in 1989.

Joseph G. Havlick, chairman and president, said: "Results were right on target with our expectations. The strong momentum of the company continues to gain strength. Profits continue to follow closely the expansion of our direct premiums written.

"We are in a positive, growing market niche, and we are expanding our penetration of the market. However, we are not interested in growth simply for growth's sake. We are expanding our book of business on a selective basis and continue to employ our conservative underwriting criteria. We also continue to limit the classes of business that we will write.

"A strong balance sheet underpins the company's growth. Total assets as of June 30, 1990, were $110.2 million, up 62 percent from $68.1 million at Dec. 31, 1989. Our investment portfolio primarily consists of high quality tax free municipal bonds, with no junk bonds and no equities."

CII Financial Inc. is a holding company, which is engaged in writing workers' compensation insurance in California through its wholly owned subsidiary California Indemnity Insurance Company (CIIC). CIIC, founded in 1988, has grown from the 73rd to the 29th largest writer of workers' compensation insurance in California during the last year.

CIIC services workers' compensation accounts of all size levels, but concentrates on small to medium-sized companies, those with annual premiums of less than $50,000. Based in Burbank, CIIC also serves Northern California through its Sacramento regional office. Policies are sold through a network of approximately 350 independent insurance agents and brokers in California.

UNIVERSAL CITY, CA (JULY 31) PR NEWSWIRE - MCA Inc. (NYSE: MCA) and Acclaim Entertainment, Inc. (NASDAQ: AKLM), announced today that they had agreed to a resolution of all purchase price issues arising out of Acclaim's April 20, 1990, purchase of LJN Toys, Ltd.

The settlement calls for the transfer back to MCA of specific LJN assets in exchange for the payment by MCA to Acclaim of $1,000,000 in cash and up to $2,000,000 worth of Acclaim common stock. The Acclaim stock was obtained by MCA as part of the consideration for Acclaim's purchase of LJN. In addition, MCA has agreed to share with Acclaim a portion of the proceeds from future sales of MCA's Acclaim stock, contingent upon the share price ultimately received by MCA.

As part of the settlement, Acclaim has agreed to waive certain restrictions governing the sale of the shares of Acclaim stock owned by MCA, facilitating MCA's participation in a proposed offering of Acclaim common shares to be underwritten by a syndicate managed by Salomon Brothers Inc and Bear Stearns & Co.

"We are truly pleased that our two companies succeeded in reaching an amicable settlement through negotiation instead of arbitration," said Gregory Fischbach, chairman and chief executive officer of Acclaim. "We look forward to a long and mutually beneficial relationship with

entertainment leader, MCA."

MCA Inc. is a worldwide leader in the entertainment marketplace with production and distribution of theatrical and television product, theme parks, recorded music and book publishing.

Acclaim Entertainment, Inc., is a leading publisher, marketer and distributor of home entertainment products under the Acclaim and LJN labels. These include Nintendo Entertainment software, Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. #90212p0380 07/31/1990 ~PR Newswire

DOMINGUEZ, CALIF. (JULY 31) PR NEWSWIRE - The Board of Directors of Pic 'N' Save Corp. (NASDAQ: PICN) announced implementation of a restructuring program intended to enhance stockholder value, which includes resumption of the Company's open market buying program of Pic 'N' Save stock, a commitment from the Company to aggressively explore alternatives to repurchase additional shares, a reorganization of the corporate management structure and a program designed to increase cash flow through reduced capital expenditures, significant cuts in general and administrative expenses and curtailment of non-profitable operations.

Pic 'N' Save also announced that, despite its intensive efforts over a two-and-a-half month period, to date it has received no satisfactory offers to purchase the Company. The Board emphasized that it is still willing to speak with interested parties concerning the sale of the Company.

Pic 'N' Save said that over the past several days it has been in discussions with Girard Partners, L.P. to try to find a way to avoid resumption of a proxy fight, but that Girard's demands were unacceptable to the Board.

Under the share repurchase program, Pic 'N' Save will reinstitute its previously announced $60 million share repurchase program and immediately begin open market buying of its shares subject to market conditions.

Additionally the Company is aggressively pursuing prudent senior bank debt borrowing opportunities in order to increase its repurchase program to up to $150 million. The Company has received and is pursuing a strong expression of interest from a responsible financial institution willing to provide funds for such an increased buyback, subject to customary terms and conditions, as well as due diligence by the lender.

The Company, through its subsidiaries, PNS Stores, Inc. and PNS Eastern Corp., operates a chain of 190 retail stores in the Far West, the South, and the New York Metropolitan area under several business names. The stores all specialize in new, closeout, variety general merchandise which is sold at substantial reductions from original retail prices.

SAN DIEGO (JULY 31) PR NEWSWIRE - NCR Corporation (NYSE: NCR) and Teradata Corporation (NASDAQ: TDAT) today announced the opening of a new facility in San Diego for the development of each company's parallel processing technology in general business computer systems. The opening of the facility is a milestone in the joint development agreement announced by both companies in March 1990.

The NCR/Teradata Joint Development Operation (JDO), located at 11010 Torreyana Rd., is housed in an 81,000 square-foot building which contains offices and computer laboratories. Currently, JDO employs 125 NCR and Teradata employees in roughly equal numbers. Employment at the facility is expected to reach 200 people by fourth quarter 1991.

According to William J. Eisenman, vice president of NCR's Multi-User Products Division, "Bringing together highly-talented, advanced technology specialists from both companies into a single facility will accelerate the development of our joint parallel processing projects."

Boyd Pearce, formerly vice president of Strategic Planning at Teradata, has been named general manager of the JDO.

Pearce joined Teradata in 1986 as vice president of sales. He was named vice president of Strategic Planning in 1988.

Teradata is the recognized leader in solving business problems through large-scale parallel processing systems. Parallel processing systems distribute work among multiple processors quickly and cost- effectively. This technology provides Teradata's customers with the ability to access and process the largest relational databases in the world.

Los Angeles-based Teradata is the leading supplier of high performance relational database computer systems. Teradata, with revenue in 1989 of $175 million, has approximately 1,500 employees worldwide.

NCR has been a leader in commercial UNIX(TM) systems since 1982 and was the first large computer vendor to offer a commercial UNIX-based family of computers. UNIX is one of the key components of NCR's Open, Cooperative Computing Architecture (OCCA) which is intended to provide customers with a bridge to future technologies while protecting their information system investments.

NCR, with headquarters in Dayton, Ohio, reported worldwide revenue in 1989 of $6 billion. The company develops, manufactures, markets and supports business information processing systems for worldwide markets.

UNIX is a registered trademark of AT&T.

#90212p0382 07/31/1990 ~PR Newswire

WALTHAM, MASS. (JULY 31) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) today reported revenues of $64.2 million for the second quarter ended June 30, 1990, up 37 percent from $47 million for the comparable period in 1989. Net income for the quarter was $4.7 million, up 41 percent from $3.3 million a year ago. Earnings per share were 18 cents, compared with 17 cents last year, on a 29 percent increase in average shares outstanding due principally to conversions of the company's debentures into common stock.

For the first half of the year, revenues rose 28 percent to $113.2 million compared with $88.2 million last year. Net income was $8.8 million, up 36 percent from $6.5 million in 1989. Earnings per share were 35 cents, compared with 33 cents a year ago, on a 26 percent increase in average shares outstanding.

Arvin H. Smith, president and chief executive officer, said, "With the addition of Finnigan Corporation in May, Thermo Instrument now addresses nearly on third of the $6 billion-per-year analytical instruments market in the U.S. We've also expanded our presence in Europe and Asia, so the

prospects for continued growth of revenues and net income are substantial."

Thermo Instrument Systems develops, manufactures, and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

#90212p0383 07/31/1990 ~PR Newswire

GALVA, ILL. (JULY 31) PR NEWSWIRE - EnviroTec Energy Systems, Inc. of Galva has signed a ten year, $75 million manufacturing and marketing agreement with Volcano Energy Systems of St. Hyacinthe, Quebec. The largest Canadian-owned manufacturer of boilers, Volcano will now have the right to manufacture and market EnviroTec's full range of industrial and commercial boilers throughout Canada.

EnviroTec recently developed a line of boilers, the "California Clean Air Boiler," to meet the strictest air quality standards in the United States. The new boiler technology is designed to meet the requirements of large manufacturing facilities, hospitals, schools, hotels, and other large facilities. The natural gas-fired California Clean Air Boiler is exceptionally fuel efficient and emits extremely low levels of pollutants. The nitrous oxide or NOx emissions from a California Clean Air Boiler are below 25 parts per million -- up to 50 percent less than competitive boilers.

As part of the agreement between EnviroTec and Volcano, EnviroTec will have the right to market a full range of Volcano Energy System products throughout the U.S. These products include non-polluting electrode boilers, and state-of-the-art wood, waste and biomass systems.

#90212p0386 07/31/1990 ~PR Newswire

ATLANTA (JULY 31) PR NEWSWIRE - National Data Corp. (NASDAQ: NDTA) today announced results for the fourth quarter and fiscal year ended May 31.

As shown on the attached schedules, revenue for the fourth quarter ended

May 31 was $62.3 million, a decrease of 10 percent from the same period of the prior year. The net loss from continuing operations for the quarter was $15.5 million, compared to net income of $6.2 million for the same quarter of fiscal 1989. The net loss per share from continuing operations was $1.32 compared to net income of $0.53 per share for the same quarter of the prior year. Income from continuing operations for the quarter, before non-recurring charges, reflected a loss of $1.4 million, a per-share loss of $0.12.

For the fiscal year ended May 31 revenue was $276.4 million, an increase of 22 percent compared to the same period of the prior year. Income from continuing operations for the year was $2.0 million. Earnings per share from continuing operations was $0.17 per share compared to $1.75 per share for the same period of the prior year. Net income per share was $0.26 and includes $0.09 income per share from discontinued operations which was recorded in the second quarter of fiscal 1990. Income from continuing operations for the year, before non-recurring charges, was $16.1 million, a per-share income of $1.37.

With respect to the one-time charge of $19.6 million, the company indicated that the $10.7 million restructuring portion is primarily related to the closing of its Reno, Nev. voice center. This action was taken due to the continuing trend towards electronic transactions by the credit card industry and lower-than-expected new operator services business. Also included in the restructuring charge was a write-off of equipment and the revaluation of certain investments.

The $4.5 million portion of the charge which relates to accounts receivables valuation includes an addition to the reserve for receivables and projected merchant processing losses.

Included in the total one-time charge is a $2.8 million charge due to a recommended change to the equity method of accounting for a management agreement with Medical Payment Systems Inc. (MPS), a company which processes medical insurance claims. This charge represents NDC's share of the cumulative losses of MPS since the signing of the agreement in fiscal year 1989. Under the arrangment NDC manages the company and has an option to purchase 80 percent of MPS at any time.

Also included in the one-time charge is $1.6 million based on the settlement with Braniff Airlines reached July 9. The company settled the bankruptcy claim prior to trial based on counsel's advice. The total costs, including extraordinary processing, in fiscal 1990 related to Braniff's bankruptcy were approximately $4.5 million, of which $2.9 million was expensed earlier in the year.

Whitney further stated that "while the total one-time charge is greater than we projected in May, I am satisfied that the extensive reviews that

have taken place over the past few months, have identified all of the current significant issues related to our business. We are confident that our managment team's renewed focus on the company's core businesses and the cost containment measures and controls which have been implemented during this process position NDC for future growth and profit. We expect to return to profitability in the first quarter of the current fiscal year."

HIGHLAND PARK, MICH. (JULY 31) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today announced 1990 second-quarter net earnings of $180 million, or $0.81 per common share, marking the second consecutive quarter that Chrysler's results have improved.

For the second quarter of 1990, Chrysler posted total sales and revenues of $8.85 billion.

Lee A. Iacocca, Chrysler chairman and chief executive officer, said, "Given current conditions in the U.S. market, our first-half performance was exceptional. While overall unit sales were disappointing, we were up year to year for the first six months in the basic middle, small specialty and luxury market segments. We were segment leaders in minivans, small sport utility vehicles and full-size passenger vans.

"The message is getting out that Chrysler offers strong, competitive advantages in customer satisfaction, safety and value. Consumers are giving us a look and, when they do, our quality sells itself.

"Chrysler's $1.5 billion cost-cutting program contributed significantly to first-half profitability," Iacocca said. "If not for the huge year-to-year increase in per-unit incentive costs, we would have made more money this quarter than we did in the second quarter of 1989. Factory sales were down 110,000 units from a year ago, nearly a quarter of those our discontinued Omni and Horizon models.

"We ought to get all those units back and then some with our new 1991 Sundance America and Shadow America models selling at less than $7,600," Iacocca said.

"Another real advantage for Chrysler is our $15 billion product spending

program that remains on schedule and intact. That's the Chrysler Advantage for the future. We aren't going to change that."

Net earnings for the first six months of 1990 were $251 million, or $1.13 per common share, on total sales and revenues of $16.48 billion.

Second-quarter net earnings for 1989 were $341 million, or $1.46 per common share. Net earnings for the first six months of 1989 were $692 million, or $2.96 per common share.

#90212p0393 07/31/1990 ~PR Newswire

NEW YORK (JULY 31) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) and Digital Equipment Corp. (NYSE: DEC) today announced dBASE IV for VAX VMS systems. The product is a full implementation of dBASE IV version 1.1 software, runs on VAX systems and workstations, and uses Digital's Network Application Support (NAS). NAS is Digital's open system for multivendor, distributed application integration. dBASE IV for VAX VMS will be marketed and supported worldwide by Digital and will be available in the United States in the fourth quarter 1990.

Digital and Ashton-Tate today also announced plans to develop dBASE IV for RISC ULTRIX systems. ULTRIX is Digital's implementation of the UNIX operating system. The two companies again stated their intentions to develop dBASE IV for DECwindows on both the VMS and ULTRIX operating systems and to develop a PC-based dBASE IV connectivity product for VAX Rdb/VMS.

"With today's announcement, Ashton-Tate can now offer its industry-standard dBASE IV to users of VAX VMS system, from desktop devices to the VAX 9000 mainframe," said David Proctor, vice president and general manager of Ashton-Tate's database division.

"dBASE IV for VAX VMS also delivers on Ashton-Tate's and Digital's shared vision of creating a computing environment that makes information and productivity tools readily available to all levels of users within an organization," Proctor added.

The combination of dBASE IV and Digital's NAS makes this product more than a personal productivity tool -- it becomes a tool that helps our customers run their business," said Henry Ancona, Digital's vice president of Information Systems and Applications. "With dBASE IV for VAX VMS our customers can now deploy dBASE applications as an integral part of their application and productivity needs," he added.

dBASE IV for VAX VMS is a version of Ashton-Tate's dBASE IV version 1.1 for DOS which is optimized to take advantage of the VMS environment and features, including enterprise-wide networking, multi-user and multi-tasking capabilities, virtual memory and full security. This fully-integrated 4GL (Fourth Generation Language) product combines a comprehensive data management system and flexible application development language with 4GL programming and productivity tools.

dBASE IV for VAX VMS maintains the same look and feel as the DOS version of dBASE IV 1.1. and allows existing DOS-based dBASE applications to run on VAX VMS systems with little or no modification.

dBASE IV for VAX VMS can operate as a front-end tool for VAX Rdb/VMS databases throughout the network, using the NAS SQL data access services. It can also be used as a self-contained data management system without the use of Rdb. And, through Digital's VAX to IBM connectivity products, dBASE IV for VAX VMS can also function as a front-end to IBM mainframe databases such as DB2.

PRODUCT FEATURES AND BENEFITS High Level Portability Protects Application and Training Investments:

-- dBASE application can be moved across DOS-based PC's, UNIX and VAX VMS systems without reprogramming or data conversion (except for hardware differences)
-- dBASE source files, data files and compiled object files are compatible across PCs, VAX VMS and UNIX systems so applications written in dBASE IV can be moved across these platforms without changes
-- dBASE IV provides a migration path for thousands of dBASE applications that have been written and used on DOS-based PCs
-- The migration path is transparent to preserve existing application investment while bringing the greater depth an breadth of sophisticated VAX VMS features to the workgroup dBASE environment
-- PC-based dBASE applications are enhanced by the extended features of the multi-user, multi-tasking VAX VMS system such as extended data storage and data sharing, larger memory, higher performance and greater security Distributed Solutions:
-- dBASE IV for VAX VMS systems is a part of Digital's strategy to offer industry-leading applications that take advantage of NAS, across all its desktop platforms and family of systems, including VMS, UNIX, OS/2 and MAC.
-- dBASE IV can operate as a front-end interface for VAX Rdb/VMS databases through Digital's VAX SQL Services component of NAS.
-- The product allows users to transparently use SQL commands in dBASE IV applications while maintaining data in enterprise-wide VAX/Rdb VMS storage.

-- The VAX Rdb/VMS database can be located on the same host as dBASE IV or on a remote VAX server accessed through DECnet.
-- Support for NAS Compound Document Services simplifies the sharing of information between dBASE IV and other applications throughout the network.
-- dBASE IV for VAX VMS can function as a front-end to IBM main-frame databases such as DB2 through Digital's VAX to IBM connectivity products.

4GL Tools Decrease Application Development Costs:

-- dBASE IV Design tools allow developers to quickly create such objects as screens, reports, views, pull-down and pop-up menus and sign-on banners.
-- The Automatic Code Generator produces documented code for the created objects to maximize developer productivity.
-- The Template Language permits developers to control the operation of the Automatic Code Generator in order to generate custom-tailored codes.
-- The symbolic, multi-windowed debugger and integrated program editor reduce debugging time.
-- dBASE IV Utilities such as dB-LINK and Build simplify distribution of end-user applications.

Menu-Driven Interface Minimizes Training and Support:

-- An innovative user interface streamlines data management and allows users, regardless of their computer experience, to perform many tasks without MIS support.
-- The menu-driven Control Center with its built-in design tools, lets users create tables, forms, reports, queries and labels without programming.

dBASE IV Complements Existing Corporate Databases:

-- dBASE IV complements an existing OLTP DBMS with an easy-to-use productivity tool for users who do not have extensive VAX VMS or VAX Rdb/VMS expertise.
-- dBASE IV brings the power of VAX VMS systems to more users, for more tasks, thereby, leveraging hardware investments.

Worldwide Support Network To Ensure Successful Implementation:

-- dBASE IV for VAX VMS systems was developed by Ashton-Tate with the engineering support and expertise of Digital Equipment Corporation.
-- The product will be backed by Ashton-Tate and will be supported worldwide 24 hours a day, seven days a week by Digital Equipment Corp.
-- dBASE users are backed by a worldwide network of third-party training and application development organizations.

dBASE IV for VAX VMS, with identical features as the Developer's Edition on a PC, starts at $1,295, with an introductory price of $995, for Digital single user workstations. For mid-range VAX systems like the VAX 4000, dBASE IV costs $21,000 and for the VAX 6000-410, dBASE IV is priced at

$33,000. In addition Digital offers a 4-user license for any VAX system for $4,995, with an introductory price of $4,200. dBASE IV for VAX VMS will be available in the fourth quarter 1990.

dBASE IV for VAX VMS systems will run on all VAX Systems including VAX station, MicroVAX and VAXcluster with Digital's VAX VMS version 5.2.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services.

Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

Headquartered in Torrance, Calif., Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has international operations in most countries around the world, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

#90212p0395 07/31/1990 ~PR Newswire

TORRANCE, CA (JULY 31) PR NEWSWIRE - Ashton-Tate (NASDAQ: TATE) today announced the shipment of dBASE IV version of 1.1 in English, German and French to coincide with the first customer shipment of the English product in the United States and Great Britain. This marks the first time the company has simultaneously shipped a new software product or upgrade in multiple languages.

dBASE IV version 1.1 is the latest release of Ashton-Tate's flagship database management system. The new product features major enhancements including reduced memory requirements, increased performance, Structured Query Language (SQL) improvements, simplified installation, nine new language commands, and several other new features and functions. dBASE IV version 1.1 is available in the standard DOS edition, the Developer's Edition with unlimited RunTime, and a LAN Pack version for local area network installation.

"We are delighted to ship dBASE IV version 1.1 to our customers in the U.K., France, Germany, Switzerland and Belgium at the same time that we first ship the product in the U.S.," said Bill Lyons, Ashton-Tate's

president and chief operating officer. "We believe that this announcement demonstrates our commitment to respond quickly to customer needs and market demand throughout the world," Lyons added.

"The teamwork and focused efforts of our people both in the U.S. and in Ashton-Tate's European Development Center (EDC) have been commendable," added Floyd Bradley, vice president and general manager of Ashton-Tate's European division. "Our next priority is to ship localized versions of dBASE IV version 1.1 to our Dutch, Portuguese, Spanish, Italian and Nordic customers as quickly as possible," Bradley said.

Simultaneously shipping multiple language versions of a complex software product like dBASE IV version 1.1 required coordinating and managing three major operations:

- Localization of approximately 20,000 messages. Over 1000 help screens and 100 sample files as well as full character support for sorting, decimal separation, currency symbols and country defaults.

- Translation, printing and packaging. Over 20 pieces of collateral material, including 1,200 pages of documentation, templates, labels and registration information in three languages.

- Production of 30 different packages. Production of the three versions of the product (Standard, Developer's and LAN Editions) into full systems and upgrades for English, French and German.

- Project Management Focus, Automated Testing & Resource Coordination. With an emphasis on combining strong project management with sophisticated automated testing procedures, a 20-member translation team synchronized U.S. development efforts with the translation and localization personnel, resources and systems in the U.K., Germany and France. This process included selecting and managing local translation agencies, coordinating the translation process with the local subsidiaries and interfacing daily with the EDC team leaders for documentation, software and testing assurance.

In addition to strong project management, automated testing procedures allowed the EDC team to respond quickly to changes made in the U.S. baseline as well as translate and localize the product while it was still in final development. According to Mark Lancaster, manager of the EDC, over 140,000 automated test suites were employed in the language testing of international versions of dBASE IV version 1.1 software. Close coordination and daily communication with the U.S. development team allowed the Europeans to continually upgrade the code as well as provide international testing feedback to the U.S. "Over 95 percent of our testing was automated to reduce human error," explained Lancaster. In addition, we had over 95 percent testing coverage to ensure that every message and

screen was translated with full support and sorting on all European language characters."

"We fully expect that the organization and processes we have put into place for dBASE IV version 1.1 translations will help us shorten the time frame and improve the quality of future product translations and localizations," said Lancaster. The development center is currently working on translated versions of the company's new Applause II graphics software and Multimate 4.0 word processing program.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has operations worldwide, with products available in 20 languages and in more than 50 countries.

The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

#90212p0396 07/31/1990 ~PR Newswire

FAIRFIELD, NJ (JULY 31) PR NEWSWIRE - Ogden Projects, Inc. (NYSE: OPI), the leading developer of waste-to-energy facilities in the United States, today reported a sharp increase in net income for the three months ended June 30, 1990 to $10.0 million from $8.5 million for the same period last year. For the six months, net income climbed 31 percent to $15.9 million from $12.1 million in the prior year.

Earnings per share rose year-over-year to $.27 from $.25 for the quarter and jumped 32 percent to $.45 from $.34 for the six-month period. OPI has 5.4 million additional common shares outstanding versus last year. Additionally, OPI has redeemed all of its preferred stock and has significantly reduced its debt to Ogden Corporation.

Revenues grew year-over-year to $100.1 million from $87.5 million for the quarter and to $189.0 million from $146.1 million for the six-month period.

Income before taxes increased year-over-year to $12.5 million from $10.7 million for the quarter and to $19.1 million from $14.5 million for the six-month period.

David L. Sokol, president and chief executive officer, stated that "OPI is a proven performer in the high growth waste-to-energy industry. I am proud to report that OPI's earnings continue on track with the company's

positive growth expectations".

OPI designs, builds and operates waste-to-energy facilities for municipalities under long-term contracts through its subsidiary, Ogden Martin Systems, Inc. OPI currently operates fifteen such facilities, is constructing five and has been awarded six more. OPI's waste-to-energy facilities to date have been completed within budget and ahead of schedule.

#90212p0398 07/31/1990 ~PR Newswire

TORRANCE, CA (JULY 31) PR NEWSWIRE - Ashton-Tate today announced that it shipped version 1.1 of its flagship product, dBASE IV. Available now at authorized Ashton-Tate resellers, significant enhancements made to the product include reduced memory requirements, increased performance, Structured Query Language (SQL) improvements, simplified installation, new language commands, and several other new features and functions.

"dBASE IV version 1.1 is smaller, faster and more reliable," said Bill Lyons, Ashton-Tate's president. "We have made the necessary enhancements and changes so that our customers will have a very stable product that meets their requirements."

Designed to maximize the productivity of both users and developers, dBASE IV version 1.1 is a data management system that includes two highly integrated work environments in a single package. The menu-driven Control Center, with its Design Tools, lets users manage data without having to program, while the application development environment and the dBASE language allow developers to build better applications faster without sacrificing flexibility.

"According to recent survey results, our beta testers said that we should ship version 1.1 now. But we didn't just rely on the beta testers," said Dave Proctor, Ashton-Tate's vice president and general manager for database products. "Using a suite of more than 60,000 proprietary internal tests, we performed more than 5 million automated test runs against the product. We believe it's the largest quality assurance program ever undertaken in the PC software industry."

Ashton-Tate has added a number of features to dBASE IV version 1.1 to enhance its memory management and performance capabilities.

-- Version 1.1 has a new dynamic Memory Management System (dMMS) that handles overlays more efficiently; the product requires less memory, which results in more applications space availability.

-- The product's lower memory requirements of only 450K of RAM provide improved network support because supplemental hardware memory is no longer required to support networks.

-- By speeding up areas of dBASE IV that are overlay-dependent, the new dMMS improves performance when working at the Control Center and in programs that use menus and windows.

-- Installed as an option, the integrated disk cache uses extended or expanded memory, if available, for caching data and program overlays to reduce disk access.

-- Unique to dBASE IV version 1.1, a user-defined performance tuning option enables users to balance requirements for speed against memory usage. Users can specify the percentage of available memory for applications versus the amount used for overlay swapping to tune the system to individual needs, ensuring optimal performance in each specific application.

Ashton-Tate also has improved version 1.1 with significant user interface programming language enhancements.

--Version 1.1 features improvements to dBASE IV's SQL implementation. While using SQL, users now can browse tables; run reports, labels and queries; and utilize 23 new or enhanced dBASE commands.
--A flexible new installation system makes version 1.1 easier for both beginning and experienced users to install. The program now allows the user to choose the type of installation desired from three options: Quick, Full and Menu-Driven. --Several new language commands that were recommended by dLAB (the dBASE Language Advisory Board) were added, as well as many enhancements to existing commands. The new commands include CERROR (), Keyboard, Save Screen/Restore Screen, Replace From Array, Set Cursor On/Off, Set Message To, Set Directory To and Window ().
--Other new features include the availability of conditional indexes; the lifting of restrictions on User-defined Functions (UDFs) and On commands, access to an "Organize" menu from "Browse" and "Edit" screens, an improved QBE design screen, and expanded printer support and functionality.

In addition to dBASE IV version 1.1, Ashton-Tate offers a version 1.1 developer's edition with a royalty-free unlimited RunTime distribution license, the template language source code, two extra LAN keys, and additional applications distribution tools and utilities.

Another option is the dBASE IV LAN Pack. While both dBASE IV version 1.1

and the developer's edition have built-in multiuser capabilities, the LAN Pack allows the addition of up to five users to a dBASE IV local area network installation.

In the United States, the dBASE IV version 1.1 standard edition has a suggested retail price of $795; the developer's edition sells for $1,295; and the LAN Pack retails for $995.

Registered owners of dBASE IV 1.0 can receive a free upgrade to version 1.1. Registered dBASE III PLUS owners can upgrade to dBASE IV version 1.1 for $175 and the dBASE IV version 1.1 Developer's Edition for $475. For upgrades, customers can call Ashton-Tate Customer Service at 800 2-ASHTON.

dBASE IV version 1.1 requires an IBM PC, XT, AT, PS/2 or other 100-percent compatible computer with 450K available user memory (some applications require more); a monochrome or color graphics (CGA, EGA OR VGA) monitor; a hard disk with 4.0Mb minimum available disk space; and PC-DOS OR MS-DOS 2.10 through 3.31, 4.01 or 100- percent compatible operating system.

For networking, dBASE IV version 1.1 requires PC-DOS or MS-DOS version 3.10 through 3.31, 4.01 or 100-percent compatible operating system. The product supports specific versions of Novell NetWare/ 286 and 386, 3Com 3+ IBM PC LAN and 100-percent compatible networks.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. Major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. LOS ANGELES (JULY 31) PR NEWSWIRE - Price Stern Sloan Inc. (NASDAQ: PSSP) today announced the election of Charles E. Gates as chief executive

officer. He retains his title as president.

Gates, 53, succeeds company co-founder and major shareholder L. Lawrence Sloan, 67, who remains chairman of the board.

Gates has been with Price Stern Sloan since 1972 in various senior management capacities, including chief operating officer. Prior to joining the company, he was vice president of marketing for Ballantine Books and sales manager of Grossett and Dunlap.

"Chuck Gates' election as chief executive officer reflects the significant contributions he has made to our company over the past 18 years," said Sloan. "I personally look forward to maintaining our close working relationship in the years ahead."

Price Stern Sloan publishes and distributes children's books and related audio and video cassettes, cookbooks, humor and self-help books, calendars puzzles and poster art, as well as the Questron electronic wand and books.

CONTACT: L. Lawrence Sloan of Price Stern Sloan Inc., 213-657-6100; or Craig A. Parsons of Rikind Pondel & Parsons, 213-207-9300, for Price Stern Sloan Inc.

#90212p0400 07/31/1990 ~PR Newswire

ENCINO, CALIF. (JULY 31) PR NEWSWIRE - Nu-Med Inc. (NASDAQ: NUMS) today reported improved results for the fourth quarter and fiscal year ended April 30, 1990, narrowing the losses recorded for the comparable prior year periods.

The net loss for the current fourth quarter declined to $1,918,000, equal to $.23 a share, from a net loss of $8,449,000, equal to $.97 a share, in the corresponding year earlier period. Net revenues from continuing operations totaled $67,297,000 and $74,356,000 respectively.

For the year ended April 30, 1990, Nu-Med registered a loss from continuing operations, before income taxes and extraordinary items, of $7,264,000, or $.86 a share. This compares with a loss from continuing operations for fiscal 1989, before income taxes and extraordinary items, of $27,474,000, or $3.19 a share. The net loss for fiscal 1990 was $7,264,000, or $.86 a share, and for fiscal 1989 a net loss of $10,126,000 or $1.20 a share. Net revenues from continuing operations increased to $277,960,000 from $270,626,000.

Results for fiscal 1990 include a gain of approximately $2,500,000 from the disposition of assets, but there were no tax benefits for the year. Included in the loss for the prior year was a loss of $15,658,000 from the

disposition of assets, a tax benefit of $3,320,000, earnings from discontinued operations of $6,716,000, and an extraordinary gain from the purchase of Senior Subordinated Sinking Fund Debentures.

The company said the improvement in fiscal 1990's operating results reflected increased utilization of facilities, more favorable patient mix and control of certain variable expenses. This positive trend is projected to continue, based on cost containment programs including corporate overhead, and further improvement in facilities' utilization and patient mix, the statement added.

At year-end, Nu-Med's long-term debt was reduced to $147,830,000 from $173,229,000 at the close of fiscal 1989. The company indicated that it will continue its operational and financial restructuring in order to enhance shareholder value.

Nu-Med Inc. is a nationwide health care services company, focusing its operations through its subsidiaries in the areas of acute and psychiatric care.

CONTACT: Kenneth E. Rappoport of Nu-Med Inc., 818-990-2000; or Melvyn S. Rikfind of Rifkind Pondel & Parson, 213-207-9300, for Nu-Med Inc.

#90212p0404 07/31/1990 ~PR Newswire

NEW YORK (JULY 31) PR NEWSWIRE - Telefonica de Espana, S.A. (NYSE: TEF), one of Spain's largest companies and ninth ranking telecommunications company worldwide, today reported sharply higher revenue and earnings for the six months ended June 30, 1990.

Net income climbed 28.5 percent to 42,012 million pesetas from 32,690 million pesetas for the first half of 1989 as operating revenues increased 18.6 percent to 404,655 million pesetas from 341,087 million pesetas a year earlier.

Under U.S. Generally Accepted Accounting Principles (GAAP), net income was $872.7 million equal to $2.82 per ADR (American Depository Receipts) for the six months, compared with $606.7 million or $1.98 a year earlier. This reflects the new tariff structures, which took effect from March 21, with an average increase of 7.3 percent.

In reporting these results, Telefonica said, in addition to stronger financial performance, service indicators showed improvement. Line installations continued to grow at a good pace, with reductions in applications pending and recovery in service quality.

While there was an acceleration of revenue growth, a slowdown in the

increase of operating expenses, and the recovery of earnings and cash flow growth, the company noted, there seem to be signals of a slowing in basic service demand, both in the growth rate of line requests and in usage per line growth, particularly in domestic service.

During the first six months of this year capital expenditures in fixed assets reached 290,214 million pesetas, 46.4 percent more than the already high figure for June 1989 (198,280 million pesetas).

A consortium led by Telefonica has been awarded rights to manage the Telecommunications Society in the southern area of Argentina, created by government division of its state-owned Telecommunications Company.

Telefonica International will establish, with Bell Atlantic (which has been awarded the northern area of the country) two new companies for the management and development of international advances and value added services. Participation will be equal.

Telefonica also has increased to 20 percent its participation in Entel Chile which manages long distance communications in Chile.

Directors appointed as the new managing director of Telefonica Ancochea Soto, who has served as director-general manager of administration and finances.

#90212p0410 07/31/1990 ~PR Newswire
MIAMI (JULY 31) PR NEWSWIRE - Florida Power & Light Company and the Jacksonville Electric Authority have signed a letter of intent today to purchase an 846-megawatt coal-fired electric generating unit from the Georgia Power Company for $810 million. FPL's and JEA's ownership interests in Scherer Unit 4, located in central Georgia, will be 76 percent and 24 percent, respectively.

The unit will be acquired in stages, with FPL purchasing 150 mw in 1991; 266 mw in 1993; 140 mw in 1994; and 90 mw in 1995. JEA will buy 150 mw in 1991 and 50 mw in 1995. The letter of intent also provides that FPL will purchase 300 mw of capacity beginning Nov. 1, 1990 and continuing until the first stage of the agreement is consummated.

FPL and JEA also have signed a related letter of intent providing for FPL to assume 150 mw of JEA's present power purchase contract with the operating companies of The Southern Company system simultaneously with the closing of JEA's purchase of 150 mw from Scherer Unit 4. This letter also provides for the transmission service FPL needs to bring the electricity into its service territory. Consummation of all the transactions is subject to various conditions, including the execution of definitive agreements and receipt of regulatory approvals.

James L. Broadhead, chairman and chief executive officer of FPL, said these transactions will fulfill a significant portion of FPL's need for additional generating capacity for which it had previously solicited proposals from the public.

"In addition to being the best economic alternative," he said, "the scheduling of these transactions fits nicely with FPL's needs, including the need to compensate for the scheduled 11-month outage of the two Turkey Point nuclear units beginning in November of this year."

FPL is one of the nation's largest investor-owned electric utilities and the principal subsidiary of FPL Group, Inc. (NYSE: FPL). Georgia Power Company is one of the operating companies of The Southern Company (NYSE: SO) system, an Atlanta-based electric utility holding company.

LAWRENCEVILLE, NJ (JULY 31) PR NEWSWIRE - William J. Holcombe, Imo

Industries Inc. (NYSE: IMD) chairman and chief executive officer, announced today that Robert R. Womack has been named president and chief operating officer of the company.

In these newly created positions, Womack will report to the chief executive officer.

Womack, 52, has served since 1987 as president and chief operating officer of Ranco Inc., a unit of Siebe plc. He joined that producer of electronic electrical and mechanical controls as executive vice president in 1982, and helped lead the company's growth from a revenue base of $180 million annually in 1984, to $900 million today. Previously he was a partner in the Dallas and San Francisco offices of McKinsey & Co. Inc., directing strategic management projects related to the general manufacturing, electronics, transportation, energy and utility industry, among other assignments. He joined McKinsey in 1970 after a decade with McDonnell Douglas Co.

"As a publicly held company, IMO has nearly tripled in size in the last three years to reach the billion dollar sales level; this added activity level has caused us to recognize the need to add to our management team," Holcombe said. "Bob Womack comes to IMO with an outstanding record as a business manager and most impressive experience in streamlining manufacturing operations, integrating new technologies, and setting their strategic objectives. His extensive knowledge of the several markets we serve will be especially valuable to us as we continue to expand."

With a bachelor's degree from North Carolina State University in mechanical and aeronautical engineering and a master's in systems engineering from UCLA, Womack has a strong technical background.

IMO supplies analytical and optical instruments, electronic and mechanical controls, engineered power products and their support services to industrial and defense customers worldwide.

#90212p0416 07/31/1990 ~PR Newswire

DEARBORN, MI (JULY 31) PR NEWSWIRE - Fiat Group and Ford Motor Company (NYSE: F) announced today that they have reached an agreement involving their worldwide tractor, and farm and industrial equipment operations.

A new company, to be formed, will incorporate Fiat's subsidiary FiatGeotech and Ford New Holland. Fiat will have an 80-percent majority interest. Ford will hold the remaining 20 percent and will receive a cash payment from Fiat. The agreement to form the new company is subject to

governmental approvals.

The new company intends to preserve the individual market and product identities of both FiatGeotech and Ford New Holland.

FiatGeotech is based in Italy, and has plants in Italy, Brazil, France, and the United States. FiatGeotech has over 13,000 employees and relies upon 2,300 dealers worldwide. Its revenues in 1989 reached $2.3 billion. Ford New Holland is headquartered in New Holland, Pa., and employs almost 18,000 people in plants and offices primarily in the United States, Canada, Great Britain, Belgium and Brazil. There are 3,700 Ford New Holland dealers worldwide. Revenues in 1989 were $2.8 billion.

Based on their 1989 results FiatGeotech and Ford New Holland had sales of 95,000 agricultural tractors and an additional 30,000 tractors produced in joint ventures or under license. Sales of other agricultural and industrial products totalled more than 54,000 units.

Cesare Romiti, Fiat's president and chief executive officer, said: "Our primary objective, in creating this new company, is to profit from the existing strengths of the two subsidiaries. We recognize that these two organizations, when combined, will complement each other remarkably well with a truly global presence in virtually every world market. This agreement, once again demonstrates Fiat's longstanding tradition of internationality."

Ford Motor Company's President and Chief Operating Officer Philip E. Benton Jr., said, "It is clear to us that Fiat considers agricultural and industrial equipment to be an integral part of its core business strategy and stands ready to support the new company in the continued development of best-in-class products of the highest quality." "We are confident," Benton added, "that this arrangement is in the best interests of Ford New Holland's employees, customers, dealers and suppliers."

As the majority shareholder in the new company, Fiat intends to provide substantially comparable pay and benefit packages to Ford New Holland employees and to honor existing collective bargaining agreements.

SCHAUMBURG, IL (JULY 31) PR NEWSWIRE - Motorola, Inc. (NYSE: MOT), communications sector announced today that its Motorola Wrist Watch Pager will be available in August. Orders are now being taken for this revolutionary product, which is currently being assembled in the United States for domestic and international markets.

Initially, the Wrist Watch Pager will be offered through U.S. Radio Common Carriers (RCCs), businesses which provide and operate paging services and radio networks. The device is compatible with many RCCs' existing paging systems and can be used immediately throughout the nation, including every Standard Metropolitan Statistical Area (SMSA) in the United States.

The pager is being assembled in a highly automated factory at Motorola's Paging Division in Boynton Beach, Fla. Subject to foreign regulatory

approvals, it will be available in Canada, the United Kingdom and many Pacific Rim nations by late 1990. Within two years, the pager will be marketed through traditional U.S. retail channels by Timex, the nation's leading manufacturer of wrist watches.

The Wrist Watch Pager costs less than $300, weighs approximately two ounces (60 grams) and provides a smaller, state-of-the-art option for current pager customers. At the same time, the device will appeal to many individuals who currently don't utilize paging devices.

The Wrist Watch Pager stores up to eight messages, all of which are "time stamped" to let the user known when they were received. The pager also has an automatic on/off functions so users can set the device to receive messages only during specified hours. Use of the pager automatic on/off function extends battery life.

The pager is equipped with a back-up power source and a memory that ensures no messages are lost when the unit is turned off or the battery is changed.

Capping more than a decade of engineering innovation, the Wrist Watch Pager's development was made possible by several major advances. Protected by 11 Motorola-held patents, the unit incorporates an advanced microprocessor decorder, several proprietary integrated circuits (ICs), proprietary quartz crystal technology, and new multidirectional antenna technology. The pager's two-part antenna is found in both the housing and wrist band and assures reliable reception in any position.

Motorola is one of the world's leading manufacturers of electronic equipment, systems and components. Products include pagers, two-way radios, cellular telephones and systems, semiconductors, defense and aerospace electronics, automotive electronic equipment, data communications and information processing and handling equipment.

#90212p0425 07/31/1990 ~PR Newswire

SEATTLE (JULY 31) PR NEWSWIRE - The Boeing Co. (NYSE: BA) has announced its agreement to cause its wholly-owned subsidiary ARGOSystems of Sunnyvale, Calif., to make a cash tender offer at $4.75 per share for all shares of UTL Corp. (NASDAQ: UTLC) of Dallas.

The transaction is valued at approximately $20 million. The boards of ARGOSystems and UTL have approved the transaction.

The tender offer will commence no later than Aug. 6. Upon completion of

the tender offer, the agreement calls for a merger in which the remaining UTL stockholders will also receive $4.75 in cash per share. The tender offer is subject to certain conditions including the tender of at least a majority of the outstanding UTL shares.

UTL Corp. designs, develops, manufactures and markets electronic warfare systems used for reconnaissance and surveillance. The systems provide information on the location and identification of radar and communications emitters.

Dan Pinick, president of the Boeing Defense & Space Group said, "UTL has strong electronic warfare capabilities that will expand our overall technology base and provide synergy with some of our existing military programs. For example, UTL is already a major supplier to Boeing Aerospace & Electronics for the Airborne Warning and Control System (AWACS). By including UTL in the Boeing operating structure we will significantly improve our ability to meet schedule and performance commitments to our national and international military customers."
